The Collected Letters of A. W. N. Pugin
Volume V: 1851-1852
Margaret Belcher

Key Selling Points
• A major work of scholarship
• An invaluable source for architectural and religio-historical research
• The fifth and final volume of an acclaimed edition

Summary
The importance of A. W. N. Pugin (1812-52) in architecture and design in England and beyond is incontestable. The leading architect of the Gothic Revival, Pugin is one of the most significant figures of the mid-nineteenth century and one of the greatest designers. His correspondence furnishes more insight into the man and more information about his work than any other source.

This volume, the last of five, contains letters from 1851 and the first months of 1852; after that, Pugin’s health failed and he died in September. In the great event of the period, the international exhibition held in the Crystal Palace in Hyde Park, the display of objects made to Pugin’s design, which he planned and oversaw, was an outstanding success, bringing substantial commercial benefit to his colleagues and spreading Pugin’s influence even more widely than before. The value of his judgment was recognized in his appointment to two committees in connection with the Great Exhibition. Frantic though the preparations for what came to be known as the Medieval Court were, Pugin made time to write for publication. He issued letters and pamphlets in explanation, defence, and support of the Catholic Church and its re-established hierarchy, and turned again to the conundrum that had long teased him, the relation between the faith and the form, not only architectural, in which it found expression. He completed the book on chancel screens conceived some years before. At home in The Grange at Ramsgate, he continued to design stained glass windows, for other architects as well as his own clients, and supervised the production of cartoons; he poured out designs in his usual fields of metalwork, ceramics, furniture, carving, and wallpaper, and branched out, not always happily, into new areas such as embroidery and the decoration of piano cases. The demand for drawings for Westminster, where the House of Commons was due to open early in 1852, was as incessant as ever. His last child, Edmund Peter, was born in 1851 only a few months before his first grandchild, Mildred. Both were baptized in the church of St Augustine which he was still building next to his house and where he himself was soon to be laid in the vault he provided for the purpose. The volume also includes some letters which have come to light too late for inclusion in their proper chronological places and some texts of doubtful authenticity.

Imagining New York City
Literature, Urbanism, and the Visual Arts, 1890-1940
Christoph Lindner

Key Selling Points
- Presents an impressive interdisciplinary argument about how New York from 1890 to 1940 related to and informed popular understandings of urbanite spaces.
- Draws on examples and archival material from across the fields of literature, architecture, visual art, cinema, and urban planning and design.
- Makes connections between modern New York and both the city’s colonial/pre-modern roots and its global future.

Summary
Using examples from architecture, film, literature, and the visual arts, this wide-ranging book examines the significance of New York City in the urban imaginary between 1890 and 1940. In particular, Imagining New York City considers how and why certain city spaces—such as the skyline, the sidewalk, the slum, and the subway—have come to emblematize key aspects of the modern urban condition. In so doing, Christoph Lindner also considers the ways in which cultural developments in the late nineteenth and early twentieth centuries set the stage for more recent responses to a variety of urban challenges facing the city, such as post-disaster recovery, the renewal of urban infrastructure, and the remaking of public space.

Contributor Bio
Christoph Lindner is Professor of Media and Culture at the University of Amsterdam.

Quotes
"This wonderfully rich and engaging book focuses on a transformative period in New York City's history to explore how and why it has so thoroughly captured modern urban imaginations."
--David Pinder, author of Visions of the City: Utopianism, Power and Politics in Twentieth-Century Urbanism

"An exciting and compelling book, Imagining New York City provides a major contribution to the study of cultural Modernism and urban visual culture. With a richly drawn narrative and a deft interweaving of texts and images, this is clearly a first class writer at work."
--Joseph Heathcott, Associate Professor of Urban Studies at The New School and President of the Society for American City and Regional Planning History

"Drawing on a rich array of literary, visual, and urbanistic materials, Christoph Lindner offers an intellectually playful, theoretically incisive guide to the cultural history of modern New York. Taking us up skylines and down sidewalks, Lindner makes it clear that imagining New York has been a crucial way of understanding urban modernity."
--David Scobey, author of Empire City: The Making and Meaning of the New York City Landscape

Antiquity, Theatre, and the Painting of Henry Fuseli
Andrei Pop

Key Selling Points
- Offers a reconsideration of Fuseli and neoclassicism
- Advances understanding of the theory of narrative in art
- Features an extensive range of little-known drawings and prints
- Provides two appendices which detail Fuseli’s literary engagement with antiquity

Summary
The rediscovery of Pompeii and Herculaneum in the eighteenth century challenged European assumptions about ancient life; just as influential, if quieter, was the revolution caused by translations of Greek tragedy. Art of the mid-eighteenth to early nineteenth centuries dealt with the violence and seeming irrationality of tragic action as an account of the rituals and beliefs of a foreign culture, worshipping strange gods and enacting unfamiliar customs. The result was a focus on the radical difference of the past which, however, was thought to still have something to teach us: not how to live better, but that we live differently and should allow others to do so as well. In recognizing tragedy as an alien cultural form, modern Europe recognized its own historical status as one culture among many.

Naturally, this insight was resisted. Greek tragedy was seldom performed. In painting, it lived a shadow existence alongside more didactic subject matter, emerging explicitly only in a corpus of wash drawings by Anglo-Swiss artist Henry Fuseli (1741-1825), and an international circle of artists active in Rome in the 1770s. In this volume, Pop examines Fuseli as exemplary of a pluralist classicism, paying especial attention to his experiments with moral and aesthetic conventions in the more private medium of drawing. He analyses this broad view of culture through the lens of Fuseli’s life and work; his remarkable acquaintances Emma Hamilton, Erasmus Darwin, and Mary Wollstonecraft, and the great theorists of art and morals to whom he responded, Jean-Jacques Rousseau, Johann Joachim Winckelmann, and David Hume, play prominent roles in this investigation of how antiquity became modern.

Roman Sculpture from London and the South-East
Penny Coombe, Martin Henig, Frances Grew, Kevin Hay...

Key Selling Points
- Complete catalogue of all Roman sculpture from the London and SE England region
- Every item is illustrated, some in color
- Includes an extensive analysis of architectural sculpture, in particular fragments of 3 major monuments
- Includes innovative analysis of the stone used
- Includes aliena (stones found in London but not from Roman Britain)

This catalogue of Roman sculpture from south-east England features over 200 items in museum collections.

Summary
This, the tenth fascicule in the British section of the international series Corpus Signorum Imperii Romani, concerns Roman sculpture from south-east England. Over 200 individual items are catalogued, from the counties of Kent, Surrey and Hertfordshire, as well as from Greater London.

In contrast to the rest of Britain, this region has yielded a substantial collection of marble and bronze statuary. The sculptures from the Temple of Mithras in London are notable highlights, as are the busts probably of the emperor Pertinax and his father from the villa at Lullingstone. The famous head of Hadrian from the Thames is one of only three bronze statues of that emperor from the entire Roman world. Scarcely less impressive is the limestone sculpture, which includes important funerary monuments and sarcophagi, alongside depictions of Classical and Romano-British deities. In the last of these categories, a Matronae relief with four rather than the usual three matrons, and several representations of a Hunter God are particularly intriguing.

A substantial part of the book concerns architectural sculpture, in particular fragments of three major monuments: the quadrifrons arch at Richborough, and a small arch and screen from London. The figural and floral motifs on the London monuments are analysed in detail, revealing close links with contemporary sculpture in the Rhineland.

For the first time in the British CSIR series, this fascicule contains a comprehensive study of the types and sources of the stone. Nearly every item was examined visually by an archaeological petrologist, Dr Kevin Haywood, and approaching half in thin-section. It emerges that in the early Roman period sculptors in Kent used stone quarried in northern France rather than Britain, so demonstrating the importance of cross-Channel connections in the formative years of the province of Britannia.

The Prophet of Cuernavaca
Ivan Illich and the Crisis of the West
Todd Hartch

Key Selling Points
- Offers the first biographical account of Illich in English
- Argues that there was a "Catholic Illich" different from the much beloved "secular Illich"

The first biography of Catholic priest and radical social critic Ivan Illich, who skewered the institutions of the West in the 1970s

Summary
Catholic priest and radical social critic Ivan Illich is best known for books like Deschooling Society and Medical Nemesis that skewered the dominant institutions of the West in the 1970s. Although commissioned in 1961 by American bishops to run a missionary training center in Cuernavaca, Mexico, Illich emerged as one of the major critics of the missionary movement. As he became a more controversial figure, his center evolved into CIDOC (Centro Intercultural de Documentación), an informal university that attracted a diverse group of intellectuals and seekers from around the world. They came to Illich's center to learn Spanish, to attend seminars, and to sit at the feet of Illich, whose relentless criticism of the Catholic Church and modern Western culture resonated with the revolutionary spirit of the times. His 1967 article, "The Seamy Side of Charity," a harsh attack on the American missionary effort in Latin America, and other criticisms of the Church led to a trial at the Vatican in 1968, after which he left the priesthood. Illich's writings struck at the foundations of western society, and envisioned utopian transformations in the realms of education, transportation, medicine, and economics. He was an inspiration to a generation of liberation theologians and other left-wing intellectuals.

In The Prophet of Cuernavaca Todd Hartch traces the development of Illich's ideas from his work as a priest through his later secular period, offering one of the first book-length historical treatments of his thought in English.

Contributor Bio
Todd Hartch is Professor of History, Eastern Kentucky University. He is the author of The Rebirth of Latin American Christianity.

Quotes
"Hartch captures Illich's rare intellect and passion -- as well as his Catholic faith -- without succumbing to the ideological commentary that mars so many analyses of one of Western culture's most incisive social critics. I strongly recommend this book to young readers who seek an introduction to Illich, as well as to those like me who thought they already knew him."
--Timothy Matovina, author of Latino Catholicism: Transformation in America's Largest Church

"Illich was an enigmatic Catholic figure, a polymath who saw himself as a prophet of revolution. He viewed missionaries as tools of cultural occupation, saw schooling as detrimental to real education, and the medical system as harmful to health. Along the way he denounced the Church hierarchy as a betrayal of Christ, was suitably tried for heresy only to turn the tables on his inquisitors. Yet he left a large footprint that Hartch has traced with diligence and care."
--Lamin Sanneh, author of Disciples of All Nations: Pillars of World Christianity

"Todd Hartch, a prolific analyst of religious cultures and institutions of Latin America, provides a thoroughly original and engrossing interpretation of the life of Ivan Illich, one of the region's most provocative social thinkers of the second half of the twentieth century. By focusing on Illich's priestly calling, which endured long after he abandoned his public ministry, and by decoding the often-camouflaged theological underpinnings of Illich's thought and action, Hartch provides an illuminating portrait of one of the last century's most influential, yet misunderstood, critics of western modernity and the
Catholic Church."
--Gilbert M. Joseph, Farnam Professor of History and International Studies, Yale University

The Oxford Handbook of Banking, Second Edition
Allen N. Berger, Philip Molyneux, John O.S. Wilson

Key Selling Points
- Covers all the important topics of research in banking
- Written by leading researchers in the field
- Strong policy orientation
- Extensive bibliography allows readers to identify the most important research across different topic areas.
- Coverage of banking in different parts of the world

Summary
The Oxford Handbook of Banking, Second Edition provides an overview and analysis of developments and research in banking written by leading researchers in the field. This handbook will appeal to graduate students of economics, banking and finance, academics, practitioners, regulators, and policy makers. Consequently, the book strikes a balance between abstract theory, empirical analysis, and practitioner, and policy-related material.

The Handbook is split into five parts. Part I, The Theory of Banking, examines the role of banks in the wider financial system, why banks exist, how they function, and their corporate governance and risk management practices. Part II deals with Bank Operations and Performance. A range of issues are covered including bank performance, financial innovation, and technological change. Aspects relating to small business, consumer, and mortgage lending are analysed together with securitization, shadow banking, and payment systems. Part III entitled Regulatory and Policy Perspectives discusses central banking, monetary policy transmission, market discipline, and prudential regulation and supervision. Part IV of the book covers various Macroeconomic Perspectives in Banking. This part includes a discussion of systemic risk and banking and sovereign crises, the role of the state in finance and development as well as how banks influence real economic activity. The final Part V examines International Differences in Banking Structures and Environments. This part of the Handbook examines banking systems in the United States, European Union, Japan, Africa, Transition countries, and the developing nations of Asia and Latin America.

Contributor Bio
Allen N. Berger, H. Montague Osteen, Jr., Professor in Banking and Finance, Moore School of Business, University of South Carolina; Philip Molyneux, Dean of the College of Business, Law, Education and Social Sciences, and Professor of Banking and Finance, Bangor Business School, Bangor University; John O.S. Wilson, Professor of Banking & Finance, School of Management, University of St Andrews

Allen N. Berger is the H. Montague Osteen, Jr., Professor in Banking and Finance, Moore School of Business, University of South Carolina; Senior Fellow, Wharton Financial Institutions Center; Extramural Fellow, CentER, Tilburg University; and Secretary/Treasurer, Financial Intermediation Research Society. He also currently serves on the editorial boards of six professional economics and finance journals. Professor Berger was Senior Economist from 1989 to 2008 and Economist from 1982-1989 at the Board of Governors of the Federal Reserve System. He is also past editor of the Journal of Money, Credit, and Banking, and has co-edited six special issues of various journals and the Oxford Handbook of Banking. He has published more than 100 professional articles, including papers in the Journal of Political Economy, American Economic Review, Journal of Monetary Economics, Journal of Finance, Journal of Financial Economics, and Review of Financial Studies.

Philip Molyneux is Dean of the College of Business, Law, Education and Social Sciences, and Professor of Banking and Finance at Bangor Business School, Bangor University, Wales. His main area of research is on the structure and efficiency of banking markets and he has published widely in this area, recent publications appear in the Journal of Money, Credit and Banking, Journal of Banking & Finance and the Review of Finance. In
the past has acted as a consultant to: New York Federal Reserve Bank, World Bank, European Commission, UK Treasury; Citibank Private Bank, Barclays Wealth, McKinsey, Credit Suisse and various other international banks and consulting firms.

John O. S. Wilson is Professor of Banking and Finance and Director for the Centre for Responsible Banking and Finance at the University of St Andrews, Scotland. His research interests focus on the areas of industrial organization, banking and credit unions. He is Associate Editor to the British Accounting Review, European Journal of Finance and the Journal of Money Credit and Banking and sits on the editorial boards of a number of journals including the Journal of Business Finance and Accounting and the Journal of Financial Economic Policy. In the period June 2011 to April 2012, John served as a full member of a Commission on Credit Unions established by the Irish Government.

Quotes

"The Oxford Handbook of Banking, Second Edition provides a comprehensive evaluation of the role of banking in the world economy. Many of the top experts in the world integrate theory and evidence to help inform our understanding of banking and its regulation. There is careful analysis of recent events during the financial crisis as well as the full range of historical experience. The sophisticated discussion is useful both for banking experts and novices."
Douglas W. Diamond, Merton H. Miller Distinguished Service Professor of Finance, University of Chicago Booth School of Business

"A good student of banking -- practitioner, academic or policymaker -- must understand equally well the microeconomics of financial intermediation as well as how it affects and is affected by policy and by the macroeconomy -- local and global. It is a challenge to cover both of these issues without compromising on depth and rigor. This book achieves this rare feat and will serve as a ready reference in the post-crisis world for all interest in banking."
Viral V. Acharya, C.V.Starr Professor of Economics, Department of Finance, New York University Stern School of Business

"What do banks do and how do their actions influence the economy? How do governments influence banks and what does this mean for economic risk and prosperity? If you want to know the answers to these and other questions about banking, this comprehensive book by an all-star group of scholars provides insightful answers."
Ross Levine, Willis H. Booth Chair in Banking and Finance, University of California, Berkeley

"If the recent financial crisis has taught us anything, it is that banks and other financial intermediaries are both vital to an economy’s health, as well as a source of enormous vulnerability. In this wide-ranging collection, Berger, Molyneux and Wilson bring together some of the best contemporary thinking on issues of enduring academic interest and pressing policy concern."
Jeremy Stein, Moise Y. Safra Professor of Economics, Harvard University

Value Practices in the Life Sciences and Medicine
Isabelle Dussauge, Claes-Fredrik Helgesson, Francis Lee

Key Selling Points
• A new approach to the study of values; Provides inspiration and conceptual tools for empirically examining the values at play in various practices.
• Provides an alternative framework for the empirical investigation of the ordering and displacement of values
• Represents a new turn in studying economy and science and will create interest and discussion
This book provides a compelling scholarly statement about the interrelation and pliability of values in the life sciences, medicine and health care.

Summary
Many deep concerns in the life sciences and medicine have to do with the enactment, ordering and displacement of a broad range of values. This volume articulates a pragmatist stance for the study of the making of values in society, exploring various sites within life sciences and medicine and asking how values are at play.

This means taking seriously the work scientists, regulators, analysts, professionals and publics regularly do, in order to define what counts as proper conduct in science and health care, what is economically valuable, and what is known and worth knowing.

A number of analytical and methodological means to investigate these concerns are presented. The editors introduce a way to indicate an empirically oriented research program into the enacting, ordering and displacing of values. They argue that a research programme of this kind, makes it possible to move orthogonally to the question of what values are, and thus ask how they are constituted. This rectifies some central problems that arise with approaches that depend on stabilized understandings of value. At the heart of it, such a research programme encourages the examination of how and with what means certain things come to count as valuable and desirable, how registers of value are ordered as well as displaced. It further encourages a sense that these matters could be, and sometimes simultaneously are, otherwise.

Contributor Bio
Isabelle Dussauge, Researcher, Center for Gender Research, University of Uppsala, Claes-Fredrik Helgesson, Professor, Department of Thematic Studies - Technology and Social Change, Linkoping University, Francis Lee, Assistant Professor, Department of Thematic Studies - Technology and social change, Linkoping University

Isabelle Dussauge is a researcher at the Center for Gender Research at the University of Uppsala. Her primary research interests are in the science and politics of the body, at the intersection of science and technology studies, gender studies, and the history of medicine. She has worked with visualization in medicine; the early computerization of health care; and the place of the brain in contemporary culture. She is currently concluding the research project entitled "Brain Desires", a critical inquiry into the contemporary neurosciences of sexuality and pleasure.

Claes-Fredrik Helgesson is professor in Technology and Social Change at Linkoping University, Sweden. His research interest concerns the intertwining of economic organising, science and technology. The theoretical inspiration comes primarily from economic sociology and social studies of science and technology (STS). His current project "Trials of Value" together with Francis Lee, investigates the designing of controlled medical experiments as a site where scientific, medical and economic values at play when establishing what knowledge is worth pursuing. Helgesson is co-founder and co-editor of Valuation Studies, a new open access journal, which published its first issue in spring 2013.

Francis Lee is assistant professor at the Department of Thematic Studies - Technology
and Social Change at Linköping University, Sweden. His primary research interests are in the practices, politics and technologies of knowledge. His work has dealt with the valuation of knowledge in the biosciences, epistemic standards in education, and exclusion in sociotechnical processes. He is currently studying research design as a valuation of biomedical knowledge in the project "Trials of Value" with C-F Helgesson.

Table Of Contents

Century of the Leisured Masses
Entertainment and the Transformation of Twentieth-Century America
David George Surdam

Key Selling Points
• Synthesizes the conclusions of many strands of research, including demography, economics, sociology, and history
• Examines leisure in America more comprehensively than any comparable works
• Explores historical developments of the twentieth century in the fascinating light of leisure time and activities

Century of the Leisured Masses comprehensively documents and examines the growing presence of leisure activities in Americans' lives and how this development came out throughout the twentieth century.

Summary
American living standards improved considerably between 1900 and 2000. While most observers focus on gains in per-capita income as a measure of economic well-being, economists have used other measures of well-being: height, weight, and longevity. The increased amount of leisure time per week and across people's lifetimes, however, has been an unsung aspect of the improved standard of living in America.

In Century of the Leisured Masses, David George Surdam explores the growing presence of leisure activities in Americans' lives and how this development came out throughout the twentieth century. Most Americans have gone from working fifty-five or more hours per week to working fewer than forty, although many Americans at the top rungs of the economic ladder continue to work long hours. Not only do more Americans have more time to devote to other activities, they are able to enjoy higher-quality leisure. New forms of leisure have given Americans more choices, better quality, and greater convenience. For instance, in addition to producing music themselves, they can now listen to the most talented musicians when and where they want. Television began as black and white on small screens; within fifty years, Americans had a cast of dozens of channels to choose from. They could also purchase favorite shows and movies to watch at their convenience. Even Americans with low incomes enjoyed television and other new forms of leisure.

This growth of leisure resulted from a combination of growing productivity, better health, and technology. American workers became more productive and chose to spend their improved productivity and higher wages by consuming more, taking more time off, and enjoying better working conditions. By century's end, relatively few Americans were engaged in arduous, dangerous, and stultifying occupations. The reign of tyranny on the shop floor, in retail shops, and in offices was mitigated; many Americans could even enjoy leisure activities during work hours.

Failure to consider the gains in leisure time and leisure consumption understates the gains in American living standards. With Century of the Leisured Masses, Surdam has comprehensively documented and examined the developments in this important marker of well-being throughout the past century.

Contributor Bio
David Surdam is an Associate Professor of Economics at the University of Northern Iowa. He earned his doctorate under the supervision of Nobel-Prize Winner in Economics, Robert W. Fogel. He is the author of several books and articles pertaining to the economics of professional team sports and the American Civil War. He is currently working on books examining Major League Baseball during the 1920s and a history of business ethics.

The Economy of the Word
Language, History, and Economics
Keith Tribe

Key Selling Points
- Appeals to a broad range of scholarly interests and relates to a variety of subjects including economics, history, politics, literary analysis, and history of the social sciences
- Proposes the adoption of a philological approach to the history of economic thought

In The Economy of the Word, Keith Tribe examines the historical construction of economic language.

Summary
It was only in the sixteenth century that texts began to refer to the significance of "economic activity" in sustaining life. This was not because the ordinary business of life was thought unimportant, but because the principles governing economic conduct were thought to be obvious or uncontroversial. The subsequent development of economic writing thus parallels the development of capitalism in Western Europe. From the seventeenth to the twenty-first century there has been a constant shift in content, audience, and form of argument as the literature of economic argument developed. The Economy of the Word proposes that to understand the various forms that economic literature has taken, we need to adopt a more literary approach in economics specifically, to adopt the instruments and techniques of philology. This way we can conceive the history of economic thought to be an on-going work in progress, rather than the story of the emergence of modern economic thinking. This approach demands that we pay attention to the construction of particular texts, showing the work of economic argument in different contexts. In sum, we need to pay attention to the "economy of the word".

The Economy of the Word is divided into three parts. The first explains what the term "economy" has meant from Antiquity to Modernity, coupling this conceptual history with an examination of how the idea of national income was turned into a number during the first half of the twentieth century. The second part is devoted to Adam Smith's Wealth of Nations, considering first the manner in which Smith deals with international trade, and then the way in which the book was read in the course of the nineteenth century. Part III examines the sources used by Karl Marx and Léon Walras in developing their economic analysis, drawing attention to their shared intellectual context in French political economy.

Contributor Bio
Keith Tribe, independent scholar and professional translator.

After doing his graduate work in the social and political sciences in Cambridge during the 1970s, Keith Tribe spent most of the first half of the 1980s in Germany studying the development of eighteenth-century German economics, and developing an interest in the work of Max Weber. During this period he was also a member of the Department of Economics at Keele University, where he taught until leaving university employment in 2002. Since then he has worked as a professional rowing coach and as a translator.

Investment Risk Management
H. Kent Baker, Greg Filbeck

Key Selling Points
• Surveys the latest research into managing risk in investments
• Contributors are academics at the forefront of the field and practitioners employing these risk management tactics in their own investments
All investments carry with them some degree of risk. Reduce yours.

Summary
All investments carry with them some degree of risk. In the financial world, individuals, professional money managers, financial institutions, and many others encounter and must deal with risk. Risk management is a process of determining what risks exist in an investment and then handling those risks in the best-suited way. This is important because it can reduce or augment risk depending on the goals of investors and portfolio managers.

The main purpose of Investment Risk Management is to provide an overview of developments in risk management and a synthesis of research involving these developments. The book examines ways to alter exposures through measuring and managing those exposures and provides an understanding of the latest strategies and trends within risk management. The scope of the coverage is broad and encompasses the most important aspects of investment risk management. Its 30 chapters are organized into six sections: (1) foundations of risk management, (2) types of risk, (3) quantitative assessment of risk, (4) risk and risk classes, (5) hedging risk and (6) going forward.

The book should be of particular interest to sophisticated practitioners, investors, academics, and graduate finance students. Investment Risk Management provides a fresh look at this intriguing but complex subject.

Contributor Bio
H. Kent Baker is a University Professor of Finance in the Kogod School of Business at American University. Professor Baker is an author or editor of 22 books including Investor Behavior - The Psychology of Financial Planning and Investing, Market Microstructure of Emerging and Developed Markets, Behavioral Finance - Investors, Corporations, and Markets, Portfolio Theory and Management, and Survey Research in Corporate Finance. As one of the most prolific finance academics, he has published more than 150 refereed articles in such journals as the Journal of Finance, Journal of Financial and Quantitative Analysis, Financial Management, Financial Analysts Journal, and Journal of Portfolio Management. He has consulting and training experience with more than 100 organizations. Professor Baker holds a BSBA from Georgetown University; M.Ed., MBA, and DBA degrees from the University of Maryland; and an MA, MS, and two PhDs from American University. He also holds CFA and CMA designations.

Greg Filbeck holds the Samuel P. Black III Professor of Insurance and Risk Management at Penn State Erie, the Behrend College and serves as Area Chair for Finance, Accounting, and Business Economics. He formerly served as Senior Vice-President of Kaplan Schweser and held academic appointments at Miami University (Ohio) and the University of Toledo, where he served as the Associate Director of the Center for Family Business. Professor Filbeck is an author or editor of four books and has published more than 75 refereed academic journal articles that have appeared in journals such as Financial Analysts Journal, Financial Review, and Journal of Business, Finance, and Accounting. Professor Filbeck conducts consulting and training world-wide for candidates for the Chartered Financial Analyst (CFA), Financial Risk Manager (FRM®), and Chartered Alternative Investment Adviser (CAIA®) designations as well as holding all three designations. Professor Filbeck holds a BS from Murray State University, an MS from Penn State University, and a DBA from the University of Kentucky.

Inheriting Wealth in America
Future Boom or Bust?
Edward N. Wolff

Key Selling Points
- Distills abundant data into 6 major findings on the state of inheritances in America
- Counters popular misconceptions about who benefits from inheritances and how significant these benefits are
Clearly-written and illuminating, Inheriting Wealth in America expertly distills an abundance of data on inheritances into important takeaways for all who wonder about the current state of inheritances and gifts in the United States.

Summary
Inheritances are often regarded as a societal "evil," enabling great fortunes to be passed from one generation to another, thus exacerbating wealth inequality and reducing wealth mobility. Discussions of inheritances in America bring to mind the Vanderbilts, Rockefellers, and "trust fund babies"—people who receive enough money through inheritances or gifts that they do not have any need to work during their lifetime. Though these are, of course, extreme outliers, inheritances in America have a reputation for being a way the rich keep getting richer. In Inheriting Wealth in America, Edward Wolff seeks to counter these misconceptions with data and arguments that illuminate who inherits what in the United States and what results from these wealth transfers.

Using data from the Survey of Consumer Finances—a triennial survey conducted by the Federal Reserve Board that contains detailed information on household wealth, inheritances, and gifts—as well as the Panel Study of Income Dynamics and a simulation model over years 1989 to 2010, Wolff reports six major findings on the state of inheritances in America. First, wealth transfers (inheritances and gifts) accounted for less than one quarter of household wealth. However, for persons age 75 and over, the figure was about two-fifths since they have more time to receive wealth transfers. Indirect evidence, derived from the simulation model, indicates a figure closer to two-thirds at end of life—probably the best estimate. Second, despite prognostications of a coming "inheritance boom," it has not materialized yet. Only a small (and statistically insignificant) uptick in average wealth transfers was observed over the period, and wealth transfers were actually down as a share of household wealth. Third, while wealth transfers are greater in dollar amount for richer households than poorer ones, they constitute a smaller share of the accumulated wealth of the rich. Fourth, contrary to popular belief, inheritances and gifts, on net, reduce wealth inequality rather than raising it. The rationale is that inheritances and particularly gifts typically flow from richer to poorer persons, thus lowering wealth inequality. Fifth, despite a rapid rise in income inequality, the inequality of wealth transfers shows no discernible time trend from 1989 to 2010, neither upward nor downward. Sixth, among the very wealthy, the share of wealth accounted for by wealth transfers is surprisingly low, only about a sixth, and this share has trended significantly downward over time.

It is true that inheritances and gifts are unequal, with only one fifth of families receiving wealth transfers and these transfers benefitting the rich far more than the middle class and the poor. That, however, is not the whole picture of inheritances in America. Clearly-written and illuminating, this books expertly distills an abundance of data on inheritances into important takeaways for all who wonder about the current state of inheritances and gifts in the United States.

Financial and Macroeconomic Connectedness
A Network Approach to Measurement and Monitoring
Francis X. Diebold, Kamil Yilmaz

Key Selling Points
• Offers a new approach to the study of financial and macroeconomic connectedness using simple time series techniques to obtain static and dynamic measures of financial and macroeconomic connectedness
• Proposes a new framework that can be used to uncover and analyze underlying network formation by using daily data on asset returns and their volatilities to study how shocks spread among a group of assets and markets in time
• Examines the measurement of connectedness among financial markets and/or financial institutions on a global scale, which has been a concern of policy-makers since the global financial crisis in 2008

In Financial and Macroeconomic Connectedness, Francis Diebold and Kamil Yilmaz propose several connectedness measures for financial and macroeconomic networks based on forecast error variance decompositions from approximating vector autoregressions.

Summary
Connections among different assets, asset classes, portfolios, and the stocks of individual institutions are critical in examining financial markets. Interest in financial markets implies interest in underlying macroeconomic fundamentals. In Financial and Macroeconomic Connectedness, Frank Diebold and Kamil Yilmaz propose a simple framework for defining, measuring, and monitoring connectedness, which is central to finance and macroeconomics. These measures of connectedness are theoretically rigorous yet empirically relevant.

The approach to connectedness proposed by the authors is intimately related to the familiar econometric notion of variance decomposition. The full set of variance decompositions from vector auto-regressions produces the core of the 'connectedness table.' The connectedness table makes clear how one can begin with the most disaggregated pair-wise directional connectedness measures and aggregate them in various ways to obtain total connectedness measures. The authors also show that variance decompositions define weighted, directed networks, so that these proposed connectedness measures are intimately related to key measures of connectedness used in the network literature.

After describing their methods in the first part of the book, the authors proceed to characterize daily return and volatility connectedness across major asset (stock, bond, foreign exchange and commodity) markets as well as the financial institutions within the U.S. and across countries since late 1990s. These specific measures of volatility connectedness show that stock markets played a critical role in spreading the volatility shocks from the U.S. to other countries. Furthermore, while the return connectedness across stock markets increased gradually over time the volatility connectedness measures were subject to significant jumps during major crisis events.

This book examines not only financial connectedness, but also real fundamental connectedness. In particular, the authors show that global business cycle connectedness is economically significant and time-varying, that the U.S. has disproportionately high connectedness to others, and that pairwise country connectedness is inversely related to bilateral trade surpluses.

Contributor Bio
Francis X. Diebold is Paul F. and Warren S. Miller Professor of Economics, and Professor of Finance and Statistics, at the University of Pennsylvania and its Wharton School. He has published widely in econometrics, forecasting, finance, and macroeconomics, and he has served on the editorial boards of leading journals including Econometrica, Review of Economics and Statistics, Journal of Business and Economic Statistics, Journal of Applied Econometrics, and International Economic Review. He is an NBER Faculty
Research Associate, as well as an elected Fellow of the Econometric Society, the American Statistical Association, and the International Institute of Forecasters. He has also been the recipient of Sloan, Guggenheim, and Humboldt fellowships; Co-Director of the Wharton Financial Institutions Center; and President of the Society for Financial Econometrics. His academic research is firmly linked to practical matters: During 1986-1989 he served as an economist under both Paul Volcker and Alan Greenspan at the Board of Governors of the Federal Reserve System, during 2007-2008 he served as an Executive Director of Morgan Stanley Investment Management, and during 2012-2013 he served as Chairman of the Federal Reserve System’s Model Validation Council. Diebold also lectures widely and has held visiting professorships at Princeton, Chicago, Johns Hopkins, and NYU. He has received several awards for outstanding teaching, and his academic "family" includes nearly 75 Ph.D. students.

Kamil Yilmaz holds PhD (1992) and MA (1990) degrees in Economics from the University of Maryland, College Park, and a BA degree in Economics from Bogaziçi University, Istanbul, Turkey (1987). He has been a faculty member at Koç University, Istanbul, Turkey, since 1994. He was a visiting professor at the University of Pennsylvania in 2003-2004 and 2010-2011 academic years. He is the recipient of the 2003 Turkish Academy of Sciences (TÜBA) Encouragement Award for Social Sciences; and a member of the American Economic Association, and the Econometric Society. His areas of research include financial econometrics, international economics and macroeconomics.

- Proposes a new framework that can be used to uncover and analyze underlying network formation by using daily data on asset returns and their volatilities to study how shocks spread among a group of assets and markets in time
- Examines the measurement of connectedness among financial markets and/or financial institutions on a global scale, which has been a concern of policy-makers since the global financial crisis in 2008

In Financial and Macroeconomic Connectedness, Francis Diebold and Kamil Yilmaz propose several connectedness measures for financial and macroeconomic networks based on forecast error variance decompositions from approximating vector autoregressions.

Summary
Connections among different assets, asset classes, portfolios, and the stocks of individual institutions are critical in examining financial markets. Interest in financial markets implies interest in underlying macroeconomic fundamentals. In Financial and Macroeconomic Connectedness, Frank Diebold and Kamil Yilmaz propose a simple framework for defining, measuring, and monitoring connectedness, which is central to finance and macroeconomics. These measures of connectedness are theoretically rigorous yet empirically relevant.

The approach to connectedness proposed by the authors is intimately related to the familiar econometric notion of variance decomposition. The full set of variance decompositions from vector auto-regressions produces the core of the 'connectedness table.' The connectedness table makes clear how one can begin with the most disaggregated pair-wise directional connectedness measures and aggregate them in various ways to obtain total connectedness measures. The authors also show that variance decompositions define weighted, directed networks, so that these proposed connectedness measures are intimately related to key measures of connectedness used in the network literature.

After describing their methods in the first part of the book, the authors proceed to characterize daily return and volatility connectedness across major asset (stock, bond, foreign exchange and commodity) markets as well as the financial institutions within the U.S. and across countries since late 1990s. These specific measures of volatility connectedness show that stock markets played a critical role in spreading the volatility shocks from the U.S. to other countries. Furthermore, while the return connectedness across stock markets increased gradually over time the volatility connectedness measures were subject to significant jumps during major crisis events.

This book examines not only financial connectedness, but also real fundamental connectedness. In particular, the authors show that global business cycle connectedness is economically significant and time-varying, that the U.S. has disproportionately high connectedness to others, and that pairwise country connectedness is inversely related to bilateral trade surpluses.

Contributor Bio
Francis X. Diebold is Paul F. and Warren S. Miller Professor of Economics, and Professor of Finance and Statistics, at the University of Pennsylvania and its Wharton School. He has published widely in econometrics, forecasting, finance, and macroeconomics, and he has served on the editorial boards of leading journals including Econometrica, Review of Economics and Statistics, Journal of Business and Economic Statistics, Journal of Applied Econometrics, and International Economic Review. He is an NBER Faculty Research Associate, as well as an elected Fellow of the Econometric Society, the
American Statistical Association, and the International Institute of Forecasters. He has also been the recipient of Sloan, Guggenheim, and Humboldt fellowships; Co-Director of the Wharton Financial Institutions Center; and President of the Society for Financial Econometrics. His academic research is firmly linked to practical matters: During 1986-1989 he served as an economist under both Paul Volcker and Alan Greenspan at the Board of Governors of the Federal Reserve System, during 2007-2008 he served as an Executive Director of Morgan Stanley Investment Management, and during 2012-2013 he served as Chairman of the Federal Reserve System's Model Validation Council. Diebold also lectures widely and has held visiting professorships at Princeton, Chicago, Johns Hopkins, and NYU. He has received several awards for outstanding teaching, and his academic "family" includes nearly 75 Ph.D. students.

Kamil Yilmaz holds PhD (1992) and MA (1990) degrees in Economics from the University of Maryland, College Park, and a BA degree in Economics from Bogaziçi University, Istanbul, Turkey (1987). He has been a faculty member at Koç University, Istanbul, Turkey, since 1994. He was a visiting professor at the University of Pennsylvania in 2003-2004 and 2010-2011 academic years. He is the recipient of the 2003 Turkish Academy of Sciences (TÜBA) Encouragement Award for Social Sciences; and a member of the American Economic Association, and the Econometric Society. His areas of research include financial econometrics, international economics and macroeconomics.

Fixed Income Modelling
Claus Munk

Key Selling Points
- Emphasizes the relation between fixed income models and economic theory
- Formal mathematical modelling made accessible to readers with limited mathematical training. Includes a chapter on the relevant aspects of stochastic processes and careful economic interpretations of mathematical expressions
- Each chapter includes a set of exercises making it easy for readers to test their knowledge
- In-depth coverage of general pricing principles and techniques and of the main models and securities
- Features chapters on interest rate risk management, credit risk, mortgage-backed securities, and numerical methods

Traders and analysts in the financial industry apply models based on economics, mathematics and probability theory to compute reasonable prices and risk measures for these securities.

Summary
Fixed Income Modelling offers a unified presentation of dynamic term structure models and their applications to the pricing and risk management of fixed income securities. It explains the basic fixed income securities and their properties and uses as well as the relations between those securities. The book presents and compares the classical affine models, Heath-Jarrow-Morton models, and LIBOR market models, and demonstrates how to apply those models for the pricing of various widely traded fixed income securities. It offers a balanced presentation with both formal mathematical modelling and economic intuition and understanding.

The book has a number of distinctive features including a thorough and accessible introduction to stochastic processes and the stochastic calculus needed for the modern financial modelling approach used in the book, as well as a separate chapter that explains how the term structure of interest rates relates to macro-economic variables and to what extent the concrete interest rate models are founded in general economic theory. The book focuses on the most widely used models and the main fixed income securities, instead of trying to cover all the many specialized models and the countless exotic real-life products. The in-depth explanation of the main pricing principles, techniques, and models as well as their application to the most important types of securities will enable the reader to understand and apply other models and price other securities. The book includes chapters on interest rate risk management, credit risk, mortgage-backed securities, and relevant numerical techniques. Each chapter concludes with a number of exercises of varying complexity.

Suitable for MSc students specializing in finance and economics, quantitatively oriented MBA students, and first- or second-year PhD students, this book will also be a useful reference for researchers and finance professionals and can be used in specialized courses on fixed income or broader courses on derivatives.

Contributor Bio

Claus Munk, Professor, Department of Finance, Copenhagen Business School

Claus Munk holds a PhD in Economics (1997) and an MSc in Mathematics-Economics (1993) from the University of Southern Denmark. After holding positions at the University of Southern Denmark and Aarhus University, he joined the Copenhagen Business School in 2012 as a Professor of finance. His primary research areas are asset allocation, general asset pricing theory, financial derivatives, household finance, executive compensation, and the application of numerical methods in finance. His research has been published in highly ranked journals such as Journal of Financial Economics, Management Science, Journal of Accounting Research, Journal of Banking and Finance, and Journal of Economic Dynamics and Control. He is the author of the books Fixed Income Modelling and Financial Asset Pricing Theory, both published by Oxford University Press.
Financial Asset Pricing Theory
Claus Munk

Key Selling Points

- Comprehensive and unified presentation of modern asset pricing theory. Ideal main textbook for courses where the required readings often consists of a long list of research articles with varying focus, notation, and writing style
- Covers recent developments in asset pricing research. These state-of-the-art models are likely to be the basis of future practical applications and of future theoretical advances
- A balanced presentation that offers both formal mathematical modelling and economic intuition and understanding
- Each chapter includes a set of exercises making it easy for readers to test their knowledge
- Divided into chapters according to economic concepts and theories. This enables the reader to take the intuition and simplicity from one-period and discrete-time settings to a more mathematically demanding continuous-time setting

The book presents models for the pricing of financial assets such as stocks, bonds, and options.

Summary

Financial Asset Pricing Theory offers a comprehensive overview of the classic and the current research in theoretical asset pricing. Asset pricing is developed around the concept of a state-price deflator which relates the price of any asset to its future (risky) dividends and thus incorporates how to adjust for both time and risk in asset valuation. The willingness of any utility-maximizing investor to shift consumption over time defines a state-price deflator which provides a link between optimal consumption and asset prices that leads to the Consumption-based Capital Asset Pricing Model (CCAPM). A simple version of the CCAPM cannot explain various stylized asset pricing facts, but these asset pricing 'puzzles' can be resolved by a number of recent extensions involving habit formation, recursive utility, multiple consumption goods, and long-run consumption risks. Other valuation techniques and modelling approaches (such as factor models, term structure models, risk-neutral valuation, and option pricing models) are explained and related to state-price deflators.

The book will serve as a textbook for an advanced course in theoretical financial economics in a PhD or a quantitative Master of Science program. It will also be a useful reference book for researchers and finance professionals. The presentation in the book balances formal mathematical modelling and economic intuition and understanding. Both discrete-time and continuous-time models are covered. The necessary concepts and techniques concerning stochastic processes are carefully explained in a separate chapter so that only limited previous exposure to dynamic finance models is required.

Wealth in the UK
Distribution, Accumulation, and Policy
John Hills, Francesca Bastagli, Frank Cowell, Howa...

Key Selling Points
• Comprehensive discussion of wealth inequalities
• Includes new research on the impact of house prices and inheritance
• Examines how wealth-holding affects your life chances
• Uses the latest information from a range of sources
This book looks at the gaps in wealth between the wealthy and the rest of the population, and at how they have changed over time.

Summary
This book examines key issues connected with the distribution of personal wealth in the UK. It studies why wealth is now such an important factor in social differences and public policy. It presents the most recent information on current wealth inequalities and a detailed discussion of trends in the distribution of wealth. It uses newly available data to compare wealth inequalities in the UK with the USA, Canada, and Sweden. It uses longitudinal data, which track the same people over time, to examine trajectories in wealth accumulation over the decade to 2005 and inequalities in inheritances over the same period. It looks at how parental wealth levels and people's asset-holdings early in adulthood affect outcomes later in their lives. The final part looks at the way in which policies towards wealth-holding developed historically, and the contradictory ways in which a wide range of public policies relate to people's wealth levels, including through taxation, means-testing, and the encouragement of saving, and discusses what the key issues for policy towards wealth and wealth inequalities now are.

Personal wealth in the UK totalled £5.5 trillion by 2010 (£9-10 trillion if occupational pension rights are included). Inheritance flows are now equivalent to 4 per cent of national income each year. All households in the wealthiest tenth have more than 75 times the wealth of any of those in the bottom tenth. Absolute differences in wealth levels have increased substantially over the last 15 years, so wealth differences represent many more years of income than in the past. This makes them of great importance to life chances. This makes the book highly relevant for public policy, but also for academic and student understanding of a crucial dimension of social difference.

As well as bringing together existing information on the area, the book contains considerable new analysis on wealth inequality, inheritance, and their impacts, drawing on work which is at the forefront of recent research.

John Hills, Professor of Social Policy and Director of the Centre for Analysis of Social Exclusion, London School of Economics, Francesca Bastagli, Research Fellow, Centre for Analysis of Social Exclusion, London School of Economics, Frank Cowell, Professor of Economics, London School of Economics, Howard Glennerster, Professor Emeritus, London School of Economics, Eleni Karagiannaki, Research Officer, Centre for Analysis of Social Exclusion, London School of Economics

John Hills is Professor of Social Policy and Director of the Centre for Analysis of Social Exclusion (CASE) at the London School of Economics. His research interests include income distribution and the welfare state, social security, housing and taxation. He led an independent review of the measurement of fuel poverty for the Department of Energy and Climate Change that reported in March 2012. He was also Chair of the National Equality Panel (2008-2010), carried out a review of the aims of social housing for the Secretary of State for Communities in 2006-07 and was one of the three members of the UK Pensions Commission from 2003 to 2006. He was Co-Director of the LSE's Welfare State Programme (1988-1997), and Senior Adviser to the Commission of Inquiry into Taxation, Zimbabwe (1984-86). He worked at the Institute for Fiscal Studies (1982-84), for the House of Commons Select Committee on the Treasury (1980-82), and at the Department of the Environment (1979-80).
Francesca Bastagli is Research Fellow at the Centre for Analysis of Social Exclusion, London School of Economics. Her research focuses on poverty and inequality, public policy evaluation, and international comparative social policy.

Frank Cowell is Professor of Economics, London School of Economics and Director of the Public Economics Programme, STICERD. He is editor of Economica and Associate Editor of the Journal of Economic Inequality. His research interests include income and wealth distribution, inequality and poverty, and issues in taxation. His work has appeared in several leading journals and his publications include The Economics of Poverty and Inequality (Edward Elgar, 2006), Microeconomics: Principles and Analysis (OUP, 2008), and Measuring Inequality, 3e (OUP, 2011).

Howard Glennerster is Emeritus Professor of Social Policy at the LSE and an associate member of CASE. Over 40 years, he has written widely on public expenditure and public finance in the social policy field especially. He was a contributing author to the first edition of 'The State of Welfare: The Economics of Social Spending' (OUP, 1990) and co-editor of, and contributor to, the second edition (1998). He is co-author with John Hills and Tony Travers of 'Paying for Health Education and Housing' (OUP, 2000), author of 'British Social Policy: 1945 to the Present' (Blackwells, 2007), and of 'Understanding the Finance of Welfare' published (Policy Press, 2e, 2008).

Eleni Karagiannaki is Research Officer at the Centre for Analysis of Social Exclusion, LSE.

Abigail McKnight is Senior Research Fellow at the Centre for Analysis of Social Exclusion, London School of Economics. Dr McKnight's research interests include low wage employment and labour market inequality, the distribution of wealth, asset-based welfare, evaluation of active labour market programmes, social mobility, and the economics of education.

Table Of Contents

PART I: WEALTH AND DISTRIBUTION
1. Introduction, John Hills
2. Trends in the Distribution of Wealth in Britain, John Hills and Francesca Bastagli
3. UK Wealth Inequality in International Context, Frank Cowell

PART II: PERSONAL WEALTH ACCUMULATION AND ITS IMPACTS
4. Wealth Accumulation, Ageing, and House Prices, Francesca Bastagli and John Hills
5. Inheritance, Transfers, and the Distribution of Wealth, Eleni Karagiannaki and John Hills
6. The Wealth Effect: How Parental Wealth and Own Asset-Holdings Predict Future Advantage, Abigail McKnight and Eleni Karagiannaki

PART III: WEALTH AND POLICY
7. Differing Public Policy Traditions, Howard Glennerster
9. Wealth and Policy: Where Do We Go From Here?, John Hills and Howard Glennerster

**Creating Value**
The Theory and Practice of Marketing Semiotics Research
Laura R. Oswald

**Key Selling Points**
- Engages in current debates about relationships between culture, meaning production, consumer behavior, and marketing.
- Provides a road map of semiotics-based marketing research for all aspects of the marketing mix, including brand positioning, advertising and media strategy, design, and new product development.
- Illustrates theory with examples, case studies, and illustrations based on actual business cases.
- Decode cultural myths, social networks and deep experiences consumers associate with marketing signs, spaces and rituals.

**Summary**
In global consumer culture, brands structure an economy of symbolic exchange that gives value to the meanings consumers attach to the brand name, logo, and product category. Brand meaning is not just a value added to the financial value of goods, but has material impact on financial markets themselves. Strong brands leverage consumer investments in the cultural myths, social networks, and ineffable experiences they associate with marketing signs and rituals. *Creating Value: The Theory and Practice of Marketing Semiotic Research* is a guide to managing these investments by managing the cultural codes that define value in a market or consumer segment.

The book extends the discussion beyond the basics of semiotics to post-structural debates related to ethnographic performance, multicultural consumer identity, the digitalized consumer, and heterotopic experiences of consumer space. The book invites readers to challenge the current thinking on topics ranging from cultural branding and brand rhetoric to digital media management and service site design. It also emphasizes the role of product category codes and cultural trends in the production of perceived value.

*Creating Value* explains theory in language that is accessible to academics and students, as well as research practitioners and marketers. By applying semiotics to the everyday world of the marketplace, the book makes sense of the semiotics discipline, which is often mystified by technical jargon and hair-splitting debate in the academic literature. The book also provides practitioners and professors with a practical guide to the methods used in semiotic research across the marketing mix.

**Contributor Bio**

Happiness and Economic Growth
Lessons from Developing Countries
Andrew Clark, Claudia Senik

Key Selling Points
• Contributions by the best-known researchers in happiness economics and development economics including Richard Easterlin and Martin Ravallion
• Several chapters document brand new stylized facts about well-being and economic development
• Presents new evidence on the foundations of subjective well-being in China
• Focus on the growth-happiness nexus in developing countries

Summary
This volume, arising from a PSE-CEPREMAP-DIMeco conference, includes contributions by some of the best-known researchers in happiness economics and development economics, including Richard Easterlin, who gave his name to the 'Easterlin paradox' that GDP growth does not improve happiness over the long run. Many chapters underline the difficulty of increasing well-being in developing countries, including China, even in the presence of sustained income growth. This is notably due to the importance of income comparisons to others, adaptation (so that we get used to higher income), and the growing inequality of income. In particular, rank in the local income distribution is shown to be important, creating a beggar-thy-neighbour effect in happiness. Wealth comparisons in China are exacerbated by the gender imbalance, as the competition for brides creates a striking phenomenon of conspicuous consumption on the housing market.

Policy has to be aware of these effects. This applies in particular to those who try to use self-reported subjective well-being in order to generate a 'social subjective poverty line', which is a key issue in developing countries.

However, the news is not only bad from the point of view of developing countries. One piece of good news is that GDP growth often seems to go hand-in-hand with lower happiness inequality, and thereby reduces the risk of extreme unhappiness.

Contributor Bio
Andrew Clark, CNRS Research Professor, Paris School of Economics, Claudia Senik, Professor at the University Paris-Sorbonne and at the Paris School of Economics

Andrew Clark is a CNRS Research Professor at the Paris School of Economics (PSE). He previously held posts at Dartmouth, Essex, CEPR, DELTA, the OECD, and the University of Orleans. His work has largely focussed on the interface between psychology, sociology and economics; in particular, using job and life satisfaction scores, and other psychological indices, as proxy measures of utility. The broad area is social interactions and social learning. Professor Clark is a member of the Editorial Boards of: Journal of Happiness Studies, Revue d'Economie Politique, British Journal of Industrial Relations, Review of Income and Wealth, Applied Economic Perspectives and Policy, International Review of Economics, Italian Economic Review, Evidence-based HRM, and the International Journal of Happiness and Development.

Claudia Senik is Professor at the University Paris-Sorbonne and at the Paris School of Economics. She is also member of the IZA. Her main research interest is in the Economics of Happiness. A large part of her work focuses on the relationship between income, income distribution and subjective wellbeing. She frequently appeals to a comparative approach, based on the different environments in Western versus Eastern Europe. She is in charge of several international scientific cooperation programs related to her field of research. Professor Senik is a member of the editorial board of the International Journal of Wellbeing, Associate Editor of the IZA Journal of Labor Economics, and a member of the Editorial Review Board of Applied Research in Quality of

Oxford Handbook of the Creative and Cultural Industries
Candace Jones, Mark Lorenzen, Jonathan Sapsed

Key Selling Points
- An interdisciplinary work from leading academics
- A single, reliable source on Creative Industry research
- Offers perspectives and case studies from the US, Europe, Asia and Africa
- Offers different levels of analysis - Government, city, network, organization and individual perspectives

The Oxford Handbook of Creative Industries is a reference work, bringing together many of the world's leading scholars in the application of creativity in economics, business and management, law, policy studies, organization studies and psychology.

Summary
The Oxford Handbook of Creative Industries is a reference work, bringing together many of the world's leading scholars in the application of creativity in economics, business and management, law, policy studies, organization studies and psychology. Creative industries research has become a regular theme in academic journals and conferences across these subjects and is also an important agenda for governments throughout the world, while business people from established companies and entrepreneurs revaluate and innovate their models in creative industries.

The Handbook is organized into four parts: Following the editors' introduction, Part One on Creativity includes individual creativity and how this scales up to teams, social networks, cities, and labour markets. Part Two addresses Generating and Appropriating Value from Creativity, as achieved by agents and organizations, such as entrepreneurs, stars and markets for symbolic goods, and considers how performance is measured in the creative industries.

Part Three covers the mechanics of Managing and Organizing Creative Industries, with chapters on the role of brokerage and mediation in creative industry networks, disintermediation and glocalisation due to digital technology, the management of project-based organizations in creative industries, organizing events in creative fields, project ecologies, Global Production Networks, genres and classification and sunk costs and dynamics of creative industries.

Part Four on Creative Industries, Culture and the Economy offers chapters on cultural change and entrepreneurship, on development, on copyright, economic spillovers and government policy.

This authoritative collection is the most comprehensive source of the state of knowledge in the increasingly important field of creative industries research. Covering emerging economies and new technologies, it will be of interest to scholars and students of the arts, business, innovation, and policy.

Candace Jones is an Associate Professor at the Carrol School of Management, Boston College. Her research interests focus on cultural frameworks, cultural meaning and social structures. She is currently on the editorial review boards of Organization Science, Strategic Management Journal, Journal of Management Studies and Organization Studies, where she was a Senior Editor from 2008-2012. Professor Jones was elected Division Chair for Organization and Management Division of the Academy of Management 2012-2015, and served as Representative at Large from 2008-2010.

Mark Lorenzen is a Professor at the Copenhagen Business School. He researches relations between innovation and economic organization in networks, projects, and clusters. Mark has published widely, convened sessions at DRUID, AOM, EGOS and AAG,
raised extensive research funding and received awards for research excellence. He is editor-in-chief of Industry and Innovation and editor of Routledge Studies in Industrial Dynamics. He is a member of the executive committee of the DRUID Society, is a keynote speaker and commentator and has received CBS award for excellence in research dissemination.

Dr Jonathan Sapsed is Academic Director of the Brighton Fuse project. He is a Principal Research Fellow at CENTRIM in University of Brighton's Business School and was an Innovation Fellow of the Advanced Institute of Management Research (AIM). He has researched creativity and innovation in digital creative firms in Silicon Valley in the US, UK video games developers, as well as companies such as Sun Microsystems, Ericsson, and QinetiQ. His research is published in journals such as Research Policy and Organization Studie

Table Of Contents

1. Creativity, Value, and Organization, Candace Jones, Mark Lorenzen, and Jonathan Sapsed

**Part I: Creativity**

2. The Creative Mind, Robert Sternberg and James Kaufman
3. Creativity in Teams: Processes and Outcomes in Creative Industries, Lucy Gilson
4. Creativity in Social Networks: A Core-Periphery Perspective, Gino Cattani, Simone Ferrari, and Mariachiara Colucci
6. Creativity in the City, Richard Florida, Charlotte Mellander, and Patrick Adler

**Part II: Creating and Appropriating Value from Creativity**

7. Creative Entrepreneurs: The Business Models of Haute Cuisine Chefs, Silviya Svejenova, Sonos Abdel-Gawad, and Barnara Slawich
8. Stars and Stardom in Creative Industries, Elizabeth Currid
11. User Innovation in Creative Industries, Elonora di Maria, Vladi Finotto and Francesco Rullani
13. Performance in the Creative Industries, Allegre Hadida

**Part III: Managing and Organizing Creative Industries**

14. Brokerage, Mediation, and Social Networks in the Creative Industries, Pacey Foster and Richard Ocejo
15. Digitizing Fads and Fashions - Disintermediation and Glocalised Markets in Creative Industries, Paul Hirsch and Daniel Gruber
16. Managing Project-Based Organization in Creative Industries, Robert DeFillippi
17. Organizing Events for Configuring and Maintaining Creative Fields, Elke Schussler and Jorg Sydow
18. Projects and Project Ecologies in Creative Industries, Tara Vinodrai and Sean Keddy
19. Global Production Networks in the Creative Industries, Neil Coe
20. Niche, Genre and Classification in Creative Industries, Narasimhan Anand and Gregoire Croidieu
21. Sunk Costs and the Dynamics of Creative Industries, Gerben Bakker

**Part IV: Creative Industries, Culture and the Economy**

22. Entrepreneurship in Creative Industries and Cultural Change: Art, Fashion, and Modernity in India, Mukthi Khaire
23. Creative Industries and development: Culture in Development, or the Cultures of Development?, Andy Pratt
24. Copyright, the Creative Industries and the Public Domain, Fiona Macmillan
25. Intellectual Property and its Discontents, Martin Kretschmer
26. Creative Industries, Spillovers and Economic Growth, Stuart Cunningham and Jason Potts
27. From Cultural Industries to Creative Economy Policy, Hasan Bakhshi, Stuart Cunningham and Juan Mateos-Garcia

Public Sector Entrepreneurship
U.S. Technology and Innovation Policy
Dennis Patrick Leyden, Albert N. Link

Key Selling Points
• Puts forth a new theory of entrepreneurship
• Applies theory to public sector entrepreneurship in a new, innovative way
• Contains a unique synthesis of U.S. technology and innovation policy

Public sector entrepreneurship refers to innovative public policy initiatives that generate greater economic prosperity by transforming a status quo economic environment into one more conducive to creative and innovative activities under uncertainty.

Summary
Public sector entrepreneurship refers to innovative public policy initiatives that generate greater economic prosperity. These initiatives can transform a status quo economic environment into one that is more conducive to economic units engaging in creative and innovative activities in the face of uncertainty.

Public Sector Entrepreneurship traces the historical development of the concepts of private and public sector entrepreneurship and their connection to the separate notions of risk and uncertainty. Based on a formal conceptualization of these notions, the book illustrates throughout public sector entrepreneurship in practice using examples from U.S. technology and innovation policy.

Technology policy—policy to enhance the application of new knowledge, learned through science, to some known problem—and innovation policy—policy to enhance the commercialization of a technology—are quintessential examples of the public sector recognizing and exploiting opportunities to bring about change and efficiency. Using this concept of public sector entrepreneurship as the lens to view the Bayh-Dole Act of 1980, the Stevenson-Wydler Act of 1980, the R&E Tax Credit of 1981, Small Business Innovation Development Act of 1982, the National Cooperative Research Act of 1984, and the Omnibus Trade and Competitiveness Act of 1988 affords us the ability to find elements of commonality among these policies and to discuss their impact on the U.S. economy from the perspective of entrepreneurial action.

Contributor Bio

Dennis Leyden is Associate Professor of Economics at the University of North Carolina at Greensboro (UNCG). Current research focuses on public and private sector entrepreneurship and on the role of universities in furthering such. Past research includes work on public education funding equity and accountability. His books include Adequacy, Accountability, and the Future of Public Education Funding (Springer 2005) and Government's Role in Innovation (Kluwer 1992). He is privileged to have made plenary presentations at the Universitat de Barcelona, Università di Torino, Universität Augsburg, and the United Nations Economic Commission for Europe in Geneva, Switzerland.

Albert N. Link is Professor of Economics at the University of North Carolina at Greensboro (UNCG). Professor Link’s research focuses on entrepreneurship, technology and innovation policy, the economics of R&D, and policy/program evaluation. He is currently the Editor-in-Chief of the Journal of Technology Transfer. Among his more than 40 books, some of the more recent ones are: Handbook for University Technology Transfer (University of Chicago Press, in production), Valuing an Entrepreneurial Enterprise (Oxford University Press, 2012), and Public Goods, Public Gains (Oxford University Press, 2011). His other research consists of more than 130 peer-reviewed articles in such journals as the American Economic Review, the Journal of Political Economy, and the Review of Economics and Statistics. Among other accomplishments, Professor Link was tapped by the State Department of the United States in 2007 to serve as the U.S. Representative to the United Nation’s Economic Commission for Europe (UNECE) in Geneva (2007-2012).

Moments of Valuation
Exploring Sites of Dissonance
Ariane Berthoin Antal, Michael Hutter, David Stark

Key Selling Points
- Aids understanding of processes of valuation in innovation processes
- Adds a new dimension to innovation research
- Contributes to the understanding of value generation
- Comprised of contributions from leading academics within the field
Moments of valuation can determine the success of innovations.

Summary
The outcome of innovation processes are determined by complex, historically grown valuation practices. In this book, a wide range of innovations are taken into consideration, from small inventions like entertainment novelties to large societal changes through new technologies. The chapters observe the particular local or distributed sites in which their episodes of innovation take place, and they identify the initial dissonance among those judging a newly proposed alternative. The emphasis of the inquiry, however, is on the practices of valuation that are at work when something succeeds in being "new".

The authors represent a wide variety of sub-disciplines and national backgrounds in the social sciences. They share an interest in social valuation and a pragmatist approach. The differences between their empirical evidence reflect the wide variety of appearances that valuation takes in contemporary society. They are anthropologists, economic or cultural sociologists, organization researchers, historians or political scientists. A number of chapters deals with aesthetic valuation, as in the tasting of a new vintage, or in the socio-technical process that shaped successful synthesizer sounds. Other chapters discuss the judgment processes in organizations, like architect offices or consultancy firms, and processes of evaluation and valorization in larger fields of practice, like accounting or mathematics. The studies are both of interest in their various professional fields, and contribute to a more general understanding of the social and cultural conditions under which innovations fail and succeed.

Contributor Bio
Ariane Berthoin Antal, Senior Fellow, WZB Berlin, Michael Hutter, Director, Research Unit 'Cultural Sources of Newness', WZB Berlin, David Stark, Arthur Lehman Professor Sociology & International Affairs, Columbia University

Ariane Berthoin Antal is senior fellow at the WZB Berlin Social Science Center, where she currently leads the research stream on "Artistic Interventions in Organizations" in the Research Unit "Cultural Sources of Newness." She is Distinguished Research Professor at Audencia Nantes School of Management in France and honorary professor at the Technical University of Berlin. She earned her B.A from Pomona College, her M.A from Boston University and Dr. phil from the Technical University of Berlin. She has published widely in English, French and German on business and society, organizational learning and knowledge creation, and intercultural management, including the Oxford Handbook of Organizational Learning and Knowledge (with Meinolf Dierkes, John Child and Ikujiro Nonaka). She serves on the editorial board of numerous journals, including Organization Studies, Management Learning, and Gender and Management.

Michael Hutter is research director at the WZB Berlin Social Science Center, where he heads the unit "Cultural Sources of Newness." He earned a B.A in mathematics at Portland State University, an M.A. in economics at the University of Washington in Germany and a doctorate at the University of Munich. From 1987-2008, he held the chair for economic theory at Witten/Herdecke University, and from 2008-13 he was research professor for knowledge and innovation at the Institute of Sociology at Technische Universitat Berlin. He was invited as a visiting scholar at the Rockefeller Foundation, Bellagio (2000), the School of Information Management Systems, UC Berkeley (2002), and the Getty Research Institute (2003 and 2007). His publications
include Beyond Price. Value in Economics, Culture and the Arts (co-edited with David Throsby) and The Rise of the Joyful Economy (forthcoming).

Table Of Contents

Introduction, Michael Hutter and David Stark

Part I: Varieties of aesthetic valuation
2. Moments in the Valuation of Sound: The Early History of Synthesizers, Trevor Pinch
3. Paying Attention: What is Tasting Wine About?, Antoine Hennion
4. Dissonant Translations: Artistic Sources of Innovation in Creative Industries, Michael Hutter
5. Evaluating Valuation: Connoisseurship, Technology and Art Attribution in an American Court of Law, John Brewer
6. An Evaluative Biography of Cynical Realism and Political Pop, Svetlana Kharchenkova and Olav Velthuis

Part II: Devices valorizing uncertain aesthetic experiences
7. Playing Nice, Being Mean, and the Space In Between: Book Critics and the Difficulties of Writing Bad Reviews, Phillippa Chong
8. Structures of the Tasted: Restaurant Reviews in Berlin Between 1995 and 2012, Sophie Mutzel
9. Making Things Precious: A Pragmatist Inquiry into the Valuation of Luxury Perfumes, Anne-Sophie Trebuchet-Breitwiller

Part III: Valuation in fields of practice
10. When Principles of Evaluation Clash: Assessing the Value of a Demonstration in Artificial Intelligence, Claude Rosental
11. Accounting and the Plasticity of Valuation, Andrea Mennicken and Michael Power
12. Clean and Profitable: Entangling Valuations in Environmental Entrepreneurship, Liliana Doganova and Peter Karnoe
13. Reframing Expertise: The Rise of Behavioral Insights and Interventions in Public Policy, Holger Strassheim, Arlena Jung and Rebecca-Lea Korinek

Part IV: Valuation within organizations
14. Epistemic Dissonance: Reconfiguring Valuation in Architectural Practice, Ignacio Farias
15. Sources of Newness in Organizations: Sand, Oil, Energy, and Artists, Ariane Berthoin Antal
16. Performing Worth: Shareholder Value and Management Consultancy in Post-Mao China, Kimberly Chong

Everything in Its Place
Entrepreneurship and the Strategic Management of Cities, Regions, and States
David B. Audretsch

Key Selling Points
- Argues that the economic performance of places matters just as much as firms; cities, regions, and states need to take responsibility for their own economic performance by strategically managing what is happening in their place.
- Proposes creating a new academic field analogous to the field of strategic management in business schools—the strategic management of places, which encompasses cities, regions and states.
- Provides a framework for guiding and informing policy makers, businesses, non-profit organizations, universities, private residents, and others mandated and concerned with the economic performance of their place.

Everything in Its Place weaves together theories, empirical evidence, and case studies from a broad spectrum of scholarly disciplines and combines them with insights and experiences garnered from practitioners and policy makers to provide a systematic framework for guiding and informing the strategic management of places.

Summary
Every city, region and state wants to do better---or at the very least, not do worse. Places have a strong and vigorous concern with and stake in generating a stronger economic performance. This concern spans a broad spectrum of constituents and interests, including business, labor, non-profit organizations, government, and private residents. However, such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place.

While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance---the field of strategic management in business schools---no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place. Everything in Its Place seeks to fill this intellectual void, explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places. Several academic fields have generated a number of important theories, empirical findings, and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance. Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers, these insights are integrated together in to a coherent, inclusive framework to guide and inform thought leaders and scholars in the strategic management of places.

Contributor Bio
David B. Audretsch is a Distinguished Professor and Ameritech Chair of Economic Development at Indiana University, where he is also serves as Director of the Institute for Development Strategies. He also is an Honorary Professor of Industrial Economics and Entrepreneurship at the WHU-Otto Beisheim School of Management in Germany. In addition, he serves as a Visiting Professor at the King Saud University in Saudi Arabia and is a Research Fellow of the Centre for Economic Policy Research in London.

Audretsch's research has focused on the links between entrepreneurship, government policy, innovation, economic development and global competitiveness. He is co-founder and co-editor of Small Business Economics: An Entrepreneurship Journal. He was awarded the 2001 Global Award for Entrepreneurship Research by the Swedish Foundation for Small Business Research. In 2008, he received an honorary doctorate degree from the University of Augsburg (Germany), and in September 2010 he received an honorary doctorate degree from Jönköping University (Sweden).

He is a member of the Advisory Board to a number of international research and policy
institutes, including the Deutsches Institut für Wirtschaftsforschung (German Institute for Economic Analysis) and the Swedish Entrepreneurship Forum.

The Role of Elites in Economic Development
Alice H. Amsden, Alisa DiCaprio, James A. Robinson

Key Selling Points
• Explores the relationship between elites and economic development
• Diverse country case studies: South Africa, Ghana, Cameroon, Bangladesh, China, and Brazil.
• Uses interdisciplinary methodologies

The impact elites have on growth and development exceeds their representation within a country. This book uses case studies in developing countries to measure the relationship between elites and economic development.

Summary
Elites have a disproportionate impact on development outcomes. While a country's endowments constitute the deep determinates of growth, the trajectory they follow is shaped by the actions of elites. But what factors affect whether elites use their influence for individual gain or national welfare? To what extent do they see poverty as a problem? And are their actions today constrained by institutions and norms established in the past? This volume looks at case studies from South Africa to China to seek a better understanding of the dynamics behind how elites decide to engage with economic development. Approaches include economic modelling, social surveys, theoretical analysis, and program evaluation. These different methods explore the relationship between elites and development outcomes from five angles: the participation and reaction of elites to institutional creation and change, how economic changes affect elite formation and circulation, elite perceptions of national welfare, the extent to which state capacity is part of elite self-identity, and how elites interact with non-elites.

Contributor Bio

Alice H. Amsden was Barton L. Weller Professor of Political Economy in the Department of Urban Studies and Planning at MIT. She was the author of Asia's Next Giant (OUP) and The Rise of "The Rest" (OUP). Her most recent work is A Rational Revolution: Developing from Collective Role Models, Deserting Deductive Theories. She was also appointed by the UN Secretary-General to serve on the United Nations Committee for Development Planning.

Alisa DiCaprio is a Research Fellow at United Nations University's World Institute for Development Economics Research. Prior to joining UNU-WIDER, she was a Post-Doctoral Fellow at New York University's Alexander Hamilton Center for Political Economy. In addition to her academic work, she has worked in the public and private sector supporting US trade policy, researching emerging market opportunities for exporters, and organizing unions in the healthcare sector.

James Robinson is David Florence Professor of Government at Harvard University and a faculty associate at the Institute for Quantitative Social Science. Professor Robinson studied economics at the London School of Economics, the University of Warwick, and Yale University. He previously taught in the Department of Economics at the University of Melbourne and the University of Southern California. Before moving to Harvard he was a Professor in the Departments of Economics and Political Science at the University of California at Berkeley. His main research interest is the political economy of development with a particular interest in Latin America and Sub-Saharan Africa.

Food Price Policy in an Era of Market Instability
A Political Economy Analysis
Per Pinstrup-Andersen

Key Selling Points
- Food price fluctuations are of international interest and concern
- In-depth analysis of the political economy on the basis of multi-country research
- Results from 14 developing countries as well as the US and EU
- Encompasses comparable policy responses
- Research undertaken with cooperation between Cornell University, Institute of Food and Resource Economics at the University of Copenhagen, and UNU-WIDER
- The evidence provided is important for future policy
- Relevant to the debate about how climate change affects the food supply and food security
This book analyses how and why governments responded as they did to the global food crisis of 2007-09 and what their decisions can teach us about policy interventions.

Summary
Food price volatility is one of the major challenges facing current and future global food systems. Since 2006, global food prices have fluctuated greatly around an increasing trend and price spikes were observed for key food commodities such as rice, wheat, and maize. The full or partial transmission of these global food price changes to individual developing countries, together with domestic food price changes, caused by domestic factors such as extreme weather events and market disruptions, caused governments to respond in a variety of ways. While there is ample description of the nature, content, and causes of food price fluctuations during the last 5 to 7 years, very little is known about the processes that led to policy responses or the relative power and behaviour of the participating stakeholder groups. Understanding how and why governments responded as they did is important to enhance the existing knowledge of the political economy of food price policy and to assist governments in their policy-making as they confront future food price fluctuations. This book presents results from political economy studies of food price policy in 14 developing countries as well as the United States and the European Union.

Contributor Bio
Per Pinstrup-Andersen, Graduate School Professor at Cornell University and Adjunct Professor at Copenhagen University

Per Pinstrup-Andersen is Graduate School Professor at Cornell University and Adjunct Professor at Copenhagen University. He is Chairman of the High Level Panel of Experts on Food Security (HLPE) and Vice chairman of the World Economic Forum's Council on food Security. He is past Chairman of the Science Council of the Consultative Group on International Agricultural Research (CGIAR) and Past President of the Agricultural and Applied Economics Association (AAEA). He is a fellow of the American Association for the Advancement of Science (AAAS) and the American Agricultural Economics Association. He has served as the International Food Policy Research Institute's Director General, as an economist at the International Center for Tropical Agriculture, and as distinguished professor at Wageningen University. He is the 2001 World Food Prize Laureate and the recipient of several awards for his research. His publications include more than 450 books, articles, and papers.

Energy Poverty
Global Challenges and Local Solutions
Antoine Halff, Benjamin K. Sovacool, Jon Rozhon

Key Selling Points
• A one-stop treatment of energy poverty, an issue whose pivotal role in the fight for human development and against poverty is only now being recognised
• A practical guide and reference work for policymakers and practitioners in the field
• Provides a fresh perspective on tomorrow's energy challenges
• Brings together diverse viewpoints and includes contributions from experts and practitioners from all over the world, including China, India, Brazil, sub-Saharan Africa, and the Middle East
• Includes chapters from authors at the cutting edge of research: Fatih Birol, chief economist of the International Energy Agency, Han Wenke, head of China's Energy Research Institute, Nigel Bruce of the World Health Organisation, and Jason Bordoff, former senior advisor on energy to President Barack Obama

Summary
This edited volume looks at energy poverty, an issue whose pivotal role in the fight for human development is only now being recognised by policymakers. Nearly one quarter of humanity still lacks access to electricity. Close to one third rely on traditional fuels like firewood and cow dung for cooking, at great cost to their health and welfare. While most prevalent in parts of Africa and Asia, energy poverty is a global problem which concerns us all. This book, which brings together economists, policymakers, entrepreneurs, and other practitioners from all over the world, is dedicated to a single goal: finding a solution to this haunting problem. It is part history, part economics, part political analysis, part business case review, and part field handbook. Part One focuses on defining and measuring the problem and benchmarking progress in solving it, an obvious prerequisite to any successful energy-access policy. Part Two reviews past and current energy access programs, with an eye towards finding out what worked and what didn't and what can be replicated elsewhere. These case reviews are told as seen on the ground - China's experience by top Chinese officials and Africa's by African regulators and scholars. Based in part on those cases, the book's last, more forward-looking section aims to present practitioners with a tool kit, a menu of options to speed up their efforts. The energy access agenda is gaining traction at a time of rising concerns about climate change and resource constraints. This book shows that bringing modern energy to those who lack it not just a moral imperative, but will likely benefit the world as a whole without harming the environment or unduly stretching finite resources.

Contributor Bio
Antoine Halff, Head of the Oil Industry and Markets Division, International Energy Agency, Benjamin K. Sovacool, Professor of Business and Social Sciences, Aarhus University; Director of the Center for Energy Technology, AU-Herning; Associate Professor of Law, Vermont Law School, Jon Rozhon, Senior Researcher, Canadian Energy Research Institute; President, Oak Leaf Energy Training

Antoine Halff is a senior official of the International Energy Agency, the head of its oil unit, and the editor of its authoritative monthly publication, the Oil Market Report. He has spent the last 20 years of his career focusing on energy issues in a series of positions spanning the worlds of government, finance, consulting, higher education, and the media, including New York bureau chief of famed newsletter Petroleum Intelligence Weekly, director of global energy for political-risk consultancy Eurasia Group, deputy head of research at Newedge, one of the world's top brokerages, and lead economist with the US Department of Energy's research arm, the Energy Information Administration. He has also taught courses on the Geopolitics of Energy and related topics at Columbia University's School of International and Public Affairs. He was born and educated in Paris and has lived and worked in Paris, Seoul, New York, and Washington, DC.
Jon Rozhon is Senior Researcher at the Canadian Energy Research Institute (CERI) and President of Oak Leaf Energy Training. He is Editor-in-Chief of the CERI journal, Geopolitics of Energy and author of numerous studies in areas as diverse as electric power, energy investment, and natural gas vehicles. He was Lecturer in English at the Gifu University for Foreign Languages for 15 years and has spent the past six years at CERI. In 2010, he started Oak Leaf Energy Training, which has provided training for over 100 corporations and government agencies. He holds an MA in English from Lakehead University and an MBA from McGill.

Benjamin K. Sovacool is Director of the Danish Center for Energy Technology at AU-Herning and a Professor of Business and Social Sciences at Aarhus University. He is also Associate Professor of Law at Vermont Law School and Director of the Energy Security and Justice Program at their Institute for Energy and the Environment, as well as the Editor-in-Chief of the journal Energy Research and Social Science. He works as a researcher and consultant on renewable energy and energy efficiency, the politics of large-scale energy infrastructure, designing public policy to improve energy security and access to electricity, and building adaptive capacity to the consequences of climate change. He is a Contributing Author to the Intergovernmental Panel on Climate Change's (IPCC) forthcoming Fifth Assessment (AR5). He has consulted for the Asian Development Bank, United Nations Development Program, and United Nations Economic and Social Commission for Asia and the Pacific.

Quotes

"Energy Poverty brings new thinking to an old problem, and is a must-read for anyone serious about creating meaningful solutions to end poverty."
--President Bill Clinton

"At long last, Energy is receiving the attention it deserves as a key factor in Poverty Alleviation. This means that key concerns in our quest for Sustainable Development, climate, population, environment and health have finally been brought together. Energy Poverty; Global issues, Local Solutions is an excellent resource for the thoughtful analyst and political leader when addressing these crucial challenges for a safe and prosperous future."
--Mrs. Gro Harlem Brundtland, former Prime Minister of Norway and head of the World Health Organization

Table Of Contents

Part I: Taking Stock of Energy Poverty
Introduction: The End of Energy Poverty: Pathways to Development, Antoine Halff, Benjamin Sovacool, and Jon Rozhon
1. Achieving Energy For All Will Not Cost The Earth, Fatih Birol
2. Defining, Measuring, and Tackling Energy Poverty, Benjamin Sovacool
3. The Development Impact of Energy Access, Douglas F. Barnes, Hussain Samad, Cesar Calderon, and Sudeshna Ghosh Banerjee

The Politics of Inclusive Development
Interrogating the Evidence
Sam Hickey, Kunal Sen, Badru Bukenya

Key Selling Points
- Broad coverage of each dimension of development
- Proposes a new conceptual approach to understanding and researching the politics of development
- Provides thorough overviews of large literatures for students and time-poor policy actors
- Chapters written by internationally renowned experts
- Applied advice for policy and practice

How do politics shape inclusive development in the global south?

Summary
It is now widely accepted that politics plays a significant role in shaping the possibilities for inclusive development. However, the specific ways in which this happens across different types and forms of development, and in different contexts, remains poorly understood. This collection provides a state of the art review regarding what is currently known about the politics of inclusive development. Leading academics offer systematic reviews of how politics shapes development across multiple dimensions, including through growth, natural resource governance, poverty reduction, service delivery, social protection, justice systems, the empowerment of marginalised groups, and the role of both traditional and non-traditional donors. The volume not only provides a comprehensive update but also a ground-breaking range of new directions for thinking and acting around these issues. The book’s originality thus derives not only from the wide scope of its case-study material, but also from the new conceptual approaches it offers for thinking about the politics of inclusive development, and the innovative and practical suggestions for donors, policy makers, and practitioners that flow from this.

Contributor Bio
Sam Hickey, Professor of Politics and Development, IDPM, School of Environment, Education and Development, The University of Manchester, Kunal Sen, Professor of Development Economics, IDPM, School of Environment, Education and Development, The University of Manchester, Badru Bukenya, Lecturer, Department of Social Work and Social Administration, Makerere University

Sam Hickey is Professor of Politics and Development. He is the Joint Director of Research within the DFID-funded Effective States and Inclusive Development (ESID) Research Centre and Associate Director of the Brooks World Poverty Institute. His research examines the politics of development and poverty reduction, with specific reference to sub-Saharan Africa, and has been published extensively in the leading development studies journals. This includes work on natural resource governance, social exclusion and adverse incorporation, citizenship and participation, social movements and NGOs, the politics of social protection, and the use of political analysis in international development.

Kunal Sen is Professor of Development Economics and Associate Director of the Brooks World Poverty Institute. His research is on the political economy determinants of inclusive development, particularly within the DFID-UK funded Effective States and Inclusive Development Research Centre, based in the University of Manchester, of which he is the Joint Research Director. Professor Sen’s most recent books are State-Business Relations and Economic Development in Africa and India (Routledge 2012) and Trade Policy, Inequality and Performance in Indian Manufacturing (Routledge 2008). He has also published over 60 articles in leading economics and development journals and won the Sanjaya Lall Prize in 2006 and Dudley Seers Prize in 2003 for his publications.

Badru Bukenya is a development analyst and practitioner. He completed his PhD at the Institute of Development Policy and Management (IDPM) and he worked as a Research
Associate with the Effective States and Inclusive Development Centre (ESID), both at the University of Manchester. He is a lecturer in the department of Social Work and Social Administration at Makerere University Kampala. He has previously worked with Uganda's largest NGO called The AIDS Support Organisation (TASO). His research focuses on the politics of civil society, service delivery, social protection, state building, and citizenship formation in Africa.

**Table Of Contents**

**Foreword, David Hulme**

**Part I: Introduction**
1. Exploring the politics of inclusive development: towards a new conceptual approach, Sam Hickey, Kunal Sen, and Badru Bukenya

**Part II: The Politics of Accumulation and Growth**
2. The Political Determinants of Economic Growth: An Analytical Review, Kunal Sen
3. The Politics of What Works for the Poor in Public Expenditure and Taxation, Paul Mosley
4. Governing Natural Resources for Inclusive Development, Anthony Bebbington

**Part III: The Politics of Social and Legal Citizenship: Promoting and Protecting the Rights of the Poor?**
5. The Politics of What Works in Service Delivery, Claire McLoughlin
6. Political Factors in the Growth of Social Assistance, Armando Barrientos and Sony Pellissey

**Part IV: The Politics of Recognition**
8. The Gendered Politics of Securing Inclusive Development, Sohela Nazneen and Simeen Mahmud
9. Ethnicity, State Capacity, and Development: Reconsidering Causal Connections, Prerna Singh and Matthias vom Hau

**Part V: The Transnational Politics of Development**
10. The Politics of Aid Revisited: A Review of Evidence on State Capacity and Elite Commitment, Arjan de Haan and Ward Warmerdam

Capital Flight from Africa
Causes, Effects, and Policy Issues
S. Ibi Ajayi, Leonce Ndikumana

Key Selling Points
• Helps the reader understand the nature, causes, and impact of capital flight
• Explains the similarities and differences between capital flight and illicit financial flows
• Provides policy perspectives on capital flight
• Analyses the role of external players and the global system in driving capital flight from Africa
A comprehensive thematic analysis of capital flight from Africa.

Summary
This edited collection provides the most comprehensive thematic analysis of capital flight from Africa, covering economic and institutional aspects, as well as domestic and global dimensions. It is organized in three parts. The first part discusses the importance of capital flight in the context of the development policy discourse at national and international level. This part takes stock of the existing evidence on the nature, causes, and consequences of capital flight. It provides the most recent data on the magnitude of capital flight from 39 African countries, and a detailed analysis of the impact of capital flight on economic development in general and on poverty reduction in particular. The second part examines economic factors and impacts of capital flight. It presents analysis of capital flight in a flow of funds context, the impact of capital flight on macroeconomic outcomes with a focus on growth, and the linkages between capital flight and monetary policy, financial liberalization, and the global financial system. The third part explores the domestic and international institutional environment and its relevance for capital flight and stolen asset recovery. It discusses the role of governance, tax evasion, and secrecy jurisdictions in driving capital flight. The last part of the book offers suggestions for strategies to address the problem of capital flight from African countries.

Contributor Bio
S. Ibi Ajayi, Professor of Economics and Distinguished Service Fellow, Department of Economics, University of Ibadan, Leonce Ndikumana, Professor, University of Massachusetts at Amherst

S. Ibi Ajayi holds a PhD degree in Economics from Queen's University in Kingston, Ontario, Canada. He is a Professor of Economics and a Distinguished Service Fellow of the Department of Economics, University of Ibadan. Professor Ajayi has consulted for a wide range of international organizations including the World Bank, the International Monetary Fund, the Carnegie Corporation of New York, the World Health Organization, the United Nations Economic Commission for Africa, the United Nation's Development Program, the African Development Bank, the African Economic Research Consortium, the West African Monetary Agency, and ECOWAS. He has published over 120 articles journals, books, and chapters. Professor Ajayi's areas of interest are macroeconomics, monetary economics, public policy issues, and health economics. His main focus is in the areas of African development.

Leonce Ndikumana is Professor of Economics and Director of the African Development Policy Program at the Political Economy Research Institute (PERI) at the University of Massachusetts at Amherst. He is a Member of the United Nations Committee on Development Policy. Leonce Ndikumana has served as Director of Operational Policies and Director of Research at the African Development Bank, Chief of Macroeconomic Analysis at the United Nations Economic Commission for Africa (UNECA), and visiting Professor at the University of Cape Town. He is also an Honorary Professor of Economics at the University of Stellenbosch, South Africa. Professor Ndikumana's research explores issues of external debt and capital flight; financial markets and growth; macroeconomic policies for growth and employment; aid, aid effectiveness and social development; and the economics of conflict and civil wars in Africa. He is co-author of Africa's Odious Debt: How Foreign Loans and Capital Flight Bled a Continent.

Sources of National Institutional Competitiveness
Sensemaking in Institutional Change
Susana Borras, Leonard Seabrooke

Key Selling Points
• Interdisciplinary - bringing together Comparative Political Economy, Institutional Theory, and Organizational Sociology
• New research essays by well known scholars in their fields
• Original and innovative theoretical framework
A framework to investigate how countries reform and change their institutions to compete in the world economy.

Summary
How do countries create and replicate socio-economic success? This book argues that success comes from how people make sense of their institutions when they are placed under stress. When institutional frameworks are challenged, a range of agents engaged in sensemaking processes that invoke certain identities on 'who we are', contain normative claims about 'how things should be', and involve strategies on 'how to get there'. Sensemaking about the future and the past is crucial to institutional competitiveness and includes prospective and retrospective points of departure, as well as focusing on developing abstract causes of change or replicating success from previous experience.

This book brings together a range of world-class scholars from Comparative Political Economy, Institutional Theory, and Organizational Sociology to discuss how sensemaking processes create institutional change. The contributors investigate a range of cases that cover different institutions linked to competitiveness, including labour, public management, think tanks, firms, innovation policies, tax and housing policies, and welfare systems. With a strong focus on the Nordic experience and comparisons with advanced industrialized economies, this volume provides an innovative and original framework for understanding institutional change.

Reconstructing the World Trade Organization for the 21st Century
An Institutional Approach
Kent Jones

Key Selling Points
- Presents a comprehensive institutional model of the WTO based on a "constructivist" approach to international organizations and informed by the historical record and experience of the GATT/WTO system since 1947
- Facilitates a systematic analysis of the failure of the Doha Round by asking taking an institutional approach, asking the question, "What is it about the WTO as an institution that has prevented the members from reaching consensus on trade liberalization?"

In Reconstructing the World Trade Organization for the 21st Century, Kent Jones examines the difficulties of the WTO in completing multilateral trade negotiations and possible ways to restore its ability to do so.

Summary
The institutional shortcomings of the World Trade Organization (WTO) became apparent during the Doha Round of Trade negotiations that began in 2001 and which aimed to improve the success of developing countries' trading by lowering trade barriers and adjusting other trade rules. This "development agenda" meant different things to rich and poor countries. In addition, many of the circumstances that supported success in General Agreement on Tariffs and Trade (GATT) negotiations of 1947 were no longer present after the WTO was founded in 1995.

In Reconstructing the World Trade Organization for the 21st Century, Kent Jones examines the difficulties of the WTO in completing multilateral trade negotiations and possible ways to restore its ability to do so. The problem lies in the institutional structure it inherited from the GATT, which was designed for a more limited scope of trade negotiations among a relatively small number of wealthier, industrialized countries. Jones presents an institutional model of the GATT/WTO system, which describes why such an organization exists and how it is supposed to accomplish its goals.

Institutional reforms will be necessary to restore the WTO's ability to complete global trade agreements, including a more flexible application of the consensus rule, a common understanding among all members about the limits of domestic policy space that is subject to negotiation, and clearer rules on reciprocity obligations. The popularity of bilateral and regional trade agreements, which have emerged as the alternative to WTO agreements, presents a threat to the WTO's relevance in trade negotiations, but also an opportunity to "multilateralize" new and deeper trade integration in future WTO agreements. Aid for trade may also play an instrumental role in bringing more developing countries into WTO disciplines. Above all, WTO members must develop new ways to find common ground in order to negotiate for mutual gains from trade.

Contributor Bio
Kent Jones is Professor of Economics at Babson College, where he has taught since 1982. He has also served as visiting professor at Brandeis University, Tufts University (Fletcher School), and the University of Innsbruck. He has held positions at the US International Trade Commission and the US Department of State. Dr. Jones is the author of several books and articles on international trade policy, including The Doha Blues: Institutional Crisis and Reform in the WTO (Oxford University Press, 2010). His research focuses on globalization, trade policy and international institutions.

Chapter 2: Institutional Foundations of the GATT/WTO System
Handbook of Experimental Economic Methodology
Guillaume R. Fréchette, Andrew Schotter

Key Selling Points
- Contains chapters written by some of the most accomplished scholars working at the intersection of experimental, behavioral, and theoretical economics talking about methodology, including Nobel Prize-winner Alvin Roth
- Features discourse of chapters and shorter commentaries on these chapters

The Handbook of Experimental Economic Methodology aims to confront and debate the issues faced by the growing field of experimental economics.

Summary
The Handbook of Experimental Economic Methodology, edited by Guillaume R. Fréchette and Andrew Schotter, aims to confront and debate the issues faced by the growing field of experimental economics. For example, as experimental work attempts to test theory, it raises questions about the proper relationship between theory and experiments. As experimental results are used to inform policy, the utility of these results outside the lab is questioned, and finally, as experimental economics tries to integrate ideas from other disciplines like psychology and neuroscience, the question of their proper place in the discipline of economics becomes less clear.

This book contains papers written by some of the most accomplished scholars working at the intersection of experimental, behavioral, and theoretical economics talking about methodology. It is divided into four sections, each of which features a set of papers and a set of comments on those papers. The intention of the volume is to offer a place where ideas about methodology could be discussed and even argued. Some of the papers are contentious—a healthy sign of a dynamic discipline—while others lay out a vision for how the authors think experimental economics should be pursued.

This exciting and illuminating collection of papers brings light to a topic at the core of experimental economics. Researchers from a broad range of fields will benefit from the exploration of these important questions.

China's Technological Catch-Up Strategy
Industrial Development, Energy Efficiency, and CO2 Emissions
Michael T. Rock, Michael Toman

Key Selling Points
- Develops detailed enterprise case studies of technological learning and its impact on CO2 emissions
- Presents estimates of energy and CO2 savings by specific intervention in 4 energy intensive industries: aluminum, cement, iron and steel, and pulp and paper
- Ties conclusions to China's broader industrial development plan, especially the "grasp the large, let go the small" strategy
- Evaluates research conclusions with empirically-rigorous econometric tests
China's Technological Catch-Up Strategy traces the impact of this new industrial development strategy on technological catch-up, energy use, and CO2 emissions.

Summary
Prior to 1979, China had a bifurcated and geographically-dispersed industrial structure made up of a relatively small number of large-scale, state-owned enterprises in various industries alongside numerous small-scale, energy-intensive and polluting enterprises. Economic reforms beginning in 1979 led to the rapid expansion of these small-scale manufacturing enterprises in numerous energy-intensive industries such as aluminum, cement, iron and steel, and pulp and paper. Subsequently, the government adopted a new industrial development strategy labeled "grasp the large, let go the small." The aims of this new policy were to close many of the unprofitable, small-scale manufacturing plants in these (and other) industries, create a small number of large enterprises that could compete with OECD multinationals, entice these larger enterprises to engage in high-speed technological catch-up, and save energy.

China's Technological Catch-Up Strategy traces the impact of this new industrial development strategy on technological catch-up, energy use, and CO2 emissions. In doing so, the authors explore several detailed, enterprise-level case studies of technological catch-up; develop industry-wide estimates of energy and CO2 savings from specific catch-up interventions; and present detailed econometric work on the determinants of energy intensity. The authors conclude that China's strategy has contributed to substantial energy and CO2 savings, but it has not led to either a peaking of or a decline in CO2 emissions in these industries. More work is needed to cap and reduce China's CO2 emissions.

Contributor Bio
Michael T. Rock is the Samuel and Etta Wexler Professor of Economic History at Bryn Mawr College. He received his PhD. in economics from the University of Pittsburgh. Rock's published research focuses on East and Southeast Asia where he writes about the environment and economic development, industrial policy and development, and democracy and economic growth. His work has appeared in numerous academic journals. His research has been funded by Resources for the Future; the World Bank; the Ministry of the Economy, Trade, and Industry in Japan; the U.S. National Science Foundation; the MacArthur Foundation; the Asian Development Bank; and the United Nations Industrial Development Organization. He has taught economics and lived in both Thailand and Vietnam.

Michael A. Toman is Lead Economist in the World Bank Development Research Group and Manager of the Energy and Environment Team. Throughout his career, Mike has done extensive research on climate change economics and policy, energy markets and policy, environmental policy instruments, and approaches to achieving sustainable development. Prior to joining the World Bank in fall 2008, he held senior analytical and management positions at RAND Corporation, Inter-American Development Bank, and Resources for the Future. His teaching experience has included adjunct positions at the Johns Hopkins School of Advanced International Studies as well as the School of the Environment at University of California-Santa Barbara. He has a B.A. from Indiana University, a M.Sc. in applied mathematics from Brown University, and M.A. and Ph.D. degrees in economics from the University of Rochester.

Iran's Natural Gas Industry in the Post-Revolutionary Period
Optimism, Scepticism, and Potential
Elham Hassanzadeh

Key Selling Points
• An essential book for those interested in natural gas issues
• A reference book on the Iranian natural gas industry
• Extensive, data, figures, and primary information on the subject
• Academic and professional experience of the author on the subject
• Includes insight of academics and industry players

Summary
This book critically examines exports of Iranian natural gas to regional and international markets. Owning the world's largest proven natural gas reserves, Iran can potentially be considered a major gas exporter. Yet, stringent international sanctions, coupled with domestic politicisation of the industry and lack of an 'attractive' investment framework, have made Iran unable to capitalise its huge natural gas potential both in domestic and international markets. In this book, a multidisciplinary approach is adopted to examine the main challenges hampering Iran's ability to become a major gas exporter. These challenges range from political and legal to economic and fiscal.

The issue of supplying gas to domestic or export markets in the light of the country's current limited production capacity has turned into a major political debate between the Parliament and the Government resulting in failure to fully meet its supply commitments to either market. Inability to produce adequate volumes of gas and its 'ambitious' gas expansion policies both in domestic and international markets, has forced the country to import gas from Turkmenistan. The unexpected title of 'a net gas importer' for a country with the largest gas reserves in the world has raised many questions over the country's ability to substantially contribute to the growing global gas market. In this book, attempts are also made to highlight the social and economic benefits of allocating gas to domestic and export markets.

This book suggests that given the country's huge domestic market, industrialisation targets, young population, and the necessity for job creation, as well as country's dependence on gas re-injection into oilfields to maintain the oil production, Iran may not want to be 'the next Qatar' in terms of exports. Available data suggest that gas export is not the most beneficial economic outcome for Iranian gas; and for all of the foregoing reasons, and even if sanctions are removed, it would take Iran 15-20 years to develop such a major export capability. This book offers recommendations to policy makers to conduct comprehensive economic analyses over costs and benefits of allocating gas to domestic and export markets, while giving due consideration to the pressing issue of 'welfare maximisation' and distributional impact of consuming gas domestically.

Oil for Food
The Global Food Crisis and the Middle East
Eckart Woertz

Key Selling Points
- Concise overview of the Global Food Crisis and the Middle East
- Sheds light on the geopolitical importance of food trade and food boycotts and how this has played out in the Middle East since World War II
- Draws lessons from the failed Sudan bread-basket strategy of the 1970s
- Analyses the foreign agro-investments by Gulf countries - the so-called Gulf 'land grab' - and accounts for the gap between project plans and their actual implementation
- Historical account of the political economy of Gulf agriculture and food security

Oil for Food draws on extensive sources and interviews to tell the story of how Arab Gulf countries reacted to the 2008 global food crisis.

Summary
In the wake of the global food crisis of 2008, Middle Eastern oil producers have announced multi-billion investments to secure food supplies from abroad. Often called land grabs, such investments are at the heart of the global food security challenge and put the Middle East in the spotlight of simultaneous global crises in the fields of food, finance, and energy. Water scarcity here is most pronounced, import dependence growing, and the links between oil and food are manifold ranging from the economics of biofuels to climate change and the provision of crucial input factors like fuels and fertilizers. In the future the Middle East will not only play a prominent role in global oil, but also in global food markets, this time on the consumption side.

In Oil for Food, Eckart Woertz analyzes the geopolitical implications behind the current investment drive of Arab Gulf countries in food insecure countries like Sudan or Pakistan. Having lived in Dubai for seven years, and drawing on extensive archival sources and interviews, he gives the inside story of how regional food security concerns have developed historically, how domestic agro-lobbies shape policy making, and how the failed attempt to develop Sudan as an Arab bread-basket in the 1970s carries important lessons for today.

The book argues against the media hype that has been created around land grabs and analyzes why there has been such a gap between announced projects and their actual implementation. Instead, it calls for a revision of Gulf food security policies and suggests policy alternatives. It is essential reading for academics interested in the political economy of the Gulf region and for practitioners in governments, the media, and international organizations who deal with contemporary food security and energy issues.

Liquidity Lost
The Governance of the Global Financial Crisis
Paul Langley

Key Selling Points
- Extensive empirical coverage of the financial crisis management interventions in US and UK in 2007 and 2011
- Provides an innovative contribution to conceptual debates in cultural economy and social studies of finance.
- A multidisciplinary source of key information on the financial crisis for researchers and students

An innovative analysis of how the contemporary global financial crisis was governed

Summary
The interventions of crisis management during the 2007 to 2011 financial crisis were not simply responses to a set of given developments in markets, banking or neo-liberal capitalism. Nor can those interventions be adequately explained as the actions of sovereign state officials and institutions. Instead, Langley argues, processes of crisis governance are shown to have established six principal technical problems to be acted upon: liquidity, toxicity, solvency, risk, regulation, and debt and that the governance of these technical problems, is shown to have been strategically assembled in order to secure the continuation of a particular, financialized way of life that depends upon global financial circulations.

Contributing to interdisciplinary debates in cultural economy and the social studies of finance, and grounded in extensive empirical research, this book offers an innovative analysis of how the contemporary global financial crisis was governed. Through an exploration of the interventions made by central banks, treasuries, and regulatory authorities in the Anglo-American heartland of the crisis between 2007 and 2011, experimental and strategic apparatuses of crisis governance are shown to have emerged. These discrete apparatuses established the six technical problems to be acted upon, but also shared certain proclivities and preferences. Crisis governance assembled discourses and devices of economy in relation with sovereign monetary, fiscal, and regulatory techniques, and elicited an affective atmosphere of confidence. It also sought to secure the financialized way of life which turns on the opportunities ostensibly afforded by uncertain financial circulations, and gave rise to post-crisis technical fixes designed to advance the resilience of banking and the macro-prudential regulation of financial stability. Thus, the consensus that prevails across economics, political economy, and beyond - wherein sovereign state institutions are cast as coming to the rescue of the markets, banking, or neo-liberal capitalism - conceals a great deal more than it reveals about the governance of the global financial crisis.

Leading Sustainable Change
An Organizational Perspective
Rebecca Henderson, Ranjay Gulati, Michael Tushman

Key Selling Points
- Contributions from leading scholars in the field of organizational change
- Combines both leading edge thinking with concrete examples
- Analyses the challenge of sustainability for large organizations
- Identifies major drivers of organisational change
Rich insight to making organizations more sustainable

Summary
The business case for acting sustainably is becoming increasingly compelling - reducing our global footprint to sustainable levels is the defining issue of our times and it is one that can only be addressed with the active participation of the private sector. However, persuading well-established organizations to act in new ways is never easy.

This book is designed to support business leaders and organizational scholars who are grappling with this challenge by pulling together leading edge insights from some of the world’s best researchers as to how organizational change in general - and sustainable change in particular - can be most effectively managed. The book begins by laying out the economic case for change, while subsequent chapters describe how leaders at firms such as Du Pont, IBM and Cemex have transformed their organizations, exploring issues such as the role of the senior team and the ways in which firms shift their identities, build innovative cultures and processes, and begin to change the world around them. Business leaders will find the book a source of both powerful examples and immediately actionable ideas, while scholars will be deeply intrigued by the insights that emerge from the cross-cutting exploration of one of the toughest challenges our society has ever faced.

Contributor Bio
Rebecca Henderson, John & Natty McArthur University Professor, Harvard Business School, Ranjay Gulati, Jaime and Josephina Chua Tiampo Professor, Harvard Business School, Michael Tushman, Paul R. Lawrence, MBA Class of 1942 Professor, Harvard Business School

Rebecca Henderson is John & Natty McArthur University Professor at Harvard University, and a research fellow at the National Bureau of Economic Research. She is also faculty co-chair of HBS's Initiative for Business and the Environment. Her research focuses on the difficulties large organizations encounter in attempting to innovate and change, particularly in response to the challenge of sustainability. She has worked with some of the largest firms in the world and with entrepreneurial start-ups in a wide variety of industries including energy, pharmaceuticals, information technology, materials and consumer goods.

In May 2011, Dr. Henderson was appointed to the U.S. Department of Commerce Innovation Advisory Board which guided a study of U.S. economic competitiveness and innovation to help inform national policies at the heart of U.S. job creation and global competitiveness, and in June 2013 she became a member of the World Economic Forum's global agenda council on the role of business.

Ranjay Gulati is the Jaime and Josefina Chua Tiampo Professor and the Unit Head of the Organizational Behavior Unit at Harvard Business School. He is also the Chair of Harvard Business School's Advanced Management Program. He is an expert on leadership, strategy, and organizational issues in firms. His recent work explores leadership and strategic challenges for building high growth organizations in turbulent markets. Some of his prior work has focused on the enablers and implications of within-firm and inter-firm collaboration. He has looked at both when and how firms should leverage greater connectivity within and across their boundaries to enhance performance.

Professor Gulati is the past-President of the Business Policy and Strategy Division at the Academy of Management and an elected fellow of the Strategic Management Society.
He was ranked as one of the top ten most cited scholars in Economics and Business over a decade by ISI-Incite.

Michael L. Tushman is the faculty chair of Leading Change and Organizational Renewal (LCOR) and the Program for Leadership Development (PLD) at the Harvard Business School. Prior to PLD, Tushman was faculty chair of the Advanced Management Program (AMP). At Columbia, he won the first W. H. Newman Award for excellence and innovation in the classroom; in 2005, Tushman was named Lecturer of the Year at CHAMPS, Chalmers University of Technology; in 2008 he received an honorary doctorate from the University of Geneva where he was commended by the university as a scholar internationally recognized for his work on the relationships between technological change and organizational evolution; in 2011 he was given the Sumanta Ghoshal Award for Rigour & Relevance in the Study of Management from London Business School; in 2013 he was awarded the Academy of Management Career Achievement Award for Distinguished Scholarly Contributions to Management.

Developing Leaders by Executive Coaching: Practice and Evidence
Andromachi Athanasopoulou, Sue Dopson

Key Selling Points
- Introduces the coaching and executive coaching fields to those new to this area and provides a reference point for those more experienced in the field
- Aids understanding of the multiple ways by which executive coaching is practised and what underpins these practices
- Provides an overview of the competing or complementary theoretical approaches to executive coaching as well as the various tools, models and frameworks applied by executive coaches
- Links the fields of executive coaching with leadership theories and leadership development
- Provides an overview of key debates in the field and future research trends.

An overview of the executive coaching field, what the coaching practice involves and who are its key stakeholders.

Summary
Executive coaching is a professional and personal development intervention that organizations introduce to address and improve those areas in managers and leaders behavior, attitude, and interactions with others that do not allow him/her to work at full potential and also to further improve one's own strengths. The end objective, besides the development of the managers and leaders, is for the organization to benefit in the long-run from the coachee's improved performance.

The book provides a comprehensive overview of the executive coaching field both in terms of practice and in terms of relevant research on executive coaching outcomes. It assesses the empirical research on executive coaching outcomes and links the executive coaching field with the fields of leadership and leadership development.

The book will be of value to both practitioners (coaches, HR professionals, executives, consultants etc.), academics and researchers with an interest in coaching or leadership development.

Faith in Shakespeare
Richard C. McCoy

Key Selling Points
- Penned in a jargon-free and intellectually accessible style
- Presents a more moderate version of faith than other recent critics by distinguishing between poetic and religious faith
- Uses tradition of Romantic era notions like Coleridge's "suspension of disbelief"

Summary
Speculation about Shakespeare's own religious beliefs and responses to the Reformation have dominated discussions of faith in the playwright's work for decades. As a result, we often lose sight of what's truly important—the plays themselves. By focusing on those plays in several succinct, fluently written chapters, Richard McCoy reminds us of the spell-binding power inherent in works like Othello, As You Like It, and The Winter's Tale and shows why they continue to cause audiences to gladly exercise what Samuel Taylor Coleridge called the "willing suspension of disbelief."

Faith in Shakespeare ruminates on what it means to believe in the Bard's plays, exploring how their plots can be both preposterous and gripping, and how their characters seem more substantial and enduring than the people surrounding us in the theater. Informed by Coleridge's "poetic faith," the book discusses what this concept shares with religious faith and how it departs from recent historicist approaches to the dramatist's work. Faith in Shakespeare concentrates more on text than context, finding the afterlife of Shakespeare's language more vivid and engaging than theological controversies. The book confirms its convictions in literature's intrinsic powers by exploring the causes for our paradoxical belief in theater's potent but manifest illusions. Plays that ask their audience to "awake your faith" or "believe then, if you please" ultimately enable us to "mind true things by what their mockeries be." Rather than faith in God or the supernatural, McCoy argues that faith in Shakespeare is sustained and explained only by the complex, subtle, and entirely human power of poetic eloquence and dramatic performance.

Contributor Bio
Richard C. McCoy is Distinguished Professor of English at Queens College and the Graduate Center at the City University of New York.

Vienna Tales
Helen Constantine, Deborah Holmes

Key Selling Points
- A fascinating collection of stories which take readers on a literary tour of the Austrian capital
- Includes stories translated into English for the first time
- Each tale is illustrated by a photo which provides a particular reflection of that story
- A map of Vienna helps to orientate the reader through the collection
- 17 stories from one of Europe's most enchanting cities.

Summary
Situated on the cusp of West and East, between the foothills of the Alps and the mighty 'Blue Danube', Vienna has long presented authors with a wealth of material for stories that entertain and intrigue. The city's famous quality of life and rich variety of cultural offerings is apparent here at every turn, but so too is its darker side, whether it be the Viennese obsession with death and decay or the dramatic, tragic events of its twentieth-century history. In stories from the early to mid-nineteenth century in particular, the city stands for wine, women and song, for a laid-back - perhaps somewhat lax? - outlook on life that is invariably linked to its location as German culture's southernmost centre. In more recent tales, the theme of the good life and of Vienna's beauty continues, but there are very few authors who do not dwell on elements of darkness or melancholy. Indeed, from the mid-twentieth century onward, death itself seems to have become literature's preferred guide to the city.

The collection concentrates on stories set at the city's margins. The tales are arranged geographically rather than chronologically, around and through the city from west to east and back again. We begin and end with Arthur Schnitzler and Joseph Roth, two authors already indelibly associated with Vienna, but represented here by little-known gems, translated for the first time. Other authors include stars of Vienna's nineteenth century feuilleton journalism - Heinrich Laube, Ferdinand Kurnberger, Adalbert Stifter - but also the most recent generation of Viennese writers, Doron Rabinovici, Eva Menasse, Dimitre Dinev, with tales as yet unknown in English.

Contributor Bio
Helen Constantine taught languages in schools until 2000, when she became a full-time translator. She has published two volumes of translated stories, Paris Tales and French Tales, and is currently editing a series of City Tales for Oxford University Press. She has translated Mademoiselle de Maupin by Theophile Gautier and Dangerous Liaisons by Choderlos de Laclos for Penguin. She is married to the writer David Constantine.

Deborah Holmes studied German and Italian in Oxford, Pavia and Salzburg, graduating from Oxford in 2001 with a DPhil on the Italian antifascist exile author Ignazio Silone. She subsequently held post-doctoral positions in Oxford, Munich and Vienna. Her recent research focuses on late nineteenth and early twentieth century Austrian literature, and she has also published a biography of the philanthropist, pedagogue and journalist Eugenie Schwarzwald (Langeweile ist Gift, Residenz 2012). Deborah Holmes is currently Senior Lecturer in German at the University of Kent, where she teaches courses in modern literature, culture and translation.

Copenhagen Tales
Helen Constantine, Lotte Shankland

Key Selling Points
- The first English-language anthology set in Copenhagen
- Introduces some of the finest contemporary Danish writers to an English speaking audience
- Provides new translations of classic short stories
- Each story is illustrated with a beautiful photograph of the city

This collection of stories present a unique view of the city of Copenhagen.

Summary
Exploring the many moods of the Danish capital.

From the narrow twisting streets of the old town centre to the shady docklands, this rich anthology captures the essence of Copenhagen and its many faces. Through seventeen tales by some of the very best of Denmark's writers past and present, we travel the length and breadth of the Danish capital examining famous sights from unique perspectives. A guide book usefully informs a new visitor to Copenhagen but these stories allow the reader to experience the city and its history from the inside.

Guilty But Insane
Mind and Law in Golden Age Detective Fiction
Samantha Walton

Key Selling Points
• Offers a timely investigation of the relationship between the mind, identity, and selfhood
• Rooted in meticulous historical research supported by persuasive case studies and descriptions of actual cases
• Provides readings of detective fiction in the context of literary modernism
• Offers an interdisciplinary focus, touching on histories of law, medicine, and literature

Summary
Guilty But Insane takes an historical approach to golden age detective fiction by Margery Allingham, Christianna Brand, Agatha Christie, Dorothy L. Sayers, and Gladys Mitchell. It examines how writers and readers of detective fiction during the 1920s to 1940s understood guilt, responsibility, and the workings of the mind as they related to the commission, the investigation, and the punishment of crime. Under the lens of psychology, the detective novel is revealed as a site for the negotiation of competing interpretations of sanity and insanity. An unexplored depth and subtlety is revealed in detective novels that address major controversies in legal and psychiatric theory and practice, while significant resonances with specific concerns of modernist fiction come into focus for the first time. During the interwar years, proponents of competing psychological schools challenged legal concepts of responsibility and free will. In response, golden age writers began to reflect on the genre's promise to accomplish true and just solutions in a social order in which the relationship between law and justice was being problematized on several fronts. By making connections between high modernism and popular culture, and by tracing the impact of psychological discourses across a range of different cultural outputs, this book makes a persuasive case for reading detective fiction historically. It aims to demonstrate the richness of these texts and their value for scholarship, not only as historical documents or residues of discourse, but as literary texts which challenge, subvert, toy with and test the prevailing values and prejudices of interwar Britain.

Vergil in Russia
National Identity and Classical Reception
Zara Martirosova Torlone

Key Selling Points
- Reveals the connection between Russian intellectuals' interest in Vergil and Russian ideas on nationhood and development of literary identity
- Material presented chronologically, allowing readers to build an understanding of the gradual development of Vergilian reception in Russia
- Covers several key texts by Russian authors, some of which have previously received little scholarly attention
This volume looks to uncover the nature of Russian reception of Vergil

Summary
The Russian reception of the greatest Roman poet, Vergil, provided Russian thinkers with a way in which to define Russian-European features. This volume looks to uncover the nature of Russian reception of Vergil, and argues that the best way to analyse his presence in Russian letters is to view it in the context of the formation and development of Russian national and literary identity.

Russian reception of Vergil began to play an integral role in the eighteenth century -- starting with the reforms of Peter the Great -- and continued to be an important point of reference for Russian writers well into the last part of the twentieth century. At the beginning of the twentieth century, it took on a spiritual, almost messianic mission, while towards the end of the millennium the post-modernist Vergil of Joseph Brodsky contemplated the fate of a poet in the world. However, Russian reception of Vergil offers significantly more than mere foreign importation or imitation of the beliefs and attitudes towards Vergil developed in Europe. It provides a gateway to understanding Russian eighteenth- and nineteenth-century thought about national identity and values, and uncovers important sources of later thinking about the character and destiny of Russia. Vergil in Russia reveals that at the centre of Russian reception of Vergil is Russia's challenge to define the character and validity of their own civilization. Vergil's poems, especially the Aeneid, gave Russian men of letters an opportunity to think about and act upon national self-determination in both political and cultural terms.

Lykophron: Alexandra
Greek Text, Translation, Commentary, and Introduction
Simon Hornblower

Key Selling Points
• Features the first ever full-length commentary in English on one of the most important and notoriously difficult Greek poems dating from the hellenistic period
• Provides the Greek text of the poem in full alongside an English translation
• Examines the meaning of the poem's numerous difficult allusions to, and descriptions of, gods, heroes, and heroines

Summary
The Alexandra attributed to Lykophron is a minor poetic masterpiece. At 1474 lines, it is one of the most important and notoriously difficult Greek poems dating from the hellenistic period (most likely the early second century BC).

Most of the poem purports to be a prophecy by the mythical Trojan princess, Kassandra, the most beautiful of the daughters of King Priam, and her prophecy ranges from the Trojan War to the historical Roman conquest of Greece, which took place in the poet's own time. The poem's importance arises from the light which it sheds on Greek religion (in particular the role of women), on foundation myths and myths of colonial identity, and on local - especially Italian - cults and cult places. The difficulty of the poem stems from its unusual vocabulary - many words of ancient Greek are found only in this poem - and the riddling and meandering way in which most of the many mythological characters are referenced.

As well as providing the Greek text in full and its English translation, this volume provides the first ever full-length commentary in English on the poem.

The Oxford Handbook of William Wordsworth
Richard Gravil, Daniel Robinson

Key Selling Points
- Forty-eight original essays from a leading team of international scholars provide an indispensable guide to beginning or continuing study of the life and career of William Wordsworth
- Highlights Wordsworth's life and networks, the exceptional variety of his poetry, his critical and political prose, his intellectual reach, and his afterlife in literature
- Traces his rich inheritance in poetry and ideas, and his legacy in many fields of human thought
- Offers the fullest treatment of Wordsworth's poetic career imaginable in a single volume
An indispensable guide to beginning or continuing study of the life and career of William Wordsworth.

Summary
The Oxford Handbook of William Wordsworth deploys its forty-eight original essays, by an international team of scholar-critics, to present a stimulating account of Wordsworth's life and achievement and to map new directions in criticism. Nineteen essays explore the highlights of a long career systematically, giving special prominence to the lyric Wordsworth of *Lyrical Ballads* and the *Poems in Two Volumes* and to the blank verse poet of 'The Recluse'. Most of the other essays return to the poetry while exploring other dimensions of the life and work of the major Romantic poet. The result is a dialogic exploration of many major texts and problems in Wordsworth scholarship.

This uniquely comprehensive handbook is structured so as to present, in turn, Wordsworth's life, career, and networks; aspects of the major lyrical and narrative poetry; components of 'The Recluse'; his poetical inheritance and his transformation of poetics; the variety of intellectual influences upon his work, from classical republican thought to modern science; his shaping of modern culture in such fields as gender, landscape, psychology, ethics, politics, religion and ecology; and his 19th- and 20th-century reception—most importantly by poets, but also in modern criticism and scholarship.

Poets and the Peacock Dinner
The Literary History of a Meal
Lucy McDiarmid

Key Selling Points
• An entirely fresh approach to modern literature, theoretically informed but written with flair and wit
• Offers a new view of the literary friendships of major writers: Yeats and Ezra Pound, Lady Gregory and Yeats, and the hidden romantic affair of Lady Gregory and Wilfrid Scawen Blunt
• Combines human interest derived from unpublished materials with close readings of major literary works
• Examines letters, diaries, and a hitherto unknown poem
Offers a new view of the literary friendships of major writers

Summary
On January 18, 1914, seven male poets gathered to eat a peacock. W. B. Yeats and Ezra Pound, the celebrities of the group, led four lesser-known poets to the Sussex manor house of the man they were honouring, Wilfrid Scawen Blunt: the poet, horse-breeder, Arabist, and anti-imperialist married to Byron's only granddaughter. In this story of the curious occasion that came to be known as the 'peacock dinner,' immortalized in the famous photograph of the poets standing in a row, Lucy McDiarmid creates a new kind of literary history derived from intimacies rather than 'isms.' The dinner evolved from three close literary friendships, those between Pound and Yeats, Yeats and Lady Gregory, and Lady Gregory and Blunt, whose romantic affair thirty years earlier was unknown to the others. Through close readings of unpublished letters, diaries, memoirs, and poems, in an argument at all times theoretically informed, McDiarmid reveals the way marriage and adultery, as well as friendship, offer ways of transmitting the professional culture of poetry. Like the women who are absent from the photograph, the poets at its edges (F.S. Flint, Richard Aldington, Sturge Moore, and Victor Plarr) are also brought into the discussion, adding interest by their very marginality. This is literary history told with considerable style and brio, often comically aware of the extraordinary alliances and rivalries of the 'seven male poets' but attuned to significant issues in coterie formation, literary homosociality, and the development of modernist poetics from late-Victorian and Georgian beginnings. Poets and the Peacock Dinner is written with critical sophistication and a wit and lightness that never compromise on the rich texture of event and personality.

Contributor Bio
Lucy McDiarmid, Marie Frazee-Baldassarre Professor of English, Montclair State University

Lucy McDiarmid is Marie Frazee-Baldassarre Professor of English at Montclair State University. The recipient of fellowships from the Guggenheim Foundation, the Cullman Center for Scholars and Writers at the New York Public Library, and the National Endowment for the Humanities, she is the author or editor of five previous books. Her scholarly interest in cultural politics, especially quirky, colourful, suggestive episodes, is exemplified by her most recent book, The Irish Art of Controversy, as well as by Poets and the Peacock Dinner. She is also a former president of the American Conference for Irish Studies.

Quotes
"Lucy McDiarmid's study is an absorbing work of rigorous scholarship consistently enlivened by a sharp and delightful wit. Its triumph resides in a lovingly meticulous unfolding of the webs of significance which radiate from this small gathering: literary homosociality, the practical business of coteries, the development of modernist poetics, assumptions about gender and creativity, and the politics of anti-imperialism. Few indeed are the books which so substantially vindicate the most ambitious claims of literary-historical scholarship." -- Professor Edward Larrissy
"[A]n excellent project which deserves to be widely-read ... with a strong narrative construction and with much fascinating biographical and historical material which is nevertheless critically sophisticated and at all times theoretically aware ... a significant contribution to the study of the pre-Great War beginnings of literary modernism."
--Matthew Campbell, Professor of Modern Literature at the University of York

"The occasion in January 1914 when seven poets headed by Yeats and Pound sat down to a dinner of peacock in honour of the ageing poet and public agitator Wilfid Scawen Blunt is a key moment in literary history. Or so it emerges in Lucy McDiarmid's brilliant exploration of the event. With her extraordinary flair for imaginative scholarship, she illuminates the origins and precedents for the peacock dinner, the offstage role of Lady Gregory, Yeats's close friend and Blunt's former lover, in organising this all-male gathering, the rivalries and alliances in those invited and excluded, and its long-term significance in terms of the genealogies of poetic modernism. Whatever the roast peacock tasted like, this is a book to be savoured and enjoyed."
--Nicholas Grene, Professor of English Literature, Trinity College Dublin.

The Oxford Handbook of Cognitive Literary Studies
Lisa Zunshine

Key Selling Points
- Includes 30 essays by leading researchers across multiple fields: cognitive studies, narratology, etc.
- Applies developments in cognitive science to a wide range of literary texts that spans multiple historical periods and numerous national literary traditions

Summary
The Oxford Handbook of Cognitive Literary Studies considers, via a variety of methodologies and combinations of interdisciplinary approaches, how the architecture that enables human cognitive processing interacts with cultural and historical contexts. Organized into five parts (Narrative, History, Imagination; Emotions and Empathy; The New Unconscious; Empirical and Qualitative Studies of Literature; and Cognitive Theory and Literary Experience), the volume uses case studies from a wide range of historical periods (from the fourth century BCE to the twenty-first century) and national literary traditions (including South Asian, postcolonial anglophone and francophone, Chinese, Japanese, English, Iranian, Russian, Italian, French, German, and Spanish).

Contributor Bio
Lisa Zunshine is Bush-Holbrook Professor of English at the University of Kentucky. She is the author or editor of ten books, including Why We Read Fiction: Theory of Mind and the Novel (Ohio State UP, 2006), Strange Concepts and the Stories They Make Possible: Cognition, Culture, Narrative (Johns Hopkins UP, 2008), Introduction to Cognitive Cultural Studies (Johns Hopkins UP, 2010) and Getting Inside Your Head: What Cognitive Science Can Tell Us About Popular Culture (Johns Hopkins UP, forthcoming in 2012).

Granular Modernism
Beci Carver

Key Selling Points
- Offers new interpretations of key works by seven major modernist writers
- Contextualises 'granular modernism' within contemporary culture and philosophy
- Provides thorough analysis through close readings of specific texts

Summary
Granular Modernism understands the way that some modernist texts put themselves together as a way of pulling themselves apart. In this volume, Beci Carver offers a new way of reading Modernist texts, by drawing attention to the anomalies that make them difficult to summarise or simplify. Carver proposes that rather than trying to find the shapes of narrative or argument in their writing, the 'Granular Modernists' - namely, Joseph Conrad, William Gerhardie, Evelyn Waugh, Henry Green, T.S. Eliot, W.H. Auden, and Samuel Beckett - experiment in certain of their works in finding the shapelessness of a moment in history that increasingly confidently called itself 'modern', which was to call itself shapeless. The project of modernism in the late nineteenth and the first half of the twentieth century, was to find a story to tell about an era full of beginnings. The project of 'Granular Modernism' was to find a way of turning the inchoateness of the modern moment into art. Granular Modernism takes from the Naturalist movements of the nineteenth and early twentieth century its attentiveness to the process of mundane experiences like eating or waiting. But where Naturalism sets out to offer a complete picture of a way of life, Granular Modernism's eating and waiting fail to amount to anything more; to paraphrase Evelyn Waugh: 'The most they can hope for is a cumulative futility.' Frank Norris once described one of Stephen Crane's narrators as: 'a locust in a grain elevator attempting to empty the silo by carrying off one grain at a time.' Norris is being dismissive. But his image of pointless, meticulous, indefinite manoeuvre potentially defines the ambition of the Granular Modernists.

Landor's Cleanness
Adam Roberts

Key Selling Points
- The first dedicated study of Walter Savage Landor in fifty years, and the first monograph to address all his work: poetry, prose and drama
- Proposes a new way of reading not just Landor but poetry more generally, via 'cleanness'
- Redraws and expands the map of Romantic literature
- Covers both Landor's English and neo-Latin work

Summary
Cleanness, both in the sense of a neoclassical stylistic purity and of an individual moral and political probity, was centrally important to Walter Savage Landor's writing, both in his prose and poetry. At the same time, this commitment to purity was contaminated in a variety of eloquent and complicating uncleannesses: his own fiery temper and frequent rages; his sometimes scurrilous and sexually explicit Latin poems; and the innovative, compacted, proto-Modernist verse style of works such as his epic Gebir, as stylistically-tangled and potent a poem ever produced in the Romantic era.

The present study, the first comprehensive study of Landor's writing for nearly half a century, addresses the whole of Landor's prodigious output over the seven decades of his writing life, in verse, prose, and drama, in English and Latin: from the brief lyrics by which (if at all) he is remembered today up to his idylls, tragedies, and epics; from his pamphlets and essays to historical novels like Pericles and Aspasia and the textual colossus of the Imaginary Conversations. 'Cleanness' becomes the organising principle by which this heterogeneous and multivocal body of work is read. At once a survey of Landor's output and life, a critically engaged reading of his work and an interrogation of the principles of poetry itself, Landor's Cleanness seeks to reconfigure the map of Romantic and Victorian writing, and move Landor's reputation at least some way in the direction of the eminence he once enjoyed: as a major writer of his time, both intensely characteristic of the nineteenth-century and startlingly relevant to the twenty-first.

Robert Browning
21st-Century Oxford Authors
Richard Cronin, Dorothy McMillan

Key Selling Points
• Latest volume in the 21st-Century Oxford Authors series
• Includes a wider selection of Browning's poems than is available in other single-volume annotated editions
• The poems are published in the form and the order in which they were first published
• The notes include brief and helpful headnotes to the poems
• The volume represents Browning’s work in all its variety, and offers examples of poems written all through his career
A comprehensive selection of the work of the Robert Browning

Summary
The Robert Browning volume in the 21st-Century Oxford Authors series is the first one-volume fully annotated edition of Browning to offer a wide selection of work written throughout Browning's career, from the very first poem he published, Pauline, to Asolando, the volume that was published on the day that he died. The text chosen is, wherever possible, the text of the poem as it was first published by Browning himself, and as a consequence the volume also constitutes a kind of biography. It reveals a poet who began as a bold experimentalist, and who continued to experiment throughout a writing career of more than fifty years. Browning is best known for his dramatic monologues, and the dramatic monologues are fully represented in this volume, but he was also a narrative poet, a poet of philosophical reflection, and a poet who fashioned an extraordinary variety of lyric measures. This volume reveals Browning as a far more versatile poet than he is often taken to be. There are two important prose items, an essay on Shelley and a letter to Ruskin which clarify Browning's intellectual stance. The Notes include brief headnotes to each poem followed by detailed annotation. Browning is often a difficult poet, and the notes are designed to assist the reader to arrive at a full understanding of the poems. The volume also includes a general introduction and a detailed chronology of Browning's life and times.

Contributor Bio
Richard Cronin has published very widely on nineteenth-century literature. After teaching for many years at the University of Glasgow, he has recently been appointed to a chair at Oxford Brookes University.

Dorothy McMillan is an Honorary Research Fellow of the University of Glasgow, and has published widely with a particular focus on Scottish literature and poetry by women.

Tense Future
Modernism, Total War, Encyclopedic Form
Paul K. Saint-Amour

Key Selling Points
- First study of literary modernism to examine the effects of total war
- Transnational in scale, covering works of literature from Britain, Ireland, Germany, and the United States
- Highlights canonical figures like Woolf, Joyce, Robert Musil, and Thomas Pynchon, alongside lesser known figures such as LEO Charlton

Summary
Tense Future falls into two parts. The first develops a critical account of total war discourse and addresses the resistant potential of acts, including acts of writing, before a future that looks barred or predetermined by war. Part two shifts the focus to long interwar narratives that pit both their scale and their formal turbulence against total war's portrait of the social totality, producing both ripostes and alternatives to that portrait in the practice of literary encyclopedism. The book's introduction grounds both parts in the claim that industrialized warfare, particularly the aerial bombing of cities, intensifies an under-examined form of collective traumatization: a pretraumatic syndrome in which the anticipation of future-conditional violence induces psychic wounds. Situating this claim in relation to other scholarship on "critical futurities," Saint-Amour discusses its ramifications for trauma studies, historical narratives generally, and the historiography of the interwar period in particular. The introduction ends with an account of the weak theory of modernism now structuring the field of modernist studies, and of weak theory's special suitability for opposing total war, that strongest of strong theories.

Contributor Bio
Paul K. Saint-Amour is Associate Professor of English at the University of Pennsylvania. Ends of Assimilation
The Formation of Chicano Literature
John Alba Cutler

Key Selling Points
- Rejects the position that Chicano/a literature is anti-assimilationist
- Provides a sustained narration of assimilation via readings of works like Pocho, George Washington Gomez, Rain of Scorpions, and Motorcycle Ride on the Sea of Tranquility

Summary
Ends of Assimilation examines how Chicano literature imagines the conditions and costs of cultural change, arguing that its thematic preoccupation with assimilation illuminates the function of literature. John Alba Cutler shows how mid-century sociologists advanced a model of assimilation that ignored the interlinking of race, gender, and sexuality and characterized American culture as homogeneous, stable, and exceptional. He demonstrates how Chicano literary works from the postwar period to the present understand culture as dynamic and self-consciously promote literature as a medium for influencing the direction of cultural change. With original analyses of works by canonical and noncanonical writers--from Américo Paredes, Sandra Cisneros, and Jimmy Santiago Baca to Estela Portillo Trambley, Alfredo Véa, and Patricia Santana--Ends of Assimilation demands that we reevaluate assimilation, literature, and the very language we use to talk about culture.

Contributor Bio
John Alba Cutler is Assistant Professor of English at Northwestern University.

Quotes
"Elegantly lucid, Ends of Assimilation traces the complex institutional dynamics of Chicana/o literature as it emerges in critical dialog with assimilation sociology. In writing the first systematic analysis of this relationship, Cutler has crafted an invaluable guide for understanding the origins and future directions of Latina/o literary scholarship."
-- John Morán González, author of Border Renaissance: The Texas Centennial and the Emergence of Mexican American Literature

"Bringing together literary works and theories of assimilation, Ends of Assimilation sharpens our understanding of the ways in which Chicano writers have engaged and challenged ideas about assimilation in the United States. Cutler deftly draws attention to assimilation discourse as both an ideology and cultural artifact in this original and timely study."
-- Catherine S. Ramírez, author of The Woman in the Zoot Suit: Gender, Nationalism, and the Cultural Politics of Memory

"In Ends of Assimilation, John Alba Cutler compellingly rethinks the history of Chicana/o literature by bringing it into conversation with assimilation sociology, a heretofore neglected critical task. Every chapter is filled with deft, nuanced interpretations that made me rethink what I know about the classics of Chicana/o literature as well as more contemporary works. In just one monograph, Cutler has reshaped the history of Chicana/o literature. A must read!"
-- Ralph Rodríguez, author of Brown Gumshoes: Detective Fiction and the Search for Chicana/o Identity

The Birth of a Jungle
Animality in Progressive-Era U.S. Literature and Culture
Michael Lundblad

Key Selling Points
- Challenges traditional beliefs on animality in American fiction and culture
- Reveals a cultural shift in the ways issues like race and sexuality were shaped during the Progressive Era
- Contributes to several areas of scholarly inquiry: literary studies, animal studies, and cultural history

Summary
Illustrating a new methodology identified as animality studies, The Birth of a Jungle explores animality at the turn of the twentieth century in the U.S.-a moment when shifts in what it meant to be both human and animal produced new ways of thinking about various human behaviors, including homosexuality, labor exploitation, and the lynching of black men. Throughout the study, Michael Lundblad explores what he identifies as the discourse of the jungle: Darwinist-Freudian constructions of human behavior that could be explained by animal instincts that were supposedly naturally violent in the name of survival and heterosexual in the name of reproduction. These new formulations were often contested rather than reinforced, however, in Progressive-Era literary and cultural texts. The Birth of a Jungle ultimately reveals the significance of animality in relation to the history of sexuality, literary naturalism, and critical race studies, while highlighting how the discourse of the jungle remains a disturbing yet powerful presence today.

British Drama 1533-1642: A Catalogue
Volume V: 1603-1608
Martin Wiggins, Catherine Richardson

Key Selling Points
- An unparalleled and comprehensive resource--covers all works within the period and the completed catalogue will contain more than 2,700 entries
- Based on a complete rethinking of the evidential foundations of the field, which will transform historiography
- Assembles the dramatic corpus in historical sequence allowing contexts, patterns, and continuities to become immediately apparent
- Contains much hitherto unknown information, including a number of unrecorded plays
- Organizes key information in standard categories for every play, aiding ease of use for readers

Summary
This is the fifth volume of a detailed play-by-play catalogue of drama written by English, Welsh, Irish, and Scottish authors during the 110 years between the English Reformation to the English Revolution, covering every known play, extant and lost, including some which have never before been identified. It is based on a complete, systematic survey of the whole of this body of work, presented in chronological order. Each entry contains comprehensive information about a single play: its various titles, authorship, and date; a summary of its plot, list of its roles, and details of the human and geographical world in which the fictional action takes place; a list of its sources, narrative and verbal, and a summary of its formal characteristics; details of its staging requirements; and an account of its early stage and textual history. The years covered in this volume saw the consolidation of the Burbage and Shakespeare company as the King's Men, and the emergence of the Jacobean court masque.

Representing Avarice in Late Renaissance France
Jonathan Patterson

Key Selling Points
• The first book-length study of avarice in late Renaissance France
• Offers a language-based approach which relates literary criticism to social, economic, and intellectual history
• Based on a wide-ranging corpus of source material
• Provides new readings of well-known authors

Summary
Why did people talk so much about avarice in late Renaissance France, nearly a century before Molière's famous comedy, L'Avare? As wars and economic crises ravaged France on the threshold of modernity, avarice was said to be flourishing as never before. Yet by the late sixteenth century, a number of French writers would argue that in some contexts, avaricious behaviour was not straightforwardly sinful or harmful. Considerations of social rank, gender, object pursued, time, and circumstance led some to question age-old beliefs. Traditionally reviled groups (rapacious usurers, greedy lawyers, miserly fathers, covetous women) might still exhibit unmistakable signs of avarice -- but perhaps not invariably, in an age of shifting social, economic and intellectual values. Across a large, diverse corpus of French texts, Jonathan Patterson shows how a range of flexible genres nourished by humanism tended to offset traditional condemnation of avarice and avares with innovative, mitigating perspectives, arising from subjective experience. In such writings, an avaricious disposition could be re-described as something less vicious, excusable, or even expedient. In this word history of avarice, close readings of well-known authors (Marguerite de Navarre, Ronsard, Montaigne), and of their lesser-known contemporaries are connected to broader socio-economic developments of the late French Renaissance (c.1540-1615). The final chapter situates key themes in relation to Molière's L'Avare. As such, Representing Avarice in Late Renaissance France newly illuminates debates about avarice within broader cultural preoccupations surrounding gender, enrichment and status in early modern France.

The Victorian Geopolitical Aesthetic
Realism, Sovereignty, and Transnational Experience
Lauren M. E. Goodlad

Key Selling Points
- Provides a new and more capacious way of understanding Victorian realism vis-a-vis French and modernist counterparts as well as later realist genres
- Offers original readings of several important nineteenth-century novels
- Enriches understanding of nineteenth-century liberalism and imperialism
- Discusses Victorian liberalism in a non-reductive way
- Demonstrates the importance of a dialectical understanding of history and historicism which integrates synchronic and longue duree perspectives

Summary
How did realist fiction alter in the effort to craft forms and genres receptive to the dynamism of an expanding empire and globalizing world? Do these nineteenth-century variations on the "geopolitical aesthetic" continue to resonate today? Crossing literary criticism, political theory, and longue duree history, The Victorian Geopolitical Aesthetic explores these questions from the standpoint of mid-nineteenth-century novelists such as Wilkie Collins, George Eliot, Gustave Flaubert, and Anthony Trollope as well as successors including E. M. Forster and the creators of recent television serials. By looking at the category of "sovereignty" at multiple scales and in diverse formal, geographic, and historical contexts, Lauren M. E. Goodlad shows that the ideological crucible for "high" realism was not a hegemonic liberalism. It was, rather, a clash of modern liberal ideals struggling to distinguish themselves from a powerful conservative vision of empire while striving to negotiate the inequalities of power along lines of race, gender, nationality, and ethnicity which a supposedly universalistic liberalism had helped to generate.

The material occasion for the mid-Victorian era's rich realist experiments was, thus, the transition from an informal empire of trade that could be celebrated as "liberal" to a neo-feudal imperialism that only Tories could warmly embrace. In this way the book places realism's "geopolitical aesthetic" at the heart of recurring modern experiences of breached sovereignty, forgotten history, and subjective exile. The Coda, titled "The Way We Historicize Now," concludes the book with connections to recent debates about "surface reading" "distant reading," and the hermeneutics of suspicion.

6. The Adulterous Geopolitical Aesthetic: Romola contra Madame Bovary
Playing in the White
Black Writers, White Subjects
Stephanie Li

Key Selling Points
- Emphasizes understudied novels by key African American writers
- Argues that race cannot be escaped and the very attempt to do so constitutes a racialized act
- Offers a new way to conceptualize African American literature as not solely defined by works written by and about black writers
- Brings postwar white life novels back into conversations about the nature of African American literature

Summary
The postwar period witnessed an outpouring of white life novels—that is, texts by African American writers focused almost exclusively on white characters. Almost every major mid-twentieth century black writer, including Zora Neale Hurston, Richard Wright, Ann Petry and James Baldwin, published one of these anomalous texts. Controversial since their publication in the 1940s and 50s, these novels have since fallen into obscurity given the challenges they pose to traditional conceptions of the African American literary canon.

Playing in the White: Black Writers, White Subjects aims to bring these neglected novels back into conversations about the nature of African American literature and the unique expectations imposed upon black texts. In a series of nuanced readings, Li demonstrates how postwar black novelists were at the forefront of what is now commonly understood as whiteness studies. Novels like Hurston's Seraph on the Suwanee and Wright's Savage Holiday, once read as abdications of the political imperative of African American literature, are revisited with an awareness of how whiteness signifies in multivalent ways that critique America's abiding racial hierarchies. These novels explore how this particular racial construction is freighted with social power and narrative meaning. Whiteness repeatedly figures in these texts as a set of expectations that are nearly impossible to fulfill. By describing characters who continually fail at whiteness, white life novels ask readers to reassess what race means for all Americans.

Along with its close analysis of key white life novels, Playing in the White: Black Writers, White Subjects also provides important historical context to understand how these texts represented the hopes and anxieties of a newly integrated nation.

Rethinking British Romantic History, 1770-1845
Porscha Fermanis, John Regan

Key Selling Points
- Twelve new essays from leading scholars are brought together to investigate the connections between history and literature
- Examines the interconnections between Romantic ideas of history and current ideas and practices
- Considers a wide variety of historical and aesthetic genres/forms from biographies and tours to painting and poetry
- Considers England, Ireland, Scotland, Wales, America, and India
A rethinking of the ways in which we understand the historical writing and the historical consciousness of the late eighteenth- and early nineteenth-century Britain.

Summary
Historians and literary scholars tend to agree that British intellectual culture underwent a fundamental transformation between 1770 and 1845. Yet they are unusually divided about the nature of that transformation and whether it is best understood as an epistemic rupture from, or a continuous dialogue with, the long eighteenth century. Rethinking British Romantic History, 1770-1845 rethinks the ways in which we understand the historical writing and the historical consciousness of late eighteenth- and early nineteenth-century Britain by arguing that British historicism developed largely in quasi and para-historical genres such as memoir, biography, verse, fiction, and painting, rather than in works of 'real' history. In a number of inter-related essays on changing generic forms, styles, methods, and standards, the collection demonstrates that the aesthetic developments associated with British literary 'Romanticism' not only intersected in mutually dependent ways with concurrent experiments and innovations in historical writing, but that these intersections forced an epistemological crisis—a deeply felt tension about the role of feeling and imagination in historical writing—that is still resonating in historiographical debates today. In exploring this theme, the volume also seeks to consider wider questions about the philosophy of history and literature, including questions of truth, evidence, professionalization, disciplinary strategies, and methodology. At its heart is the idea that literary texts and other artistic representations of history can have historical value, and should therefore be taken seriously by practitioners of history in all its forms.

Contributor Bio

Dr Porscha Fermanis is a Lecturer in Eighteenth-Century and Romantic Literature at University College Dublin. Her research interests include the relationship between Enlightenment and Romanticism; Romantic-era historiography and historical fiction; and Romantic poetry and poetics. She has published John Keats and the Ideas of the Enlightenment (Edinburgh University Press, 2009), and is currently working on A Concise History of Romanticism (with Carmen Casaliggi, forthcoming 2015) and a monograph entitled Romantic Pasts: Narrative History in Britain and Ireland, 1770-1850.

Dr John Regan is a Research Fellow at Clare Hall, University of Cambridge. His current research interests centre on the inter-relatedness of poetry, aesthetics, and historiography in the long eighteenth-century. Dr Regan has published on Scott's prosody, philosophical history and late Enlightenment antiquarianism, and the relations between versification and historiography in Byron.

The Oxford Handbook of John Donne
Jeanne Shami, Dennis Flynn, M. Thomas Hester

Key Selling Points

- Contributing scholars comprise many of the best established scholars in the field as well as emerging new scholars
- Paired insights of literary scholars and historians to establish biographical and historical contexts
- Focus on tools for Donne studies (practical, theoretical, conceptual)
- Comprehensive treatment of every genre in which Donne wrote

The Oxford Handbook of John Donne links past scholarship with current and future redefinitions to provide a distinctive response to Donne and the significance of his work, and forms an essential contribution to early modern studies.

Summary

The Oxford Handbook of John Donne presents scholars with the history of Donne studies and provides tools to orient scholarship in this field in the twenty-first century and beyond. Though profoundly historical in its orientation, the Handbook is not a summary of existing knowledge but a resource that reveals patterns of literary and historical attention and the new directions that these patterns enable or obstruct.

Part I -- Research resources in Donne Studies and why they they matter -- emphasizes the heuristic and practical orientation of the Handbook, examining prevailing assumptions and reviewing the specialized scholarly tools available. This section provides a brief evaluation and description of the scholarly strengths, shortcomings, and significance of each resource, focusing on a balanced evaluation of the opportunities and the hazards each offers.

Part II -- Donne's genres -- begins with an introduction that explores the significance and differentiation of the numerous genres in which Donne wrote, including discussion of the problems posed by his overlapping and bending of genres. Essays trace the conventions and histories of the genres concerned and study the ways in which Donne's works confirm how and why his "fresh invention" illustrates his responses to the literary and non-literary contexts of their composition.

Part III -- Biographical and historical contexts -- creates perspective on what is known about Donne's life; shows how his life and writings epitomized and affected important controversial issues of his day; and brings to bear on Donne studies some of the most stimulating and creative ideas developed in recent decades by historians of early modern England.

Part IV -- Problems of literary interpretation that have been traditionally and generally important in Donne Studies -- introduces students and researchers to major critical debates affecting the reception of Donne from the 17th through to the 21st centuries.

Contributor Bio

Jeanne Shami is Professor of English at the University of Regina, Saskatchewan, where she has taught since 1977. In 1992, she discovered a manuscript of a John Donne sermon corrected in his hand. She published a parallel-text edition of this sermon in 1996 (John Donne's 1622 Gunpowder Plot Sermon: A Parallel-Text Edition). Shami is the author of John Donne and Conformity in Crisis in the Late Jacobean Pulpit (D.S. Brewer, 2003) and Renaissance Tropologies: The Cultural Imagination of Early Modern England (Duquesne University Press, 2008). She is past president of the John Donne Society (2002-03) and has won its award for distinguished publication three times (1996, 2000, 2003).

Dennis Flynn is Professor of English at Bentley University and a past president of the John Donne Society. He has published numerous review and articles in Donne studies; authored John Donne and the Ancient Catholic Nobility; and co-edited three volumes in the ongoing Donne Variorum project as well as John Donne's Marriage Letters at The Folger Shakespeare Library.
M. Thomas Hester is Alumni Distinguished Professor of English at North Carolina State University and the author/editor of numerous books and articles on Renaissance literature---most recently, *Donne’s Marriage Letters* in the Folger Shakespeare Library (with Dennis Flynn and Robert P. Sorlien) and *Talking Renaissance Texts: Essays on the Humanist Tradition* (with Jeffrey Kahan). At present he is an editor of The Oxford Edition of the Prose Letters of Donne, with Dennis Flynn and Ernest W. Sullivan, II. He is also Editor of *The John Donne Journal*.

Picturing the Closet
Male Secrecy and Homosexual Visibility in Britain
Dominic Janes

Key Selling Points
- Uses the concept of the closet to give a degree of conceptual unity to the history of same-sex desire from the eighteenth-century to the present
- Moves beyond the idea that the 'homosexual' was constructed at the end of the 19th century, but that the building blocks were there long before
- Looks at a wide range of new source material, and applies a wide range of methodologies in case-studies so as to show how literary, art historical, philosophical, film studies, social history and other approaches can contribute to the development of queer readings of the past

Summary
To what extent did people think they could identify an 'obvious' sodomite before the construction of the homosexual as a type of person during the latter part of the nineteenth century? What role did secrecy and denial play in relation to the visual expression of same-sex desire before the term 'the closet' came into widespread use in the latter part of the twentieth century? And what, therefore, did sodomites/homosexuals/gays/queers look like in Britain in 1700, 1800, 1900 and 2000? Could they be spotted mincing down the street? Or were such as these just the flamboyant few whose presence conveniently drew attention away from the many others who wanted to appear 'normal'? These issues are not peripheral to the struggle of the last several decades for individual self-determination and self-expression. It was this set of cultural constructions that the pioneering writer Eve Kosofsky Sedgwick (1950–2009) attacked in her book Epistemology of the Closet as representing 'the defining structure for gay oppression in this century'. This book represents a visual culture counterpart to Sedgwick's study and aims, through the use of a series of interdisciplinary case-studies, to explore both the pre-history of the closet since the eighteenth century and its evolution through to the present day. Chapters explore key moments and issues within the British cultural experience and make pioneering use of a wide range of source materials ranging from art to fashion, literature, philosophy, theology, film and archival records.

Diverting Authorities
Experimental Glossing Practices in Manuscript and Print
Jane Griffiths

Key Selling Points
- Traces the early development, in English vernacular literature, of the under-researched form of the marginal gloss
- Breaches the artificial boundaries between medieval and renaissance studies and between manuscript and print studies
- Identifies new kinds of literary experimentation
- Discusses transmission and the material form of the text as influences on authorial theory

Summary
Diverting Authorities examines the glossing of a variety of fifteenth- and sixteenth-century texts by authors including Lydgate, Douglas, Chaloner, Baldwin, Bullein, Harington, and Nashe. It is concerned particularly with the use of glosses as a means for authors to reflect on the process of shaping a text, and with the emergence of the gloss as a self-consciously literary form. One of the main questions it addresses is to what extent the advent of print affects glossing practices. To this end, it traces the transmission of a number of glossed texts in both manuscript and print, but also examines glossing that is integral to texts written with print production in mind. With the latter, it focuses particularly on a little-remarked but surprisingly common category of gloss: glossing that is ostentatiously playful, diverting rather than directing its readers. Setting this in the context of emerging print conventions and concerns about the stability of print, Jane Griffiths argues that---like self-glossing in manuscript---such diverting glosses shape as well as reflect contemporary ideas of authorship and authority, and are thus genuinely experimental. The book reads across medieval-renaissance and manuscript-print boundaries in order to trace the emergence of the gloss as a genre and the way in which theories of authorship are affected by the material processes of writing and transmission.

Romancing Treason
The Literature of the Wars of Roses
Megan Leitch

Key Selling Points
• Reads a central work of late Middle English literature (Malory's Morte Darthur) from a new angle and in a new contemporary context
• Brings understudied prose romances to light
• Offers a new argument about the genre of Middle English romance
• Contributes to the reconsideration of periodisation across the medieval-renaissance 'divide'
• Foregrounds the idea of a literature of the Wars of the Roses, suggested by pervasive textual concerns with treason

Summary
Romancing Treason addresses the scope and significance of the secular literary culture of the Wars of the Roses, and especially of the Middle English romances that were distinctively written in prose during this period. Megan Leitch argues that the pervasive textual presence of treason during the decades c.1437-c.1497 suggests a way of conceptualising the understudied space between the Lancastrian literary culture of the early fifteenth century and the Tudor literary cultures of the early and mid-sixteenth century. Drawing upon theories of political discourse and interpellation, and of the power of language to shape social identities, this book explores the ways in which, in this textual culture, treason is both a source of anxieties about community and identity, and a way of responding to those concerns. Despite the context of decades of civil war, treason is an understudied theme even with regards to Thomas Malory's celebrated prose romance, the Morte Darthur. Leitch accordingly provides a double contribution to Malory criticism by addressing the Morte Darthur's engagement with treason, and by reading the Morte in the hitherto neglected context of the prose romances and other secular literature written by Malory's English contemporaries. This book also offers new insights into the nature and possibilities of the medieval romance genre and sheds light on understudied texts such as the prose Siege of Thebes and Siege of Troy, and the romances William Caxton translated from French. More broadly, this book contributes to reconsiderations of the relationship between medieval and early modern culture by focusing on a comparatively neglected sixty-year interval -- the interval that is customarily the dividing line, the 'no man's land' between well--but separately-studied periods in English literary studies.

The Oxford Handbook of Thomas Middleton
Gary Taylor, Trish Thomas Henley

Key Selling Points
- The largest and most ambitious collection of original criticism on Thomas Middleton - 'our other Shakespeare' - ever assembled
- 37 new essays on Middleton's comedies, tragedies, tragicomedies, history plays, masques, pageants, pamphlets, and poems
- Wide range of critical approaches, including feminism, stylistics, ecocriticism, and performance studies

Summary
The 37 essays in The Oxford Handbook of Thomas Middleton reinterpret the English Renaissance through the lens of one of its most original, and least understood, geniuses. Shakespeare's younger contemporary and collaborator, Middleton wrote modern comedies, tragedies, tragicomedies, history plays, masques, pageants, pamphlets, and poetry. The largest collection of new Middleton criticism ever assembled, this ambitious Handbook provides a comprehensive, in-depth, cutting-edge reaction to OUP's Collected Works of Thomas Middleton, winner of the 2009 MLA prize for editing, the first complete scholarly text of his voluminous and diverse oeuvre. The Handbook brings together an international, cross-generational team of experts to discuss all these genres through an equally diverse range of critical approaches, from feminism to stylistics, ecocriticism to performance studies, Aristotle to Zizek. Reinterpretations of canonical plays such as The Changeling, Women Beware Women, The Roaring Girl, and A Chaste Maid in Cheapside mingle with explorations of neglected or recently-identified works. Middleton's dramatic use of dance, music, and clothing, Middletonian adaptation, his relationships to the classical world and to continental Europe, his fascinating explorations of sexuality and religion, all receive attention. The collection also provides new essays on modern and postmodern reactions to Middleton, including recent Middleton revivals and films, and living artists' responses to his work-responses that range from the actresses who play Middleton's women to writers in various genres who have been inspired by his artistry. The Handbook establishes an authoritative foundation for the rapidly-expanding growth of interest in this extraordinarily protean, funny, moving, disturbing, and modern writer.

Contributor Bio
Gary Taylor is George Matthew Edgar Professor of English at Florida State University, founder of the History of Text Technologies program there, general editor (with Stanley Wells) of the Oxford edition of Shakespeare's Complete Works, and general editor (with John Lavagnino) of the Oxford edition of Middleton's Collected Works.

Trish Thomas Henley is an Assistant Professor of English and Comparative Literature at the University of Cincinnati. She has published in Exemplaria, Journal for Early Modern Cultural Studies, and Theatre Journal, and is currently finishing a book manuscript, Velvet Women Within: The Boy Actor and the Prostitute on the Early English Stage.

The Institutional Development of Business Schools
Andrew M. Pettigrew, Eric Cornuel, Ulrich Hommel

Key Selling Points
- The book deals with one of the largest and fastest growing parts of the international higher education system.
- The study of business schools is an academic, economic and organisational concern and the themes in the book engage with some of the most important concerns of business schools in their environments.
- Provides a review of some of the existing research themes on the study of business schools and offers a challenging research agenda on how to further develop our understanding of business schools.

Summary
In recent times, the fastest growing part of the higher education system has been business schools. With an established set of university based business schools in the USA since the early part of the 20th century, the growth since then has come in Europe between the 1960's and the 1990's, and in Australasia and Asia over the past 20 years. This has meant that, for example, in the UK by 2010 management and business studies staff made up 7% of the UK higher education sector and taught 14% of the students. In that same year, 1 in 8 undergraduates, 1 in 5 postgraduates and 1 in 4 international students were studying management business studies in UK business schools.

This growth has inevitably attracted the interest of those applauding and sceptical of these developments, and more scholarly literature on business schools has also developed. The purpose of this book is to assess the character and quality of selected research themes on the study of business schools and to articulate a forward looking research agenda on the study of business schools as institutions. The book provides novel empirical findings on the change and development of business schools, the causes and consequences of the ranking, and branding wars around business schools in particular and higher education systems more generally. The book also offers a stimulating critique of some of the intellectual, professional and economic challenges facing business schools in the contemporary world. The book's authors are internationally renowned scholars from the fields of organisation theory, strategic management, management development, and higher education management and policy.

Contributor Bio

Andrew Pettigrew is Professor of Strategy and Organization at the Said Business School, University of Oxford and Senior Golding Fellow, Brasenose College. He was Dean of the School of Management, University of Bath from 2003 to 2008 and before then held academic appointments at Yale University, London Business School, Warwick Business School and Harvard Business School where in 2001 he was a Visiting Professor. He also holds and Adjunct Professorship at BI, The Norwegian Business School. Andrew's research has pioneered the use of contextual and temporal analyses of organizational processes of strategy making, decision making, change and power. He is the author or editor of 16 books and has published in most of the top management journals in the world. He has been awarded many distinctions as a scholar. These include election as Distinguished Scholar of the Organization and Management Theory and Organization Development and Change Divisions of the Academy of Management.

Eric Cornuel is the Director General & CEO of EFMD (European Foundation for Management Development) in Brussels since 2000. He holds a degree of Sciences Po from IEP Paris, an MBA from HEC Graduate School of Management, Paris, and a DEA in strategy and management from Paris Nanterre University, together with a Doctoral Certificate in Strategy from HEC Graduate School of Management Paris and a PhD in management, written on international network organizations, from Paris Dauphine University.

Eric started his career as an entrepreneur by setting up a hydroelectric power plant in France when he was still a student. He was also Director of the HEC Institute for
Central and Eastern Europe (Paris). He then served as Dean of KIMEP, at the time the leading Business and Economics school in Central Asia, from 1997 to 1999. He was awarded an honorary professorship for his achievements there. From 1996 to the present, Eric Cornuel has been Affiliate Professor at HEC Graduate School of Management, Paris.

Ulrich Hommel is Professor and Chair of Corporate Finance & Higher Education Finance at EBS Business School, Germany. He holds a Ph.D. in Economics from the University of Michigan, Ann Arbor, and has completed his habilitation (Dr. habil) in Business Administration at the WHU, Germany. He is also an Adjunct Professor of Finance at Corvinus University of Budapest, Faculty of Business Administration. In the past, he has held visiting appointments at Stockholm University School of Business, Stephen M. Ross School of Business (University of Michigan), Krannert School of Management of Purdue University and Bordeaux Business School. He has been Dean and has subsequently held the position of Rector and Managing Director of EBS. He is currently also the Director of Research & Surveys at the European Foundation for Management Development (EFMD) in Brussels as well as one of the Senior Advisors for EFMD Quality Services administering the EQUIS and EPAS accreditation systems.

Provides a much-needed philosophical underpinning to our understanding of educational practices at different levels of teaching, learning and research

**Summary**
The book brings philosophical considerations to bear upon our understanding of the concept of education and concepts related to it. It seeks to answer questions such as: is education a unitary concept, or is it a cluster of concepts which are more or less related to one another? Are there values which are constitutive of the practice of education? Is moral education an independent variety of education, or is it necessary internal to all educational practice? The book also explores the notion of the autonomy of educational institutions as it is applied in the context of Indian higher education. This leads to an incisive consideration of the kind of research that educational institutions like our universities must sustain and promote. A discussion of accountability of institutions forms a necessary part of this consideration. Two other interesting areas of debate about higher education that the book considers are the division of academic labour as an interdisciplinary effort and problems associated with the great multiplicity of languages in our country and their use in teaching and research. The work, therefore, provides a much-needed philosophical underpinning to our understanding of educational practices at different levels of teaching, learning and research.

The Oxford Handbook of Witchcraft in Early Modern Europe and Colonial America
Brian P. Levack

Key Selling Points
- Thirty-two essays from leading scholars working in the rapidly developing field of witchcraft studies offer a broad geographical and chronological coverage of the history of witchcraft in early modern Europe and Colonial America
- Explores the historical literature and summarizes the current state of knowledge in the field
- Offers new interpretations of the material and suggestions for future research
- Takes into account the most recent scholarship in witchcraft studies

A collection of essays from leading scholars in the field that collectively study the rise and fall of witchcraft prosecutions in the various kingdoms and territories of Europe and in English, Spanish, and Portuguese colonies in the Americas.

Summary
The essays in this Handbook, written by leading scholars working in the rapidly developing field of witchcraft studies, explore the historical literature regarding witch beliefs and witch trials in Europe and colonial America between the early fifteenth and early eighteenth centuries. During these years witches were thought to be evil people who used magical power to inflict physical harm or misfortune on their neighbours. Witches were also believed to have made pacts with the devil and sometimes to have worshipped him at nocturnal assemblies known as sabbaths. These beliefs provided the basis for defining witchcraft as a secular and ecclesiastical crime and prosecuting tens of thousands of women and men for this offence. The trials resulted in as many as fifty thousand executions.

These essays study the rise and fall of witchcraft prosecutions in the various kingdoms and territories of Europe and in English, Spanish, and Portuguese colonies in the Americas. They also relate these prosecutions to the Catholic and Protestant reformations, the introduction of new forms of criminal procedure, medical and scientific thought, the process of state-building, profound social and economic change, early modern patterns of gender relations, and the wave of demonic possessions that occurred in Europe at the same time. The essays survey the current state of knowledge in the field, explore the academic controversies that have arisen regarding witch beliefs and witch trials, propose new ways of studying the subject, and identify areas for future research.

The History of Emotions
An Introduction
Jan Plamper, Keith Tribe

Key Selling Points
• The first book-length introduction to one of the fastest-growing fields of historical discipline
• Offers a synthesis of the work already carried out in the field and an agenda for the direction of future study
• Provides a multidisciplinary approach, engaging with anthropology, philosophy, sociology, linguistics, art history, political science, psychology, and the latest affective neuroscience
• Shows how genuine collaboration between history and neuroscience might be possible and thus moves beyond the binary debate between social constructionism and universalism
The first book-length introduction to one of the fastest-growing fields of historical discipline

Summary
The history of emotions is one of the fastest growing fields in current historical debate, and this is the first book-length introduction to the field, synthesizing the current research, and offering direction for future study. The History of Emotions is organized around the debate between social constructivist and universalist theories of emotion that has shaped most emotions research in a variety of disciplines for more than a hundred years: social constructivists believe that emotions are largely learned and subject to historical change, while universalists insist on the timelessness and pan-culturalism of emotions. In historicizing and problematizing this binary, Jan Plamper opens emotions research beyond constructivism and universalism; he also maps a vast terrain of thought about feelings in anthropology, philosophy, sociology, linguistics, art history, political science, the life sciences - from nineteenth-century experimental psychology to the latest affective neuroscience - and history, from ancient times to the present day.

Contributor Bio
Jan Plamper is Professor of History at Goldsmiths, University of London. He obtained a BA from Brandeis University and a PhD from the University of California, Berkeley, after which he taught at the University of Tubingen and from 2008 to 2012 was a Dilthey Fellow at the Center for the History of Emotions, Max Planck Institute for Human Development, in Berlin. He is co-editor, with Benjamin Lazier, of Fear: Across the Disciplines (2012); and co-editor, with Marc Elie and Schamma Schahadat, of Rossiiskaia imperia chuvstv: Podkhody k kul'turnoi istorii emotsiy [In the Realm of Russian Feelings: Approaches to the Cultural History of Emotions] (2010). He has also recently authored The Stalin Cult: A Study in the Alchemy of Power (2012).

Salmonella Infections, Networks of Knowledge, and Public Health in Britain, 1880-1975
Anne Hardy

Key Selling Points
- The first scholarly history of food infections, food poisoning, and Salmonella
- Examines the world of the public health laboratory, extending research on laboratory provision and practice into the twentieth century
- Indicates how the globalisation of trade has affected problems of food infection
- Shows that problems of fraud and poor hygiene in the food industries have a long history
The first scholarly history of food infections, food poisoning, and Salmonella

Summary
Salmonella infections were the most significant food poisoning organisms affecting human and animal health across the globe for most of the twentieth century. In this pioneering study, Anne Hardy uncovers the discovery of food poisoning as a public health problem and of Salmonella as its cause. She demonstrates how pathways of infection through eggs, flies, meat, milk, shellfish, and prepared foods were realised, and the roles of healthy human and animal carriers understood. This volume takes us into the world of the laboratories where Salmonella and their habits were studied - a world with competing interests, friendships, intellectual agreements and disagreements - and describes how the importance of different strains of these bacteria and what they showed about agricultural practices, global trade, and modern industrial practices came to be understood. Finally, Hardy takes us from unhygienic practice on fields and farms, to crucial sites of bacterial exchange in slaughterhouse and kitchen, where infections like Salmonella and Campylobacter enter the human food chain, and where every cook can make the difference between well-being and suffering in those whom they feed. This history is based on a case-study of the British experience, but it is set in the context of today's immense global problem of food-borne disease which affects all human societies, and is one of the most urgent and important problems in global public health.

Conversing with Antiquity
English Poets and the Classics, from Shakespeare to Pope
David Hopkins

Key Selling Points
- Emphasizes reception of the classics as trans-historical dialogue and conversation
- Challenges views of poetic translation as mere assimilation, colonization, or accommodation, identifying its role as creative criticism of the original
- Engages with debates about the formation of the canon of English literature, both in terms of the writers selected for study, and the areas of their works which are privileged in this regard

A selection of previously published articles, with a new Introduction, exploring the interaction between English poets of the seventeenth and eighteenth centuries and those of ancient Greece and Rome, and emphasizing the element of exchange and dialogue between the two.

Summary

Conversing with Antiquity collects, in a substantially revised and updated form, studies of the reception of the classics by English poets of the seventeenth and eighteenth centuries by one of the leading scholars in the field. A new Introduction locates the book's investigations within the context of current debates between aestheticians and cultural historians about the reception of classical culture. Where some recent studies have regarded English poets' dealings with the classics as acts of 'appropriation', or even 'colonialization', David Hopkins emphasizes the element of dialogic give-and-take in the relationship between these poets and their classical peers. He argues that, rather than simply 'updating' or 'assimilating' the classics to their own cultural norms, poets such as Abraham Cowley, Lucy Hutchinson, Thomas Creech, John Milton, John Dryden, and Alexander Pope engaged in trans-historical conversation with Greek and Roman poets, in which self-discovery and self-transcendence were as important as any simple 'accommodation' of ancient texts to modern tastes.

Universal Salvation in Late Antiquity
Porphyry of Tyre and the Pagan-Christian Debate
Michael Bland Simmons

Key Selling Points
- Offers a scholarly analysis of soteriological universalism from the perspective of pagan and Christian writers that places it in its broader political, social, religious, economic, and philosophical context
- Gives attention to the often-neglected "Theophany" of Eusebius
- A new study of Porphyrian soteriology, or the concept of the salvation of the soul, in the thought of Porphyry of Tyre

Summary
This study offers an in-depth examination of Porphyrian soteriology, or the concept of the salvation of the soul, in the thought of Porphyry of Tyre, whose significance for late antique thought is immense. Porphyry's concept of salvation is important for an understanding of those cataclysmic forces, not always theological, that helped convert the Roman Empire from paganism to Christianity. Porphyry, a disciple of Plotinus, was the last and greatest anti-Christian writer to vehemently attack the Church before the Constantinian revolution. His contribution to the pagan-Christian debate on universalism can thus shed light on the failure of paganism and the triumph of Christianity in late antiquity. In a broader historical and cultural context this study will address some of the issues central to the debate on universalism, in which Porphyry was passionately involved and which was becoming increasingly significant during the unprecedented series of economic, cultural, political, and military crises of the third century. As the author will argue, Porphyry may have failed to find one way of salvation for all humanity, he nonetheless arrived a hierarchical soteriology, something natural for a Neoplatonist, which resulted in an integrative religious and philosophical system. His system is examined in the context of other developing ideologies of universalism, during a period of unprecedented imperial crises, which were used by the emperors as an agent of political and religious unification. Christianity finally triumphed over its competitors owing to its being perceived to be the only universal salvation cult that was capable of bringing about this unification. In short, it won due to its unique universalist soteriology. By examining a rival to Christianity's concept of universal salvation, this book will be valuable to students and scholars of ancient philosophy, patristics, church history, and late antiquity.

The Language of Atoms
Performativity and Politics in Lucretius’ De rerum natura
W. H. Shearin

Key Selling Points
• Offers a new argument regarding Epicureanism, performativie language, and postmodern thought
• Expresses a better understanding of poetic language within Epicureanism

The Language of Atoms argues that Epicurean writing, specifically Lucretius', offers a theory of performativie language, of how language acts rather than describes.

Summary
While scholarship on Lucretius has looked to connect De rerum natura to its larger cultural and historical context, it has never turned to speech act theory in this quest. This omission is striking at least in so far as speech act theory was developed precisely as a way of locating language (including texts) within a theory of action. At its root speech act theory is about how language is part of history and acts within it, and it thus holds promise for addressing this long-standing scholarly concern. Further, as this book asserts, speech act theory is not some modern development that one may apply to De rerum natura but rather a theory native, at least in some respects, to Epicurus' school. The argument contends that a central problem in Epicurean semantics may be resolved if we allow that Epicurus (or his school) developed an understanding of performative language. It reads the fragmentary remains of Epicurus' writing on language against central texts of speech act theory such as J. L. Austin's How to Do Things with Words and Émile Benveniste's definition of the performative as a form of speaking in which the act of speech creates its own referent. The book moves on to consider the larger place of performativity within De rerum natura, and the poem's insight on the acts of promising and naming. Bridging critical theory and ancient philosophy, The Language of Atoms will engage scholars in a host of humanities disciplines, including Classics, Philosophy, and Comparative Literature.

Contributor Bio
W. H. Shearin is Assistant Professor of Classics, University of Miami and co-editor of Dynamic Reading (OUP 2012).

Quotes
"One of the most exciting fields currently in Classics is the study of ancient philosophical texts not simply as systems of thought but as dynamic historical and discursive phenomena that exploit the social practices and linguistic resources of the culture in which they are produced. In his rigorous exploration of the performative dimension of the De rerum natura, Shearin takes the study of the language of Lucretius to a new level of critical sophistication, and offers a fresh and compelling understanding of the poem's claims to a practical, therapeutic function." --Duncan Kennedy, University of Bristol

Children in the Hellenistic World
Statues and Representation
Olympia Bobou

Key Selling Points
- Provides an introduction to history, sociology, and art history of childhood
- Offers an examination of statues by location
- Includes an analysis of iconography of children
- Fully illustrated throughout with catalogue

Bobou offers a systematic analysis of ancient Greek statues of children from the sanctuaries, houses, and necropoleis of the Hellenistic world in order to understand their function and meaning.

Summary
In this volume, Bobou offers a systematic analysis of ancient Greek statues of children from the sanctuaries, houses, and necropoleis of the Hellenistic world in order to understand their function and meaning. Comparing images of children in reliefs, terracotta figurines, and marble statues, she shows that children and childhood became more prominent in the visual material record from the late fifth century BC, a time during which children became a matter of parental and state concern.

Looking at the literary and epigraphical evidence, Bobou argues that statues of children were important for transmitting civic values to future citizens, serving as paradigms of behaviour and standing testament to the strength and future of a community. Created by adults, the statues reveal much about adult ideology and values during this period, and the expectations and hopes placed on children. The combination of iconographic studies and examination of the original locations in which statues were placed highlights the importance of children in Hellenistic society as well as their connection with specific areas of civic and social life.

Religion and Society in Ancient Thessaly
Maria Mili

Summary
The fertile plains of the ancient Greek region of Thessaly stretch south from the shadow of Mount Olympus. Thessaly's numerous small cities were home to some of the richest men in Greece, their fabulous wealth counted in innumerable flocks and slaves. It had a strict oligarchic government and a reputation for indulgence and witchcraft, but also a dominant position between Olympus and Delphi, and a claim to some of the greatest Greek heroes, such as Achilles himself. It can be viewed as both the cradle of many aspects of Greek civilization and as a challenge to the dominant image of ancient Greece as moderate, rational, and democratic.

Religion and Society in Ancient Thessaly explores the issues of regionalism in ancient Greek religion and the relationship between religion and society, as well as the problem of thinking about these matters through particular bodies of evidence. It discusses in depth the importance of citizenship and of other group-identities in Thessaly, and the relationship between cult activity and political and social organization. The volume investigates the Thessalian particularities of the evidence and the role of religion in giving the inhabitants of this land a sense of their identity and place in the wider Greek world, as well as the role of Thessaly in the ancients' and moderns' understanding of Greekness.

**Callimachus**

**The Hymns**

Susan A. Stephens

**Key Selling Points**

- First ever commentary in English on all six of Callimachus' hymns

This volume offers a text and commentary of all six of Callimachus' hymns, as well as interpretive essays on each hymn that integrate what has been the dominant paradigm-intertextuality--into a broader focus on Callimachus' context.

**Summary**

Callimachus was arguably the most important poet of the Hellenistic age, for two reasons: his engagement with previous theorists of poetry and his wide-ranging poetic experimentation. Of his poetic oeuvre, which exceeded what we now have of Theocritus, Aratus, Posidippus, and Apollonius combined, only his six hymns and around fifty of his epigrams have survived intact. His enormously influential Aetia, the collection of Iambi, the Hecale, and all of his prose output have been reduced to a handful of citations in later Greek lexica and handbooks or papyrus fragments. In recent years excellent commentaries and synthetic studies of the Aetia, the Iambi, and the Hecale have appeared or are about to appear. But there is no modern study in English of the collection of hymns. And while there are excellent commentaries in English on three of the hymns (Apollo, Athena, Demeter), the commentaries on Zeus and on Delos are limited in scope, and there is no commentary at all on the Artemis hymn. Synthetic studies in English for the most part treat only one hymn, not the collection, and tend to focus on Callimachus' intertextual relationships with his predecessors and/or his influence on Roman poetry. Yet recent work is requiring scholars to broaden their perspective and to consider Callimachus' religious, civic, and geo-political contexts much more systematically in attempting to understand the hymns. A further incentive is that apart from the Homeric and Orphic hymns, Callimachus' are the only other hymns that have survived intact; those written in earlier periods are now reduced to fragments. For these reasons a study of the six hymns together is a desideratum. An additional reason is that Callimachus' collection of six hymns is very likely to have been an authorially arranged poetry book, quite possibly the earliest such book that we have intact; therefore, it allows a unique perspective on the evolution of the form.

This volume offers a text and commentary of all six hymns for advanced students of classics and classical scholars, as well as interpretive essays on each hymn that integrate what has been the dominant paradigm-intertextuality--into a broader focus on Callimachus' context. Her introduction treats the transmission of the hymns, the potential for and likelihood of the Homeric hymns as models, the hymns as a poetry book, their language and meter (especially in light of recent work done on this topic), performance practices, and their relationship to cult, court, local geographies, and panhellenic sanctuaries. For each hymn Stephens presents the Greek text, a translation, and a brief commentary containing important information or parallels for interpretation.

Pindar and the Construction of Syracusan Monarchy in the Fifth Century B.C.
Kathryn A. Morgan

Key Selling Points
• Offers a systematic integration of Pindar's odes for Hieron of Syracuse into the larger political and material context of early fifth-century Sicily.

This book situates Pindar's victory odes for Hieron of Syracuse within the tumultuous context of Syracuse and Greece in the early fifth century BC. It combines exploration of the material and musical culture of Hieron's Syracuse with literary analysis to demonstrate how Pindar's poetry manipulates epinician form to effect political legitimation.

Summary
This groundbreaking book attempts a fully contextualized reading of the poetry written by Pindar for Hieron of Syracuse in the 470s BC. It argues that the victory odes and other occasional songs composed by Pindar for the Sicilian tyrant were part of an extensive cultural program that included athletic competition, coinage, architecture, sanctuary dedication, city foundation, and much more. In the tumultuous years following the Persian invasion of Greece in 480, elite Greek leaders and their cities struggled to capitalize on the Greek victory and to define themselves as free peoples who triumphed over the threat of Persian monarchy. Pindar's victory odes are an important contribution to Hieron's goal of panhellenic pre-eminence, redescribing contemporary tyranny as an instantiation of golden-age kingship and consonant with best Greek tradition. In a delicate process of cultural legitimation, the poet's praise deploys athletic victories as a signs of more general preeminence. Three initial chapters set the stage by presenting the history and culture of Syracuse under the Deinomenid tyrants, exploring issues of performance and patronage, and juxtaposing Hieron to rival Greek leaders on the mainland. Subsequent chapters examine in turn all Pindar's preserved poetry for Hieron and members of his court, and contextualizes this poetry by comparing it to the songs written for Hieron by Pindar's poetic contemporary, Bacchylides. These odes develop a specifically "tyrannical" mythology in which a hero from the past enjoys unusual closeness with the gods, only to bring ruin on him or herself by failing to manage this closeness appropriately. Such negative exemplars counterbalance Hieron's good fortune and present the dangers against which he must (and does) protect himself by regal virtue. The readings that emerge are marked by exceptional integration of literary interpretation with the political/historical context.

Euripides: Iphigenia in Tauris
L. P. E. Parker

Key Selling Points
• Up-to-date edition of one of Greek tragedian Euripides' most frequently studied plays
• Offers a comprehensive introduction which covers the mythological and literary background, the play's reception, the dating of the play, and the metre and transmission of the text
• Provides an extensive commentary which includes notes on the play's vocabulary and syntax to assist readers

Summary
Euripides' Iphigenia in Tauris is the tale of how two children of Agamemnon whose lives have been blighted in youth are brought together for mutual salvation and for the healing of the calamitous house of Pelops. Aristotle makes more complimentary references to the play than any other Attic tragedy, apart from Sophocles' Oedipus the King, and even less favourable critics recognize the extraordinary skill of its construction.

Comprising an introduction, the Greek text, and commentary, this volume is designed to be useful to a wide range of readers, facilitating a close and accurate reading of one of Euripides' more frequently studied plays. The introduction explores earlier and later re-interpretations of the story of Iphigenia, the adoption of narrative motifs in New Comedy, Roman comedy, and the ancient novel, differing critical assessments, and more technical information on metre and textual transmission. The commentary features guidance on vocabulary and syntax, while more advanced material, including textual discussion, is included in parenthesis.

Key Selling Points
- Up-to-date edition of one of Greek tragedian Euripides' most frequently studied plays
- Offers a comprehensive introduction which covers the mythological and literary background, the play's reception, the dating of the play, and the metre and transmission of the text
- Provides an extensive commentary which includes notes on the play's vocabulary and syntax to assist readers

Summary
Euripides' Iphigenia in Tauris is the tale of how two children of Agamemnon whose lives have been blighted in youth are brought together for mutual salvation and for the healing of the calamitous house of Pelops. Aristotle makes more complimentary references to the play than any other Attic tragedy, apart from Sophocles' Oedipus the King, and even less favourable critics recognize the extraordinary skill of its construction.

Comprising an introduction, the Greek text, and commentary, this volume is designed to be useful to a wide range of readers, facilitating a close and accurate reading of one of Euripides' more frequently studied plays. The introduction explores earlier and later reinterpretations of the story of Iphigenia, the adoption of narrative motifs in New Comedy, Roman comedy, and the ancient novel, differing critical assessments, and more technical information on metre and textual transmission. The commentary features guidance on vocabulary and syntax, while more advanced material, including textual discussion, is included in parenthesis.

The Laws of Ancient Crete, c.650-400 BCE
Michael Gagarin, Paula Perlman

Key Selling Points
- Offers comprehensive coverage of all the most significant ancient Cretan laws, from c.650-400 BCE
- Provides English translations of all Greek text
- Features detailed introduction to archaic and classical Crete
- Includes full epigraphical details of the more recently discovered texts

Summary
This volume presents the Greek text of approximately 200 stone inscriptions, which detail the laws of ancient Crete in the archaic and classical periods, c.650-400 BCE. The texts of the inscriptions, many of which are fragmentary and relatively unknown, are accompanied by an English translation and also two commentaries; one focused on epigraphical and linguistic issues, and the other, requiring no knowledge of Greek, focused on legal and historical issues.

The texts are preceded by a substantial introduction, which surveys the geography, history, writing habits, social and political structure, economy, religion, and law of Crete in this period.

Early Greek Relative Clauses
Philomen Probert

Key Selling Points
- Investigates not only relative clause syntax and semantics but also ways in which these are exploited for literary and non-literary purposes
- Provides detailed philological analysis of classical texts
- Based on a well-defined and substantial corpus of data from a wide range of genres
- Draws on recent work in linguistic theory and typology

Summary
Early Greek Relative Clauses contributes to an old debate currently enjoying a revival: should we expect languages spoken a few thousand years ago, such as Proto-Indo-European, to be less well-equipped than modern languages when it comes to subordinate clauses? Early Greek relative clauses provide a test case for this problem. Early Greek uses several kinds of relative clause, but all these are usually thought to come from one, or at most two, prehistoric types. In a new look at the evidence, this book finds that a rich variety of relative clause types has been in place for a considerable time.

The reconstruction of prehistoric linguistic stages requires detailed work on the individual languages descending from them. A substantial part of the book is therefore devoted to a new look at the relative clause systems found in a wide variety of early Greek texts. It emerges that the same basic system is in use across all these texts. Different kinds of relative clause predominate in different kinds of text, however, because relative clause syntax and semantics interact with the needs of different kinds of text.

Considering material as diverse as the Homeric poems, laws inscribed in stone on the island of Crete, and the philosophical prose of Heraclitus, the discussion remains clear and straightforward as Probert considers the uses and histories of different relative clause types.

Proxeny and Polis
Institutional Networks in the Ancient Greek World
William Mack

Key Selling Points
- Offers a comprehensive treatment in English of proxeny
- Makes an important contribution both to the study of interstate institutions and the interpretation of the epigraphic record
- Provides translation of all Greek text and transliteration of key terms

Summary
Known from ancient authors such as Herodotus, Thucydides, and Plato, and more than 2,500 inscriptions, proxeny (a form of public guest-friendship) is the best attested interstate institution of the ancient world. Proxeny and Polis offers a comprehensive re-examination of our evidence for this important Greek institution and uses it to examine the structure and dynamics of the interstate system of the Greek world, and the way in which these were transformed under the Roman Empire.

Based on a detailed analysis of the function of the formulaic language of honorific decrees, this volume presents a new reconstruction of proxeny, and explores the way in which interstate institutions shaped the behaviour of individuals and communities in the ancient world. It draws on other material which has not been systematically exploited to reconstruct the proxeny networks of Greek city-states. This material reveals the extraordinary density of formal interconnections which characterized the ancient Greek world before the age of Augustus and reflected both trade and political contacts of different kinds.

It also traces the disappearance of both proxeny and the broader institutional system of which it was part. Drawing on nuanced analysis of quantitative trends in the epigraphic record, it argues that the Greek world underwent a profound reorientation by the time of the Roman Principate, which fundamentally altered how Greek cities viewed relations with each other.

**Law, Power, and Imperial Ideology in the Iconoclast Era**
c.680-850
M. T. G. Humphreys

**Key Selling Points**
- Sheds new light on a crucial period within Byzantine studies which is seldom explored and little understood
- Investigates numerous legal texts of the period in terms of their relationship to fluctuating imperial power structures and ideology
- Offers an opportunity to compare similar themes occuring during the same period in the west

Explores Roman law and canon law to chart the various responses to the turbulent years of the Iconoclast era, c.680-850, which saw the rise of Islam and the emergence of medieval Byzantium from the wreckage of ancient Rome.

**Summary**
Law was central to the ancient Roman's conception of themselves and their empire. Yet what happened to Roman law and the position it occupied ideologically during the turbulent years of the Iconoclast era, c.680-850, is seldom explored and little understood. The numerous legal texts of this period, long ignored or misused by scholars, shed new light on this murky but crucial era, when the Byzantine world emerged from the Roman Empire.

*Law, Power, and Imperial Ideology in the Iconoclast Era* uses Roman law and canon law to chart the various responses to these changing times, especially the rise of Islam, from Justinian II's Christocentric monarchy to the Old Testament-inspired Isaurian dynasty. The Isaurian emperors sought to impose their control and morally purge the empire through the just application of law, sponsoring the creation of a series of concise, utilitarian texts that punished crime, upheld marriage, and protected property. This volume explores how such legal reforms were part of a reformulation of ideology and state structures that underpinned the transformation from the late antique Roman Empire to medieval Byzantium.

State Power in Ancient China and Rome
Walter Scheidel

Key Selling Points
• Identifies and seeks to explain similarities and differences in the character of the largest ancient empires.
• Brings together separate areas of historical scholarship and promotes a new way of doing ancient history.

In a series of pioneering comparative studies, leading historians break new ground by exploring government and power relations in the two largest empires of the ancient world. They shed new light on key issues such as elite formation, the rise of bureaucracies, and the determinants of urban development.

Summary
Two thousand years ago, the Qin/Han and Roman empires were the largest political entities of the ancient world, developing simultaneously yet independently at opposite ends of Eurasia. Although their territories constituted only a small percentage of the global land mass, these two Eurasian polities controlled up to half of the world population and endured longer than most pre-modern imperial states. Similarly, their eventual collapse occurred during the same time.

The parallel nature of the Qin/Han and Roman empires has rarely been studied comparatively. Yet here is a collection of pioneering case studies, compiled by Walter Scheidel, that sheds new light on the prominent aspects of imperial state formation. This essential new volume builds on the foundation of Scheidel's Rome and China (2009), and opens up a comparative dialogue among distinguished scholars. They provide unique insights into the complexities of imperial rule, including the relationship between rulers and elite groups, the funding of state agents, the determinants of urban development, and the rise of bureaucracies. By bringing together experts in each civilization, State Power in Ancient China and Rome provides a unique forum to explore social evolution, helping us further understand government and power relations in the ancient world.

Rome, Polybius, and the East
the late Peter Sidney Derow, Andrew Erskine, Josep...

Key Selling Points
- Major contribution to the understanding of Roman imperialism and the Greek historian Polybius by a leading specialist in the field
- Collects together and makes easily accessible significant articles
- Brings together the lifetime work of a leading ancient historian
This volume offers a collection of seventeen of the more important papers written by the late Peter Derow during the course of his career.

Summary
Rome, Polybius, and the East offers a collection of seventeen of the more important papers written by the late Peter Derow, Hody Fellow and Tutor in Ancient History at Wadham College, Oxford, during the course of his career.

With a detailed introduction by the editors, the papers make up a distinctive and influential body of work—essential reading for anyone interested in Roman imperialism or Polybius, and Rome's rise to Mediterranean power. They include Derow's classic survey articles on the Roman conquest of the East, the great Greek historian Polybius, his investigations of the Roman calendar, and several papers on epigraphy. It also contains a bibliography of Derow's work.

The Oxford Handbook of Roman Sculpture
Elise A. Friedland, Melanie Grunow Sobocinski, Ela...

Key Selling Points
- Includes material from the early republican period through late antiquity
- Considers sculpture in Rome and in regions dominated by the Roman Empire, including Italy, Gaul, Spain, the Northern European provinces, North Africa, Greece, Asia Minor, Egypt, and the Near East
- Emphasis on new technical, scientific, literary, and theoretical approaches to the study of Roman sculpture

The Oxford Handbook of Roman Sculpture synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of art history, classical archaeology, and Roman studies.

Summary
The study of Roman sculpture has been an essential part of the disciplines of Art History and Classics since the eighteenth century. Famous works like the Laocoön, the Arch of Titus, and the colossal portrait of Constantine are familiar to millions. Again and again, scholars have returned to sculpture to answer questions about Roman art, society, and history. Indeed, the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography, and a variety of artistic media, formats, sizes, and functions. Exciting new theories, methods, and approaches have transformed the specialized literature on the subject in recent decades.

Rather than creating another chronological catalogue of representative examples from various periods, genres, and settings, The Oxford Handbook of Roman Sculpture synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of Art History, Classical Archaeology, and Roman Studies. This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature. The Oxford Handbook of Roman Sculpture conveniently presents new technical, scientific, literary, and theoretical approaches to the study of Roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well-known works in the corpus. The contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style. Authoritative, innovative, and up-to-date, The Oxford Handbook of Roman Sculpture will remain an invaluable resource for years to come.

Australia and the War in the Air: Volume I - The Centenary History of Australia and the Great War
Michael Molkentin

Key Selling Points
• Offers new perspectives, using fresh material, on Australia's involvement in the Great War.
• Covers aspects of the topic neglected elsewhere in the literature - such as Imperial involvement in the air war, training, organisation and administration.
• Provides new insights into the First World War in the air to both Australian and international readers; it revises the account given in the British and Australian official histories.
• Illustrated with maps and photographs, some of which have not been published previously, to assist readers in following the progress of campaigns.

Drawing on archival records in Australasia, Europe and North America, Australia and the War in the Air provides a fresh perspective on Australia's involvement in the Great War and a revaluation of air power's early influence on warfare.

Summary
Drawing on archival records in Australasia, Europe and North America, Australia and the War in the Air provides a fresh perspective on Australia's involvement in the Great War and a revaluation of air power's early influence on warfare.

From the earliest days of the Great War, Australians volunteered to fight in the air - warfare's newest arena, and one that would transform the nature of military operations. In the squadrons of the Australian Flying Corps and with Britain's flying services, Australian airmen fought in campaigns that spanned the length and breadth of the First World War; between 1914 and 1918 they served in the Middle East, the Mediterranean and on the Western Front. By 1919 over 4000 Australians had served with the empire's flying units. Though modest compared to some of the other British dominions, Australia's part had been the most conspicuous. Whereas the other dominions had opted to provide manpower to serve in Britain's flying services, the Commonwealth's insistence on a distinctly national contribution ensured recognition for Australia's support to the empire's effort in the air.

This book examines Australia's role in history's first major air war. Unlike previous accounts, which focus on the airmen of the Australian Flying Corps in isolation, this study conceives the Australian part as one of an imperial - and international - whole. In addition to using Australian involvement as a case study to analyse the impact air power had on military operations, this study also addresses aspects of organisation, training, administration and command, as well as the imperial politics and strategic issues that contextualised dominion participation in the war.

Furphies and Whizz-bangs: Anzac Slang from the Great War
Amanda Laugesen

Key Selling Points
• Tells the story of a different, more human side of the First World War through the exploration of the slang words used by Australian soldiers in this war.
• The book is divided into thematic chapters covering topics such as Languages, Enemies and Friends, Trench and Battlefield and Weapons and Technology of War. This book illuminates Australian soldiers' voices, feelings and thoughts, through exploration of the words and language used during the Great War.

Summary
This book illuminates Australian soldiers' voices, feelings and thoughts, through exploration of the words and language used during the Great War. It is mostly concerned with slang, but there were also new words that came into Standard English during the war with which Australians became familiar. The book defines and explains these words and terms, provides examples of their usage by Australian soldiers and on the home front that provides insight into the experiences and attitudes of soldiers and civilians, and it draws out some of the themes and features of this language to provide insight into the social and cultural worlds of Australian soldiers and civilians.

Saxo Grammaticus (Volume II)
Gesta Danorum: The History of the Danes
Karsten Friis-Jensen, Peter Fisher

Key Selling Points
• The first complete translation in any language
• This volume is the most scholarly Latin text of Saxo Grammaticus, which is one of the most important sources in Medieval Danish history
• Provides a very readable account of early Danish legend and history in a lively modern English translation
• Engages with Saxo's own narrative skill and lively sense of humour
• Saxo is the first author to give a full account of Hamlet, corresponding surprisingly closely with Shakespeare's play

This volume is the most scholarly Latin text of Saxo Grammaticus, which is one of the most important sources in Medieval Danish history

Summary
Saxo was probably a canon of Lund Cathedral, at that period a Danish cathedral, and lived at the end of the twelfth century. He was in the service of Archbishop Absalon, who encouraged him to write a history of his own country from the beginnings up to his own time, with a strong Christian bias. Starting with the myths and heroic tales of primitive Scandinavia, he devoted the first nine of his sixteen books to legendary material before dealing with the first kings of the Viking age and finished in 1285, after relating the earlier exploits of King Cnut Valdemarsson. The activities of the Danish kings were intimately bound up with the monarchies of Norway and Sweden; Cnut the Great, one of Saxo's heroes, whose empire stretched as far as Britain and Iceland, was ruler of both these countries. In the last books Saxo took particular concern to describe the campaigns of Valdemar the Great and his warrior archbishop, Absalon, against the Wends of North Germany.

The work is a prosimetrum, that is, in six of the first nine books he inserts poems, which are intended to parallel specimens of old Danish heroic poetry in Latin metres. Saxo's Latin prose style is often complex, based as it is on models like Valerius Maximus and Martianus Capella, but he is a lively and compelling story-teller, often displaying a rather sly sense of humour, and an interest in the supernatural. He is the first author to give a full account of Hamlet, whose adventures he relates at some length, the elements of which in a great many respects correspond surprisingly closely with the characters and incidents of Shakespeare's play.

Volume II of Saxo Grammaticus contains books 11-16 of Saxo's work, mainly dealing with the history of the first Danish kings.

Contributor Bio

Karsten Friis-Jensen was born in Copenhagen, and educated at the University there, where he became a teacher from 1985 and a senior lecturer from 1990 in the Institute of Greek and Latin, now a part of the Saxo Institute. Previously he had worked at the Thesaurus Linguae Latinae in Munich from 1983 to 1985. He was a member of the Royal Danish Academy of Sciences and Letters from 1997 onwards. His main field of study was Medieval Latin literature, which culminated in a scholarly edition of Saxo Grammaticus's Gesta Danorum, published in 2005, with a Danish translation by Peter Zeeberg. His other principal area of research was the medieval reception of the Roman poet Horace, and he directed the work on Horace for the Catalogus translationum et commentariorum in Toronto.

Peter Fisher was born in Sheffield, and was educated there and later at Exeter College, Oxford, where he read Classics and English. He continued as a teacher in these subjects in Welwyn Garden City and subsequently as a lecturer at what is now Anglia Ruskin University in Cambridge. During this time he wrote an M. Phil. thesis on Christopher Marlowe with Warwick University. Since the late 1970s he has translated and published a number of historical and medical texts from Medieval and Renaissance Latin, mainly Scandinavian. A keen amateur clarinettist, he regularly plays in local chamber groups.
and orchestras, with whom he has performed several concertos. He is married and has four children.

Martin Delrio
Demonology and Scholarship in the Counter-Reformation
Ian Machielsen

Key Selling Points
- First biography of an early modern demonologist
- Sheds new light on both early modern witchcraft belief and the Counter-Reformation
- Comprehensive introduction gives a clear historiographical survey of recent works on witchcraft, especially demonology
- Develops a wider argument about the significance of Delrio's writings
- Sheds light on an important period in history when the worlds of humanism and Catholic Reform collided

Martin Delrio, author of Disquisitiones magicae (Investigations into Magic, 1599-1600) probably never persecuted or met a witchcraft suspect, yet his name is a byword for credulity and cruelty. Jan Machielsen recovers the lost world of Delrio's scholarship set in the context of the Catholic Reformation, rather than the straitjacket of demonology.

Summary
If the Jesuit Martin Delrio (1551-1608) is remembered at all today, it is for his Disquisitiones magicae (1599-1600), a voluminous tome on witchcraft and superstition which was reprinted numerous times until 1755.

The present volume recovers the lost world of Delrio's wider scholarship. Delrio emerges here as a figure of considerable interest not only to historians of witchcraft but to the broader fields of early modern cultural, religious and intellectual history as well. As the editor of classical texts, notably Senecan tragedy, Delrio had a number of important philological achievements to his name. A friend of the Flemish philosopher Justus Lipsius (1547-1606) and an enemy of the Huguenot scholar Joseph Scaliger (1540-1609), he played an important part in the Republic of Letters and the confessional polemics of his day. Delrio's publications after his admission to the Society of Jesus (the Disquisitiones included) marked a significant contribution to the intellectual culture of the Counter-Reformation. Catholic contemporaries accordingly rated him highly, but later generations proved less kind.

As attitudes towards witchcraft changed, the context in which the Disquisitiones first emerged disappeared from view and its author became a byword for credulity and cruelty. Recovering this background throws important new light on a period in history when the worlds of humanism and Catholic Reform collided. In an important chapter, the book demonstrates that demonology, in Delrio's hands, was a textual science, an insight that sheds new light on the way witchcraft was believed in. At the same time, the book also develops a wider argument about the significance of Delrio's writings, arguing that the Counter-Reformation can also be seen as a textual project and Delrio's contribution to it as the product of a mindset forged in its fragile borderlands.

The Oxford Illustrated History of the Reformation
Peter Marshall

Key Selling Points
- The story of a seismic event in world history - one which laid the foundations for the plural and conflicted world we now inhabit
- Covers both Protestant and Catholic reform movements - as well as the more radical off-shoots of Reformation
- Shows how Christianity became a truly global religion - spreading beyond Europe to Asia and the Americas
- Traces the Reformation from its explosive beginnings through to its profound legacy for the modern world - social, cultural, political, and sexual
The Oxford Illustrated History of the Reformation is the story of one of the truly epochal events in world history - and how it helped create the world we live in today

Summary
The Reformation was a seismic event in history, whose consequences are still working themselves out in Europe and across the world. The protests against the marketing of indulgences staged by the German monk Martin Luther in 1517 belonged to a long-standing pattern of calls for internal reform and renewal in the Christian Church. But they rapidly took a radical and unexpected turn, engulfing first Germany and then Europe as a whole in furious arguments about how God's will was to be discerned, and how humans were to be 'saved'.

However, these debates did not remain confined to a narrow sphere of theology. They came to reshape politics and international relations; social, cultural, and artistic developments; relations between the sexes; and the patterns and performances of everyday life. They were also the stimulus for Christianity's transformation into a truly global religion, as agents of the Roman Catholic Church sought to compensate for losses in Europe with new conversions in Asia and the Americas.

Covering both Protestant and Catholic reform movements, in Europe and across the wider world, this beautifully illustrated volume tells the story of the Reformation from its immediate, explosive beginnings, through to its profound longer-term consequences and legacy for the modern world. The story is not one of an inevitable triumph of liberty over oppression, enlightenment over ignorance. Rather, it tells how a multitude of rival groups and individuals, with or without the support of political power, strove after visions of 'reform'. And how, in spite of themselves, they laid the foundations for the plural and conflicted world we now inhabit.

On the Edge of the Cold War
American Diplomats and Spies in Postwar Prague
Igor Lukes

Key Selling Points
- Based on new archival documents from the United States and Prague and offers personal testimonies of U.S. diplomats and intelligence officers who served in the U.S. Embassy,
- Highly narrative account, featuring colorful portraits of key players.
- Author is respected senior scholar of Czech history.
This book illuminates the early stages of the Cold War in postwar Prague

Summary
In 1945, both the U.S. State Department and U.S. Intelligence saw Czechoslovakia as the master key to the balance of power in Europe and as a chessboard for the power-game between East and West. Washington believed that the political scene in Prague was the best available indicator of whether the United States would be able to coexist with Joseph Stalin's Soviet Union.

In this book, Igor Lukes illuminates the end of World War II and the early stages of the Cold War in Prague, showing why the United States failed to prevent Czechoslovakia from being absorbed into the Soviet bloc. He draws on documents from archives in the United States and the Czech Republic, on the testimonies of high ranking officers who served in the U.S. Embassy from 1945 to 1948, and on unpublished manuscripts, diaries, and memoirs.

Exploiting this wealth of evidence, Lukes paints a critical portrait of Ambassador Laurence Steinhardt. He shows that Steinhardt's groundless optimism caused Washington to ignore clear signs that democracy in Czechoslovakia was in trouble. Although U.S. Intelligence officials who served in Prague were committed to the mission of gathering information and protecting democracy, they were defeated by the Czech and Soviet clandestine services that proved to be more shrewd, innovative, and eager to win. Indeed, Lukes reveals that a key American officer may have been turned by the Russians. For all these reasons, when the Communists moved to impose their dictatorship, the U.S. Embassy and its CIA section were unprepared and powerless.

The fall of Czechoslovakia in 1948 helped deepen Cold War tensions for decades to come. Vividly written and filled with colorful portraits of the key participants, On the Edge of the Cold War offers an authoritative account of this key foreign policy debacle.

Contributor Bio
Igor Lukes is University Professor of History and International Relations at Boston University. He is the author of Czechoslovakia between Stalin and Hitler: The Diplomacy of Edvard Benes in the Thirties and Rudolf Slansky: His Trials and Trial.

Quotes
"Vividly told." --Kieran Williams, Times Literary Supplement

"Lukes's work is more than a study of postwar events in one country in Eastern Europe caught up in the rivalry between Washington and Moscow. He makes a significant contribution to the field of cold war studies. Although the Communist takeover in Czechoslovakia was unique and delayed compared to other East European countries, Lukes gives insight not just into the role of U.S. policy, but also into Moscow's reactions and its perceptions of Washington as well as what was happening in the Prague government. Will be the major account of this period in U.S.-Czechoslovak relations for many years to come."--Paul Kubricht, H-Net

"Lukes convincingly backs up his arguments with fascinating depictions of the personalities involved, which are detailed and penetrating but never unkind or unconscious of attractive traits. Highly Recommended." --CHOICE
"As Igor Lukes shows in On the Edge of the Cold War, his engrossing chronicle of the days when Czechoslovakia hung in the balance, the country's place behind the Iron Curtain was anything but foreordained...an invaluable account." --Wall Street Journal
"This is a surprisingly good book. It is surprising because it could have been a narrowly focused dry scholarly diplomatic history. Instead, On the Edge of the Cold War provides a brisk narrative that includes lively portraits of American diplomats and spies and raises the question of whether America could have saved Czechoslovakia from Communist takeover in 1948." --H-Diplo

"Though full of thrilling detail, this excellent history of the failure of American diplomats and spies to support Czechoslovak democracy before the communist takeover is ultimately quite sobering. Deep research in both American and Czech archives reveals some of the lessons that Americans had to learn in order to become a great power." --Timothy Snyder, author of Bloodlands

"Espionage and intelligence-gathering have often been described as the 'missing dimension' in the historiography of the Cold War. Igor Lukes's fascinating book fills in this dimension in great detail. By showing how U.S. intelligence agencies went astray in early postwar Czechoslovakia, Lukes's gripping narrative sheds invaluable light on the initial years of the Cold War." --Mark Kramer, Cold War Studies Program, Harvard University

"Superb and unique--I know of no account of the Cold War's beginnings as vivid and entertaining as this or as full of lessons and warnings for today. Igor Lukes presents these three postwar years as a high-stake drama, full of suspense. Had that drama ended differently--and he reminds us that it could have--it would have changed the shape of the Cold War that was to beset the world for two generations. With sinking hearts we watch Czechoslovak democracy--this pivot point, this 'master key to Europe'--being lost, step by step, by wrong-headed Western policies, naiveté, lack of will, and inept intelligence work." --Tennent H. Bagley, author of Spy Wars

"Unique among studies of the history of the Cold War, Lukes's book is a penetrating account of the human cost of U.S. diplomacy and intelligence for their practitioners as well as their unintended victims during the formative period of the global conflict. A result of prodigious multi-archival research, the absorbing narrative puts the catalytic role of Czechoslovakia into a new light." --Vojtech Mastny, author of The Cold War and Soviet Insecurity

"With inventive research and skillful storytelling, Igor Lukes reconstructs the crucial Cold War history of Czechoslovakia between the collapse of the Third Reich and the momentous February 1948 Czech coup. A striking cast of characters--adventurous spies, naive diplomats, secret police rogues, and seductive women--inhabits this intriguing, if ultimately tragic, tale of the fecklessness of the U.S. government when facing the destruction of Czechoslovak democracy." --Norman M. Naimark, Stanford University

"In his meticulously researched book "On the Edge of the Cold War: American Diplomats and Spies in Postwar Prague," historian Igor Lukes describes how a small group of Soviet-backed communists were able to seize power in Czechoslovakia in 1948." - Washington Times

**Medieval Rome**

*Stability and Crisis of a City, 900-1150*

Chris Wickham

**Key Selling Points**

- The first detailed medieval urban history before 1200
- Offers a new type of history of Rome, one which does not focus on the Church
- Describes the workings of a medieval urban economy in its historical context
- Covers all strata of society, to give a true picture of a complex city

The first detailed medieval urban history before 1200

**Summary**

*Medieval Rome* analyses the history of the city of Rome between 900 and 1150, a period of major change in the city. This volume doesn't merely seek to tell the story of the city from the traditional Church standpoint; instead, it engages in studies of the city's processions, material culture, legal transformations, and sense of the past, seeking to unravel the complexities of Roman cultural identity, including its urban economy, social history as seen across the different strata of society, and the articulation between the city's regions.

This new approach serves to underpin a major reinterpretation of Rome's political history in the era of the 'reform papacy', one of the greatest crises in Rome's history, which had a resonance across the entire continent. *Medieval Rome* is the most systematic analysis ever made of two and a half centuries of Rome's history, one which saw centuries of stability undermined by external crisis and the long period of reconstruction which followed.

**Contributor Bio**

*Chris Wickham* is Chichele Professor of Medieval History, University of Oxford. He taught at Birmingham for nearly thirty years before coming to Oxford as Chichele Professor in 2005. He has travelled to Rome for short and long research visits over a hundred times.

The World of the Salons
Sociability and Worldliness in Eighteenth-Century Paris
Antoine Lilti

Key Selling Points
• Translation and revision of award-winning French title.
• A close examination of the world of the salon which argues that, contrary to accepted wisdom, it maintained the status and power of the social elites.

A revisionist study of the French salon of the eighteenth century, arguing that it was a place governed by social hierarchy, not equality, connected to the world of the Court, and not the fount of the Enlightenment as has traditionally been believed.

Summary
The world of the eighteenth-century salon has long been lauded as a meritocratic setting where writers, philosophers, and women created the Enlightenment. In The World of the Salons, historian Antoine Lilti proposes a fresh interpretation of salons in eighteenth-century Paris. Drawing on cultural history, social history, and the history of literature, he challenges the commonly accepted vision of salons as literary circles that were part of the Republic of Letters.

Lilti argues, instead, that salons were institutions of worldly sociability that helped shape "the world" (le monde) and high society. They were essential places where the aristocratic elites of the capital met and interacted with literary figures. Attending them required a mastery of the codes of polite conversation. There news circulated and personal reputations were made and lost. As opposed to the salon being a realm separate from the court at Versailles, it was a site where elites gained enough influence to forge marital alliances, secure government appointments or pensions, and win over royal censors. These discussion circles were part of refined society, not public opinion, and those writers who gained mass appeal were shunned by salon-goers.

For those who think they know what the salon meant in early modern European culture, politics, and intellectual circles, Antoine Lilti's The World of the Salons offers an important corrective of what went on behind the closed doors of the French salons.

Contributor Bio
Antoine Lilti teaches social and cultural history at the École des Hautes Études en Sciences Sociales in Paris and is former editor of the Annales journal. He is the author of Figures publiques : l'invention de la célébrité (1750-1850) and co-editor of Penser l'Europe au XVIIIe siècle: commerce, civilisation, empire.

Quotes
"Antoine Lilti's book is a masterpiece. Grounded in exhaustive social historical research, it offers the most complete picture ever produced of 'salon society' in eighteenth-century France, dispelling countless myths and revealing the social background against which so much of the Enlightenment took shape. At the same time, its trenchant and original approach, grounded in cutting-edge social and cultural theory, makes it essential reading for anyone interested in what Robert Darnton famously described as the 'social history of ideas.'"-David A. Bell, Princeton University

"A rich and multi-faceted account of an essential eighteenth-century social and cultural context. If we know it today as the 'salon,' it was only named as such after the fact. What is more, Lilti argues, this world never did quite conform to the standard notions that we have inherited of it, whether via Rousseau-esque aversion to aristocratic culture or post-Revolutionary nostalgia for polite society."-Geoffrey Turnovsky, Eighteenth-Century Studies

"The picture Lilti paints of the eighteenth-century salon stands in stark contrast to the one drawn by those who have tried to write its history in the light of Habermas's theory..."
of the bourgeois public sphere. A number of the broader claims made by this dense and rewarding book, however, suggest that salons matter more than we have previously thought. Not only has Lilti reaffirmed that the subject will remain a vital element in a number of on going historical debates—concerning the roles of writers, the dimensions of the public sphere, the formation of public opinion, and the nature of Old Regime politics—but he has opened up new lines of inquiry by exploring such themes as the construction of social identities, the links between mondanité and literature, and the constitution of national stereotypes."—Steven D. Kale, H-France

"Le monde des salons offers a fresh and innovative perspective on the salons of eighteenth-century Paris. Antoine Lilti is an important new voice in the history of early modern France, and his stimulating book is sure to make a splash in the historiography of old regime cultural practices. Lilti writes with the grace and confidence of a seasoned professional, and Le monde des salons is certainly the new 'must read' on the history of the pre-Revolutionary French salon."—Jeremy Caradonna, Department of History, University of Alberta

"Antoine Lilti’s Le Monde des salons is the most thorough and important study of eighteenth-century French salons to date. Methodologically sophisticated, it distinguishes between how contemporaries talked about salons and what actually took place in them. In doing so, it explodes several myths. First, it puts the lie to recent interpretations that have depicted salons as crucibles of modern egalitarianism—places where social hierarchy gave way to polite, enlightened conversation among equals. Second, Lilti shatters the image of salons as literary founts of enlightenment. Third, Lilti challenges the Tocquevellian notion that salons were sites for the elaboration of abstract literary politics and oppositional public opinion. Far from providing naïve, disempowered philosophes a place to concoct seditious ideologies, salons were where savvy socialites bolstered their social, cultural, and political capital."—Charles Walton, University of Warwick

The Oxford Handbook of the French Revolution
David Andress

Key Selling Points
• A comprehensive guide to the history of the French Revolution
• Contains over thirty contributions from an international team of leading scholars
• Challenges readers to think about new ways of understanding and sets out an agenda for future research possibilities
• Addresses the structural and political contexts to explore the origins, events, and ongoing legacies of the French Revolution in transnational and global contexts.

Summary
The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought-provoking insights into the history and historiography of the French Revolution, particularly its legacies in transnational and global contexts.

Placing core dimensions of the history of the French Revolution in their transnational and global contexts, the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors - whether the king and his ministers or the besieged leaders of the Jacobin republic - and attention to the deeply local politics of both rural and urban populations. Identities of class, gender and ethnicity are interrogated, but so too are conceptions and practices linked to citizenship, community, order, security, and freedom: each in their way just as central to revolutionary experiences, and equally amenable to critical analysis and reflection.

This volume covers the structural and political contexts that build up to give new views on the classic question of the 'origins of revolution'; the different dimensions of personal and social experience that illuminate the political moment of 1789 itself; the goals and dilemmas of the period of constitutional monarchy; the processes of destabilisation and ongoing conflict that ended that experiment; the key issues surrounding the emergence and experience of 'terror'; and the short- and long-term legacies, for both good and ill, of the revolutionary trauma - for France, and for global politics.

Purging the Empire
Mass Expulsions in Germany, 1871-1914
Matthew P. Fitzpatrick

Key Selling Points
- The first work in any language to look at the expulsion of a range of different groups from the German Empire between 1871 and 1914 collectively
- Employs research from public and political debates, legal developments, and the German media, as well as archival holdings from a range of German, French and Polish archives
- Examines what these expulsions reveal about the nature of law making and the German state
- Shows that power emanated from the grassroots of Imperial German society, as well as from the Chancellor and the Kaiser

The first work in any language to look at the expulsion of a range of different groups from the German Empire between 1871 and 1914 collectively

Summary
While the fate of minorities under Nazism is well known, the earlier expulsions of Germany's unwanted residents are less well understood. Against a backdrop of raging public debate, and numerous claims of a 'state of exception', tens of thousands of vulnerable people living in the German Empire were the victims of mass expulsion orders between 1871 and 1914. Groups as diverse as Socialists, Jesuits, Danes, colonial subjects, French nationalists, Poles, and 'Gypsies' were all removed, under circumstances that varied from police actions undertaken by provincial governors through to laws authorising removals passed by the Reichstag.

Purging the Empire examines the competing voices demanding the removal or the preservation of suspect communities, suggesting that these expulsions were enabled by the decentralised and participatory nature of German politics. In a surprisingly responsive political system, a range of players, including the Kaiser, the Reichstag, the bureaucracy, provincial officials, and local police authorities were all empowered to authorise the expulsion of unwanted residents. Added to this, the German press, civic associations, chambers of commerce, public intellectuals, religious societies, and the grassroots membership of political parties all played an important role in advocating or denouncing the measures before, during and after their implementation. Far from revealing the centrality of authoritarian caprice, Germany's mass expulsions point to the diffuse nature of coercive sovereign power and the role of public pressure in authorising or censuring the removals that took place in a modern, increasingly parliamentary Rechtsstaat.

Mapping the Germans
Statistical Science, Cartography, and the Visualization of the German Nation, 1848-1914
Jason D. Hansen

Key Selling Points
- Approaches the radicalization of nationalism in nineteenth-century Germany in a completely novel way
- Demonstrates how Europeans learned to see nationality in a spatially specific and manipulable way - important for the understanding of German expansion in both world wars
- Contains many useful maps for a clearer understanding of the subject
- Contains a clear discussion of the build-up of the Imperial German Census Bureau

Approaches the radicalization of nationalism in nineteenth-century Germany in a completely novel way

Summary
Mapping the Germans explores the development of statistical science and cartography in Germany between the beginning of the nineteenth century and the start of World War One, examining their impact on the German national identity. It asks how spatially-specific knowledge about the nation was constructed, showing the contested and difficult nature of objectifying this frustratingly elastic concept. Ideology and politics were not themselves capable of providing satisfactory answers to questions about the geography and membership of the nation; rather, technology also played a key role in this process, helping to produce the scientific authority needed to make the resulting maps and statistics realistic. In this sense, Mapping the Germans is about how the abstract idea of the nation was transformed into a something that seemed objectively measurable and politically manageable.

Jason Hansen also examines the birth of radical nationalism in central Europe, advancing the novel argument that it was changes to the vision of nationality rather than economic anxieties or ideological shifts that radicalized nationalist practice at the close of the nineteenth century. Numbers and maps enabled activists to "see" nationality in local and spatially-specific ways, enabling them to make strategic decisions about where to best direct their resources. In essence, they transformed nationality into something that was actionable, that ordinary people could take real actions to influence.

Contributor Bio

Jason D. Hansen is Assistant Professor of History at Furman University. He specializes in the study of modern Germany and is currently working on a new project which examines the impact of the development of the internet and digitalization on the future of Holocaust memory. Dr. Hansen has been the recipient of awards from the Council of European Studies and the German Academic Exchange Service (DAAD), and he has presented at numerous conferences around the world.

Bibliography
**Dachau and the SS**
*A Schooling in Violence*
Christopher Dillon

**Key Selling Points**
- First study of Dachau and the effect it had in the pre-history of the Holocaust
- Integrates history with broader concepts including social psychology and gender
- Challenges assumptions about concentration camp violence being the product of individual pathologies

The first systematic study of the 'Dachau School', Hitler's first concentration camp and a national academy of violence.

**Summary**
*Dachau and the SS* studies the concentration camp guards at Dachau, Hitler's first concentration camp and a national 'school' of violence for all concentration camp personnel. Set up in the first months of Hitler's rule, it was a bastion of the Nazi 'revolution' and a key springboard for the ascent of Heinrich Himmler and the SS to control of the Third Reich's terror and policing apparatus. Throughout the pre-war era of Nazi Germany, Dachau functioned as a national academy of violence where SS concentration camp personnel were schooled in steely resolution and the techniques of terror. An international symbol of Nazi depredation, Dachau was the cradle of a new and terrible spirit of destruction.

Combining new research on the pre-war history of Dachau with theoretical insights from studies of perpetrator violence, this volume offers the first systematic study of the 'Dachau School'. It challenges assumptions about concentration camp violence as the product of individual pathologies, whether of ideological zealots or mindless sadists, and explores the backgrounds and socialization of thousands of often very young men in the camp. Christopher Dillon analyses recruitment to the Dachau SS and evaluates the contribution of ideology, training, masculinity, and social psychology to the conduct and subsequent careers of concentration camp guards. Graduates of the Dachau School would go on to play a central role in the wartime criminality of the Third Reich, particularly at Auschwitz. *Dachau and the SS* makes an original contribution to the pre-history of the Holocaust, and to the social and institutional organisation of violence.

Colonial America and the Earl of Halifax, 1748-1761
Andrew D. M. Beaumont

Key Selling Points

- The first published biography of Lord Halifax
- The first systemic interpretation of colonial administration in the period leading up to the American Revolution
- Reinterprets major historical events, specifically the Albany Congress of 1754
- Redefines key concepts in Anglo-American relations (including salutary neglect, pre-revolutionary administrative reform and ministerial ideas of empire)
- Provides an explanation of the transition from laissez-faire governance to imperialism

The first systemic interpretation of colonial administration in the period leading up to the American Revolution

Summary

Ambitious Men of Modest Means examines the governance of British America in the period prior to the American Revolution. Focusing upon the career of George Montagu Dunk, Second Earl of Halifax and First Lord of the Board of Trade & Plantations (1716-1771), it explores colonial planners and policy-makers during the political hiatus between the age of Walpole and the subsequent age of imperial crisis. As ambitious metropolitan politicians vied for ministerial dominance, Halifax's board played a vital role in shaping British perceptions of its growing empire. A repository of information and intelligence, the board offered Halifax the opportunity to establish his own niche interest, for the good of the empire and himself alike.

Challenging the view that Britain's attitude towards its American colonies was one of ignorance compounded by complacency, this study explores those charged directly with governing America, from the imperial centre to its westward peripheries: the governors entrusted with maintaining the royal prerogative, and implementing reform. Between 1748 and 1761, Halifax sought to reform the America from a motley assortment of territories into an ordered, uniform asset of the imperial nation-state. Exploring the governors themselves reveals a complex, modern network of professional and personal loyalties, bound together through mutual self-interest under Halifax's leadership.

Confronted by the Seven Years' War, Halifax saw his plans and followers dissipate in the face of global conflict, the results of which established British America, and also sowed the seeds of its eventual destruction in 1776.

Long overshadowed by the acknowledged 'great men' of his age, this study restores Halifax and his interest to its rightful place as a significant influence upon major historical events, illustrating his grand, elaborate vision for an alternative British America that never was.

The Invention of Improvement
Information and Material Progress in Seventeenth-Century England
Paul Slack

Key Selling Points
- The first full account of how English improvement began and developed
- Covers a broad historical period, aiding understanding of the changes wrought by improvement
- Offers an insight into the social and economic changes which occurred before the Industrial Revolution
- Draws on a great variety of contemporary comment for illustration, while presenting paths for future research

Explores the concept of improvement which took root in seventeenth-century England, the political and economic circumstances which led to its rise, the effect it had on the society and culture of England, and its subsequent outreach as the British Empire spread.

Summary
Improvement was a new concept in seventeenth-century England; only then did it become usual for people to think that the most effective way to change things for the better was not a revolution or a return to the past, but the persistent application of human ingenuity to the challenge of increasing the country's wealth and general wellbeing. Improvements in agriculture and industry, commerce and social welfare, would bring infinite prosperity and happiness. The word improvement was itself a recent coinage. It was useful as a slogan summarising all these goals, and since it had no equivalent in other languages, it gave the English a distinctive culture of improvement that they took with them to Ireland and Scotland, and to their possessions overseas. It made them different from everyone else.

The Invention of Improvement explains how this culture of improvement came about. Paul Slack explores the political and economic circumstances which allowed notions of improvement to take root, and the changes in habits of mind which improvement accelerated. It encouraged innovation, industriousness, and the acquisition of consumer goods which delivered comfort and pleasure. There was a new appreciation of material progress as a process that could be measured, and its impact was publicised by the circulation of information about it. It had made the country richer and many of its citizens more prosperous, if not always happier. Drawing on a rich variety of contemporary literature, The Invention of Improvement situates improvement at the centre of momentous changes in how people thought and behaved, how they conceived of their environment and their collective prospects, and how they cooperated in order to change them.

Very Different, But Much the Same
The Evolution of English Society Since 1714
W. G. Runciman

Key Selling Points
- A multi-disciplinary account, written by one of the foremost sociologists of our time
- Covers more than three hundred years of British history
- Takes a new approach to social history by applying neo-Darwinian social theory
- Presents the disjunction of cultural and social evolution in British history

A multi-disciplinary account, written by one of the foremost sociologists of our time

Summary
Very Different, but Much the Same takes as its starting point the distribution of political, ideological, and economic power between English society's constituent roles from the time when Daniel Defoe was writing Robinson Crusoe, and argues that Defoe would find it remarkably similar three centuries later despite all the changes in technology, lifestyles, amenities, beliefs, attitudes, norms, and values by which he would no doubt be astonished.

The disjunction between the two is explained by bringing to bear the approach of current evolutionary sociological theory in which the reproduction or extinction of a society's institutional practices is traced to selective environmental pressures which are independent of the personal motives and subjective experiences of the individuals whose practices they are. It is further argued that the rates of high absolute and low relative social mobility that sociologists have documented in detail for the twentieth century are likely to have been much the same during the eighteenth and nineteenth centuries. The conclusion drawn is that for as long as the country was not defeated in a European war, the probability of a radical change in institutional distribution of power was extremely low throughout, however much contemporary observers or later historians would have either welcomed or deplored it.

The Liberal Party and the Economy, 1929-1964
Peter Sloman

Key Selling Points
- The first detailed study of the British Liberal Party's economic thought during the twentieth century
- Analyses the complex relationship between British Liberalism and the early neoliberal movement in politics and economics
- Sets the party political activities of leading economists such as John Maynard Keynes, William Beveridge, and Roy Harrod in a broader context
- Sheds new light on the reception and use of Keynesian ideas in British politics during the 1920s and 1930s
- Allows historians, political scientists, and journalists to set the current Conservative-Liberal Democrat coalition in a richer historical context

Summary
The Liberal Party and the Economy, 1929-1964 explores the reception, generation, and use of economic ideas in the British Liberal Party between its electoral decline in the 1920s and 1930s, and its post-war revival under Jo Grimond. Drawing on archival sources, party publications, and the press, this volume analyses the diverse intellectual influences which shaped British Liberals' economic thought up to the mid-twentieth century, and highlights the ways in which the party sought to reconcile its progressive identity with its longstanding commitment to free trade and competitive markets.

Peter Sloman shows that Liberals' enthusiasm for public works and Keynesian economic management - which David Lloyd George launched onto the political agenda at the 1929 general election - was only intermittently matched by support for more detailed forms of state intervention and planning. Likewise, the party's support for redistributive taxation and social welfare provision was frequently qualified by the insistence that the ultimate Liberal aim was not the expansion of the functions of the state but the pursuit of 'ownership for all'. Liberal policy was thus shaped not only by the ideas of reformist intellectuals such as John Maynard Keynes and William Beveridge, but also by the libertarian and distributist concerns of Liberal activists and by interactions with the early neoliberal movement. This study concludes that it was ideological and generational changes in the early 1960s that cut the party's links with the New Right, opened up common ground with revisionist social democrats, and re-established its progressive credentials.

Redbrick
A Social and Architectural History of Britain's Civic Universities
William Whyte

Key Selling Points
- The first history of the civic universities for 50 years
- Draws on a uniquely broad range of sources - many of them previously ignored
- Offers a new approach to the history of higher education, providing the richest possible account of university life by incorporating the study of the social and architectural aspects of education
- Provides the first ever examination of the architecture of Britain's urban universities
- Gives an insight into the relationship between class and education, and between the universities and the state

Offers a new approach to the history of higher education, providing the richest possible account of university life by incorporating the study of the social and architectural aspects of education

Summary
In the last two centuries Britain has experienced a revolution in higher education, with the number of students rising from a few hundred to several million. Yet the institutions that drove - and still drive - this change have been all but ignored by historians.

Drawing on a decade’s research, and based on work in dozens of archives, many of them used for the very first time, this is the first full-scale study of the civic universities - new institutions in the nineteenth century reflecting the growth of major Victorian cities in Britain, such as Liverpool, Manchester, Birmingham, York, and Durham - for more than 50 years. Tracing their story from the 1780s until the 2010s, it is an ambitious attempt to write the Redbrick revolution back into history.

William Whyte argues that these institutions created a distinctive and influential conception of the university - something that was embodied in their architecture and expressed in the lives of their students and staff. It was this Redbrick model that would shape their successors founded in the twentieth century: ensuring that the normal university experience in Britain is a Redbrick one.

Using a vast range of previously untapped sources, Redbrick is not just a new history, but a new sort of university history: one that seeks to rescue the social and architectural aspects of education from the disregard of previous scholars, and thus provide the richest possible account of university life.

It will be of interest to students and scholars of modern British history, to anyone who has ever attended university, and to all those who want to understand how our higher education system has developed - and how it may evolve in the future.

**Family Men**  
_Fatherhood and Masculinity in Britain, 1914-1960_  
Laura King

**Key Selling Points**

- The only history of fatherhood in Britain from 1914-1960
- Uses a wide range of sources pertaining to cultural norms about fatherhood (as discussed in the press and popular culture) and individual testimony (through interviews, social research, letters and autobiographies)
- Pioneers a combined approach to the social and cultural history of Britain
- Offers a new perspective on the history of masculinity in twentieth-century Britain
- Gives a fuller understanding of fatherhood, focusing on emotions, status and attitudes as well as behaviour
- Offers a new perspective on the history of masculinity in twentieth-century Britain

**Summary**

Fathers are often neglected in histories of family life in Britain. _Family Men_ provides the first academic study of fathers and families in the period from the First World War to the end of the 1950s. It takes a thematic approach, examining different aspects of fatherhood, from the duties it encompassed to the ways in which it related to men's identities. The historical approach is socio-cultural: each chapter examines a wide range of historical source materials in order to analyse both cultural representations of fatherhood and related social norms, as well as exploring the practices and experiences of individuals and families. It uncovers the debates surrounding parenting and family life and tells the stories of men and their children.

While many historians have examined men's relationship to the home and family in histories of gender, family life, domestic spaces, and class cultures more generally, few have specifically examined fathers as crucial family members, as historical actors, and as emotional individuals. The history of fatherhood is extremely significant to contemporary debate: assumptions about fatherhood in the past are constantly used to support arguments about the state of fatherhood today and the need for change or otherwise in the future. Laura King charts men's changing experiences of fatherhood, suggesting that although the roles and responsibilities fulfilled by men did not shift rapidly, their relationships, position in the family, and identities underwent significant change between the start of the First World War and the 1960s.

The Global Offensive
The United States, the Palestine Liberation Organization, and the Making of the Post-Cold War Order
Paul Thomas Chamberlin

Key Selling Points
• First international history of the Palestinian liberation struggle, drawing on Arabic language sources
• Reinterprets Arab-Israeli conflict and international terrorism
• Connects the PLO to revolutionary struggles in Vietnam, China, Cuba, and Algeria
A bold new look at the global significance of the Palestine Liberation Organization, highlighting the impact of the PLO on revolutionary movements and Cold War diplomacy

Summary
On March 21, 1968, Yasir Arafat and his guerrillas made the fateful decision to break with conventional guerrilla tactics, choosing to stand and fight an Israeli attack on the al-Karama refugee camp in Jordan. They suffered terrible casualties, but they won a stunning symbolic victory that transformed Arafat into an Arab hero and allowed him to launch a worldwide campaign, one that would reshape Cold War diplomacy and revolutionary movements everywhere.

In The Global Offensive, historian Paul Thomas Chamberlin offers new insights into the rise of the Palestine Liberation Organization in its full international context. After defeat in the 1967 war, the crushing of a guerrilla campaign on the West Bank, and the attack on al-Karama, Arafat and his fellow guerilla fighters opened a global offensive aimed at achieving national liberation for the Palestinian people. In doing so, they reinvented themselves as players on the world stage, combining controversial armed attacks, diplomacy, and radical politics. They forged a network of nationalist revolutionaries, making alliances with South African rebels, Latin American insurrectionists, and Vietnamese Communists. They persuaded the United Nations to take up their agenda, and sent Americans and Soviets scrambling as these stateless forces drew new connections across the globe. "The Vietnamese and Palestinian people have much in common," General Vo Nguyen Giap would tell Arafat, "just like two people suffering from the same illness." Richard Nixon's views mirrored Giap's: "You cannot separate what happens to America in Vietnam from the Mideast or from Europe or any place else."

Deftly argued and based on extensive new research, The Global Offensive will change the way we think of the history of not only the PLO, but also the Cold War and international relations since.

Contributor Bio
Paul Chamberlin is Associate Professor of History at the University of Kentucky.

Quotes
"The Global Offensive makes a laudable contribution to the growing body of scholarship that places the developing world and transnational actors at the forefront of international politics, rather than treating them as peripheral, secondary actors or curiosities." -- Jeffrey James Byrne, H-Diplo

"By establishing connections between the PLO and other revolutionary nationalist groups that most historians have either previously ignored or failed to recognize, Chamberlin has written a true work of transnational history that includes discussion of the United States, Palestinians, Israel, Vietnam, China, Algeria, and South Africa. By establishing connections between the PLO and other revolutionary nationalist groups that most historians have either previously ignored or failed to recognize, Chamberlin has written a true work of transnational history that includes discussion of the United States, Palestinians, Israel, Vietnam, China, Algeria, and South Africa." -- Craig Daigle, H-Diplo

"Chamberlin's most innovative move is simply to insist that we view the PLO as part of a
larger landscape of third-world revolutionaries and the global radical left, of which it viewed itself a part, and not merely as a subset of the Arab-Israeli struggle or the history of Arab nationalism and decolonization." --Bradley Simpson, H-Diplo

"The Global Offensive would be quite valuable for undergraduate and graduate history courses on the Middle East, U.S. foreign policy, or twentieth-century global history. Students and teachers would undoubtedly benefit from the balance of narrative and argumentation buttressed by clearly written explanations of key players and events. Most importantly, the book offers an opportunity for teacher and students to engage in questions regarding the latter decades of the twentieth century as less of a coda for the post-World War II global order and more as a beginning point toward understanding the twenty-first century." --Teaching History

"The Global Offensive is sophisticated in its treatment of complex issues, drawing on published and unpublished sources in Arabic and English. The book internationalizes the story of Arab-Israeli conflict in the Middle East, and it simultaneously localizes the story of globalization. Most of all, the book asks a big question: what were the alternatives to the patterns of insurgency and counterinsurgency that have characterized the Middle East for the last forty years?...The book will surely inform and inspire many new perspectives." --Jeremi Suri, American Historical Review

"Using hitherto unexcavated material, at least in much of Western scholarship, Chamberlin provides an engaging, well-documented narrative of the PLO global offensive. It contributes to the growing scholarship that recognizes that the history of the Cold War in the Middle East, Latin America, Africa, and Asia is inseparable from the history of the states and the peoples that constitute those regions. Or, as Chamberlin puts it in reference to the PLO, the dynamics of its encounter [with the global stage] rejects the reality that the process of globalization was taking place not only from the top down, but also from the bottom up." --Dina Matar, Diplomatic History

"Paul Chamberlin's The Global Offensive moves from the camps of the Palestinian refugees to the air conditioned offices of the White House, from the deliberations of the Vietnamese guerrillas to the calculations of Tel Aviv's political elite. Drawn from an array of archives, Chamberlin's narrative teaches us that international relations is not simply the whimsy of states but that it is constrained and enabled by the dreams and frustrations of ordinary people forced to be extraordinary because of their circumstances. A brilliant study of how the Palestinian liberation struggle moved from the valleys of the Levant onto the world stage." --Vijay Prashad, author of The Darker Nations: A People's History of the Third World

"With balanced and comprehensive scholarship, Paul Chamberlin traces the rise of the Palestine Liberation Organization under Yasser Arafat, the widening gap of generations in both Israel and the Arab world, and the dilemmas of the U.S. government as Lebanon descended into civil war. The Global Offensive is a masterly account of the worldwide as well as the regional dimension of Arab-Israeli conflict in the critical decades of the 1960s and 1970s." --Wm. Roger Louis, University of Texas at Austin

"Chamberlin is the first to frame the story of the Palestine Liberation Organization in a truly global context, and in so doing he sheds startling new light on his subject. He shows how the Palestinian struggle in the 1960s and 1970s was embedded in global revolutionary networks that stretched from Cuba to Vietnam, and argues convincingly for its centrality in the drama of Cold War decolonization and the transformation of international relations in this era. This book is not only a rare judicious intervention in the history of the conflict between Israelis and Palestinians; it is also a superb contribution to postwar international history writ large." --Erez Manela, author of The Wilsonian Moment

"A major contribution to understanding US foreign policy since WWII, not only in the Middle East, but also in the context of the Cold War and national liberation movements. Summing Up: Highly recommended." --CHOICE

"Paul Chamberlin's history of the relationship between the United States and the Palestinian Liberation Organization is a superb example of Cold War international and transnational history. Based on an extensive use of Arabic language sources, it documents dispassionately and with remarkable fairness the long history of efforts to form a Palestinian state. Must reading for anyone interested in how the modern Middle East came to be." --John Lewis Gaddis, Yale University

"This extremely well-written book clearly reflects the extensive archival research that has gone into it. Chamberlin's narrative style is engaging and effective, and offers a great deal of information and insight into U.S. policy towards the PLO and, through this, the Arab-Israeli conflict and the wider region. For the reader, the access provided by the author to U.S. thinking is akin to the impact that Wikileaks has had more recently, giving this historical study an unexpectedly fresh and topical feel. I recommend it
without any hesitation." -- Yezid Sayigh, Carnegie Middle East Center

**Routes and Realms**  
The Power of Place in the Early Islamic World  
Zayde Antrim

**Key Selling Points**
- Features a new conceptual framework, the "discourse of place," which analyzes a wide range of formal texts over a substantial period of time
- Adopts an interdisciplinary approach that combines insights from the fields of geography and literary criticism with historical methods.
- Challenges a widespread tendency to underestimate the importance of territory and to over-emphasize the importance of religion and family to notions of community and belonging among Muslims and Arabs.
- Challenges a widespread tendency to underestimate the importance of territory and to over-emphasize the importance of religion and family to notions of community and belonging among Muslims and Arabs.

**Summary**
*Routes and Realms* explores the ways in which Muslims expressed attachment to land from the ninth through the eleventh centuries, the earliest period of intensive written production in Arabic. In this groundbreaking first book, Zayde Antrim develops a "discourse of place," a framework for approaching formal texts devoted to the representation of territory across genres. The discourse of place included such varied works as topographical histories, literary anthologies, religious treatises, world geographies, poetry, travel literature, and maps.

By closely reading and analyzing these works, Antrim argues that their authors imagined plots of land primarily as homes, cities, and regions and associated them with a range of claims to religious and political authority. She contends that these are evidence of the powerful ways in which the geographical imagination was tapped to declare loyalty and invoke belonging in the early Islamic world, reinforcing the importance of the earliest regional mapping tradition in the Islamic world.

*Routes and Realms* challenges a widespread tendency to underestimate the importance of territory and to over-emphasize the importance of religion and family to notions of community and belonging among Muslims and Arabs, both in the past and today.

**Contributor Bio**

Zayde Antrim is Charles A. Dana Associate Professor of History and International Studies at Trinity College.

**Quotes**

"Antrim's study...will effectively stimulate discussion on the very nature (and study) of early Islamic geography." --Paul L. Heck, *Journal of Historical Geography*

"Zayde Antrim's monograph provides a guided tour through the menagerie of literatures that poets, litterateurs, religious scholars, travel writers, and geographers of this vast empire devised between the ninth and twelfth centuries." --*American Historical Review*

"Most of the texts Antrim uses will be very familiar to scholars of early Islamic history, but she has a talent for reading these in new, engaging and informative ways. Antrim has produced an innovative analysis of real importance which should be considered carefully by all who work on early Islamic history and the Arabic and Persian literary texts of the period." --Harry Munt, *Bulletin of the School of Oriental and African Studies*

"The first comprehensive study of land and belonging in the premodern Islamic world Routes and Realms is a welcome addition to the study of medieval Muslim history. It challenges us to think about identity and belonging in new and compelling ways. It employs an innovative methodology for the analysis of texts that traverse conventional disciplinary boundaries and that highlights their extra-textual significance. It successfully makes the
case for regionalism as a powerful category of belonging during the medieval period." -- Steve Tamari, H-Net Reviews

"Antrim's findings have ramifications for historians of the modern period. As ethnosymbolists have argued, pre-existing notions of a homeland, of the kind that Antrim traces in classical Arabic literature, are a necessary condition for the emergence of nationalism. But the complexity of the notions of home vs. nonhome, inside vs. outside, and local vs. stranger that she highlights contributes to an understanding of the alternative and competing types of nationalism that have emerged in the Middle East in the twentieth century, that is, pan-Arabism and pan-Islamic nationalism as well as nationalism at the level of individual countries." -- Ahmed El Shamsy, American Historical Review

"By exhaustively delineating early Muslim attitudes toward homeland, city, and regional identity, Zayde Antrim shows how early Muslims did, in fact, create their own ways of relating to the land beneath and around them, and hence a discourse of place with which any modern notions of nationhood would have needed to contend. It is a rare thing when the study of premodern history can enliven modern debates, but Antrim's work is one of those rarities." -- Paul M. Cobb, University of Pennsylvania

"Zayde Antrim's most significant contribution is that she challenges the dominant view that explains the rise of nationalism in the Middle East as a byproduct of the nineteenth century encounter with Europe. By critiquing this widely disseminated position, Antrim allows scholars of medieval and modern Middle East to realize that the concept of homeland represents at the same time continuity and change with the classical period, and therefore nationalism has invoked in the mind of medieval and modern Middle Easterners a complex web of legacies. She reminds us that good scholarship should be meticulous research and not speculation." -- Suleiman A. Mourad, Smith College

- One of the only historical studies of male/female friendship to have been written.
- Uses friendship as a frame for studying cultural history of early American Republic.
- Displaces marriage as the only important, fulfilling relationship between men and women.

Offers a fresh and expansive look at how America's founding generation of men and women defined and experienced friendship, love, gender, and power in the new nation.

**Summary**

"When Harry Met Sally" is only the most iconic of popular American movies, books, and articles that pose the question of whether friendships between men and women are possible. In *Founding Friendships*, Cassandra A. Good shows that this question was embedded in and debated as far back as the birth of the American nation. Indeed, many of the nation's founding fathers had female friends but popular rhetoric held that these relationships were fraught with social danger, if not impossible.

Elite men and women formed loving, politically significant friendships in the early national period that were crucial to the individuals' lives as well as the formation of a new national political system, as Cassandra Good illuminates. Abigail Adams called her friend Thomas Jefferson "one of the choice ones on earth," while George Washington signed a letter to his friend Elizabeth Powel with the words "I am always Yours." Their emotionally rich language is often mistaken for romance, but by analyzing period letters, diaries, novels, and etiquette books, Good reveals that friendships between men and women were quite common. At a time when personal relationships were deeply political, these bonds offered both parties affection and practical assistance as well as exemplified republican values of choice, freedom, equality, and virtue. In so doing, these friendships embodied the core values of the new nation and represented a transitional moment in gender and culture.

Northern and Southern, famous and lesser known, the men and women examined in *Founding Friendships* offer a fresh look at how the founding generation defined and experienced friendship, love, gender, and power.

**Contributor Bio**

Cassandra Good is the associate editor of the Papers of James Monroe at the University of Mary Washington.

**Quotes**

"Of all the familial configurations of the founders, 'founding friends' is the most richly provocative. Employing an impressive array of primary sources, Cassandra Good uncovers a hitherto unexplored realm where women were at their most equal and their relationships with male friends represented the purest form of republican ideals. *Founding Friendships* is a dazzling debut and a major contribution to our knowledge of early national culture." - Catherine Allgor, author of *A Perfect Union: Dolley Madison and the Creation of the American Nation*

"This beautifully written and insightful study builds on studies of same-sex friendship and marital friendship by turning our attention to cross-sex non-marital friendships during the revolutionary period. Cassandra Good shows that friendships between men and women were common, highly valued, and at the same time feared by citizens of the new republic. She provides a nuanced analysis of the delicate balancing act that friends of the opposite sex had to achieve between what their relationships had to offer and the potential dangers that they posed. This book will fascinate anyone interested in the history of friendship, the family, gender relations, the social and political history of the
Cassandra Good's *Founding Friendships* is a remarkable account of how friendships between men and women were critical to both the social and political fabric of the new nation. Good's work is an insightful analysis of the flow of power in these male/female relationships that could be threatening to the traditional understanding of a proper social order. Only in 'quiet conversations' could women convey their observations and political opinions. It is a story of the utmost importance to our understanding of the early nineteenth century."—Barbara Oberg, Princeton University

"A sensitively-drawn study packed with insights into how men and women understood and experienced their friendships with each other at a time of great social and political change. *Founding Friendships* is filled with very real people banging up against changing expectations as they navigated the period's highly politicized and thereby rocky social terrain."—Joanne B. Freeman, author of *Affairs of Honor: National Politics in the New Republic*

Sick from Freedom
African-American Illness and Suffering during the Civil War and Reconstruction
Jim Downs

Key Selling Points
- Reveals that the moment of emancipation triggered widespread illness and death among African Americans.
- 2012 marks the 150th anniversary of the unofficial liberation of the slaves during the Civil War and 2013 the anniversary of the Emancipation Proclamation.
- The first in-depth study of the Medical Division of the Freedmen's Bureau, the first system of national medical care created by the federal government.
- Connects the federal government's response to emancipation to the displacement of Native Americans on reservations.

A pioneering account of the deadly consequences of emancipation, based on research in the medical records of the Freedmen's Bureau

Summary
Bondspeople who fled from slavery during and after the Civil War did not expect that their flight toward freedom would lead to sickness, disease, suffering, and death. But the war produced the largest biological crisis of the nineteenth century, and as historian Jim Downs reveals in this groundbreaking volume, it had deadly consequences for hundreds of thousands of freed people.

In Sick from Freedom, Downs recovers the untold story of one of the bitterest ironies in American history—that the emancipation of the slaves, seen as one of the great turning points in U.S. history, had devastating consequences for innumerable freedpeople. Drawing on massive new research into the records of the Medical Division of the Freedmen's Bureau—a nascent national health system that cared for more than one million freed slaves—he shows how the collapse of the plantation economy released a plague of lethal diseases. With emancipation, African Americans seized the chance to move, migrating as never before. But in their journey to freedom, they also encountered yellow fever, smallpox, cholera, dysentery, malnutrition, and exposure. To address this crisis, the Medical Division hired more than 120 physicians, establishing some forty underfinanced and understaffed hospitals scattered throughout the South, largely in response to medical emergencies. Downs shows that the goal of the Medical Division was to promote a healthy workforce, an aim which often excluded a wide range of freedpeople, including women, the elderly, the physically disabled, and children. Downs concludes by tracing how the Reconstruction policy was then implemented in the American West, where it was disastrously applied to Native Americans.

The widespread medical calamity sparked by emancipation is an overlooked episode of the Civil War and its aftermath, poignantly revealed in Sick from Freedom.

Contributor Bio
Jim Downs is Associate Professor of History and American Studies at Connecticut College. He is the editor of Taking Back the Academy: History of Activism, History as Activism and Why We Write: The Politics and Practice of Writing for Social Change.

Quotes
"One comes away from this book with no doubt that the path out of slavery was a minefield of death and disease that needs its proper acknowledgement in histories of reconstruction." --Journal of the History of Medicine
"An important challenge to our understanding of an event that scholars and laypeople alike have preferred to see as an uplifting story of newly liberated people vigorously claiming their long-denied rights." --The New York Times
"A major turning point in how we understand the African-American past, the nation's past, and their intertwining." --The Journal of Interdisciplinary History
"Based on extensive research, particularly in the Freedman's Bureau's Medical Division records, the book details the enormity of the public health crisis that afflicted freed
people during and after the Civil War... This is revisionist history at its finest, and it deserves a wide audience. Highly recommended." --Choice
"Jim Downs' exceptional research has resulted in a major study... Highly recommended." --Civil War News
"Sick from Freedom is a welcome addition to the literature on the history of the Civil War and Reconstruction, medicine, and public health... [T]hought-provoking." --The Journal of American History
"Ick from Freedom is beautifully written... The author dedicates this work to 'all those who were emancipated but never made it to freedom' (p. v). He honors their memories in this excellent and haunting book." --Arkansas Historical Quarterly
"As Jim Downs makes clear in this carefully documented work, the Union leadership, domestic and military, was wholly unprepared to deal with the breakdown of the system of slavery that followed the Union army with every foray into southern soil... One comes away from this book with no doubt that the path out of slavery was a minefield of death and disease that needs its proper acknowledgment in histories of reconstruction." --Journal of the History of Medicine and Allied Sciences
"A signal contribution to the vastly understudied question of freedpeople's health and a formidable challenge to the dominant analytical framework that has heretofore framed our understanding both of the transition from slavery to freedom in the American South and the meaning of death and dying in the era of the Civil War. It, quite simply, remaps a field." --Thavolia Glymph, Duke University

"A fresh and ambitious account of the Civil War era that not only interrogates the transition from slavery to freedom in new and unsettling ways but also invites us to rethink the geographical dimensions of Reconstruction." --Steven Hahn, University of Pennsylvania

"Charts new, darker, and profoundly revealing paths into the history of the American emancipation in the Civil War. In a work of medical, social, labor, and military history all at once, Downs shows that achieving freedom for American slaves was a signal triumph, but only through a horrible passage of disease, suffering and death. A 'new' history of emancipation is emerging, and Downs is one of its most talented and innovative craftsmen." --David W. Blight, author of American Oracle: The Civil War in the Civil Rights Era

"Jim Downs paints a startling and little known portrait of African American emancipation in which struggles for health and survival must be factored alongside the political and economic history of the period." --Sharla Fett, Occidental College

"Traces a shrouded chapter of American history: the mass death and medical devastation that visited African Americans in the immediate wake of legal emancipation. Downs compellingly reveals how the confluence of racial slander, government indifference, and medical malign neglect proved widely fatal, and in doing so he paints a detailed and disheartening portrait of man's inhumanity to man." --Harriet Washington, author of Medical Apartheid: The Dark History of Medical Experimentation on Black Americans from Colonial Times to the Present
"An important contribution to understanding the process of emancipation and the suffering so many freedpeople endured." --North Carolina Historical Review
"Downs insists that understanding the scale of the medical crisis for African Americans during the war is critical to the idea of what freedom felt and looked like for those who were trying to experience it... This book reminds us that this grim portrait must be a part of any discussion of the years that messily separate African American slavery from freedom." --Bulletin of the History of Medicine

The London Customs Accounts
24 Henry VI (1445-46)
Stuart Jenks

Key Selling Points
• An enormously rich resource for the study of late medieval English trade

This edition of London's customs accounts for 1445-46 provides a snapshot of late medieval English trade. The meticulous detail provides a wealth of information on shipping, merchants and merchandise, making possible the study of individual traders and products.

Summary
The medieval customs accounts record all imports and exports on which customs duties were payable, ship by ship, merchant by merchant. The meticulous detail of these accounts puts flesh on the bare bones of England's trade statistics, providing information on shipping, merchants and merchandise. One can trace the careers of the individual wealthy merchants or groups of merchants - whether they are from London, Bristol, the Hanseatic League, or Venice. The volumes and prices of products - such as English cloth, salt, or furs - can be calculated. And even the trading patterns of individual ship captains can be deduced.

So that the whole process can be understood, all the other accounting documents relating to the London accounts for 1445-46 are also published in the edition. Furthermore, the technical Introduction explains the customs system and the Exchequer's accounting procedures.

**Saxo Grammaticus (Volume I)**

**Gesta Danorum: The History of the Danes**

Karsten Friis-Jensen, Peter Fisher

---

**Key Selling Points**

- No complete translation in any language
- This volume is the most scholarly Latin text of Saxo Grammaticus, which is one of the most important sources in Medieval Danish history
- Provides a very readable account of early Danish legend and history in a lively modern English translation
- Engages with Saxo's own narrative skill and lively sense of humour
- He is the first author to give a full account of Hamlet, whose adventures he relates at some length, the elements of which in a great many respects correspond surprisingly closely with the characters and incidents of Shakespeare's play

This volume is the most scholarly Latin text of Saxo Grammaticus, which is one of the most important sources in Medieval Danish history.

---

**Summary**

Saxo was probably a canon of Lund Cathedral, at that period a Danish cathedral, and lived at the end of the twelfth century. He was in the service of Archbishop Absalon, who encouraged him to write a history of his own country from the beginnings up to his own time, with a strong Christian bias. Starting with the myths and heroic tales of primitive Scandinavia, he devoted the first nine of his sixteen books to legendary material before dealing with the first kings of the Viking age and finished in 1285, after relating the earlier exploits of King Cnut Valdemarsson. The activities of the Danish kings were intimately bound up with the monarchies of Norway and Sweden; Cnut the Great, one of Saxo's heroes, whose empire stretched as far as Britain and Iceland, was ruler of both these countries. In the last books Saxo took particular concern to describe the campaigns of Valdemar the Great and his warrior archbishop, Absalon, against the Wends of North Germany.

The work is a prosimetrum, that is, in six of the first nine books he inserts poems, which are intended to parallel specimens of old Danish heroic poetry in Latin metres. Saxo's Latin prose style is often complex, based as it is on models like Valerius Maximus and Martianus Capella, but he is a lively and compelling story-teller, often displaying a rather sly sense of humour, and an interest in the supernatural. He is the first author to give a full account of Hamlet, whose adventures he relates at some length, the elements of which in a great many respects correspond surprisingly closely with the characters and incidents of Shakespeare's play.

Volume I of *Saxo Grammaticus* contains an introduction from the editor, and the first ten books of Saxo's work.

---

**Contributor Bio**

**Karsten Friis-Jensen** was born in Copenhagen, and educated at the University there, where he became a teacher from 1985 and a senior lecturer from 1990 in the Institute of Greek and Latin, now a part of the Saxo Institute. Previously he had worked at the Thesaurus Linguae Latinae in Munich from 1983 to 1985. He was a member of the Royal Danish Academy of Sciences and Letters from 1997 onwards. His main field of study was Medieval Latin literature, which culminated in a scholarly edition of Saxo Grammaticus's *Gesta Danorum*, published in 2005, with a Danish translation by Peter Zeeberg. His other principal area of research was the medieval reception of the Roman poet Horace, and he directed the work on Horace for the *Catalogus translationum et commentariorum in Toronto*.

**Peter Fisher** was born in Sheffield, and was educated there and later at Exeter College, Oxford, where he read Classics and English. He continued as a teacher in these subjects in Welwyn Garden City and subsequently as a lecturer at what is now Anglia Ruskin University in Cambridge. During this time he wrote an M. Phil. thesis on Christopher Marlowe with Warwick University. Since the late 1970s he has translated and published a number of historical and medical texts from Medieval and Renaissance Latin, mainly...
Scandinavian. A keen amateur clarinetist, he regularly plays in local chamber groups and orchestras, with whom he has performed several concertos. He is married and has four children.

Prehistoric Copper Mining in Europe
5500-500 BC
William O'Brien

Key Selling Points
- Offers a good balance of descriptive details and interpretation of up-to-date research
- Provides a broad survey, covering a wide geographical range of sites, and incorporating research from many archaeologists and geologists in different countries
- Includes an extensive range of illustrations

Examines prehistoric copper mining in Europe, from the first use of the metal eight thousand years ago in the Balkans to its widespread adoption during the Bronze Age.

Summary
This volume examines prehistoric copper mining in Europe, from the first use of the metal eight thousand years ago in the Balkans to its widespread adoption during the Bronze Age. The history of research is examined, as is the survival of this mining archaeology in different geological settings. There is information on the technological processes of mineral prospecting, ore extraction, and metal production, as well as the logistics and organization of this activity and its environmental impact. The analysis is broadened to consider the economic and societal context of prehistoric copper mining and the nature of the distinctive communities involved.

The study is based on a review of field data and research produced over many decades by the collaboration of archaeologists and geologists in a number of different countries, and covers such famous mining centres as the Mitterberg in Austria, Kargaly in Russia, the Great Orme in Wales, and those in Cyprus, from where the name of this metal derives. These regional studies are brought together for the first time to present a remarkable story of human endeavour and innovation, which marks a new stage in the mastery of our natural resources.

Tangible Things
Making History through Objects
Laurel Thatcher Ulrich, Ivan Gaskell, Sara Schechner...

Key Selling Points
- Presents an innovative and unprecedented exhibition as a new framework for thinking about museum collections
- Challenges the boundaries between museums and between academic disciplines
- Introduces an astonishing array of objects hidden in Harvard collections
- Each chapter includes accessible and entertaining case studies
- 200 beautiful photographs that illustrate modes of close looking
Any object can serve as a link between past and present

Summary
In a world obsessed with the virtual, tangible things are once again making history. Tangible Things invites readers to look closely at the things around them, ordinary things like the food on their plate and extraordinary things like the transit of planets across the sky. It argues that almost any material thing, when examined closely, can be a link between present and past.

The authors of this book pulled an astonishing array of materials out of storage—from a pencil manufactured by Henry David Thoreau to a bracelet made from iridescent beetles—in a wide range of Harvard University collections to mount an innovative exhibition alongside a new general education course. The exhibition challenged the rigid distinctions between history, anthropology, science, and the arts. It showed that object-centered inquiry inevitably leads to a questioning of categories within and beyond history.

Tangible Things is both an introduction to the range and scope of Harvard’s remarkable collections and an invitation to reassess collections of all sorts, including those that reside in the bottom drawers or attics of people’s houses. It interrogates the nineteenth-century categories that still divide art museums from science museums and historical collections from anthropological displays and that assume history is made only from written documents. Although it builds on a larger discussion among specialists, it makes its arguments through case studies, hoping to simultaneously entertain and inspire. The twenty case studies take us from the Galapagos Islands to India and from a third-century Egyptian papyrus fragment to a board game based on the twentieth-century comic strip "Dagwood and Blondie." A companion website catalogs the more than two hundred objects in the original exhibition and suggests ways in which the principles outlined in the book might change the way people understand the tangible things that surround them.

Contributor Bio

Laurel Thatcher Ulrich taught for fifteen years at University of New Hampshire before moving to Harvard in 1995. She is the author of many books and articles on early American history including A Midwife's Tale, which won the Pulitzer Prize for history in 1991, and The Age of Homespun: Objects and Stories in the Creation of an American Myth.

Ivan Gaskell held positions at the Warburg Institute, Cambridge University, and Harvard before moving to the Bard Graduate Center in 2012. His work on material culture addresses intersections among history, art history, anthropology, and philosophy. He is the author, editor, or co-editor of eleven books, and has contributed to numerous journals and edited volumes in history, art history, and philosophy.

Sara J. Schechner is the David P. Wheatland Curator of the Collection of Historical Scientific Instruments at Harvard University, where is she is part of the history of science department and has taught museum studies. She recently received the Joseph H. Hazen Education Prize (2008) of the History of Science Society for a career of innovative and diverse object-based teaching. She lives in a historic house on the National Register and has an archaeological site in her back yard.
Sarah Anne Carter is the curator of the Chipstone Foundation and the Chipstone Fellow in Material Culture at the University of Wisconsin-Madison. She was previously a lecturer on history and literature at Harvard University. Her research has been supported by several grants, and she has published essays in The History of Photography, The History of Childhood and Youth, and The Museum History Journal.

Samantha van Gerbig is curatorial technician of the Collection of Historical Scientific Instruments at Harvard University.

Slave Labor in Nazi Concentration Camps
Marc Buggeln, Paul Cohen

Key Selling Points
• Carries out systematic comparisons of different concentration camps, something which has not been done in previous studies
• Considers the statements of both perpetrators and victims, an approach seldom used in Holocaust or concentration camp studies
• Combines a cultural history perspective with a structural history one
• Offers a comparative framework that will be useful for further examinations of National Socialist concentration camps or other camp systems, such as gulags

Examines the slave labor carried out by concentration camp prisoners from 1942 and the effect this had on the German wartime economy.

Summary
Slave Labor in Nazi Concentration Camps examines the slave labor carried out by concentration camp prisoners from 1942 and the effect this had on the German wartime economy. This work goes far beyond the sociohistorical 'reconstructions' that dominate Holocaust studies - it combines cultural history with structural history, drawing relationships between social structures and individual actions. It also considers the statements of both perpetrators and victims, and takes the biographical approach as the only possible way to confront the destruction of the individual in the camps after the fact.

The first chapter presents a comparative analysis of slave labor across the different concentration camps, including Auschwitz, Buchenwald, and Dachau. The subsequent chapters analyse the similarities and differences between various subcamps where prisoners were utilised for the wartime economy, based on the example of the 86 subcamps of Neuengamme concentration camp, which were scattered across northern Germany. The most significant difference between conditions at the various subcamps was that in some, hardly any prisoners died, while in others, almost half of them did. This work carries out a systematic comparison of the subcamp system, a kind of study which does not exist for any other camp system. This is of great significance, because by the end of the war most concentration camps had placed over 80 percent of their prisoners in subcamps. This work therefore offers a comparative framework that is highly useful for further examinations of National Socialist concentration camps, and may also be of benefit to comparative studies of other camp systems, such as Stalin's gulags.

Contributor Bio
Marc Buggeln is research assistant at the Humboldt-University in Berlin. He received his Ph.D. at the University of Bremen in 2008 with a study on the subcamp system of the CC Neuengamme. Currently he is working on a history of public finance in West Germany.

From Anatolia to Aceh
Ottomans, Turks, and Southeast Asia
Andrew Peacock, Annabel Teh Gallop

Key Selling Points
• Contains new research based on previously unknown primary sources and not available elsewhere
• Includes contributions from experts on Ottoman and Southeast Asian history, thus combining perspectives from two very different regions
• Covers a wide range of disciplines: political, economic and diplomatic history, literature, theology, art history

The spread of Islam across maritime Southeast Asia was one of the great transformations that shaped today's world. Links with the Middle East were crucial, but ties with the Ottoman empire have received little attention from historians. This book uses original archival research to focus on the relationship, from the 16th century to the present day.

Summary
Southeast Asia has long been connected by trade, religion and political links to the wider world across the Indian Ocean, and especially to the Middle East through the faith of Islam. However, little attention has been paid to the ties between Muslim Southeast Asia - encompassing the modern nations of Indonesia, Malaysia, Brunei, Singapore and the southern parts of Thailand and the Philippines - and the greatest Middle Eastern power, the Ottoman empire.

The first direct political contact took place in the 16th century, when Ottoman records confirm that gunners and gunsmiths were sent to Aceh in Sumatra to help fight against the Portuguese domination of the pepper trade. In the intervening centuries, the main conduit for contact between was the annual Hajj pilgrimage, and many Malay pilgrims from Southeast Asia spent long periods of study in the holy cities of Mecca and Medina, which were under Ottoman control from 1517 until the early 20th century. During the period of European colonial expansion in the 19th century, once again Malay states turned to Istanbul for help. It now appears that these demands for intervention from Southeast Asia may even have played an important role in the development of the Ottoman policy of Pan-Islamism, positioning the Ottoman emperor as Caliph and leader of Muslims worldwide and promoting Muslim solidarity.

The papers in this volume represent the first attempt to bring together research on all aspects of the relationship between the Ottoman world and Southeast Asia - political, economic, religious and intellectual - much of it based on documents newly discovered in archives in Istanbul.

Key Selling Points

- A new study of gifts in early modern English culture with a unique take on the political aspect of the subject
- An interdisciplinary volume, of interest to scholars in many fields, including political, social, and cultural historians, anthropologists, and literary scholars
- Based on a rich range of often unexplored primary sources - including pamphlets, literature, financial accounts, and correspondence
- Explores the legal implications of gifts and bribes, which will be of interest to legal historians
- Addresses the nature of gifts in relation to the politics of the court of various monarchs

A new study of gifts in early modern English culture with a unique take on the political aspect of the subject

Summary

Gifts are always with us: we use them positively to display affection and show gratitude for favours; we suspect that others give and accept them as douces and bribes. The gift also performed these roles in early modern English culture: and assumed a more significant role because networks of informal support and patronage were central to social and political behaviour. Favours, and their proper acknowledgement, were preoccupations of the age of Erasmus, Shakespeare, and Hobbes. As in modern society, giving and receiving was complex and full of the potential for social damage. 'Almost nothing', men of the Renaissance learned from that great classical guide to morality, Lucius Annaeus Seneca, 'is more disgraceful than the fact that we do not know how either to give or receive benefits'. The Power of Gifts is about those gifts and benefits - what they were, and how they were offered and received in the sixteenth and seventeenth centuries. It shows that the mode of giving, as well as what was given, was crucial to social bonding and political success.

The volume moves from a general consideration of the nature of the gift to an exploration of the politics of giving. In the latter chapters some of the well-known rituals of English court life - the New Year ceremony, royal progresses, diplomatic missions - are viewed through the prism of gift-exchange. Gifts to monarchs or their ministers could focus attention on the donor, those from the crown could offer some assurance of favour. These fundamentals remained the same throughout the century and a half before the Civil War, but the attitude of individual monarchs altered specific behaviour. Elizabeth expected to be wooed with gifts and dispensed benefits largely for service rendered, James I modelled giving as the largesse of the Renaissance prince, Charles I's gift-exchanges focused on the art collecting of his coterie. And always in both politics and the law courts there was the danger that gifts would be corroded, morphing from acceptable behaviour into bribes and corruption. The Power of Gifts explores prescriptive literature, pamphlets, correspondence, legal cases and financial records, to illuminate social attitudes and behaviour through a rich series of examples and case-studies.

Contributor Bio

Felicity Heal is Emeritus Fellow at Jesus College, Oxford. She was also a lecturer in History at the University of Oxford from 1980 to 2011. She is the author of numerous books and articles on sixteenth- and seventeenth-century Britain, including Reformation in Britain and Ireland (2003), The Gentry in England and Wales 1500-1700 (with Clive Holmes, 1994), and Hospitality in Early Modern England (1990). In recent years her research interests have focused on gifts and social exchange, and also on Tudor chronicles and the history of the early Church in England.
Part 1: Society and its Gifts
1. What is a Gift?
2. Gifts Small and Great
3. Occasions and Seasons

Religion of a Different Color
Race and the Mormon Struggle for Whiteness
W. Paul Reeve

Key Selling Points
- The most thorough telling to date of Mormonism's tortured relationship with blackness, which has been the topic of recent controversy within the LDS Church.
- Chronicles the way in which Mormons were described as physically different and the argument that polygamy was giving rise to a new race, degraded and deformed.
- Explores accusations of Mormons dressed as Indians at the Mountain Meadows Massacre and substantiates that those claims predated the massacre by at least seven years.

The Church of Jesus Christ of Latter-day Saints (Mormonism) has consistently found itself on the wrong side of white. Mormon whiteness in the nineteenth century was a contested variable not an assumed fact. Religion of a Different Color traces Mormonism's racial trajectory from not white enough in the nineteenth century, to too white by the twenty-first.

Summary
The Protestant white majority in the nineteenth century was convinced that Mormonism represented a racial—not merely religious—departure from the mainstream and they spent considerable effort attempting to deny Mormon whiteness. Being white equalled access to political, social, and economic power, all aspects of citizenship in which outsiders sought to limit or prevent Mormon participation. At least a part of those efforts came through persistent attacks on the collective Mormon body, ways in which outsiders suggested that Mormons were physically different, racially more similar to marginalized groups than they were white. Medical doctors went so far as to suggest that Mormon polygamy was spawning a new race. Mormons responded with aspirations toward whiteness. It was a back and forth struggle between what outsiders imagined and what Mormons believed. Mormons ultimately emerged triumphant, but not unscathed. At least a portion of the cost of their struggle came at the expense of their own black converts. Mormon leaders moved away from universalistic ideals toward segregated priesthood and temples, policies firmly in place by the early twentieth century. So successful were they at claiming whiteness for themselves, that by the time Mormon Mitt Romney sought the White House in 2012, he was labelled "the whitest white man to run for office in recent memory." Mormons once again found themselves on the wrong side of white.

A Revolutionary History of Interwar India
Violence, Image, Voice and Text
Kama Maclean

Key Selling Points
• Maclean's history of Indian revolutionaries in the interwar years situates their politics of violence in the broader context of the freedom struggle and Congress politics.
• Revisits the history of the Civil Disobedience movement to include those activists who made strategic use of violence as a means of unsettling the British in India.
• Gives voice to those Indian nationalists, long overshadowed by Gandhi, who supported the use of violence in the anti-colonial struggle.

Summary
Focusing on the Hindustan Socialist Republican Army (HSRA), A Revolutionary History delivers a fresh perspective on the ambitions, ideologies and practices of this influential organization, formed by ChandrashekharAzad and Bhagat Singh and inspired by transnational anti-imperial dissent. It is a new interpretation of the activities and political impact of the north Indian revolutionaries who advocated the use of political violence against the British.

Kama Maclean contends that the actions of these revolutionaries had a direct impact on Congress politics and tested its policy of non-violence. In doing so she draws on visual culture studies, demonstrating the efficacy of imagery in constructing — as opposed to merely illustrating — historical narratives. Maclean analyses visual evidence alongside recently declassified government files, memoirs and interviews to elaborate on the complex relationships between the Congress and the HSRA, which were far less antagonistic than is frequently imagined.

Contributor Bio
Kama Maclean is Associate Professor of South Asian and World History at UNSW in Sydney, and Editor of South Asia. Her book, Pilgrimage and Power, was awarded an honorable mention in the Ananda Coomaraswamy Prize (2009).

Quotes
"An extraordinarily well-written and well-researched book that will transform our understanding of the relationship between violence and nonviolence in interwar India. The book reframes the place of revolutionary ideologies and programs as they both competed and collaborated with the campaigns of Gandhi and Congress in northern India. A model of creative research and good writing." -- Durba Ghosh, Associate Professor, Department of History, Cornell University

"A courageous alternative account of the Indian freedom struggle, so far predominantly framed within the mega-narrative of Gandhi's ideology of non-violence as the principal instrument of triumph of India's independence, overshadowing the role of the revolutionaries during interwar India. Never before has the history of this crucial phase in modern India been reconstructed using the living archives of oral histories, folklore, popular visual culture, interviews, cinema and satires as powerful additional sources, resulting in the fascinating story of people's movements, lesser known martyrs and unsung freedom fighters intricately analysed within the dynamics of anticolonial violence." -- Jyotindra Jain

"In pursuing the story of the revolutionary-nationalist Bhagat Singh and his comrades, Maclean makes a clean break with the official teleology of Indian nationalism: the victory of non-violence over imperial forces. However, she also encounters a figure whose historical life extends far beyond official archives into the regions of oral testimony, popular cinema and bazaar representations. The resulting text raises fundamental questions about the place of violence in Indian nationalism. It also presents some very thoughtful reflections on historians' use of unconventional sources. A remarkable and enduring achievement." -- Dipesh Chakrabarty, Lawrence A. Kimpton

Sri Lanka in the Modern Age
A History
Nira Wickramasinghe

Key Selling Points
- Concise history of the Sri Lankan people
- Accomplished history of both the state and the people of Sri Lanka which provides an essential background for understanding the country's contemporary problems
- Only up-to-date history of Sri Lanka on the market

Summary
Sri Lanka in the Modern Age recounts the modern history of the island in an accessible yet unconventional manner. Where other histories have tended to focus on the state's failure to accommodate the needs and demands of minority communities, Wickramasinghe places their claims alongside the political, social and economic demands of other communities, parties, associations and groups, tracing their lineages to the colonial period. This updated second edition carries the book into the present, covering the brutal end of Sri Lanka's civil war and the making of oppressive stability that has grown in its wake.

Drawing on recent work as well as on her own research in the field, Wickramasinghe has written above all a history of the people of Sri Lanka rather than a history of the nation-state.

Contributor Bio
Nira Wickramasinghe is Professor and Chair of Modern South Asian Studies at Leiden University in the Netherlands. Her most recent books are Metallic Modern: Everyday Machines in Colonial Sri Lanka and L'invention du vetement national au Sri Lanka: Habiller le corps colonise.

Quotes
"For those wanting to understand the origins of the disputes which have kept the island of Sri Lanka in turmoil for the past thirty-five years, Nira Wickramasinghe has written a packed and comprehensive account of the historical developments which have shaped the nation now known as Sri Lanka."--Asian Affairs

"Sri Lanka in the Modern Age is a refreshing departure from historiography's standard treatment of South Asia. EL By putting a people-centred politics of identity at its centre, the book offers a different take from those proffered by historians on the relationship between state-building and the violent defence of territorially-based categorical identities in Sri Lanka; what it shows is that state-building does not consolidate an immanent nation, but rather works to produce certain people as the native, the national, the majority, the citizen through the simultaneous disavowal of others as the outsider, the minority, the migrant."--Contemporary South Asia

"A neatly crafted, well documented historical narrative EL A significant contribution to the discipline of history in Sri Lankan society."--Commonwealth and Comparative Politics

Table Of Contents
Preface: Identities and Histories

PART I: PRE-INDEPENDENCE YEARS: CHANGING LIVES
1. Colonial Encounters
Conquest and sovereignties
Conditions of differentiation; new identities
The British colonial state
New landscapes: the plantation

2. Colonialism and Constructed Identities

Counting and classifying: the census mode of knowledge
Constructing political identities: Kandyans and Ceylon Tamils
Colonial constructs of authenticity and gender differences
Evading colonial divides

3. National Framings: Authentic Bodies and Things
Spreading notions of authenticity: schools, reading, newspapers, theatre and new religious practices
Images of an authentic past
Authenticity in the present: dressing and caring for the authentic body

4. Before Independence: Communities and Conflicts
Symbolic struggles: riots and clashes in pre-independence Ceylon
The vote and anti-migrant moves
Politics of violence: migrants during the Depression
4 February 1948: Independence

PART II: THE POST-INDEPENDENCE YEARS: POLITICAL CULTURES

5. Citizens, Communities, Rights, Constitutions, 19472000
Unmaking citizens
The Donoughmore Commission: origins and purity as the basis of rights
The Soulbury Report
The Soulbury Report, Indian citizenship and franchise
The 19489 Indian Citizenship Acts
Other Citizenship Acts
More rights and less representation: women as citizens
Legal and constitutional protection of women
Making a majority, 194887
From Draft Constitution 2000 to open-ended peace
Constitutional responses

6. The Search for Equality: The Left Movement and Insurrections
A combatant's itinerary
The left in Sri Lanka
The left movement: origins
The war years
Post-war social unrestthe 19467 strikes
The decline of the traditional left, 195070
Disunity of the left
Electoral politics: the challenge of the SLFP
Dilution of the left: coalition politics
Policies of the left: from class to sectarianism
The rise of the Radical Left, 196570
The rise of the New Left, 197090: political violence

7. The Search for Sovereignty: Tamil Separatism/Nationalism
Being Tamil: multiple modes
Pan-Tamilness: 'a great Tamil-speaking world of goodness'
Being Tamil: history and past
Regional modes of being Tamil
Being Tamil: diasporic ways
Land, language, education: the quest for Tamil rights 1950s60s
Counternarratives: temple entry, caste, class
Elite politics and caste
Insurrection: 1970s-1983
War of attrition: from the 1983 riots to 2001
The spirit of Tamilness

8. Sri Lanka: The Welfare State and Beyond

Lineages of the past: peasant welfare and welfare measures
From welfare state to humanitarianism
Neo-welfarism: the humanitarian thrust
Alternatives: the rise of civil society
Postcolonial dilemmas: between globalisation and traditions

9. 'Only A Great Land Wounded': The End of the War

Mahinda Rajapaksa's ascendance to power
Military campaigns in the Eastern Province
The 'Peace with War' strategy in the Northern Province in 2008
Insecurity and insurgent violence in 2008
The final battle, 2009
Human rights, NGOs and the shift in international norms
Electoral gains and the consolidation of the regime
Afterlives
Conclusion

10. The Post-War State: The Making of Oppressive Stability

Consolidation of power
18th Amendment
Creating a patronage state
Rajapaksa and family politics
Militarisation and gentrification: space as politics
Producing the present: patriotism and cultural heritage
Vying for popular appeal: merging of history and heritage
in Popular Culture
Contest over place/sites and practices
Heritage and violence
Through the interstices: social solidarities and the possibility of protest
Autumn of the Matriarch
Indira Gandhi's Final Term in Office
Diego Maiorano

Key Selling Points
• A revealing political history of Indira Gandhi's final term that sheds light on the successes and failures of her last four years in office
• First book to focus on Indira Ghandi's last years in power
• Highlights the legacy of Indira Ghandi's leadership in today's India
Media will be recounting Indira Gandhi's legacy toward the end of 2014 during the 30th anniversary of her assassination

Summary
Indira Gandhi's last years in office as India's prime minister ran from January 1980 to her assassination in October 1984 but until now no book has been devoted to her final term. Among the principal themes discussed in this innovative volume are how Indian politics and society changed in the 1970s, including the State of Emergency (1975-77); Congress's response to insurgency in Punjab, Assam and Kashmir; the rise of new forms of political mobilisation in the early 1980s; and the prime minister's relationship with the key institutions of state. Maiorano also reveals how Mrs Gandhi's policies in the 1980s impacted on the big industrialists, the middle class, the rich peasantry and the poor, thereby crucially re-orienting India's economic strategy. Autumn of the Matriarch is the first major study of Mrs Gandhi’s last years in power, an important juncture in India’s recent history, as it was then that trends emerged that influenced the country for the next three decades.

Contributor Bio
Diego Maiorano is a Postdoctoral Research Fellow, University of Liège, Belgium. He has written several articles on Indian politics and society, most recently for Modern Asian Studies and Economic and Political Weekly.

Quotes
"This fine book is the first comprehensive analysis of Indira Gandhi''s last spell in power and fills a major gap in our understanding. It examines her drive for personal rule and its corrosive impact on democratic institutions, and assesses her manipulation of dangerous communal forces which ultimately led to her own demise. And yet it is also an admirably balanced account of crucial economic and other policy issues, and much else besides." - James Manor, Emeka Ayaoku Professor Emeritus of Commonwealth Studies, School of Advanced Study, University of London
"Maiorano's study of Indira Gandhi's final term in office is illuminating. His carefully crafted analysis, interweaving national and state level dynamics, contributes to our understanding of Indian politics during this period, and of her legacies to contemporary Indian politics, economy and society." -- Katharine Adeney, Director of the Institute of Asia and Pacific Studies, University of Nottingham

Table Of Contents

Introduction

1. Indian Politics and Society in the 1970s

Introduction
The Socio-economic Context
Demands for Political Representation
The Deinstitutionalisation of the Congress Party
The Emergency 1975-77

2. The Party that didn't work: The Congress (I) in the Early 1980s
Introduction
The Rise of the Youth Congress
Coalition-building and Electoral Alliances
The Electoral Campaign
The Election Outcomes
January-June 1980: The Defectors Market
The Congress (I) in the states
Reform of the Congress (I): Rajiv Gandhi's attempt
Declining Governability: The Deterioration of Law and Order
Conclusion

3. Political Mobilisation in the Early 1980

Introduction
The Indian Economy 1980-84: An Overview
The Business Community
The Middle Class
Rich Farmers
The Poor
Mrs Gandhi's Political Strategy
The Weaker Sections
The Middle Class's Need for Political Representation
Mrs Gandhi's Social Base in the 1980s
The Rise of Political Hinduism
The Rise of the Regional Alternatives
Conclusion

4. Institutions: Politicisation, Erosion, and Informalisation

Introduction
Politicisation of Institutions: the Bureaucracy
Politicisation of Institutions: the Judiciary, the Parliament, and the Presidency
Erosion of Institutions: The Rule of Law and the Constitution
Informalisation of Institutions: The Federal Setting
Conclusion

Conclusion

The Death of the Mehdi Army
The Rise, Fall, and Revival of Iraq's Most Powerful Militia
Nicholas Krohley

Key Selling Points
- Investigates the rise, fall and possible re-emergence of a powerful Shia militia in post-Saddam Iraq
- Author was embedded with US troops in Baghdad during the "Surge" under the controversial Human Terrain System
- Offers new evidence on an important chapter in modern Iraqi history

Summary
The Mehdi Army militia was a towering force in Iraq during the early years of the post-Saddam era. As an aggressive opponent of foreign occupation and one of the principal antagonists in Iraq's brutal sectarian civil war, the militia was central to the violence that ravaged the country and a pivotal political actor. Growing rapidly in size and strength, and controlling entire districts of Baghdad and broad swathes of southern and central Iraq, the Mehdi Army seemed poised to become a Hezbollah-like 'state within a state' that would remain enormously powerful for years to come.

Drawing from extensive field experience in one of Baghdad's most volatile militia-held districts, Krohley exposes how, and why, the militia suddenly and unexpectedly collapsed in the midst of the Americans' 'Surge' of forces during 2008. Building from an examination of the Mehdi Army's social and ideological roots, he presents a neighbourhood-by-neighbourhood study of the militia's changing fortunes that offers unparalleled local detail and specificity. Krohley shows how the Mehdi Army's demise was ultimately a self-inflicted 'death' as opposed to a triumph of its foes. In so doing, he not only challenges prevailing orthodoxies of counterinsurgency doctrine and the mythology of the Surge, but also offers penetrating insights into the battered state of Iraqi society after decades of dictatorship, privation and war.

Contributor Bio
Nicholas Krohley is the founder & CEO of Subaltern Research Services and a Visiting Research Fellow at King's College London. He served in Baghdad as a social scientist with the US Army's Human Terrain System.

Quotes
"A most valuable and original insight into issues and dynamics that have eluded the grasp of Iraq specialists for far too long ... an urgently needed scholarly contribution to our understanding of modern Iraqi history." - Fanar Haddad, author of Sectarianism in Iraq

Table Of Contents

Preface
Introduction
1. A City Transformed - The Creation of Eastern Baghdad
3. The Sanctions Era - Shifts in Civil Society & the Rise of the Sadrist Movement
4. The Changing Fortunes of the Rekindled Sadrist Movement
5. Tisa Nissan - District Overview
6. Beladiyat & Mashtal - Communities Under Siege
7. Kamaliyah & Amin - Rallying the Masses
8. Fedaliyah & Shawra wa Umm Jidr - Traction in the Remnants of Tradition

Conclusion - Insurgency and Counterinsurgency in Uneven Terrain
Appendix - Human Terrain Mapping & Counterinsurgency Operations

The Improbable War
China, The United States and Logic of Great Power Conflict
Christopher Coker

Key Selling Points
- A prescient analysis of the likelihood of a US - China conflict and how it might be avoided
- Considers prospects of cyberwar and war in outer space

Looks to China for the next major conflict

Summary
The Improbable War explains why conflict between the USA and China cannot be ruled out. In 1914 war between the Great Powers was considered unlikely, yet it happened. We learn only from history, and popular though the First World War analogy is, the lessons we draw from its outbreak are usually mistaken. Among these errors is the tendency to over-estimate human rationality.

All major conflicts of the past 300 years have been about the norms and rules of the international system. In China and the US the world confronts two 'exceptional' powers whose values differ markedly, with China bidding to challenge the current order. The 'Thucydidean Trap' - when a conservative status quo power confronts a rising new one - may also play its part in precipitating hostilities. To avoid stumbling into an avoidable war both Beijing and Washington need a coherent strategy, which neither of them has.

History also reveals that war evolves continually. The next global conflict is likely to be played out in cyberspace and outer space and like all previous wars it will have devastating consequences. Such a war between the United States and China may seem improbable, but it is all too possible, which is why we need to discuss it now.

Contributor Bio
Christopher Coker is Professor of International Relations at the London School of Economics. He is the author of Barbarous Philosophers: Reflections on the Nature of War from Heraclitus to Heisenberg; Warrior Geeks; and Men At War: What Fiction Tells Us About Conflict, From The Iliad to Catch-22, all of which are published by Hurst.

Quotes
"Provides an exceptionally clear and succinct discussion of what may well be the most important question of our age: does war between major states have a future, and, if so, what will it be like?" -- Martin van Creveld, author of The Culture of War and The Changing Face of War: Lessons of Combat from the Marne to Iraq
"Christopher Coker has put forward a challenging argument: not that conflict between the US and China is inevitable, but that it is possible, and that both sides will have to sharpen their understanding of one other to avoid it. Coker draws richly on history, philosophy, and international relations theory to make his case. This is a highly stimulating account by a major thinker on one of the most important geopolitical questions of our time." -- Rana Mitter, Professor of the History and Politics of Modern China at the Institute for Chinese Studies, Oxford University, and author of China's War With Japan, 1937-1945

Most Secret Agent of Empire
Taline ter Minassian

Key Selling Points
- Compelling biography of Reginald Teague-Jones (1889-1988) -- the most important British spy you have never heard of
- Teague-Jones was feared by Stalin, roamed Eurasia and chameleon-like, vanished, only to reappear in America, decades later, still practicing espionage
- DT Teague-Jones was held responsible for the execution of 'the 26 Commissars' after the fall of the Baku Commune in 1918 -- an event that inspired a poem by Yesenin, a Brodsky painting and a 1933 feature film
- Compelling biography of Reginald Teague-Jones (1889-1988) -- the most important British spy you have never heard of

Summary
Dubbed an "agent of British imperialism" by Joseph Stalin, Reginald Teague-Jones (1889-1988) was the quintessential English spy whose exceptional story is recounted in this new biography. He studied in St Petersburg, participated in the 1905 Revolution and spent the rest of his life working for various branches of British secret intelligence. Plunging into the Great Game, he participated in daring operations against the Bolsheviks and tracked down a turbulent German agent, Wilhelm Wassmuss, who was spreading anti-British propaganda in Persia. Teague-Jones was also held responsible for the execution of 'the 26 Commissars' after the fall of the Baku Commune in 1918. This became one of the Soviet Union's most powerful cults of martyrology, inspiring a poem by Yesenin, a Brodsky painting, a 1933 feature film and an immense monument. Shortly after, Teague-Jones changed his name to Ronald Sinclair and adopted a secret persona for the next five decades, for part of which he worked undercover in the United States as an expert on Indian, Soviet and Middle Eastern affairs, possibly in collaboration with the OSS, the new American secret service. In his swan song in espionage he kept a gimlet eye on the Soviet delegation to the UN in New York. For these reasons, and many others besides, Reginald Teague-Jones is the most important British spy you have never heard of.

Contributor Bio
Taline Ter Minassian is a historian at the Institut National des Langues et Civilisations Orientales, INALCO, Paris, specialising in Soviet and Middle Eastern studies. She is the author of Colporteurs du Komintern, L'Union Soviétique et les minorités au Moyen-Orient.

Quotes
"A meticulously researched book ... Dubbed an 'agent of British imperialism,' by Joseph Stalin, English Spy Reginald Teague-Jones is the subject of this highly readable biography ... Ter Minassian tells a fascinating tale." -- Cahiers du Monde Russe

Table Of Contents
Foreword
Acknowledgments
Introduction
Chapter 1- Childhood in Liverpool and St Petersburg
Liverpool: birthplace and departure point
Pendennis Street
Liverpool, Second City of the Empire
An Englishman in Russia
Dazzling St Petersburg
A German Education at St Petersburg: the Annenschule
Red Sunday: memories of the 1905 Revolution
Warning bells and ice-hilling
The preludes to an expected drama
Caught in the crowd: Teague-Jones, witness to the massacre

Chapter 2 - From the Punjab to the North West Frontier: the making of a Gentleman of the Raj

An Ambition: joining the Indian Political Service
A foretaste of the Frontier: the Punjab
The Indian Political Service: a caste within the colonial administration
A shadow organisation: the Indian Political Service
The training-ground: the North West Frontier Province
Administrative and political frontiers: controlling the hinterland
Sherani country
The Frontier: a territory for elites?

Chapter 3 - The Persian Gulf and the hunt for Mr Wassmuss

The Great War and Persia
Iran during the First World War: the theory and practice of neutrality
Jihad and pointed helmets
A police in the South: the South Persia Rifles (SPR)
The tribulations of the German Lawrence in the Persian Gulf
Wassmuss, a model field-agent
Reginald Teague-Jones on Wassmuss's track
Persian and the Russian Revolution
On the road to Meshed
Meshed: Teague-Jones at the Turkestan frontier

Chapter 4 - Ashkhabad and the Transcaspian Episode

A Secret Mission at the gates of Central Asia in 1918
First impressions of Transcaspia
Transcaspia after the Russian Revolution: from the Red offensive to the emergence of a Turkmen power
The brief history of a transient government: the Transcaspian Government
Reginald Teague-Jones: Political Representative in Transcaspia
This is a railway war
A railway government
Building an intelligence network in Transcaspia
From improvisation to retreat: the Transcaspian episode
The Turkmen question: an instrumental strategy
An intelligence service in Yomut country
Malmiss: Game over

Chapter 5 - The Legend of the 26 Commissars: Teague-Jones, hero or villain?

Baku: 1918
The country before the battle
Baku: the geostrategic prize
The siege of Baku
The drama of the 26 Commissars: the anatomy of an execution
A political drama with a railway ending
Passengers for Krasnovodsk
Diminished responsibilities
A malicious propaganda legend (Teague-Jones, 1979)
The origins of the Soviet case: Vadim Chaikin's inquiry
Shot or decapitated?
The culprit on stage: Teague-Jones in Soviet iconography

Chapter 6 - The Retreat of the White Armies: from Constantinople to the Caucasus (1919-1921)
A nest of spies in Constantinople
In the ruins of the Ottoman Empire: Constantinople in 1919
Beefsteaks à la Hoover-Nansen
A meeting with General Wrangel
The Caucasian imbroglio
Back to Baku
Georgia on the eve of the Red invasion
The view from Mount Ararat (February 1921)
Teague-Jones and the Soviet-Turkish Entente
A confluence of interests
Ajaria: a strategic position on the Soviet-Turkish frontier
Plans for a Muslim policy: an Alliance counter-strategy against Russia

Chapter 7-Ronald Sinclair, commercial traveller for the British Empire

Zobeida and I: A Persian Odyssey
An opaque mission in Iran for a combination of partners
Levantine encounters
Across the Syrian desert
Persian adventures: to India by the back door
Kurdistan to Iranian Azerbaijan: assessing Soviet influence
Iran from north to south: Tehran to Bushir
Iran from west to east: return to Baluchistan
The colonial eye behind the camera
A Cairo idyll
A passenger of Imperial Airways
A season in Tibet

Chapter 8-Ronald Sinclair in America (1941-1960)

British Security Coordination at the heart of Anglo-American relations during the Second World War
Rockefeller Center, 38th Floor, Room 3801
June 1941: an emergency mission to Bermuda
Major Sinclair, BSC Co-ordination officer
The Anglo-American relationship and the test of India
The IPI: from Imperial security to Anglo-American collaboration
The India League of America: the rising power of a pressure group
Counter-propaganda in the land of democracy
The transfer of power
The other side of the mirror
Sahib! Sahib!
Return to the North-West Frontier

The Psychology of Strategy
Exploring Rationality in the Vietnam War
Kenneth Payne

Key Selling Points
- Drawing on emotional, evolutionary and social psychology, Payne explores the strategic behaviour of key political and military actors in the Vietnam War.
- This is the first book length treatment that applies modern concepts from psychology and neuroscience to understand strategic decision-making and behaviour in modern conflict.
- The book advances an original approach to understanding strategic behaviour as a struggle for esteem, rather than a search for security.

Summary
How do strategists decide what they wish to achieve through war, and how they might accomplish it? And why does their understanding of violence regularly turn out to be wrong? In seeking answers to these questions Kenneth Payne draws on the study of psychology to examine strategic behaviour during the Vietnam War. He explores the ways in which cognitive biases distort our sense of our own agency and our decision-making, arguing that much of the latter is emotional, shaped by unconscious processing and driven by a prickly concern for social esteem.

The Nixon and Johnson administrations both proved susceptible to the processes that are familiar to students of modern neuroscience and psychology, but perhaps less appreciated within strategic studies. US strategists in the Vietnam era miscalculated in ways that would surprise rational theorists, but not evolutionary psychologists: they exaggerated the stakes, embraced risky and overly optimistic solutions, and failed to appreciate the limits of force to shatter the enemy's resolve. Their concern for reputation led to escalation, based on a flawed conception of what such escalation could achieve.

The Vietnam conflict provides an excellent illustration that war is an inherently psychological phenomenon. This challenges abstract notions of rationality in strategic affairs, suggesting that the strategists -- much like the rest of us -- are strangers to themselves.

Contributor Bio
Kenneth Payne is a political psychologist and lecturer in Defence Studies at King's College London. He is also a research associate at the Centre for International Studies, Oxford University.

Quotes
"The author assaults the long-held ideal-typical rational strategist, and what Friedrich Meineke called the 'sophisticated, rational will, untroubled by passions and momentary impulses.' The book offers a welcome return--and addition--to two lines of thinking about those who make strategy: the importance of non-material interests and impulses, and the role of the subconscious (or unconscious?) in shaping decisions."--Dr. Patrick Porter, author of Military Orientalism: Eastern War Through Western Eyes

"Required reading my international relations and strategic studies specialists who focus on decision-making at a time or crisis or war. This volume will also be useful in revising historical accounts of American decision-making in the Vietnam War to fathom how the 'best and brightest' were so prone to getting strategy wrong."--Carlyle A. Thayer, Professor Emeritus of Strategic Studies at the University of New South Wales

Table Of Contents
1. Introduction Strategy as psychology
2. The genius of command
3. Social identity in war
4. Honour, revenge and reputation
5. Shock versus the social network
6. Risk and the fog of war
7. Memory and myth
8. Conclusion On strategy and atonality
Social Science Goes to War
The Human Terrain System in Iraq and Afghanistan
Montgomery McFate, Janice H. Laurence, General Dav...

Key Selling Points
- Foreword written by General Petraeus
- An assessment of the US military program in which anthropologists and other social scientists researched societies at war in Iraq and Afghanistan
- Unique look at how social science can aid our understanding of modern conflict in a highly practical way
- McFate's experiences have been profiled in magazines such as Elle and the New Yorker

Summary
The Human Terrain System (HTS) was catapulted into existence in 2006 by the US military's urgent need for knowledge of the human dimension of the battlespace in Iraq and Afghanistan. Its centrepiece was embedded groups of mixed military and civilian personnel, known as Human Terrain Teams (HTTs), whose mission was to conduct social science research and analysis and to advise military commanders about the local population. Bringing social science - and actual social scientists - to the wars in Iraq and Afghanistan was bold and challenging. Despite the controversy over HTS among scholars, there is little good, reliable source material written by those with experience of HTS or about the actual work carried out by teams in theatre. This volume goes beyond the anecdotes, snippets and blogs to provide a comprehensive, objective and detailed view of HTS. The contributors put the program in historical context, discuss the obstacles it faced, analyse its successes, and detail the work of the teams downrange. Most importantly, they capture some of the diverse lived experience of HTS scholars and practitioners drawn from an eclectic array of the social sciences.

Contributor Bio
Montgomery McFate is a cultural anthropologist who works on defence and national security issues. She is the Minerva Chair at the Center for Naval Warfare Studies at the US Naval War College and has been profiled in the New Yorker, Elle and the Atlantic Monthly. Janice H. Laurence is a professor in the College of Education at Temple University and is an internationally recognized military psychologist.

Table Of Contents
Introduction - Unveiling the Human Terrain System
Montgomery McFate & Janice H. Laurence

1. Mind the Gap: Bridging the Military/Academic Divide

High Command
British Military Leadership in the Iraq and Afghanistan Wars
Christopher Elliott

Key Selling Points
- Written by a retired British Army Major General, this is a scathing indictment of the military's decisions in Iraq and Afghanistan
- Reveals how the highest levels of the British military focused on making plans work rather than questioning whether such goals made military sense
- Why didn't the British Military high command achieve much better results in 2000-10 in Iraq and Afghanistan, and what accounts for this poor performance?

Summary
From 2001, Britain supported the United States in wars in Iraq and Afghanistan. "Victory" in such conflicts is always hard to gauge and domestic political backing for them was never robust. For this, the governments of Tony Blair and Gordon Brown were held responsible, and paid the price, but the role played by the High Command in the Ministry of Defence also bears examination. Critics have noted that the armed services were riven by internal rivalry and their leadership was dysfunctional, but the truth is more complicated.

In his book, General Elliott explores the circumstances that led to these wars and how the Ministry of Defence coped with the challenges presented. He reveals how the Service Chiefs were set at odds by the system, almost as rivals in the making, with responsibility diffuse and authority ambiguous. The MoD concentrated on making things work, rather than questioning whether what they were being asked to do was practicable. Often the opinion of a junior tactical commander led the entire strategy of the MoD, not the other way around, as it should have been. While Britain's senior officers, defense ministers and civil servants were undeniably competent and well intentioned, the conundrum remains why success on the battlefield proved so elusive.

Contributor Bio
Christopher L. Elliott retired from the British Army as a Major General in 2002. This book was written over two years while Elliott was a research fellow at the universities of Oxford and Reading.

Table Of Contents
1. Prologue
2. A Case to Answer?

The Libyan Revolution and its Aftermath
Peter Cole

Key Selling Points
• A wide-ranging account of the roots, trajectory, and consequences of Libya's '17 February Revolution'
• Includes interviews with fighters, politicians and civil society leaders
This book offers a novel, incisive and wide-ranging account of Libya's '17 February Revolution' by tracing how critical towns, communities and political groups helped to shape its course.

Summary
This book offers a novel, incisive and wide-ranging account of Libya's '17 February Revolution' by tracing how critical towns, communities and political groups helped to shape its course. Each community, whether geographical (e.g. Misrata, Zintan), tribal/communal (e.g. Beni Walid) or political (e.g. the Muslim Brotherhood) took its own path into the uprisings and subsequent conflict of 2011, according to their own histories and relationship to Muammar Qadhafi's regime.

The story of each group is told by the authors, based on reportage and expert analysis, from the outbreak of protests in Benghazi in February 2011 through to the transitional period following the end of fighting in October 2011. They describe the emergence of Libya's new politics through the unique stories of those who made it happen, or those who fought against it.

The Libyan Revolution and its Aftermath brings together leading journalists, academics, and specialists, each with extensive field experience amidst the constituencies they depict, drawing on interviews with fighters, politicians and civil society leaders who have contributed their own account of events to this volume.

Contributor Bio
Peter Cole was a Senior Analyst on Libya with the International Crisis Group (ICG) during the revolution and the ensuing transitional government, providing policy advice and background briefings to the UN, EU, governments, companies, NGOs and most major media outlets. Prior to his work with ICG, Peter completed an MPhil in Modern Middle Eastern Studies at the University of Oxford. Brian McQuinn is a research associate at the Centre on Conflict, Development and Peacebuilding and a doctoral candidate at the University of Oxford.

Quotes
"This is an important book that deserves a wide readership. With more than a dozen books published on the Libyan revolution, this is the first in which the contributors share extensive professional experience, a thorough knowledge of the literature, and recent fieldwork in Libya. The result is a detailed, nuanced account of the revolution and its aftermath." -- Ronald Bruce St John, author Libya: Continuity and Change and Libya: From Colony to Revolution

"Here in shocking detail is the story of Libya's violent "uncertain revolution" of 2011-12. Expert eye-witnesses give blow-by-blow accounts of why, where, when and how complex popular revolts replaced the Gaddafi fiefdom with a chaotic national "liberation". A serious, convincing and much needed clarification of the Libyan crisis." -- John Wright, former chief political commentator and analyst of the BBC Arabic Service, and author of A History of Libya

"This unique and valuable book describes the Libyan Revolution as it has never been described before. It is full of rewarding surprises and deep insights of the sort that seldom make it into daily reporting. Rarely has any revolution been captured in so many dimensions by such a capable collection of authors." -- Jon B. Alterman, Senior Vice President, Brzezinski Chair in Global Security and Geostrategy and Director, Middle East Program Center for Strategic and International Studies

"This volume represents the first in-depth account of the dramatic fall and aftermath of
the Gaddafi regime in Libya. Peter Cole and Brian McQuinn have successfully brought together nearly all of the keenest and most expert observers of this drama, journalists, academic and policy-makers, to provide detailed and considered analysis of what has occurred in Libya 2011. This book gives informed and nuanced accounts of the different aspects and actors of Libya's revolution and is destined to become an essential handbook for all those seeking to understand the seismic changes that have occurred and continue to unfold in the country." -- Michael Willis, King Mohamed VI Fellow in Moroccan and Mediterranean Studies at St Antony's College, University of Oxford, and author of Politics and Power in the Maghreb: Algeria, Tunisia and Morocco from Independence to the Arab Spring

Hungry Bengal
War, Famine and the End of Empire
Janam Mukherjee

Key Selling Points
• An unsparring account of one of the most overlooked episodes of mass starvation in history.
• Offers fresh insight into Indian history by focussing on three crises that precipitated independence: WWII, the Bengal famine of 1943, and the Calcutta riots of 1946
• Lucid account of a long-ignored moment in Indian history.
An unsparring account of one of the most overlooked episodes of mass starvation in history.

Summary
The years leading up to the independence and accompanying partition of India mark a tumultuous period in the history of Bengal. Representing both a major front in the Indian struggle against colonial rule, as well as a crucial Allied outpost in the British/American war against Japan, Bengal stood at the crossroads of complex and contentious structural forces - both domestic and international - which, taken together, defined an era of political uncertainty, social turmoil and collective violence. While for the British the overarching priority was to save the empire from imminent collapse at any cost, for the majority of the Indian population the 1940s were years of acute scarcity, violent dislocation and enduring calamity. In particular there are three major crises that shaped the social, economic and political context of pre-partition Bengal: the Second World War, the Bengal famine of 1943, and the Calcutta riots of 1946. Hungry Bengal examines these intricately interconnected events, foregrounding the political economy of war and famine in order to analyse the complex nexus of hunger, war and civil violence in colonial Bengal at the twilight of British rule.

Contributor Bio
Janam Mukherjee is Assistant Professor of History at Ryerson University in Toronto.

Quotes
"By refocusing the chronological lens of famine and by consistently showing how government prioritisation of the war effort affected Bengal, this highly original book achieves a paradigm shift in thinking about the famine. Extremely comprehensive, clearly written and justifiably angry, Hungry Bengal will be indispensable for scholars of modern India." -- Yasmin Khan, author of The Great Partition: The Making of India and Pakistan

'This is an important contribution to our understanding of the Bengal famine of 1943 which brings out hitherto under-appreciated connections between the famine, the riots, and the resistance of famine victims.' -- Maitreesh Ghatak, Professor of Economics, London School of Economics, editor of The Journal of Development Economics

Terrains of Exchange
Religious Economies of Global Islam
Nile Green

Key Selling Points
- Examines how encounters throughout Eurasia and beyond transformed Muslim practices and the history of Islam.
- Green draws on a huge range of materials, from Indian magazines for African Americans to Muslim Japanology; from Urdu tales of ocean-going saints to the diaries of German missionaries; from Bibles in Tatar to the first Arabic printed books.
- A global Islamic history from the bottom up
- Uncovers the beginnings of Islam in America and Japan
- Unravels the processes of religious globalization
- Connects Islamic history to global history
Uncovers the beginnings of Islam in America

Summary
Drawing together Indian and Iranian Muslims with Christian missionaries, Hindu nationalists and Japanese imperialists, this book brings to life the local sites of globalisation that transformed Muslim religiosity through the long nineteenth century. Nile Green evokes terrains of exchange that range from the Russian empire's borderlands to the Indian princely states and the car factories of Detroit. He casts a microhistorian's eye on the religious productions that spilled from these many sites of contact. Whether looking at imperial evangelicals and Iranian language-workers, or Indian Muslims and Yogi masters of breath control, each chapter unravels local forces of religious contact, competition and exchange. Green draws on a huge range of materials, from Indian magazines for African Americans to Muslim Japanology; from Urdu tales of ocean-going saints to the diaries of German missionaries; from Bibles in Tatar to the first Arabic printed books. Challenging perceptions of an age usually identified with the unifying ideologies of Pan-Islamism and nationalism, his book reveals more muddled human terrains in which Muslims defended, reformed and promoted in an increasingly connected world. Terrains of Exchange presents not only global history from the bottom up but global history as Islamic history.

Contributor Bio
Nile Green is Professor of South Asian and Islamic history at UCLA. His research focuses on the history and literature of the Muslim communities of India, Pakistan, Afghanistan, Iran and the Indian Ocean. He is the editor of Afghanistan in Ink: Literature Between Diaspora and Nation, published by OUPt. His book Bombay Islam was Winner of the Middle East Studies Association's Albert Hourani Book Award and the Association for Asian Studies' Ananda K. Coomaraswamy Book Award.

Table Of Contents

Introduction: Terrains of Exchange
Evangelicals: Missionary Catalysts, Muslim Responses

Chapter 1: Parnassus of the Evangelical Empire
Chapter 2: The Christian Origins of Muslim Printing
Chapter 3: The Islamic Opportunities of Bible Translation

Innovators: Communal Competitors, Local Cosmopolitans

Chapter 4: Missionaries, Mystics and Mill-Owners
Chapter 5: The Invention of a Hindu Sufism

Exporters: Pious Passengers, Islamic Impresarios

**Key Selling Points**

- Directly linked to the Oxford Higher Level Course Book, naturally extending learning
- Drive a truly IB approach to mathematics, helping learners connect mathematical theory with the world around them
- The most comprehensive, accurate match to the most recent syllabus, written by experienced workshop leaders
- Build essential mathematical skills with extensive practice enabling confident skills-development
- Cement assessment potential, with examiner guidance and exam questions driving confidence in every topic
- Thoroughly integrate TOK and support complex mathematical thinking skills
- Complete worked solutions included free online

**Summary**

Written by experienced IB workshop leaders and curriculum developers, this book covers all the course content and essential practice needed for success in the Statistics Option for Higher Level. Enabling a truly IB approach to mathematics, real-world context is thoroughly blended with mathematical applications, supporting deep understanding and instilling confident mathematical thinking skills. Exam support is integrated, building assessment potential. Complete worked solutions included.

Dueling Discourses
The Construction of Reality in Closing Arguments
Laura Felton Rosulek

Key Selling Points
- Offers qualitative and quantitative analyses of the linguistic and discursive forms utilized by opposing lawyers in their closing arguments during criminal trials.
- Applies the insights and methodologies of critical discourse analysis and systemic functional linguistics to a corpus of arguments from seventeen trials
- The first detailed analysis of closing arguments
The first detailed analysis of closing arguments

Summary
Dueling Discourses offers qualitative and quantitative analyses of the linguistic and discursive forms utilized by opposing lawyers in their closing arguments during criminal trials. Laura Felton Rosulek analyzes how these arguments construct contrasting representations of the same realities, applying the insights and methodologies of critical discourse analysis and systemic functional linguistics to a corpus of arguments from seventeen trials. Her analysis suggests that silencing (omitting relevant information), de-emphasizing (giving information comparatively less attention and focus), and emphasizing (giving information comparatively more attention and focus) are the key communicative devices that lawyers rely on to create their summations. Through these processes, lawyers' lexical, syntactic, thematic, and discursive patterns, both within individual narratives and across whole arguments, function together to create versions of reality that reflect each individual lawyer's goals and biases.

The first detailed analysis of closing arguments, this book will significantly improve our understanding of courtroom discourse. Furthermore, as previous research on all genres of discourse has examined exclusion/inclusion and de-emphasis/emphasis as separate issues rather than as steps on a continuum, this book will advance the field of discourse analysis by establishing the ubiquity of these phenomena.

Contributor Bio
Laura Felton Rosulek received her PhD from the University of Illinois, Urbana-Champaign. She has taught courses at the University of Montana and Oregon State University. Her research specializations are in sociolinguistics and discourse analysis (particularly Critical Discourse Analysis).

The Architecture of Determiners
Thomas Leu

Key Selling Points
- A treatise of a set of function words, the closed class of determiners.
- Thomas Leu's dissection of a series of different determiners in German and other Germanic languages brings to light unexpected structural regularities previously unexplored in this class of words.

Summary
Work in morphology is typically concerned with productive word formation and regular inflection, in any event with open class categories such as verbs, nouns, and adjectives, and their various forms. The Architecture of Determiners, by contrast, is devoted to a set of function words: the closed class of determiners. While it is traditionally assumed that function words are syntactically atomic, Thomas Leu shows that a comparative perspective on a series of determiners - each insistently vivisected into its minimal morphotactic segments - reveals an anatomy with properties analogous to clausal syntax, including a lexical, an inflectional, and left peripheral layer, as well as transformational relations among subconstituents. Leu argues that determiners are extended adjectival projections with a closed class minimal stem.

Leu focuses on Swiss German and German, using other Germanic and non-Germanic languages as a comparative domain. His discussion of the internal structure of determiners includes demonstratives (ch.2), distributive quantifiers (ch.4), possessive and negative determiners (ch.5), and interrogative determiners such as 'was für' (ch.6). His main claim - that all of these involve extended adjectival projections - connects naturally to a discussion of adjectival / determiner inflection in German. Chapter 3 addresses the oft-debated strong versus weak agreement alternation in a novel way, proposing that the adjective moves within its own extended projection, in a way akin to verb movement to C in the clause. This accounts for the central facts of nominative and accusative inflection. Chapter 7, then, addresses dative and genitive morphology, setting them syntactically apart from adjectival / determiner inflection in a way that leads to a surprising account of most of the systematic (meta-) syncretism patterns in German adjectival inflection.

Contributor Bio
Thomas Leu is Professor of Linguistics at the Université du Québec à Montréal. He is a co-editor of An Annotated Syntax Reader: Lasting Insights and Questions (2013).

Affix Ordering Across Languages and Frameworks

Stela Manova

Key Selling Points

- Focuses on cases of affix ordering that challenge linguistic theory with such phenomena as affix repetition and variable ordering
- Chapters consider more than one language and provide data from typologically diverse languages, some of which are examined for the first time

Summary

This volume advances our understanding of how word structure in terms of affix ordering is organized in the languages of the world. A central issue in linguistic theory, affix ordering receives much attention amongst the research community, though most studies deal with only one language. By contrast, the majority of the chapters in this volume consider more than one language and provide data from typologically diverse languages, some of which are examined for the first time. Many chapters focus on cases of affix ordering that challenge linguistic theory with such phenomena as affix repetition and variable ordering, both of which are shown to be neither rare nor typical only of lesser-studied languages with unstable grammatical organization, as previously assumed. The book also offers an explicit discussion on the non-existence of phonological affix ordering, with a focus on mobile affixation, and one on the emergence of affix ordering in child language, the first of its kind in the literature. Repetitive operations, undesirable in many theories, are frequent in early child language and seem to serve as trainings for morphological decomposition and affix stacking. Thus, the volume also raises important questions regarding the general architecture of grammar and the nature and side effects of our theoretical assumptions.

Contributor Bio

Stela Manova is a senior researcher and a lecturer at the University of Vienna. She is the founder and organizer of the Vienna Workshops on Affix Order, the author of Understanding Morphological Rules (2011) and Affixation (2013, in Oxford Bibliographies in Linguistics, ed. Mark Aronoff), and the editor Affix Combinations (two volumes, 2010, both with Mark Aronoff) and of Affixes and Bases (2011).

Table Of Contents

Contributors

1. Introduction: Affix ordering across languages and frameworks
   Stela Manova

Part 1: Syntactic and semantic ordering

2. Recursive passivization: a causative coercion account
   Ekaterina Lyutikova and Sergei Tatevosov

3. Scope versus ordering of operations: causativisation and ordering of valency-changing operations in Adyghe
   Alexander Letuchiy

4. Modern Greek parasynthetic verbs: a hierarchical relationship between prefixes and suffixes?
   Angeliki Efthymiou

Part 2: Phonological and morphological ordering

5. Mobile affixation within a modular approach to the morphology-phonology interface
   Yuni Kim

6. Hierarchy-governed Affix Order in Eastern Kiranti
   Eva Zimmermann
7. Negation in Kurmanji
   Songül Gündo?du

Part 3: Psycholinguistic and cognitive ordering
8. Suffix combinations in Italian: selectional restrictions and processing constraints
   Luigi Talamo

9. Affix order and the structure of the Slavic word
   Stela Manova

Part 4: Description and acquisition of affix order
10. Suffix sets in Polish de-nominal derivatives
    Iwona Burkacka

11. Reduplication, repetition, hypercharacterisation and other affix-doubling in child language
    Wolfgang U. Dressler, Katarzyna Dziubalska-Ko?aczyk, Natalia Gagarina, Marianne Kilani-Schoch

Continuations and Natural Language
Chris Barker, Chung-chieh Shan

Key Selling Points
- Explicit, concrete formal analysis of natural language
- Extensive derivations and diagrams to illustrate techniques and analysis
- Exercises and solutions to aid the reader’s understanding of technical material

Summary
This book takes concepts developed by researchers in theoretical computer science and adapts and applies them to the study of natural language meaning. Summarizing more than a decade of research, Chris Barker and Chung-chieh Shan put forward the Continuation Hypothesis: that the meaning of a natural language expression can depend on its own continuation. In Part I, the authors develop a continuation-based theory of scope and quantificational binding and provide an explanation for order sensitivity in scope-related phenomena such as scope ambiguity, crossover, superiority, reconstruction, negative polarity licensing, dynamic anaphora, and donkey anaphora. Part II outlines an innovative substructural logic for reasoning about continuations and proposes an analysis of the compositional semantics of adjectives such as ‘same’ in terms of parasitic and recursive scope. It also shows that certain cases of ellipsis should be treated as anaphora to a continuation, leading to a new explanation for a subtype of sluicing known as sprouting.

The book makes a significant contribution to work on scope, reference, quantification, and other central aspects of semantics and will appeal to semanticists in linguistics and philosophy at graduate level and above.

Contributor Bio

Chris Barker is Professor of Linguistics at New York University. He has held positions at a number of universities, including 10 years at University of California, San Diego. His 1991 PhD thesis, ‘Possessive Descriptions’, was published in 1995 by CSLI, Stanford. He is the co-editor with Pauline Jacobson of Direct Compositionality (OUP 2007), the co-founder of semanticsarchive.net, and co-editor with Chris Kennedy of the series ‘Oxford Surveys in Semantics and Pragmatics’ and ‘Oxford Studies in Semantics and Pragmatics’.

Chung-chieh Shan is Professor of Informatics and Computing at Indiana University, and was previously Assistant Professor of Computer Science at Rutgers University. He received his PhD in computer science in 2005 from Harvard University and has published articles in Linguistics and Philosophy, Journal of Logic, Language and Information, and Science of Computer Programming.

Table Of Contents

Preface

The Semantics of Evaluativity
Jessica Rett

Key Selling Points
- Provides a comprehensive review of evaluativity and the history of degree semantics
- The first detailed case study dealing with manner implicata in compositional semantics
- Offers a detailed discussion of the relationship between morphological markedness and meaning in semantic theory

Summary
This book focuses on the semantic phenomenon of evaluativity and its consequences across constructions. Evaluativity has traditionally been associated exclusively with the positive construction, a term for sentences with a gradable adjective but with no overt degree morphology. John is tall is evaluative because it entails that John is tall relative to a contextually valued standard. John is taller than Sue and John is as tall as Sue are not evaluative because both could be used even if John and Sue were short.

Previous accounts of evaluativity have assumed that it is not part of the inherent meaning of adjectives, but is contributed by a null morpheme. Jessica Rett argues against this analysis, proposing that no null morpheme is required. Instead, evaluativity is explained on the basis of assumptions that speakers and hearers make about the relationship between the simplicity of a situation and the simplicity of the language used to describe that situation.

Contributor Bio
Jessica Rett, Assistant Professor of Linguistics, University of California Los Angeles

Jessica Rett studied linguistics at the University of Michigan and Rutgers, the State University of New Jersey. She now teaches theoretical semantics at the University of California, Los Angeles. Her primary research interests are degree semantics and the semantics/pragmatics interface, the study of how the meaning of words and language affects the use of language, and vice versa.

Table Of Contents
1. Introduction
2. The null morpheme POS
3. The null morpheme EVAL
4. Implicature: a brief review
5. Evaluativity as implicature
6. Extensions of the evaluativity implicature
7. Conclusion

The Syntax of Roots and the Roots of Syntax
Artemis Alexiadou, Hagit Borer, Florian Schafer

Key Selling Points
- The first detailed examination of the nature of roots and their interaction with syntactic structure
- Draws on data from a range of languages
- Investigates syntactic, semantic, and morpho-phonological properties of roots from different theoretical perspectives

Summary
This book investigates the nature and properties of roots, the core elements of word meaning. In particular, chapters examine the interaction of roots with syntactic structure, and the role of their semantic and morpho-phonological properties in that interaction. Issues addressed in the book include the semantics and phonology of roots in isolation and in context; the categorial specification of roots; and the role of phases in word formation.

Internationally recognized scholars approach these topics from a variety of theoretical backgrounds, drawing on data from languages including German, Hebrew, and Modern Greek. The book will be of interest to linguistics students and researchers of all theoretical persuasions from graduate level upwards.

Contributor Bio
Artemis Alexiadou, Professor and Chair, Institute of English Linguistics, University of Stuttgart,
Hagit Borer, Professor and Chair of Linguistics, Queen Mary, University of London,
Florian Schafer, Researcher, Department of Linguistics, University of Stuttgart

Artemis Alexiadou is Professor of Theoretical and English Linguistics at the Universität Stuttgart. She received her Ph.D. in Linguistics in 1994 from the University of Potsdam. Her research interests lie in theoretical and comparative syntax, morphology, and most importantly in the interface between syntax, morphology, the lexicon, and interpretation. Her work has been published in several journals, edited volumes, and conference proceedings.

Hagit Borer is Professor and Chair of Linguistics at Queen Mary, University of London. She received her Ph.D. in Linguistics at MIT, and has held professorial positions at the University of Massachusetts at Amherst and at the University of Southern California. Her research interests include syntax, morphosyntax, the syntax-semantics interface, and the acquisition of syntax by children.

Florian Schafer is researcher at the the collaborative research centre (Sonderforschungsbereich) SFB 732 'Incremental Specification in Context' at the University of Stuttgart. He studied General and Theoretical Linguistics at the University of Potsdam and finished his dissertation on the (anti-)causative alternation in 2007 at the University of Stuttgart. His main research interests are in the theories of syntax, morphology, and lexical semantics and the interaction of these modules of grammar.

Table Of Contents
1. Introduction, Artemis Alexiadou, Hagit Borer, and Florian Schafer
2. From syntax to roots: A syntactic approach to root interpretation, Victor Acedo-Matellan and Jaume Mateu
3. The roots of nominality, the nominality of roots, Paolo Acquaviva
4. Roots in transitivity alternations: Afto/auto-reflexives, Artemis Alexiadou
5. Domains within words and their meanings: A case study, Elena Anagnostopoulou and Yota Samioti
6. The category of roots, Hagit Borer
7. On a low and high diminutive: Evidence from Italian and Hebrew, Marijke De Belder, Noam Faust, and Nicola Lampitelli
8. The interaction of adjectival passive and Voice, Edit Doron
9. Roots and phases, Angel J. Gallego
10. The ontology of roots and verbs, Lisa Levinson
11. Derivational affixes as roots, no exponence: Phasal spellout meets English stress shift, Jean Lowenstamm
12. Building scalar changes, Malka Rappaport Hovav
13. When roots license and when they respect semantico-syntactic structure in verbs, Antje Rossdeutscher

Artemis Alexiadou is Professor of Theoretical and English Linguistics at the Universitat Stuttgart. She received her Ph.D. in Linguistics in 1994 from the University of Potsdam. Her research interests lie in theoretical and comparative syntax, morphology, and most importantly in the interface between syntax, morphology, the lexicon, and interpretation. Her work has been published in several journals, edited volumes, and conference proceedings.

Hagit Borer is Professor and Chair of Linguistics at Queen Mary, University of London. She received her Ph.D. in Linguistics at MIT, and has held professorial positions at the University of Massachusetts at Amherst and at the University of Southern California. Her research interests include syntax, morphosyntax, the syntax-semantics interface, and the acquisition of syntax by children.

Florian Schafer is researcher at the the collaborative research centre (Sonderforschungsbereich) SFB 732 'Incremental Specification in Context' at the University of Stuttgart. He studied General and Theoretical Linguistics at the University of Potsdam and finished his dissertation on the (anti-) causative alternation in 2007 at the University of Stuttgart. His main research interests are in the theories of syntax, morphology, and lexical semantics and the interaction of these modules of grammar.

Table Of Contents
1. Introduction, Artemis Alexiadou, Hagit Borer, and Florian Schafer
2. From syntax to roots: A syntactic approach to root interpretation, Victor Acedo-Matellan and Jaume Mateu
3. The roots of nominality, the nominality of roots, Paolo Acquaviva
4. Roots in transitivity alternations: Afto/auto-reflexives, Artemis Alexiadou
5. Domains within words and their meanings: A case study, Elena Anagnostopoulou and Yota Samioti
6. The category of roots, Hagit Borer
7. On a low and high diminutive: Evidence from Italian and Hebrew, Marijke De Belder, Noam Faust, and Nicola Lampitelli
8. The interaction of adjectival passive and Voice, Edit Doron
9. Roots and phases, Angel J. Gallego
10. The ontology of roots and verbs, Lisa Levinson
11. Derivational affixes as roots, no exponent: Phasal spellout meets English stress shift, Jean Lowenstamm
12. Building scalar changes, Malka Rappaport Hovav
13. When roots license and when they respect semantico-syntactic structure in verbs, Antje Rossdeutscher

Causation in Grammatical Structures
Bridget Copley, Fabienne Martin

Key Selling Points
- Brings together leading researchers from linguistics, psychology, and philosophy
- Provides extensive empirical data from a range of typologically diverse languages
- Addresses key issues in the interfaces between morphology, syntax, and semantics

Summary
This book brings together research on the topic of causation from experts in the fields of linguistics, philosophy, and psychology. It seeks to arrive at a more sophisticated understanding both of how causal concepts are expressed in causal meanings, and how those meanings in turn are organized into structures. Chapters address some of the most exciting current issues in the field, including the relata of causal relations; the representation of defeasible causation within verb phrases and at the level of modality; the difference between direct and indirect causal chains; and the representation of these chains in syntax.

The book examines data from a wide variety of languages, such as Tohono O'odham, Finnish, Tagalog, Vietnamese, Hindi, and Karachay-Balkar, and will be of interest to syntacticians and semanticists, as well as psycholinguists and philosophers, from graduate level upwards.

Contributor Bio
Bridget Copley is a chargee de recherche at the laboratory Structures Formelles du Langage, jointly affiliated with the Centre Nationale de la Recherche and the Universite Paris 8. Her research interests include the semantics and syntax-semantics interface of causation, aspect, futures, and modality. Copley received her Ph.D. in Linguistics and Philosophy in 2002 from the Massachusetts Institute of Technology, and is the author of The Semantics of the Future (Routledge, 2009).

Fabienne Martin is a post-doctoral researcher at the Institut fur Linguistik of the University of Stuttgart. She received her Ph.D. in Linguistics in 2006 from the Universite libre de Bruxelles, and is the author of Les Predicats statifs (De Boeck, 2009). Her research interests include lexical semantics, aspect and the semantics/pragmatics interface.

Table Of Contents
1. Introduction, Bridget Copley and Fabienne Martin
2. From Causal Theories to Causal Meanings
   2.1 Theories of causation can and should inform linguistic theory, Bridget Copley and Phillip Wolff
   2.2 Formal semantics for causal constructions, Richmond H. Thomason
   2.3 Two types of causal statements, Max Kistler
   2.4 Force dynamics in causal meaning and reasoning, Phillip Wolff
   2.5 Eliminating causative entailments with the force-dynamic framework: The case of the Tohono O'odham frustrative cem, Bridget Copley and Heidi Harley
   2.6 Modality and causation: Two sides of the same coin, Tatjana Ilic
   2.7 Intentional action and the semantics of gradable expressions (on the Knobe Effect), Paul Egre
3. From Causal Meanings to Causal Structures
   3.1 Causation at the syntax-semantics interface, Fabienne Martin and Florian Schafer
   3.2 Causal chains and instrumental case in Hindi/Urdu, Gillian Ramchand
   3.3 Causativization and event structure, Sergei Tatevosov and Ekaterina Lyutikova
   3.4 Inadvertent cause and the unergative-unaccusative split in Vietnamese and English, Nigel Duffield
   3.5 Causatives and inchoatives in the lexicon and the syntax: evidence from Italian, Raffaella Folli
   3.6 Event-structural prominence and forces in verb meaning shift, Anja Latrouite

The Art of Grammar
A Practical Guide
Alexandra Y. Aikhenvald

Key Selling Points
- A how-to guide to writing a grammar from one of the world's leading linguists
- Clearly presented, accessible, and theory neutral
- Offers practical advice drawing on the author's extensive experience of linguistic fieldwork

Summary
This book introduces the principles and practice of writing a comprehensive reference grammar. Several thousand distinct languages are currently spoken across the globe, each with its own grammatical system and its own selection of diverse grammatical structures. Comprehensive reference grammars offer a basis for understanding linguistic diversity and can provide a unique perspective into the structure and social and cognitive underpinnings of different languages. Alexandra Aikhenvald describes the means of collecting, analysing, and organizing data for use in this type of grammar, and discusses the typological parameters that can be used to explore relationships with other languages. She considers how a grammar can made to reflect and bring to life the society of its speakers through background explanation and the judicious choice of examples, as well as by showing how its language, history, and culture are intertwined. She ends with a full glossary of terms and guidance for those wanting to explore a particular linguistic phenomenon or language family. The Art of Grammar is the ideal resource for students and teachers of linguistics, language studies, and inductively-oriented linguistic, cultural, and social anthropology.

Contributor Bio
Alexandra Y. Aikhenvald is Distinguished Professor, Australian Laureate Fellow, and Director of the Language and Culture Research Centre at James Cook University. She is a major authority on languages of the Arawak family, from northern Amazonia, and has written grammars of Bare (1995) and Warekena (1998), plus A Grammar of Tariana, from Northwest Amazonia (Cambridge University Press, 2003), in addition to essays on various typological and areal features of South American languages. Her other major publications, with OUP, include Language Contact in Amazonia (2002), Evidentiality (2004), The Manambu Language of East Sepik, Papua New Guinea, (2008), Imperatives and Commands (2010), and Languages of the Amazon (2012).

Table Of Contents
1. Introduction: To write a grammar
2. A language and its setting
3. Basics
4. Sounds and their functions
5. Word classes
6. Nouns
7. Verbs
8. Adjectives and adverbs
9. Closed classes
10. Who does what to whom: grammatical relations
11. Clause and sentence types
12. Clause linking and complex clauses
13. Language in context
14. Why is a language the way it is?
15. How to create a grammar and how to read one

Language Down the Garden Path
The Cognitive and Biological Basis of Linguistic Structures
Montserrat Sanz, Itziar Laka, Michael K. Tanenhaus

Key Selling Points
- Reviews the major lines of research in sentence processing from the beginning of the cognitive science field to the present
- Contains chapters by world-renowned scientists who explain the evolution of their research programmes
- Includes a reprint of 'Cognitive Basis of Linguistic Structures'
- Contains guidance for using the book as a class text

This book traces the lines of research that grew out of Thomas Bever's "The Cognitive Basis of Linguistic Structures". Leading scientists review over 40 years of debates on the factors at play in language comprehension, production, and acquisition; the current status of universals; and virtually every topic relevant in psycholinguistics since 1970.

Summary
Thomas G. Bever's now iconic sentence, The horse raced past the barn fell, first appeared in his 1970 paper "The Cognitive Basis of Linguistic Structures". This 'garden path sentence', so-called because of the way it leads the reader or listener down the wrong parsing path, helped spawn the entire subfield of sentence processing. It has become the most often quoted element of a paper which spanned a wealth of research into the relationship between the grammatical system and language processing.

Language Down the Garden Path traces the lines of research that grew out of Bever's classic paper. Leading scientists review over 40 years of debates on the factors at play in language comprehension, production, and acquisition (the role of prediction, grammar, working memory, prosody, abstractness, syntax and semantics mapping); the current status of universals and narrow syntax; and virtually every topic relevant in psycholinguistics since 1970. Written in an accessible and engaging style, the book will appeal to all those interested in understanding the questions that shaped, and are still shaping, this field and the ways in which linguists, cognitive scientists, psychologists, and neuroscientists are seeking to answer them.

Contributor Bio

Montserrat Sanz Yague received her PhD in Linguistics and Brain and Cognitive Sciences at the University of Rochester. She is currently Professor in the Department of Spanish at Kobe City University of Foreign Studies (Japan). She leads a research team that explores the process of acquisition of Spanish by native speakers of Japanese. Her previous research on the syntax/semantics interface under Minimalist premises culminated in the book Events and Predication: A New Approach to Syntactic Processing in English and Spanish (John Benjamins, 2000). Recently she has published a book with Jose Manuel Igoa entitled Applying Language Science to Language Pedagogy: Contributions of Linguistics and Psycholinguistics to Language Teaching (Cambridge Scholars Publishing).

Itziar Laka received her PhD in Linguistics at MIT. She is Professor at the University of the Basque Country and Director of The Bilingual Mind research group. She is the author of Negation in Syntax (Garland, 1994), and A Brief Grammar of Euskara (1996). Her current research combines linguistics and psycholinguistics to explore the neural representation of linguistic structure in bilinguals.

Michael K. Tanenhaus received his Ph.D. from Columbia University in 1978. He taught at Wayne State University until 1983 when he moved to the University of Rochester. His research spans a wide range of topics in psycholinguistics, with a primary focus on real-time spoken language processing. In 2011, he was elected as a Fellow of the American Academy of Arts and Sciences.

Table Of Contents
Reprint of 'The Cognitive Basis of Linguistic Structures', Thomas G. Bever
2. Anticipating the Garden Path: The horse raced past the barn ate the cake, Gerry T. M. Altmann
3. Inviting Production to the Cognitive Basis Party, Maryellen C. MacDonald
4. Thematic Templates and the Comprehension of Relative Clauses, Chien-Jer Charles Lin
5. The Processing Complexity of English Relative Clauses, Edward Gibson, Harry Tily, and Evelina Fedorenko
7. Enduring Themes in Sentence Comprehension: Projecting linguistic structures, David J. Townsend
8. The Multiple Bases for Linguistic Structures, Robert Berwick
9. Pronouncing and Comprehending Center-embedded Sentences, Janet Dean Fodor
10. Beyond Capacity: The role of memory processes in building linguistic structure in real-time, Brian McElree and Lisbeth Dyer
11. Neurotypology: Modelling cross-linguistic similarities and differences in the neurocognition of language comprehension, Ina Bornkessel-Schlesewsky and Matthias Schlesewsky
12. The Path From Certain Events to Linguistic Uncertainties, Montserrat Sanz
13. On Abstraction and Language Universals, Massimo Piattelli-Palmarini
15. Anchoring Agreement, Simona Mancini, Nicola Molinaro, and Manuel Carreiras
16. Parser-grammar Relations: We don't understand everything twice, Colin Phillips
17. The Epicenter of Linguistic Behaviour, Edward P. Stabler
18. From Action to Language: Evidence and speculations, Luciano Fadiga and Alessandro D'Ausilio
20. Some Issues in Current Language Acquisition Research, Jacques Mehler
21. A Bayesian Evaluation of the Cost of Abstractness, Ewan Dunbar, Brian Dillon, and William J. Idsardi
22. The Biolinguistics of Language Universals - the next years, Thomas G. Bever

Afterword: The Impact of The Cognitive Basis for Linguistic Structures: A retrospective reflection, reconstruction, and appreciation, Michael K. Tanenhaus

Reliability in Pragmatics
Eric McCready

Key Selling Points
- First analysis of reliability in formal pragmatics
- Provides a detailed account of the relationship between inductive inference and linguistic phenomena
- Offers a new approach to the foundations of the Gricean program in pragmatics

Summary
This book is an exploration of how knowledge about the reliability of information sources manifests itself in linguistic phenomena and use. It focuses on cooperation in language use and on how considerations of reliability influence what is done with the information acquired through language. Eric McCready provides a detailed account of the phenomena of hedging and evidentiality and analyses them using tools from game theory, dynamic semantics, and formal epistemology. Hedging is argued to be a mechanism used by speakers to protect their reputations for cooperativity from damage inflicted by infelicitous discourse moves. The pragmatics of evidential use is also discussed in terms of the histories of interaction that influence reputation: the author argues that past experience with the evidence source indexed by the evidential determines how the process of adding information will proceed.

The book makes many new connections between seemingly disparate aspects of linguistic meaning and practice. It will be of interest to specialists in semantics, pragmatics, and philosophy of language, as well as those in the fields of philosophy and cognitive science with an interest in language and epistemology.

Contributor Bio
Eric McCready is an Associate Professor at Aoyama Gakuin University in Tokyo, Japan. His research interests include formal semantics and pragmatics, the semantics-pragmatics interface, Japanese and its dialects, philosophy of language and epistemology, modal and dynamic logics, and game theory. His articles have appeared in journals including Semantics and Pragmatics, Linguistic Inquiry, and Journal of Pragmatics.

Table Of Contents
1. Introduction
Part I - Reputation and Cooperation
2. Cooperation
3. Trust and reputations
4. Hedging beyond truth
5. Deriving hedged interpretations
Part II - Evidentials and Reliability
6. The nature of evidentials
7. Evidentials and reliability
8. Using priorities
9. Testimonial evidence
10. Conclusion
Appendix: Formal system

Vowel Length From Latin to Romance
Michele Loporcaro

Key Selling Points
- Written by a leading expert in dialect variation across Romance
- Draws on extensive empirical data, including from lesser known varieties
- Puts forward a new account of a well-known diachronic phenomenon

Summary
This book investigates the changes that affected vowel length during the development of Latin into the Romance languages and dialects. In Latin, vowel length was contrastive (e.g. *pila* 'ball' vs. *pila* 'pile', like English *bit* vs. *beat*), but no modern Romance language has retained that same contrast. However, many non-standard Romance dialects (as well as French, up to the early 20th century) have developed novel vowel length contrasts, which are investigated in detail here.

Unlike previous studies of this phenomenon, this book combines detailed historical evidence spanning three millennia (as attested by extant texts) with extensive data from present-day Romance varieties collected from first-hand fieldwork, which are subjected to both phonological and experimental phonetic analysis. Professor Loporcaro puts forward a detailed account of the loss of contrastive vowel length in late Latin, showing that this happened through the establishment of a process which lengthened all stressed vowels in open syllables, as in modern Italian *casa* ['ka:sa]. His analysis has implications for many of the most widely-debated issues relating to the origin of novel vowel length contrasts in Romance, which are also shown to have been preserved to different degrees in different areas. The detailed investigation of the rise and fall of vowel length in dozens of lesser-known (non-standard) varieties is crucial in understanding the development of this aspect of Romance historical phonology, and will be of interest not only to researchers and students in comparative Romance linguistics, but also, more generally, to phonologists and those interested in historical linguistics beyond the Latin-Romance language family.

Contributor Bio

Michele Loporcaro is Professor of Romance Linguistics at the University of Zurich. He held previous positions at the Universities of Padova and Cosenza, in addition to visiting professorships in several universities in Europe and the USA and visiting fellowships at Magdalen College Oxford (2012) and the Wissenschaftskolleg zu Berlin (2013-14). In 2012, he received the Premio Antonio Feltrinelli for his work in Italian linguistics. His research interests include historical linguistics, linguistic historiography, and the phonology, morphology, and syntax of Italo-Romance linguistic varieties. His work has been published widely in many journals and he is the author of several books, including Profilo linguistico dei dialetti italiani (Laterza 2009; 3rd edn. 2013), Sintassi comparata dell'accordo participiale romanzo (Rosenberg & Sellier 1998), and L'origine del raddoppiamento fonosintattico. Saggio di fonologia diacronica romanza. (Francke 1997).

Table Of Contents

1. Introduction
2. Vowel length in the Latin-Romance transition
3. The development of VL in Romance
4. The analysis of Northern Romance vowel length
5. Dialect variation and comparative reconstruction
6. In lieu of a conclusion
Appendix: Language and dialect area maps

The Utility of Meaning
What Words Mean and Why
N. J. Enfield

Key Selling Points
- Includes extensive data from semantic and pragmatic case studies carried out in Laos, with accompanying illustrations.
- Proposes an integrated framework for linguistic meaning, bringing together semantics, pragmatics, and broad conceptual structure.
- Reformulates a classic debate between 'utilitarian' versus 'intellectualist' views of word meaning.

Summary
This book argues that the complex, anthropocentric, and often culture-specific meanings of words have been shaped directly by their history of 'utility' for communication in social life. N. J. Enfield draws on semantic and pragmatic case studies from his extensive fieldwork in Laos to investigate a range of semantic fields including emotion terms, culinary terms, landscape terminology, and honorific pronouns, among many others. These studies form the building blocks of a conceptual framework for understanding meaning in language. The book argues that the goals and relevancies of human communication are what bridge the gap between the private representation of language in the mind and its public processes of usage, acquisition, and conventionalization in society. Professor Enfield argues that in order to understand this process, we first need to understand the ways in which linguistic meaning is layered, multiple, anthropocentric, cultural, distributed, and above all, useful.

This wide-ranging account brings together several key strands of research across disciplines including semantics, pragmatics, cognitive linguistics, and sociology of language, and provides a rich account of what linguistic meaning is like and why.

Contributor Bio
N. J. Enfield is Professor of Linguistics at the University of Sydney, and a senior staff scientist at the Max Planck Institute, Nijmegen. He has carried out extensive field work in mainland Southeast Asia, especially Laos, with a focus on language, culture, cognition, and social interaction. His books include Ethnosyntax (OUP 2002), Linguistic Epidemiology (Routledge 2003), A Grammar of Lao (Mouton de Gruyter 2007), The Anatomy of Meaning (CUP 2009), Relationship Thinking (OUP 2013), and The Cambridge Handbook of Linguistic Anthropology (with P Kockelman and J Sidnell, 2014). He has published over 100 academic articles and reviews.

The Oxford Handbook of Historical Phonology
Patrick Honeybone, Joseph Salmons

Key Selling Points
- First and only book of its kind
- Focused on key current research issues
- Examines and illustrates every theoretical perspective
- Ranges across the world's languages

This critical overview examines every aspect of the field including its history, key current research questions and methods, theoretical perspectives, and sociolinguistic factors. The authors represent leading proponents of every theoretical perspective. The book is a valuable resource for phonologists and a stimulating guide for their students.

Summary
This book presents a comprehensive and critical overview of historical phonology as it stands today. Scholars from around the world consider and advance research in every aspect of the field. In doing so they demonstrate the continuing vitality of one of the oldest sub-disciplines of linguistics.

The book is divided into six parts. The first considers key current research questions, the early history of the field, and the structuralist context for work on sound change. The second examines evidence and methods, including phonological reconstruction, typology, and computational and quantitative approaches. Part III looks at types of phonological change, including stress, tone, and morphophonological change. Part IV explores a series of controversial aspects within the field, including the effects of first language acquisition, the mechanisms of lexical diffusion, and the role of individuals in innovation. Part V considers the main theoretical perspectives including those of evolutionary phonology and generative historical phonology. The final part examines sociolinguistic and exogenous factors in phonological change, including the study of change in real time, the role of second language acquisition, and loanword adaptation. The authors, who represent leading proponents of every theoretical perspective, consider phonological change over a wide range of the world's language families. The handbook is, in sum, a valuable resource for phonologists and historical linguists and a stimulating guide for their students.

Contributor Bio

Patrick Honeybone is Senior Lecturer in Linguistics and English Language at the University of Edinburgh where his main interests are historical phonology, phonological theory, and northern English dialects. He has published articles in English Language and Linguistics, Lingua, Language Sciences, and a range of other journals. He is the main organizer of the annual Manchester Phonology Meeting.

Table Of Contents

Part I Introduction and Context
1. Introduction: key questions for historical phonology, Patrick Honeybone and Joseph Salmons
2. An Early History of Historical Phonology, Robert Murray
3. Structuralist Historical Phonology: systems in sound change, Joseph Salmons and Patrick Honeybone

Part II: Evidence and Methods in Historical Phonology
4. Phonological Reconstruction, Anthony Fox
5. Establishing Phonemic Contrast in Written Sources, Donka Minlova
6. Interpreting Diffuse Orthographies and Orthographic Change, J. Marshall Unger
7. Interpreting Alphabetic Orthographies: early Middle English spelling, Roger Lass
8. The Role of Typology in Historical Phonology, Martin Kummel
9. Computational and Quantitative Approaches to Historical Phonology, Brett Kessler
10. Simulation as an Investigative Tool in Historical Phonology, Andrew Wedel
11. Using Corpora of Recorded Speech for Historical Phonology, Warren Maguire
12. Exploring Chain Shifts, Mergers, Near-mergers as Changes in Progress, Matthew J. Gordon

Part III: Types of Phonological Change
13. Basic Types of Phonological Change, Andras Cser
14. Analogy and Morphophonological Change, David Fertig
15. Change in Stress Patterns, Aditi Lahiri
16. Tonoexodus, Tonogenesis, and Tone Change, Martha Ratliff
17. The Role of Prosodic Templates in Diachrony, Laura Catharine Smith and Adam Ussishkin

Part IV: Fundamental Controversies in Phonological Change
18. First Language Acquisition and Phonological Change, Paul Foulkes and Marilyn Vihman
19. How Diachronic is Synchronic Grammar? Crazy Rules, Regularity, and Naturalness, Tobias Scheer
20. An I-Language Approach to Phonologization and Lexification, Mark Hale, Madelyn Kissock, and Charles Reiss
21. Lexical Diffusion in Historical Phonology, Betty S. Phillips
22. Amphichronic Explanation and the Life Cycle of Phonological Processes, Ricardo Bermudez-Otero
23. Individuals, Innovation, and Change, Mark J. Jones
24. The Role of Experimental Investigation in the Explanation of Sound Change, Alan C. L. Yu

Part V: Theoretical Historical Phonology
25. Natural Phonology and Sound Change, Patricia J. Donegan and Geoffrey S. Nathan
27. Articulatory Processing and Frequency of Use in Sound Change, Joan Bybee
28. Evolutionary Phonology: a holistic approach to sound change typology, Juliette Blevins
29. Rule-based Generative Historical Phonology, B. Elan Dresher
30. Distinctive Features, Levels of Representation, and Historical Phonology, Thomas C. Purnell and Eric Raimy
31. Historical Sound Change in Optimality Theory: achievements and challenges, D. Eric Holt
32. Phonologization, Paul Kiparsky

Part VI: Sociolinguistic and Exogenous Factors in Historical Phonology
33. Variation, Transmission, Incrementation, Alexandra D’Arcy
34. Phonological Change in Real Time, David Bowie and Malcah Yaeger-Dror
35. Historical Phonology and Koineisation, Daniel Schreier

The Positions of Adjectives in English
P. H. Matthews

Key Selling Points
• Builds on and extends traditional previous analyses of adjective positions
• Calls into question several basic assumptions about syntactic categories and constituents
• Addresses a wide variety of issues relating to the positions of individual adjectives

Summary
This book explores the uses of adjectives in different constructions, and of the problems that arise in their analysis, both in terms of syntactic theory and philosophy of grammar. Professor Matthews also examines a variety of other issues relating to individual adjective positions, including the basic structure of noun phrases and the justification for binary constituents; the status of the copular and its uses in the progressive; the indeterminacy of what were once described as raised constructions; and the function of postmodifying adjectives and adjective phrases in relation to others.

The book will be of interest to graduate students and researchers in theoretical and descriptive linguistics, especially those focusing on the history of the English language and lexicology.

Contributor Bio

P. H. Matthews is Emeritus Professor of Linguistics at the University of Cambridge, and a Fellow of St John's College, Cambridge. He has formerly held positions at Bangor University and the University of Reading, and has been an Honorary Member of the Linguistic Society of America since 1994. His many books include The Concise Oxford Dictionary of Linguistics (3rd edn; OUP 2014), Syntactic Relations: A Critical Survey (CUP 2007), Linguistics: A Very Short Introduction (OUP 2003), and A Short History of Structural Linguistics (CUP 2001).

Table Of Contents
1. Introduction
2. Which words are adjectives?
3. Can one position be primary?
4. How the syntax of adjectives has changed
5. Modifiers and determiners
6. Relations between premodifiers
7. Linear and layered dependency
8. Adjectives in extended predicative positions
9. States and occurrences
10. The positions of premodifiers
11. Envoi

Time, Language, and Ontology
The World from the B-Theoretic Perspective
M. Joshua Mozersky

Key Selling Points
• Brings together semantic and ontological perspectives on time
• Addresses a variety of issues of current concern in philosophy
• Defends an important but often neglected position

Summary
This book brings together, in a novel way, an account of the structure of time with an account of our language and thought about time. Joshua Mozersky argues that it is possible to reconcile the human experience of time, which is centred on the present, with the objective conception of time, according to which all moments are intrinsically alike. He defends a temporally centreless ontology along with a tenseless semantics that is compatible with - and indeed helps to explain the need for - tensed language and thought. This theory of time also, it is argued, helps to elucidate the nature of change and temporal passage, neither of which need be denied nor relegated to the realm of subjective experience only.

The book addresses a variety of topics including whether the past and future are real; whether temporal passage is a genuine phenomenon or merely a subjective illusion; how the asymmetry of time is to be understood; the nature of representation; how something can change its properties yet retain its identity; and whether objects are three-dimensional or four-dimensional. It is a wide-ranging examination of recent issues in metaphysics, philosophy of language and the philosophy of science and presents a compelling picture of the relationship of human beings to the spatiotemporal world.

Contributor Bio

M. Joshua Mozersky is Associate Professor in, and Head of, the Department of Philosophy at Queen's University. He works primarily on issues in the philosophy of science, ontology, and the philosophy of language. His articles have appeared in numerous journals including Philosophical Studies, Synthese, and International Studies in the Philosophy of Science, and in The Oxford Handbook of Philosophy of Time (OUP, 2011) and A Companion to the Philosophy of Time (Wiley-Blackwell, 2013).

Table Of Contents
1. Introduction: Time, tense, and the objective conception
2. The reality of the future
3. Restricting reality to the present
4. Tensed predicates
5. Experience and the present
6. Objects and times
7. Temporal parts
8. The B-theory and the passage of time

A Functional Discourse Grammar for English
Evelien Keizer

Key Selling Points
• First textbook on Functional Discourse Grammar
• Presents a complex theory in a systematic and accessible fashion
• Provides numerous exercises and suggestions for further reading

Summary
This is the first textbook on Functional Discourse Grammar, a recently developed theory of language structure which analyses utterances at four independent levels of grammatical representation: pragmatic, semantic, morphosyntactic and phonological. The book offers a very systematic and highly accessible introduction to the theory: following the top-down organization of the model, it takes the reader step-by-step though the various levels of analysis (from pragmatics down to phonology), while at the same time providing a detailed account of the interaction between these different levels. The many exercises, categorized according to degree of difficulty, ensure that students are challenged to use the theory in a creative manner, and invite them to test and evaluate the theory by applying it to the new data in various linguistic contexts.

Evelien Keizer uses examples from a variety of sources to demonstrate how the theory of Functional Discourse Grammar can be used to analyse and explain the most important functional and formal features of present-day English. The book also contains examples from a wide variety of other typologically diverse languages, making it attractive not only to students of English linguistics but to anyone interested in linguistic theory more generally.

Contributor Bio
Evelien Keizer is Professor of English Linguistics at the University of Vienna. Her main interest is in the interplay between the discourse-pragmatic, semantic, syntactic, and phonological properties of linguistic expressions. Her overall approach is a functional-cognitive one; more specifically she works within the framework of Functional Discourse Grammar. Her publications include The English Noun Phrase: The Nature of Linguistic Categorization (CUP, 2007) and The Syntax of Dutch: The Noun Phrase, Vol. 1 (Amsterdam University Press, 2011). Her current research interests include syntactic alternations, linguistic categorization, and the analysis of semi-fixed expressions.

Table Of Contents
1. Why Functional Discourse Grammar?
2. The general architecture of FDG
3. The Interpersonal Level
4. The Representational Level
5. The Morphosyntactic Level
6. The Phonological Level
7. Sample representations
   Glossary
   List of languages

Constraints on Numerical Expressions
Chris Cummins

Key Selling Points
• Adopts an interdisciplinary approach drawing on work in semantics, philosophy, and psychology
• Provides a detailed description of a useful modelling mechanism, the constraint-based model
• Suggests potential directions for future research in the field

Summary
This book considers how expressions involving number are used by speakers and understood by hearers. A speaker's choice of expression can be a complex problem even in relatively simple-looking domains. In the case of numerical expressions, there are often many choices that would be semantically acceptable: for instance, if 'more than 200' is true, then so is 'more than 199', 'more than 150', and 'more than 100', among others. A speaker does not choose between these options arbitrarily but also does not consistently follow any simple rule. The hearer is interested not just in what has been said but also in any further inferences that can be drawn.

Chris Cummins offers a set of criteria that individually influence the speaker's choice of expression. The process of choosing what to say is then treated as a problem of multiple constraint satisfaction. This approach enables multiple different considerations, drawn from principles of semantics, philosophy, psycholinguistics and the psychology of number, simultaneously to be integrated within a single coherent account. This constraint-based model offers novel predictions about usage and interpretation that are borne out experimentally and in corpus research. It also explains problematic data in numerical quantification that have previously been handled by more stipulative means, and offers a potential line of attack for addressing the problem of the speaker's choice in more general linguistic environments.

Contributor Bio

Chris Cummins is a researcher in experimental semantics and pragmatics, currently employed as a Chancellor's Fellow at the University of Edinburgh. Prior to this, he worked at Bielefeld University within the DFG-funded Collaborative Research Centre (SFB) 673, 'Alignment in Communication'. He obtained his PhD from the University of Cambridge, supervised by Napoleon Katsos. His research interests include the mechanisms of implicature and presupposition, the psychology of dialogue, and more generally issues in experimental and statistical methodology.

Table Of Contents
1. Introduction
2. Constructing a constraint-based model
3. Deriving predications from the constraint-based account
4. Towards a pragmatic account of superlative quantifier usage
5. Scalar implicatures from numerically-quantified expressions
6. Corpus evidence for constraints on numerical expressions
7. Overview and outlook

Where Metaphors Come From
Reconsidering Context in Metaphor
Zoltan Kövecses

Key Selling Points
- Recasts cognitive metaphor theory, as a contextual theory of metaphor, expanding and refining it to account for the ways in which many verbal metaphors are tied to context
- Blends psychological and linguistic theories of how context affects language use and meaning with the author's own significant work on the experiential and contextual forces that lead to metaphorical expressions in discourse
- Shows how appeals to universal embodiment in metaphor theory are not necessarily opposed to contextualist views of metaphor

Summary
In Where Metaphors Come From, Zoltán Kövecses proposes a metaphorical grounding that augments and refines conceptual metaphor theory according to which conceptual metaphors are based on our bodily experience. While this is certainly true in many cases of metaphor, the role of the body in metaphor creation can and should be reinterpreted, and, consequently, the body can be seen as just one of the several contexts from which metaphors can emerge (including the situational, discourse, and conceptual-cognitive contexts) - although perhaps the dominant or crucial one.

Kövecses is a leader in CMT, and his argument in this book is more in line with what has been discovered about the nature of human cognition in recent years; namely, that human cognition is grounded in experience in multiple ways - embodiment, in a strict sense, being just one of them (see Barsalou, 2008; Gibbs, 2006; Pecher and Zwaan, 2005). In light of the present work, this is because cognition, including metaphorical cognition, is grounded in not only the body, but also in the situations in which people act and lead their lives, the discourses in which they are engaged at any time in communicating and interacting with each other, and the conceptual knowledge they have accumulated about the world in the course of their experience of it.

Contributor Bio
Zoltán Kövecses is Professor of Linguistics in the Department of American Studies at Eötvös Loránd University.

Language Policy and Political Economy
English in a Global Context
Thomas Ricento

Key Selling Points
- Reveals the complex ways in which government leaders and policymakers, as well as communities and individuals in those communities, make decisions within a global economy about the languages that will be taught as subjects or used as media of instruction

Summary
English is the common denominator that unites the work presented in this volume; it provides a focal point to illustrate the ways in which a political economic approach can account for a range of phenomena in diverse settings in which a "global" language has attained a special status as (an often perceived) tool for socioeconomic mobility. The findings reveal the complex ways in which government leaders and policymakers, as well as communities and individuals in those communities, make decisions within a global economy about the languages that will be taught as subjects or used as media of instruction in schools. Whether or not the "Straight for English" policy that has become popular in various countries in southern Africa and elsewhere is a good or bad idea, in terms of improving school completion and literacy rates, English is often promoted by its advocates as a social "good" with unquestioned instrumental value; yet access to quality English medium education in low-income countries is mostly restricted to those with sufficient economic means to pay for it. As the capitalist world-economy undergoes transformations, and assuming that translation technologies continue to improve, it is likely that the roles and relative importance that English as a global language has enjoyed over the past century will change significantly. Synchronic contextual analyses of English in various countries and regions are snapshots of a moving target with fuzzy boundaries; this is even more so the case when the object of analysis is "lingua franca English," a fluid, contextually realized "practice" that may be described in situ, which is not stable and likely never will be. The degree to which English serves effectively as a lingua franca depends on who the interlocutors are, the situation, and the extent to which interlocutors' interests and goals are mutually compatible and understood.

Contributor Bio
Thomas Ricento is Professor and Research Chair at the University of Calgary, Canada. He has published widely in the field of language policy and on the politics of language in North America.

External Arguments in Transitivity Alternations
A Layering Approach
Artemis Alexiadou, Elena Anagnostopoulou, Florian ...

Key Selling Points
• Provides extensive empirical data from English, German, and Greek
• Takes a cross-linguistic approach to transitivity alternations
• Brings together data on causatives, passives, reflexives, and adjectival passives

Summary
This book is an exploration of the syntax of external arguments in transitivity alternations from a cross-linguistic perspective. It focuses particularly on the causative/anticausative alternation, which the authors take to be a Voice alternation, and the formation of adjectival participles. The authors use data principally from English, German, and Greek to demonstrate that the presence of anticausative morphology does not have any truth-conditional effects, but that marked anticausatives involve more structure than their unmarked counterparts. This morphology is therefore argued to be associated with a semantically inert Voice head that the authors call ‘expletive Voice’. The authors also propose that passive formation is not identical across languages, and that the distinction between target vs. result state participles is crucial in understanding the contribution of Voice in adjectival passives.

The book provides the tools required to investigate the morphosyntactic structure of verbs and participles, and to identify the properties of verbal alternations across languages. It will be of interest to theoretical linguists from graduate level upwards, particularly those specializing in morphosyntax and typology.

Contributor Bio
Artemis Alexiadou is Professor of Theoretical and English Linguistics at the University of Stuttgart. She received her Ph.D. in Linguistics in 1994 from the University of Potsdam. Her research interests lie in theoretical and comparative syntax, morphology, and most importantly in the interface between syntax, morphology, the lexicon, and interpretation. Her publications include The Unaccusativity Puzzle (with Elena Anagnostopoulou and Martin Everaert; OUP 2004) and The Syntax of Roots and the Roots of Syntax (with Hagit Borer and Florian Schafer; OUP 2014), along with multiple journal articles and papers in conference proceedings.

Elena Anagnostopoulou is Professor of Theoretical Linguistics at the University of Crete. She obtained her Ph.D. in Linguistics from the University of Salzburg in 1994. After a post-doc at MIT (1997–1998), she took a position at the University of Crete in 1998, where she is currently Professor of Theoretical Linguistics. Her research interests lie in theoretical and comparative syntax, with special focus on the interfaces between syntax, morphology, and the lexicon, argument alternations, Case, Agreement, clitics and anaphora. She is the author of The Syntax of Ditransitives. Evidence from Clitics (Mouton de Gruyter 2003), has co-edited four volumes in theoretical linguistics and has published in journals, edited volumes and conference proceedings.

Florian Schafer is a researcher at the collaborative research centre (Sonderforschungsbereich) SFB 732 'Incremental Specification in Context' at the University of Stuttgart. He studied General and Theoretical Linguistics at the University of Potsdam and finished his dissertation on the (anti-)causative alternation in 2007 at the University of Stuttgart. His main research interests are located in the theories of syntax, morphology and lexical semantics and the interaction of these modules of grammar. He is co-editor, along with Artemis Alexiadou and Hagit Borer, of The Syntax of Roots and the Roots of Syntax (OUP 2014).

Pragmatics (2nd Edition)
Yan Huang

Key Selling Points
- Clear and comprehensive
- Includes exercises and solutions, a glossary, and guides to further reading
- Provides examples from English and a wide range of other languages
- Brings together work in linguistics and philosophy of language

Summary
Yan Huang’s highly successful textbook on pragmatics - the study of language in use - has been fully revised and updated in this second edition. It includes a brand new chapter on reference, a major topic in both linguistics and the philosophy of language. Chapters have also been updated to include new material on upward and downward entailment, current debates about conversational implicature, impoliteness, emotional deixis, contextualism versus semantic minimalism, and the elimination of binding conditions.

The book draws on data from English and a wide range of the world’s languages, and shows how pragmatics is related to the study of semantics, syntax, and sociolinguistics and to such fields as the philosophy of language, linguistic anthropology, and artificial intelligence. Professor Huang includes exercises and essay topics at the end of each chapter, and offers guidance and suggested solutions at the end of the volume. Written by one of the leading scholars in the field, this new edition will continue to be an ideal textbook for students of linguistics, and a valuable resource for scholars and students of language in philosophy, psychology, anthropology, and computer science.

Contributor Bio
Yan Huang is Professor of Linguistics at the University of Auckland, and has previously taught at the universities of Reading, Cambridge, and Oxford. His published work includes The Syntax of Anaphora (CUP 1994), Anaphora: A Cross-Linguistic Study (OUP 2000), and The Oxford Dictionary of Pragmatics (OUP 2012).

International Climate Change Law
Daniel Bodansky, Jutta Brunnee, Lavanya Rajamani

Key Selling Points
• Provides a comprehensive overview of international climate change law offering a perfect introduction to the field for students
• Assesses all of the relevant international instruments and conventions dealing with climate change, with particular emphasis on how to interpret their often deliberately vague terms
• Explores the relationship between climate change law, human rights law, migration law, and the law of the WTO

Provides a comprehensive overview of international climate change law offering a perfect introduction to the field for students.

Summary
This textbook, by three experts in the field, provides a comprehensive overview of the legal instruments and sources that govern the international response to climate change. Climate change is one of the fundamental challenges facing the world today, and is the cause of significant international concern. In response, states have created a legal regime, albeit a contested one, to address climate change and its impacts. The legal texts that comprise the climate regime - the United Nations Framework Convention on Climate Change, 1992, and its Kyoto Protocol, 1997 - are in force, have concrete content, and are binding. Resources are in place to facilitate the negotiation process, incentivize emissions reductions, and supervise and enforce compliance with the obligations imposed by these treaties. However, the language used in these international instruments is frequently intentionally vague. This book provides a clear guide to the legal regime applicable to climate change, demonstrating how the terms employed in the relevant instruments and conventions should be interpreted.

The book begins by locating international climate change law within the broader context of international law and international environmental law. It considers the evolution of the international climate change regime, and the process of law-making that has led to it. It examines the key provisions of the Framework Convention and the Kyoto Protocol. It then analyses the principles that form part of the conceptual underpinning of the climate regime, as well as the elaborate institutional and governance architecture that has been created at successive international conferences. This assessment of the contours of the current regime is followed by a chapter devoted to the design of the post-2012 climate change regime, and trends indicated by the climate negotiations. The final two chapters address the relationship of international climate change law to regional and national climate change law, as well as its relationship with other areas of international regulation.

This book is an essential introduction for any student and scholar needing to know more about international climate change law.

Daniel Bodansky, Lincoln Professor of Law, Ethics, and Sustainability, Sandra Day O’Connor College of Law; Professor of Law, School of Sustainability, Arizona State University, Jutta Brunnee, Metcalf Chair in Environmental Law, University of Toronto, Lavanya Rajamani, Lavanya Rajamani, Professor, Centre for Policy Research, New Delhi

Daniel Bodansky is the Lincoln Professor of Law, Ethics, and Sustainability at the Sandra Day O’Connor College of Law and Professor of Law at the School of Sustainability at Arizona State University. Bodansky is an expert on international environmental law. He has worked extensively on the international climate change negotiations, including as a senior negotiator in the US Department of State and as a consultant to the UN climate change secretariat and the Pew Center on Global Climate Change. He co-edited the Oxford Handbook of International Environmental Law, and is the author of the Art and
Craft of International Environmental Law, which was awarded the 2011 Harold and Margaret Sprout Award from the International Studies Association as the best book published that year in the area of international environmental politics.

Jutta Brunnee holds the Metcalf Chair in Environmental Law at the University of Toronto. Professor Brunnee is co-author of Legitimacy and Legality in International Law: An Interactional Account (Cambridge University Press, 2010), which was awarded the American Society of International Law's 2011 Certificate of Merit for preeminent contribution to creative scholarship. Professor Brunnee has authored numerous articles on topics of international environmental law and international law, and was the co-editor of the Oxford Handbook of International Environmental Law (Oxford University Press 2007). She is a member of the International Law Association's Committee on Legal Principles relating to Climate Change and of World Conservation Union's (IUCN) Environmental Law Commission.

Lavanya Rajamani is a Professor at the Centre for Policy Research in New Delhi. She was previously a University Lecturer in Environmental Law, and Fellow & Director of Studies in Law at Queens' College, Cambridge, where she lectured in international and European environmental law, international law and tort. She is the author of Differential Treatment in International Environmental Law (Oxford University Press, 2006). Lavanya Rajamani is the Rapporteur for the International Law Association's Committee on Legal Principles Relating to Climate Change, and an Indian member of the Academic Advisory Group of the Section on Energy, Environment, Natural Resources and Infrastructure Law of the International Bar Association. She has worked as a consultant to the UN Framework Convention on Climate Change (UNFCCC) Secretariat, the Indian Ministry of Environment and Forests, the Danish Ministry of Climate Change and Energy, and the World Bank, amongst others.

International Climate Change Law
Daniel Bodansky, Jutta Brunnee, Lavanya Rajamani

Key Selling Points
- Provides a comprehensive overview of international climate change law offering a perfect introduction to the field for students
- Assesses all of the relevant international instruments and conventions dealing with climate change, with particular emphasis on how to interpret their often deliberately vague terms
- Explores the relationship between climate change law, human rights law, migration law, and the law of the WTO

Provides a comprehensive overview of international climate change law offering a perfect introduction to the field for students.

Summary
This textbook, by three experts in the field, provides a comprehensive overview of the legal instruments and sources that govern the international response to climate change. Climate change is one of the fundamental challenges facing the world today, and is the cause of significant international concern. In response, states have created a legal regime, albeit a contested one, to address climate change and its impacts. The legal texts that comprise the climate regime - the United Nations Framework Convention on Climate Change, 1992, and its Kyoto Protocol, 1997 - are in force, have concrete content, and are binding. Resources are in place to facilitate the negotiation process, incentivize emissions reductions, and supervise and enforce compliance with the obligations imposed by these treaties. However, the language used in these international instruments is frequently intentionally vague. This book provides a clear guide to the legal regime applicable to climate change, demonstrating how the terms employed in the relevant instruments and conventions should be interpreted.

The book begins by locating international climate change law within the broader context of international law and international environmental law. It considers the evolution of the international climate change regime, and the process of law-making that has led to it. It examines the key provisions of the Framework Convention and the Kyoto Protocol. It then analyses the principles that form part of the conceptual underpinning of the climate regime, as well as the elaborate institutional and governance architecture that has been created at successive international conferences. This assessment of the contours of the current regime is followed by a chapter devoted to the design of the post-2012 climate change regime, and trends indicated by the climate negotiations. The final two chapters address the relationship of international climate change law to regional and national climate change law, as well as its relationship with other areas of international regulation.

This book is an essential introduction for any student and scholar needing to know more about international climate change law.

The Law of Rescission (2nd Edition)

Dominic O'Sullivan, Steven Elliott, Rafał Zakrzewski...

Key Selling Points
- The only book to provide specialized treatment of the law of rescission
- Analysis of the law is placed in commercial context and covers matters that arise in commercial, property and insurance disputes
- Provides foundation for theoretical analysis which assists with teaching the topic
- Improved coverage of relevant case law in Singapore, Hong Kong, Ireland and smaller common law jurisdictions such as the Cayman Islands and the British Virgin Islands
- New section on mortgagor's right to rescind a sale of the mortgaged property by the mortgagee at an undervalue
- Examines major developments in scholarship since the first edition

Analysis of the law is placed in commercial context and covers matters that arise in commercial, property and insurance disputes.

Summary
The Law of Rescission provides comprehensive treatment of the law relating to the remedy of rescission in England and Wales, and contains detailed reference to the law of other parts of the Commonwealth including Australia, New Zealand, Canada, BVI, Cayman Islands, Isle of Man, Singapore, Hong Kong, Malaysia, and India. It is the only book on the topic in the common law world.

The book includes the differences between rescission ab initio and cognate concepts, the various grounds for rescission, and its diverse mechanisms and bars. It also contains full consideration of the controversial distinctions between rescission at law and in equity; the incidence of proprietary claims upon rescission; claims against third parties; and the special rules governing the rescission of gifts.

This second edition builds on the success of the first, which established itself as the leading work on this topic. The first edition was cited and the analysis of partial rescission applied in Canada in BC Ltd v JEL Investments Ltd 2012 BCSC 202. For this second edition there is expanded coverage of the mortgagor's right to rescind sale of a mortgaged property by the mortgagee at an undervalue and even more extensive consideration of authorities, including those from a wider selection of Commonwealth jurisdictions.

Rescission is frequently sought in commercial, property, and insurance disputes, and as such this book is an indispensable reference for all lawyers involved in civil litigation and for civil judges. The book will also be of great interest to academics researching contract, remedies or restitution.

Contributor Bio
Dominic O'Sullivan is a barrister specializing in commercial law. Dominic wrote a doctoral thesis at the University of Oxford which considered aspects of the law of rescission, under the supervision of the late Professor Peter Birks. He subsequently practised as a barrister in London at Essex Court Chambers, and is now based in Brisbane, Australia, where he lives with his wife and four sons.

Steven Elliott is a barrister who practices commercial law at the Chambers of Lord Grabiner QC, One Essex Court in London.

Rafał Zakrzewski specializes in corporate finance with an emphasis on debt, particularly in relation to syndicated lending, acquisition finance, real estate finance, and project finance. He advises lenders and borrowers on cross-border and domestic transactions, and has extensive experience relating to joint ventures. Rafał conducts research in the area of corporate finance and teaches English Private Law at Oxford University. He is a fellow of St Hugh's College, Oxford.

A The Roots of Hindu Jurisprudence Sources of Dharma and Interpretations of Mimamsa and Dharmashastra (2nd Edition)
Domenico Francavilla

Key Selling Points
- Original research into philosophy of Hindu legal theory
- Ideal supplementary text for students of Hindu law

A detailed, innovative and comprehensive examination of the sources of dharma, which is among the key concepts in Hindu jurisprudence. The book is also an introduction to the main topics of Hindu legal theory.

Summary
This book is a detailed, innovative, and comprehensive examination of the sources of dharma, which is among the key concepts in Hindu jurisprudence. The book is also an introduction to the main topics of Hindu legal theory. Underlying the work of authors of various texts of Sanskrit juridical literature, including the dharmashastra, commentaries, and nibandhs, as well as of interpreters of questions concerning dharma, is a theory of the sources of dharma. Understanding the theory requires in-depth examination of the basis of the authority of different sources and of the issues that arise in case of conflict. The book begins with a detailed analysis the concept of dharma itself and the general problems concerning the knowledge of dharma (chapters 1-2). Then it studies the arguments used in the literature to establish the authority of sources (chapters 3-5). It pays special attention to the authority of smrti and sadâcâra, which are the two crucial sources in the practical functioning of the system. It examines the theory of sources of dharma as reconstructed mainly through an analysis of Medhatithi's commentary on Manu II.6-15 and of the smrtipada of the Tantravarttika of Kumarila Bhatta, a pivotal text in the Mimamsa philosophical tradition. It concludes with a look at wider issues of legal theory, the acceptance of universal and particular authorities in Hindu jurisprudence, the role of rulers, and the law in practice.

Independent Agencies in the United States
Law, Structure, and Politics
Marshall J. Breger, Gary J. Edles

Key Selling Points
• Offers a full-length study of the structure and organization of federal independent regulatory agencies in the US
• Focuses on traditional multi-member independent agencies, such as the SEC, FCC, FTC, and many others
• Compares US with EU and certain UK independent agencies to offer a unique comparative perspective
• Describes the powers and procedures of the agencies, with each supplemented by a selective bibliography of pertinent materials

Independent Agencies in the United States provides a full-length study of the structure and workings of federal independent regulatory agencies in the US, focusing on traditional multi-member agencies, such as the Securities and Exchange Commission, the Federal Communications Commission, the National Labor Relations Commission, and the Federal Trade Commission.

Summary
It is essential for anyone involved in law, politics, and government to comprehend the workings of the federal independent regulatory agencies of the United States. Occasionally referred to as the “headless fourth branch of government,” these agencies do not fit neatly within any of the three constitutional branches. Their members are appointed for terms that typically exceed those of the President, and cannot be removed from office in the absence of some sort of malfeasance or misconduct. They wield enormous power over the private sector.

Independent Agencies in the United States provides a full-length study of the structure and workings of federal independent regulatory agencies in the US, focusing on traditional multi-member agencies, such as the Securities and Exchange Commission, the Federal Communications Commission, the National Labor Relations Commission, and the Federal Trade Commission. It recognizes that the changing kaleidoscope of modern life has led Congress to create innovative and idiosyncratic administrative structures including government corporations, government sponsored enterprises governance, public-private partnerships, systems for “contracting out,” self-regulation and incorporation by reference of private standards.

In the process, Breger and Edles analyze the general conflict between political accountability and agency independence. They provide a unique comparative review of the internal operations of US agencies and offer contrasts between US, EU, and certain UK independent agencies. Included is a first-of-its-kind appendix describing the powers and procedures of the more than 35 independent US federal agencies, with each supplemented by a selective bibliography.

Contributor Bio

Marshall J. Breger is a Professor of Law at the Columbus School of Law, The Catholic University of America. He was a Senior Fellow at the Heritage Foundation specializing in labor, regulatory and trade policy (including NAFTA). During the George H.W. Bush Administration, he served as Solicitor of Labor, the chief lawyer of the Labor Department, and Chair of the Tripartite Advisory Panel on International Labor Standards (TAPILS). During 1992, by Presidential designation, he served concurrently as Acting Assistant Secretary for Labor Management Standards. He was Chairman of the Administrative Conference of the United States, an independent federal agency charged with developing improvements in the administrative process. Professor Breger is a contributing columnist to Moment magazine. He has authored or edited five books, as well as written over 25 law review articles in publications including the Stanford Law Review, Boston University Law Review, Duke Law Journal and North Carolina Law Review. Among his recent books on administrative law are: ADR in the Federal Government: A Practitioner’s Deskbook, with Gerald Schatz & Deborah Laufer (2000); Developments in Administrative Law 2000-2001 (ed. Lubbers, 2001).
Gary J. Edles is a Fellow in Administrative Law and Adjunct Professor of Law at American University, Washington College of Law, where he teaches a course on the Federal Regulatory Process. He is also Visiting Professor at the University of Hull Law School, where he teaches American Public Law, and lectures on comparative British-American public law. He is licensed as a lawyer in the United States, and is a member of Gray's Inn (UK). He was General Counsel of the Administrative Conference of the United States (ACUS), the US government’s expert advisory body on matters of administrative law and process, with the responsibility for making non-partisan recommendations to the President, the cabinet departments and regulatory agencies, Congress and the courts on methods of improving the fairness and efficiency of the administrative process. Professor Edles is co-author of two books: Edles & Nelson, Federal Regulatory Process: Agency Practices and Procedures (Second Edition, 1989), a book that has been cited by the US Supreme Court and the lower federal courts, and Berg, Klitzman & Edles, An Interpretive Guide to the Government in the Sunshine Act (Second Edition, 2005). He is also the author or co-author of more than a dozen articles. He is a past Chair of both the Administrative Law Section and General Counsels' Section of the Federal Bar Association, a member of the Section on Administrative Law and Regulatory Practice of the American Bar Association, and a member of the Faculty Review Board of the Administrative Law Review.

Quotes

"Independent Agencies in the United States: Law, Structure, and Politics fills a major gap in administrative law scholarship. Setting the stage with a historical pageant, sweeping from the 19th Century British origins of America's basic regulatory model through its metamorphosis into the multiple types of agencies that exist today, the book provides an intellectually vigorous analysis of the real-world influences on agency decision making. It ranges from such current issues as agency use of private contractors to long-standing issues such as Presidential and Congressional techniques for seeking to direct independent agency activities. The authors' unparalleled experience shines through this outstanding book!" - Betty Jo Christian, Partner, Steptoe & Johnson LLP Washington, D.C.

"Independent Agencies in the United States is truly a prodigious feat of scholarship that should be read by anyone with a serious interest in issues of governmental structure and function. Professors Breger and Edles examine not only the agencies generally referred to as 'independent,' like the SEC, but also innumerable other hybrid entities including government corporations and government sponsored enterprises, as well as the increasing trend to privatization of governmental functions. Their balanced treatment of issues that often provoke intense battles of theory and politics insures that this book will be one of the most highly regarded in recent administrative law scholarship." - William V. Luneburg, Professor Emeritus University of Pittsburgh School of Law, Former Chair, ABA Section of Administrative Law & Regulatory Practice

"Independent Agencies in the United States is an enormously ambitious effort that succeeds magnificently. It explains both the meaning of independence and the numerous reasons for seeking it, including both history and theory, and gets down to the nitty-gritty of how independence plays out in its many different ramifications in the real world of administrative law. On top of that, the book includes appendices that spell out for each independent entity those features of independence that it has and does not have, as well as numerous examples of how the many attributes of independence have different manifestations in different settings. In short, this is a book that scholars, practitioners, agency officials, congressional staff, and even students will find of great use." - Alan Morrison, Associate Dean, George Washington Law School, and long-time administrative law practitioner and teacher

"Breger and Edles enormously advance the understanding of the critical independent agency sector by treating the differences between executive and independent agencies as a continuum between executive controllability of agency decisions and the lack thereof. They rely on many legal, political, cultural, and historical factors, and supply fascinating data on how multi-member agencies function as well as comparative material on independent agencies in other legal systems. This rich and nuanced treatment of agency independence will be extremely helpful to scholars of government and to policymakers who are structuring new agencies to address the problems of the future."

- Michael Asimow, Visiting Professor, Stanford Law School

"Marshall Breger and Gary Edles have done the unusual. As significant thinkers in the
area of administrative law they have written a scholarly work that is also a practical tool for those who deal with the 'independent agencies' of the federal government. *Independent Agencies in the United States* reads well, is clear, is thoughtful, and a must for those who either study or interact with the federal government. The authors have made a real contribution to both the scholarship and the practical understanding of the federal legal system, and their extensive background in government enriches the text.” - Senior Judge Loren A. Smith, United States Court of Federal Claims, and Distinguished Adjunct Professor, George Mason University School of Law

**Table Of Contents**

Preface

Chapter 1: Introduction

Chapter 2: How the Independent Agency Developed: The Search For Expertise
A. The Interstate Commerce Commission
B. The Federal Trade Commission
C. The Federal Power Commission
D. The National Labor Relations Board
E. Federal Reserve Board: Independence as Needed
F. Observations

Chapter 3: The Modern Agency: Appointments
A. Historical Characteristics of Independence
B. Appointments
C. Observations

Chapter 4: The Modern Agency: Removal Protection As An Indicator of Independence
A. Early Congressional & Judicial Attacks on Removal by the President
B. The Historic Removal Trilogy: Myers, Humphrey's Executor & Weiner
C. The Morrison "Twist"
D. Grounds for Removal
E. Procedures for Removal
F. End of Service
G. An International Twist on the Removal Issue
H. Observations

Chapter 5: Other Indicia of Independence
A. Control of Agency Submissions to Congress1
B. Control of Litigation
C. Independent Funding Authority
D. Selection of Agency Vice Chairmen
E. Other Indicia of Independence
F. Observations

Chapter 6: Theories of Agency Independence
A. Theory of the Unitary Executive
B. Other Efforts to Centralize Effective Power
C. The Functionalist Response to the Unitary Executive
D. Political Will and Independence
E. Presidential Directive Authority
F. Observations

Chapter 7: Internal Agency Operations
A. Role of the Chairman
B. Institutional Decisionmaking

Chapter 8: Institutional Design: The Tension Between Autonomy and Accountability
A. Introduction
B. The Staying Power of Independent Regulatory Agencies
C. The Evolution of Independent Agencies: The Need for Accountability and Centralized Authority
D. The Application of Centralized Regulatory Review Authority to the Independent Agencies
E. Divided Accountability: The Separation of Policy and Adversarial Functions within Agencies
F. Split-Enforcement Model
G. Shared Regulatory Space: An Assessment
H. Unsuccessful Shift to the Single Member Option
I. Successful Shift to the Single Member Option
J. Independent Oversight Agencies
K. Independent Agencies Squarely in the Executive Branch
L. Promoting Executive Branch Autonomy and Accountability to Congress
M. Inspector Generals
N. Observations

Chapter 9: Further Along on the Continuum: Government Function and Private Enterprise
A. Public Corporations
B. Government Constraints and Constitutional Obligations on Public Corporations
C. Government Sponsored Enterprises
D. Private Action by Federal Agencies
E. Privatization
F. Observations

Chapter 10: The Independent Agency as an Institutional Art Form: Comparative Examples
A. National Independent Entities: The United Kingdom
B. The Council of Europe
C. European Coal and Steel Community
D. The Transition to a European Union
E. The European Commission Today
F. European Independent Agencies
G. Other International Administration
H. Observations

Chapter 11- CONCLUSION: The Future of the Independent Agency
A. The Changing Face of Independent Agencies
B. Centralization Theory and the Pushback Against It
C. Final Thoughts

Appendix A: Multi-Member Boards and Commissions (With Selective Bibliographies)

Appendix B: Comparing Independent Agencies

Cross-Examination in International Arbitration
Kaj I Hober, Howard S. Sussman

Key Selling Points
- The first focused, practical guide to cross-examination in international arbitration
- Written in an accessible style by two highly expert practitioners with examples from their own practice
- Provides sample transcripts of good cross-examinations for those with little opportunity to gain hands-on experience
- A quick reference 'do's and don'ts' structure and helpful tips aid understanding of the key techniques
- Highlights the potential cultural, jurisdictional, and linguistic differences amongst the arbitral tribunal
A practical, self-teaching guide to effective cross-examination in international arbitration.

Summary
Opportunities to see expert cross-examinations are often infrequent in international arbitration and the occasions to sharpen these skills for many are rare. This book is both an invaluable teaching tool as well as a general guide to effective cross-examination in international arbitration. Based on extensive experience and insight from the authors and aided by practical examples, it provides a thoroughly illustrated analysis of how essential cross-examination techniques can best be adapted to the arbitral format. Concise and well organised, it leads the reader through the different cross-examination techniques in an accessible 'do's and don'ts' structure, presenting readers with a clear and authoritative introduction on how best to conduct a cross-examination or a quick-reference for more experienced practitioners.

An international arbitration hearing is very different from a trial in a court and any practitioner appearing as counsel, whether common or civil law lawyers, need to know what will happen and how it will differ in order to adapt their conduct. Hober and Sussman explore the challenges practitioners face when conducting a cross-examination in such an environment and provide practical learning aids to help overcome them. Cross Examination In International Arbitration addresses the common issues that can occur in cross-examination in arbitrations such as adjusting the level of English to consider the competency of the panel's least competent member or how to cross-examine a witness with only the use of a written statement rather than by means of oral direct testimony. By highlighting the common challenges which might arise, the authors present a guide which will benefit those practicing or looking to practice in this field.

Contributor Bio
Kaj I Hober, Partner, Mannheimer Swartling in Stockholm and Professor of East European Commercial Law at Uppsala University, Howard S. Sussman, Of Counsel, Wrobel Schatz & Fox LLP, New York (and previously Associate Professor of Law at University of Houston)

Kaj I. Hober is a Partner at Mannheimer Swartling in Stockholm and a Professor of International Investment and Trade Law at Uppsala University. He has acted as arbitrator in more than 150 international arbitrations and as counsel in a comparable number. He was involved in preparing the 1999 Swedish Arbitration Act and in drafting the Arbitration Rules of the Swedish Chamber of Commerce. He sits on the board of the Arbitration Institute of the Stockholm Chamber of Commerce. He has published numerous books and articles in the field of arbitration.

Howard S. Sussman is of Counsel at Wrobel Schatz & Fox LLP, New York. He is a highly-experienced trial and appellate litigator, having practiced for almost fifty years in civil litigation, arbitration, and white-collar criminal prosecution and defence. From 1977-1982 he was Associate Professor of Law at the University of Houston, Texas, before founding Sussman Sollis Tweedy & Wood LLP, New York. He is now a prominent consultant on domestic and international business disputes and related issues and is the 'Elder Statesman' at Wrobel Schatz & Fox LLP.

MCMEEL AND VIRGO ON FINANCIAL ADVICE AND FINANCIAL PRODUCTS (3rd Edition)
Gerard McMeel, John Virgo

Key Selling Points
- The only book to focus on the retail dimension of financial services law, by examining the complex legal regime governing sales and advice of all financial products (investments, insurance, mortgages, banking) to individuals and businesses
- Provides full coverage of the Financial Services Act 2012, and the introduction of "twin peaks" regulation, and considers the impact of the Financial Services (Banking Reform) Act 2013
- Examines the more product-focused approach of the Financial Conduct Authority (FCA) including product interventions, such as the restrictions on the marketing of Unregulated Collective Investment Schemes (UCIS)
- Explains the role of the FCA including the transfer of the consumer credit regime from the Office of Fair Trading to the FCA
- Analyses and explains the large number of cases on retail investment and financial services in the wake of the 2007-8 financial crisis, including Rubenstein v HSBC Bank Plc, Zaki v Credit Suisse (UK) Ltd, Grant Estates Ltd v Royal Bank of Scotland and Green and Rowley v Royal Bank of Scotland.
- Considers all types of claims against financial services providers including both statutory claims under FSMA and claims in contract, tort and equity
- Covers the recent wave of product mis-selling, including payment protection insurance (PPI), Unregulated Collective Investment Schemes (UCIS) and interest rate hedging products (IHRP)

Summary
Now in hardback, this comprehensive work covers the legal and regulatory environment in which claims concerning sales of and advice on financial products for individuals and businesses are brought and defended.

Fully updated to explain the impact of the twin peaks regulation under the Financial Services Act 2012, the book analyses the role of the Financial Conduct Authority and considers its activities to date. The book covers both statutory claims and traditional 'professional negligence' claims based on contract and tort against financial advisers, brokers, other intermediaries and product providers.

Also included in this third edition is a new chapter on consumer credit, considering the transfer of responsibility for the consumer credit regime from the Office of Fair Trading to the Financial Conduct Authority.

This is the leading work on professional negligence in the financial services field and is an essential reference tool for all those who advise on bringing or defending such claims.

International Monetary and Financial Law *(2nd Edition)*
Rosa Lastra

**Key Selling Points**
- The leading authority on central banking and financial regulation
- Includes detailed analysis of public international law aspects and the role of central banks and institutions such as the IMF
- Provides contextualised discussion of regulatory issues such as the new legislation dealing with bank resolution regimes
- Explains the law in the context of economic and policy issues such as financial support mechanisms for the Eurozone (including "bailouts")

The new edition of this leading authority provides a comprehensive overview of international monetary stability and co-operation taking into account crucial updates in relation to "crisis" related issues.

**Summary**
This book is a leading authority on central banking and financial regulation, including detailed legal and policy analysis of the institutions that safeguard monetary stability and financial stability nationally, at the EU level and globally.

The new edition has been renamed (previously 'Legal Foundations of International Monetary Stability') to better reflect the book's breadth of coverage, which includes an in-depth study of central banking, a fresh look at supervision, regulation and crisis management after the global financial crisis. It also includes updated material on the law of the European Central Bank and banking union, the law of the IMF and work undertaken by international standard-setters, in particular the FSB and the Basel Committee.

Part I focuses on national developments, Part II deals with EU developments and Part III examines international developments. Each of these sections commences with a historical chapter, then analyses the framework of the 'monetary architecture'. Finally, each part considers the 'financial architecture' with regard to the functions of financial supervision (micro and macro) and surveillance, regulation and crisis management, including lender of last resort and resolution.

**Contributor Bio**

Uniform Civil Code for India
Proposed Blueprint for Scholarly Discourse
Shimon Shetreet, Hiram E. Chodosh

Key Selling Points
- Provides a blueprint for alternative frameworks and courses of action, drawing on lessons from comparative context to develop a Uniform Civil Code for India
- Looks at how to resolve the challenge of introducing the civil code while keeping continued respect for community laws and social customs
- Provides global and local perspectives on the promised, Uniform Civil Code, anticipated by the Indian Constitution, yet still not developed or implemented
- Provides a fresh set of guidelines and processes that are capable of helping India find answers to the vexing and politically sensitive dilemma of implementation of the Uniform Civil Code

This book provides a blueprint for alternative frameworks and courses of action, drawing on lessons from comparative context to develop a Uniform Civil Code for India.

Summary
Article 44 of The Constitution of India, provides that 'The State shall endeavor to secure for the citizens a Uniform Civil Code throughout the territory of India.' Even after more than six decades, this anticipated code has not been developed or implemented.

This book provides a blueprint for alternative frameworks and courses of action, drawing on lessons from comparative context to develop a Uniform Civil Code for India. It explores the interplay between issues of law, culture, and religion in light of various intra-community and inter-community disputes. The book proposes a series of guidelines and considerations to inform this process. The first guideline urges that the process of preparing and implementing a Uniform Civil Code should be the function of the Legislature. The Courts can resolve certain specific points but the comprehensive code is a legislative function and not for judicial resolution. The second guideline suggests the parallel application of civil and religious law. The securing of a Uniform Civil Code must not negate the possibility of citizens availing themselves of religious law if they so wish. The third guideline advises a gradual application of a Uniform Civil Code. The development of the code should be done topic by topic, chapter by chapter. The fourth guideline is to deploy tools of mediation in both the formation of the code and its implementation. This mediation should take on two forms - intercommunity mediation and individual mediation. The first of these two relates to a dialogue between the communities of India, to advance an agreement upon the substantive provisions of the Uniform Civil Code. The second relates to mediation between individuals, in occasions where dispute arises in the realm of personal law.

The proposed blueprint derives guidance from the experience of other nations and the many ways in which they have faced the challenge of introducing a civil code and maintaining respect for local community laws and social customs. The blueprint also focuses on the relationships between religion and the state. This set of proposals should alleviate the suspicion of the Muslim community or the Hindu majority community. A Uniform Civil Code can be developed to achieve two simultaneous objectives: to maximize the sustainability of traditions and community values while also reinforcing constitutional values that prevent discrimination and, in particular, unfair practices to girls and women in a democratic country.

International Commercial Litigation (2nd Edition)
Richard Fentiman

Key Selling Points
- The definitive account of the principles of international commercial litigation, regularly cited with approval by the courts
- Takes a strategic approach to litigation risk and looks at tactical options related to forum and interlocutory proceedings
- Structured to address issues in the order in which they arise
- Embeds the underlying principles within the framework of private international law adopting a structure which tracks the issues as they actually arise

The new edition has been fully updated to reflect current trends and concerns in the management of litigation risk in the transnational legal and regulatory environment including treatment of the recast Brussels Regulation.

Summary
The new edition of this highly regarded work has been fully updated to reflect current trends and concerns in commercial litigation practice. It considers significant changes in the law, and how they affect both the structure and drafting of commercial transactions, and the strategic choices of litigants. It includes extensive treatment of the recast Brussels I Regulation which is in force from January 2015 and which will substantively affect the treatment of contractual jurisdiction clauses, and incorporates analysis of important recent decisions including VTB v Nutritek, The Alexandros T, and Star Reefers v JFC.

The legal framework of cross-border commercial disputes is important and complex in practice, but it is increasingly difficult to discern the subject's structure and assumptions. This book is a definitive account of the law and practice of international commercial disputes in the English courts, which describes the present state of the law, and articulates its underlying principles. It is intended to be of value to both specialist and non-specialist practitioners, and to scholars in the field.

The book offers an account of the subject which is comprehensive, sophisticated in its analysis, but firmly grounded in addressing the challenges and concerns facing practitioners. The role of commercial litigation is examined, not merely in the resolution of disputes, but as an aspect of commercial practice. A feature of the book is its emphasis on evolving areas of practice, and issues of difficulty, with an emphasis on problematic decisions, and legislative changes. Particular emphasis is placed on how the principles established by the higher courts are applied in the Commercial Court. Where the law is uncertain or controversial, the rival arguments are examined and solutions considered. Particular emphasis is given to the impact of litigation on cross-border transactions, and its effect on legal risk. Mechanisms for managing the risks associated with cross-border litigation are extensively discussed, with particular emphasis on the drafting of effective jurisdiction and governing law clauses. The first edition was highly regarded and was cited with approval by the courts in a number of key decisions including Blue Sky One Ltd v Mahan Air (March 2010), Royal & Sun Alliance plc v Rolls Royce plc (July 2010), Sebastian Holdings Inc v Deutsche Bank AG (Aug 2010, Court of Appeal), Glacier Reinsurance AG & v Gard Marine & Energy Ltd (Oct 2010, Court of Appeal), Faraday Reinsurance Co Ltd v Howden North America Inc (Nov 2011, Commercial Court), Mauritius Commercial Bank Ltd v Hestia Holdings Ltd (May 2013, Commercial Court), Antonio Gramsci v Lembergs (June 2013, Court of Appeal), and The Alexandros T (6 Nov 2013, Supreme Court).

Internet Governance by Contract
Lee A. Bygrave

Key Selling Points
- The only book to focus on internet governance in relation to a contractual framework
- Written by an expert author who has advised on Information and Communications Technology regulatory policy for a range of institutions
- Examines topical and well-known mediums such as Facebook in relation to their policies and online parameters

Written by an expert in the field of privacy, internet governance and data protection law, this authoritative and topical book examines the question of governance of the internet in relation to contract.

Summary
This book presents a transnational and transsystemic perspective on the role of contract in Internet Governance, and considers parameters for assessing the utility and legitimacy of contracts in this context.

Bygrave presents definitions and parameters of internet governance and the role of contract alongside examples of how these are used in the ever-changing internet world. He examines topical and well-known mediums such as Facebook in relation to their policies and online parameters.

Taking into account legal developments across jurisdictions and within both common law and civil law systems, Bygrave explores the idea of the contract as the principal means of governing the virtual world.

The Myth of the Cultural Jew
Culture and Law in Jewish Tradition
Roberta Rosenthal Kwall

Key Selling Points
• Analyzes the idea that Jews can embrace the cultural components of Judaism without appreciating the legal aspects of the Jewish tradition
• Explains that much of Jewish culture has a basis in Jewish law, and that Jewish law produces Jewish culture
• Develops and applies a cultural analysis paradigm to the Jewish tradition that departs from the understanding of Jewish law solely as the embodiment of Divine command
• Emphasizes the human element of law's composition and the role of existing power dynamics in shaping Jewish law
• Explains why both law and culture must matter to those interested in forging meaningful Jewish identity and transmitting the tradition

Roberta Rosenthal Kwall develops and applies a cultural analysis paradigm to the Jewish tradition that departs from the understanding of Jewish law solely as the embodiment of Divine command.

Summary
A myth exists that Jews can embrace the cultural components of Judaism without appreciating the legal aspects of the Jewish tradition. This myth suggests that law and culture are independent of one another. In reality, however, much of Jewish culture has a basis in Jewish law. Similarly, Jewish law produces Jewish culture. A cultural analysis paradigm provides a useful way of understanding the Jewish tradition as the product of both legal precepts and cultural elements. This paradigm sees law and culture as inextricably intertwined and historically specific. This perspective also emphasizes the human element of law's composition and the role of existing power dynamics in shaping Jewish law.

In light of this inevitable intersection between culture and law, The Myth of the Cultural Jew: Culture and Law in Jewish Tradition argues that Jewish culture is shallow unless it is grounded in Jewish law. Roberta Rosenthal Kwall develops and applies a cultural analysis paradigm to the Jewish tradition that departs from the understanding of Jewish law solely as the embodiment of Divine command. Her paradigm explains why both law and culture must matter to those interested in forging meaningful Jewish identity and transmitting the tradition.

Contributor Bio
Roberta Rosenthal Kwall is the Raymond P. Niro Professor of Law at DePaul University College of Law. Prior to teaching at DePaul, she practiced law at Sidley & Austin in Chicago and served as a judicial clerk for Judge Leonard I. Garth, U.S. Court of Appeals for the 3rd Circuit. Kwall earned her law degree from the University of Pennsylvania and received her undergraduate degree from Brown University. Currently she is completing a Master's Degree in Jewish Studies.

Kwall is an internationally renowned scholar and lecturer and has published articles on a wide variety of topics including Jewish law and culture, intellectual property, and property law. Her book, The Soul of Creativity: Forging a Moral Rights Law for the United States, is the seminal work in this area. She has received numerous awards for teaching and scholarship and in 2006, was designated as one of the 10 Best Law Professors in Illinois by Chicago Lawyer magazine.

Quotes
"A brilliant exploration of the relationship between law and culture in the context of Judaism. Kwall offers a provocative thesis and impressively analyzes a myriad of contemporary topics. This book is a 'must read' not only for all interested in Judaism, but for all who are studying the relationship between law and culture." —Erwin Chemerinsky, Dean and Distinguished Professor of Law, Raymond Pryke Professor of First
"The Myth of the Cultural Jew will change the way in which lay people, academics, and Jewish clergy and professionals think about the development of Jewish law. It is the first book to apply to Jewish law the method of cultural analysis used in secular legal studies. This book also has broader implications, for Kwall uses this method to address the critical question for Judaism today -- What kind of Jewish religion and identity will be viable for the future? It is a must read for anyone interested in Judaism or Jewish law." - Rabbi Elliot Dorff, Rector and Distinguished Professor of Philosophy, American Jewish University

"The Myth of the Cultural Jew is a fascinating book. It is both scholarly and practical, grappling with the challenges that face all of us in the contemporary world. Roberta Rosenthal Kwall writes a powerful and relevant message for the religious and non-religious alike. This book will lead you to a deeper understanding of who you are as a Jew in the 21st century." -Rabbi Asher Lopatin, President, Yeshivat Chovevei Torah Rabbinical School

Religious Freedom in the Liberal State (2nd Edition)
Rex Ahdar, Ian Leigh

Key Selling Points
• Develops a normative theory of religious freedom from a liberal democratic standpoint
• Provides an invaluable comparative analysis of major Anglophone common law jurisdictions and European human rights jurisprudence

The right of religious freedom in major English speaking nations is a complex and vast topic, full of controversy. Offering a comprehensive analysis, this book examines the key questions from both a liberal democratic and religious standpoint.

Summary
Examining the law and public policy relating to religious liberty in Western liberal democracies, this book contains a detailed analysis of the history, rationale, scope, and limits of religious freedom from (but not restricted to) an evangelical Christian perspective. Focusing on United Kingdom, the United States, Canada, New Zealand, Australia, and EU, it studies the interaction between law and religion at several different levels, looking at the key debates that have arisen.

Divided into three parts, the book begins by contrasting the liberal and Christian rationales for and understandings of religious freedom. It then explores central thematic issues: the types of constitutional frameworks within which any right to religious exercise must operate; the varieties of paradigmatic relationships between organized religion and the state; the meaning of 'religion'; the limitations upon individual and institutional religious behavior; and the domestic and international legal mechanisms that have evolved to address religious conduct. The final part explores key subject areas where current religious freedom controversies have arisen: employment; education; parental rights and childrearing; controls on pro-religious and anti-religious expression; medical treatment; and religious group (church) autonomy.

This new edition is fully updated with the growing case law in the area, and features increased coverage of Islam and the flashpoint debates surrounding the accommodation of Muslim beliefs and practices in Anglophone nations.

Achieving Democracy
The Future of Progressive Regulation
Sidney A. Shapiro, Joseph P. Tomain

Key Selling Points
• Provides a clear history of regulation to enable an understanding of the beneficial functions of government
• Provides a clear statement of principles to enable an understanding of the connections among philosophical pragmatism, progressive government, and democracy
• Makes a sustained philosophical argument for positive government by offering numerous political, economic, and regulatory examples
• Restores philosophical pragmatism as a basis for regulatory policy, and constructs a new model for future regulatory practice

This book explains and explores the dynamic and changing nature of contemporary government and the future of the regulatory state.

Summary
Democracy is the ability to participate freely and equally in the political and economic affairs of the country. Americans have relied on philosophical pragmatism and on the impulse of political progressivism to express those creedal democratic values. Achieving Democracy argues that, in the last 30 years, however, by focusing on free markets and small government, America has since lost its grasp on these crucial democratic values. Economically, the vast majority of Americans have been made worse off due to a historically unprecedented redistribution of wealth from the lower and middle classes to the top one percent. Politically, partisan gridlock has hampered efforts to seek fairer taxes, responsive and effective regulation, reliable health care, and better education, among other needs.

Achieving Democracy critiques the history of the last 30 years of neoliberal government in the United States, and enables an understanding of the dynamic and changing nature of contemporary government and the future of the regulatory state. Sidney A. Shapiro and Joseph P. Tomain demonstrate how lessons from the past can be applied today to regain essential democratic losses within the successful framework of a progressive government to ultimately construct a good society for all citizens.

Contributor Bio

Sidney A. Shapiro is University Chair in Law at Wake Forest University School of Law. Before beginning his teaching career, he served as an attorney with the Federal Trade Commission and the Department of Health, Education and Welfare. Professor Shapiro is a founding member and now Vice-President of the Center for Progressive Reform (CPR), a nonprofit research and educational organization of sixty scholars dedicated to protecting health, safety, and the environment through analysis and commentary. He has been a consultant to the Occupational Safety and Health Administration (OSHA) and the Administrative Conference of the United States (ACUS), and he has testified in Congress on regulatory policy and process issues. He is the co-author of The People's Agents and the Battle to Protect the American Public and co-author of Risk Regulation at Risk: Restoring a Pragmatic Approach. In addition, Professor Shapiro has published over 85 articles on regulatory policy and process topics, including a book on occupational safety and health law and policy.

Joseph P. Tomain is Dean Emeritus and the Wilbert & Helen Ziegler Professor of Law at the University of Cincinnati College of Law. He has held positions as Visiting Environmental Scholar at Lewis & Clark Law School; a Distinguished Visiting Energy Professor at the Vermont Law School; a Visiting Scholar in the Program of Liberal Studies at the University of Notre Dame; a Visiting Fellow at the Harris Manchester College, Oxford University; and a Fulbright Senior Specialist in law in Cambodia. Dean Tomain serves on a number of civic organizations including Chair of the Board of the Knowledge Works Education Foundation; founder and principal of the Justice Institute for the Legal Profession; Board Member of the Greater Cincinnati Foundation. He has written extensively in the energy law field, and his publications include: Regulatory Law and Policy; Energy Law and Policy for the 21st Century; Nuclear Power Transformation,

**Quotes**

"*Achieving Democracy* is a richly textured and beautifully argued account of the pragmatic capacity of administrative government, emphasizing the importance of understanding that capacity, and why we have failed to understand it. This book provides a solid foundation upon which to construct a more intelligent and sophisticated conversation about the potential of the US administrative state and how we should comprehend the interrelationship between markets and government."
- Dr. Liz Fisher, Reader in Environmental Law, Faculty of Law, University of Oxford

"*Achieving Democracy* offers a sweeping portrait of and compelling brief for government regulation in the United States, from a philosophical, historical, political, economic, and ethical perspective. Shapiro and Tomain remind us that government regulation can be the friend of justice, liberty, and prosperity alike, and that the public ends of government are not adequately captured in the economic marketplace. Their call for a renewed and reshaped commitment to positive government could not come at a better time."
- Lisa Heinzerling, Professor of Law, Georgetown University Law Center

"In *Achieving Democracy*, Professors Shapiro and Tomain provide a powerful critique of laissez faire economic liberalism and pragmatic defense of government programs aimed at protecting the public from the perils of unconstrained markets."
- Tom McGarity, Joe R. and Teresa Lozano Long Chair in Administrative Law, University of Texas School of Law

"Our current situation of political disenchantment and deadlock is a potential teaching moment, and Shapiro and Tomain are just the teachers we need. Drawing on a remarkable range of thinking in philosophy, political science, and law, they advance a revised conception of democracy, and a revised administrative practice to accompany it. *Achieving Democracy* is a great introduction to the most adventurous recent thinking about politics."
- William H. Simon, Arthur Levitt Professor of Law, Columbia Law School

Constitutions and the Classics
Patterns of Constitutional Thought from Fortescue to Bentham
Denis Galligan

Key Selling Points
• Unveils the history and development of Western constitutional thought
• Examines the contributions of key thinkers in the UK, America, and France at critical stages of the development of constitutional thought
• Multi-disciplinary approach draws from law, history, and political theory
Focusing on major political and legal theorists whose work on constitutional theory had a significant impact, this book unearths an untold story of the development of constitutional thought in the context of the broader political environment.

Summary
The period from the fifteenth century to the late eighteenth century was one of critical importance to British constitutionalism. Although the seeds were sown in earlier eras, it was at this point that the constitution was transformed to a system of representative parliamentary government. Changes at the practical level of the constitution were accompanied by a wealth of ideas on constitutions written from different - and often competing - perspectives. Hobbes and Locke, Harrington, Hume, and Bentham, Coke, the Levellers, and Blackstone were all engaged in the constitutional affairs of the day, and their writings influenced the direction and outcome of constitutional thought and development. They treated themes of a universal and timeless character and as such have established themselves of lasting interest and importance in the history of constitutional thought. Examining their works we can follow the shaping of contemporary ideas of constitutions, and the design of constitutional texts.

At the same time major constitutional change and upheaval were taking place in America and France. This was an era of intense discussion, examination, and constitution-making. The new nation of the United States looked to authors such as Locke, Hume, Harrington, and Sydney for guidance in their search for a new republicanism, adding to the development of constitutional thought and practice. This collection includes chapters examining the influences of Madison, Hamilton, Jefferson, and Adams. In France the influence of Rousseau was apparent in the revolutionary constitution, and Sieyes was an active participant in its discussion and design. Montesquieu and de Maistre reflected on the nature of constitutions and constitutional government, and these French writers drew on, engaged with, and challenged the British and American writers. The essays in this volume reveal a previously unexplored dynamic relationship between the authors of the three nations, explaining the intimate connection between ruler and ruled.

The Complete Bill of Rights (2nd Edition)
The Drafts, Debates, Sources, and Origins
Neil H. Cogan

Key Selling Points
- The only comprehensive collection of texts essential to understanding the Bill of Rights.
- Provides background material for the Bill of Rights in a complete, accurate, and accessible format.
- Delineates a history of the text from proposal through drafting through adoption.
- Clause-by-clause layout of textual provisions, debates, and original sources from federal and state archives.
- Provides original source material without editing or "corrections" by editors at the risk of introducing bias.

The only comprehensive collection of texts essential to understanding the Bill of Rights.

Summary
The fundamental, inalienable rights and privileges set forth in the Bill of Rights represent the very foundations of American liberty. The Complete Bill of Rights is a documentary record of the process by which these rights and privileges were defined and recorded as law.

Now in its second edition, The Complete Bill of Rights contains double the content featured in the first edition. This new edition includes all the background texts for the origins and debate of the ratification of the Bill of Rights and presents them clause by clause in a complete, accurate, and accessible format. Arranged in chronological order, the work presents each clause in its finished form, and traces its development from its proposal through drafting through adoption. Cogan presents every draft of the text and every documentary source, including state convention proposals, state, colonial, and English constitutional texts, sources in caselaw and treatises, and State and Colonial statutory and decisional law. He includes data from diaries and correspondence, pamphlets and newspapers, as well as the Congressional and State debates, including the correspondence of George Washington, Thomas Jefferson, James Madison, and John Adams among many others who debated the issues that the Supreme Court considers law today. The book also contains each version of the drafts from the manuscript collections of the National Archives and Library of Congress. The result is the most detailed and useful record of the debate over the Bill of Rights available.

This first new edition since 1997 substantially expands on the previous edition, providing the same invaluable texts for two fundamental protections of liberty found in the Constitution of 1789 (though not in the Bill of Rights): the protections under habeas corpus and the privileges and immunities clauses. Each chapter expands the background discussion of rights, and provides pertinent texts in contemporary legal dictionaries to meet the increasing interest of federal and state courts in additional sources for interpretation. The second edition also provides a chapter-by-chapter discussion of rights by treatise and abridgement writers in addition to Blackstone. Finally, all margin notes and footnotes in the dictionaries and treatises are included, so the reader has access to the totality of the original statues and case law upon which the drafters relied.

The Complete Bill of Rights is the only comprehensive collection of texts essential to understanding the Bill of Rights. Organized in an accessible and practical manner, it is an invaluable tool for law students, judges, lawyers, and law clerks, as well as scholars of the law, history, and political science.

Neil H. Cogan is Professor of Law at Whittier Law School. He was Dean of Whittier Law School and Vice President for Legal Education for the College from 2001 to 2009. During his deanship, the Law School established the Center for International and Comparative Law, the Institute for Legal Writing and Professional Skills, the Institute for Student and
Graduate Academic Support, the Institute for Trial Advocacy, and six Summer Study Abroad Programs. He is a litigator, having tried both bench and jury trials and argued appeals in the federal and state courts. His *The Complete Bill of Rights* (Oxford University Press, 1997) has been frequently cited by the United States Supreme Court and in the scholarly literature.

**Quotes**

Reviews from previous edition:

"Every reference library should have a copy."--

"All academic research libraries should buy this book."--

"For anyone interested in our Constitution, our history, or our political theory, this book is an intellectual treasure chest. It is more than legislative history. It is constitution-drafting in the raw—all the proposals and all the give-and-take (some of it disturbing) that resulted in the adoption of the Bill of Rights."—Floyd A. Abrams,

"This wonderful collection offers one-stop shopping for the serious student of the Bill of Rights, for the casual reader, and for everyone in between."—Akhil Reed Amar,

_Southmayd Professor of Law, Yale Law School_

"This book is an invaluable resource for constitutional scholars, teachers, litigators, and judges alike. It collects and collates the basic texts necessary for informed interpretation of the Bill of Rights and gives them to researchers in a compact, comprehensive, and reliable form that is wonderfully organized for both quick scanning and sustained critical analysis. It makes previously difficult research tasks easy and opens new lines of thinking at a glance."—Anthony G. Amsterdam, _Judge Edward Weinfeld Professor and Director, Lawyering Program, New York University Law School_

"What a treasure. In one volume, everything any constitutional scholar, lawyer, or history buff needs to know about the origins of our Bill of Rights. Now the debate about how these amendments should be interpreted can really begin."—Alan M. Dershowitz,

_Felix Frankfurter Professor, Harvard Law School_

"_The Complete Bill of Rights_ is a major occasion in American publishing. This volume will take its place on the reference shelf next to Farrand, Elliott, Storing, Kurland, and Lerner as essential to the understanding of the American constitutional tradition. Never before has it been possible to think seriously and completely about the text of the Bill of Rights, for never before have all of the texts relating to the final version of the Bill of Rights been easily and accurately accessible in one reference work. This is a triumph of careful and thoughtful scholarship. It is now one of the essential components of the library of constitutionalism. It will never be out of date."—Stanley N. Katz, _President, American Council of Learned Societies_

"...all students of the Constitution will find this a helpful and provocative work."—

_Pergamon_

"..._The Complete Bill of Rights_ contribute[s] significantly to our understanding of a towering constitutional document that plays a major role in determining our national identity...."—_Wisconsin Magazine of History_

"..._The Complete Bill of Rights_ is, by any reasonable standard of measurement, a magnificent accomplishment...[it] is likely to become the standard source book for those seeking to ground their examination of the issues posed by the first ten amendments in the original source materials describing their drafting, discussion and ratification."—_Michigan Law Review_

Public Rights, Private Relations
Jean Thomas

Key Selling Points
- Comprehensively and systematically addresses the core normative question of which private actors should bear obligations in respect of human rights
- Addresses one of the most urgent contemporary problems facing human rights
- Provides a clear and novel assessment of current debates in rights theory
- Brings together issues in several areas of rights theory and moral theory in the context of a concrete problem
This book develops a theoretical framework for the application of human and constitutional rights in relations between private parties.

Summary
The abuse of workers in export processing zones in developing countries, the undignified treatment of elderly people in care homes, and the dangers for internet users' privacy arising from private companies' control of their data are prominent examples of how our most fundamental interests are increasingly jeopardized by powerful private actors. Jean Thomas argues that, while these interests are protected by human and constitutional rights in relation to the state, no similar protections exist in relations among private actors. To address this problem, she develops a theoretical framework for the application of human and constitutional rights among private actors.

The author proposes a theory of private liability for public rights violations that allows us to answer the question: who should bear the duties associated with human and constitutional rights in the private sphere? And what do private actors owe one another in respect of the interests protected by these rights? In advancing a model of rights that makes the application of public rights among private actors morally plausible and institutionally feasible, the book also illuminates the broader conceptual question of what rights are.

The Three Branches
A Comparative Model of Separation of Powers
Christoph Moellers

Key Selling Points

- Develops a normative model justifying the constitutional principle of the separation of powers grounded in a liberal theory
- Analyses the applicability of the traditional model of the separation of powers in the context of international organizations like the EU and WTO
- Draws on comparative constitutional analysis to present a jurisdictionally-neutral model for power separation

The idea of the separation of powers is still popular in much political and constitutional discourse, though its meaning for the modern state remains unclear and contested. This book develops an original account of the principle and its implications for modern national and transnational public bodies.

Summary

The idea of the separation of powers is still popular in much political and constitutional discourse, though its meaning for the modern state remains unclear and contested. This book develops a new, comprehensive, and systematic account of the principle. It then applies this new concept to legal problems of different national constitutional orders, the law of the European Union, and international institutional law. It connects an argument from normative political theory with phenomena taken from comparative constitutional law. The book argues that the conflict between individual liberty and democratic self-determination that is characteristic of modern constitutionalism is proceduralized through the establishment of different governmental branches.

A close analysis of the relation between individual and collective autonomy on the one hand and the ways lawmaking through public institutions can be established on the other hand helps us identify criteria for determining how legislative, administrative, and judicial lawmaking can be distinguished and should be organized. These criteria define a common ground in the confusing variety of western constitutional traditions and their diverse use of the notion of separated powers. They also enable us to establish a normative framework that throws a fresh perspective on problems of constitutional law in different constitutional systems: constitutional judicial review of legislation, limits of legislative delegation, parliamentary control of the executive, and standing. Linking arguments from comparative constitutional law and international law, the book then uses this framework to offer a new perspective on the debate on constitutionalism beyond the state. The concept permits certain institutional insights of the constitutional experiences within states to be applied at the international level without falling into any form of methodological nationalism.

**Key Selling Points**
- Each Q&A is written by experts in the field, who are able to draw upon years of examination experience to point out common pitfalls and provide examples of ideal answers
- Every question is followed by a clear commentary indicating exactly what examiners are looking for, and how best to achieve it
- Bullet point answer plans and diagram answer plans clearly outline the best approach to take, and provide a strong foundation for constructing a good answer
- 'Examiner's tip' boxes throughout the text offer bite-size advice to steer you away from common mistakes, or guidance on how to make your answer really stand out from the crowd
- The accessible and user-friendly structure of the book ensures chapters are easy to navigate and key information can be readily broken down and retained
- Further reading suggestions at the end of every chapter direct you to additional resources, to help develop and consolidate your existing knowledge

Q&A Public Law provides clear guidance from experienced examiners on how best to tackle exam questions, and gives students the opportunity to practice their exam technique and assess their progress.

**Summary**
If you're feeling overwhelmed by a sea of revision, let OUP's Questions and Answers series keep you afloat! Written by experienced examiners, the Q&As offer expert advice on what to expect from your exam, how best to prepare, and guidance on what examiners are really looking for. Revision isn't always plain sailing, but the Q&As will allow you to approach your exams with confidence.

Q&As will help you succeed by:
- identifying typical law exam questions
- giving you model answers for up to 50 essay and problem-based questions
- demonstrating how to structure a good answer
- helping you to avoid common mistakes
- advising you on how to make your answer stand out from the crowd
- teaching you how to use your existing knowledge to convey exactly what the examiner is looking for
- directing you to related further reading

Minority Shareholders (5th Edition)
Law, Practice, and Procedure
Victor Joffe QC, David Drake, Giles Richardson, Da...

Key Selling Points
- The only book to provide authoritative and accessible analysis of the application of legislation and authorities to practical issues
- Known for coverage of difficult areas such as unfair prejudice, derivative actions and shareholder duties
- Detailed treatment of procedural matters in relation to derivative and personal claims
- Practical guidance and coverage includes provision of precedents

This new edition of the leading authority on minority rights includes rigorous analysis of difficult areas such as on unfair prejudice, derivative claims and shareholder duties, and also provides the most detailed treatment of procedural matters available.

Summary
This well-established work on the law relating to minority shareholders provides practitioners with the most detailed reference on the subject.

The new edition includes a chapter on foreign aspects of minority shareholder litigation which covers all of the jurisdictional and procedural issues concerned with litigation involving foreign companies and foreign parties. There are also substantially more detailed chapters on directors' duties and derivative claims.

The new edition includes analysis of many important decisions covering the following areas:
DT Derivative claim procedure and alternative remedies
DT Unfairly prejudicial conduct, attribution of responsibility and appropriate parties
DT Personal rights of shareholders, their liability and piercing the corporate veil
DT The mechanics of share valuation

As in previous editions, the fifth edition provides the best-organised, and most accessible analysis available of the application of legislation and authorities to difficult areas of practice. It contains a very detailed treatment of procedural matters and incudes practical guidance and tools such as precedents.

The Machinery of Criminal Justice
Stephanos Bibas

Key Selling Points
• Provides readers with a powerful critique of the criminal justice system and its domination by insider lawyers.
• Discusses a wide range of topics in criminal justice, including victim’s rights, restorative justice, therapeutic justice, public morality and moral debate.
• Written by a seasoned expert in criminal justice with experience as a Supreme Court clerk and a former Manhattan federal prosecutor.
The Machinery of Criminal Justice explores the transformation of the criminal justice system and considers how criminal justice could better accommodate lay participation, values, and relationships.

Summary
Two centuries ago, American criminal justice was run primarily by laymen. Jury trials passed moral judgment on crimes, vindicated victims and innocent defendants, and denounced the guilty. But since then, lawyers have gradually taken over the process, silencing victims and defendants and, in many cases, substituting plea bargaining for the voice of the jury. The public sees little of how this assembly-line justice works, and victims and defendants have largely lost their day in court. As a result, victims rarely hear defendants express remorse and apologize, and defendants rarely receive forgiveness. This lawyerized machinery has purchased efficient, speedy processing of many cases at the price of sacrificing softer values, such as reforming defendants and healing wounded victims and relationships. In other words, the U.S. legal system has bought quantity at the price of quality, without recognizing either the trade-off or the great gulf separating lawyers’ and laymen’s incentives, values, and powers.

In The Machinery of Criminal Justice, author Stephanos Bibas surveys the developments over the last two centuries, considers what we have lost in our quest for efficient punishment, and suggests ways to include victims, defendants, and the public once again. Ideas range from requiring convicts to work or serve in the military, to moving power from prosecutors to restorative sentencing juries. Bibas argues that doing so might cost more, but it would better serve criminal procedure’s interests in denouncing crime, vindicating victims, reforming wrongdoers, and healing the relationships torn by crime.

Contributor Bio
Stephanos Bibas is a professor at the University of Pennsylvania Law School, where he specializes in criminal procedure. As director of Penn’s Supreme Court Clinic, he also litigates a wide array of cases before the Supreme Court of the United States. After graduating from Yale Law School and clerking at the Supreme Court, he worked as a federal prosecutor in New York City, where he prosecuted a wide array of criminal cases. He successfully investigated, prosecuted, and convicted the world’s leading expert in Tiffany stained glass for hiring a grave robber to loot priceless Tiffany windows from tombs in cemeteries, winning an FBI award for outstanding performance. He has published widely on plea bargaining, sentencing, and how criminal procedure could better serve the substantive moral goals of the criminal law.

Quotes
"In The Machinery of Criminal Justice, author Stephanos Bibas presents a bold and inspiring vision of what criminal justice and the punishment imposed in its name can and should be about. Criminal justice is ideally the process, and punishment ideally the vehicle, through which wronged and wrongdoing restore the bond they once shared. Restoration, not retribution or deterrence, is the rock upon which Bibas builds."
--Stephen P. Garvey, Professor of Law, Cornell Law School

"The Machinery of Criminal Justice is an exceptional volume that gives us the big picture on a scholarly subject too often hobbled by technical focus and narrow thinking. Always
accessible and always interesting, Bibas asks some hard questions and gives some creative answers. Common morality, lay justice, mercy, re-integrative punishment - these are the issues at the cutting edge of today's crime policy debates, but Bibas shows us that they are also the historical roots of American criminal justice."

--Paul H. Robinson, Colin S. Diver Professor of Law, University of Pennsylvania, author, with Michael Cahill, of Law Without Justice

"Th[e] embrace of populism as a counterweight to expertise sets Bibas apart. The academics and professionals who work in criminal justice routinely look for ways to insulate criminal punishment from popular passions; they hope to take advantage of specialized professional insights. Bibas offers a bracing challenge to this received expert wisdom."

--Ronald Wright, Criminal Law and Criminal Justice Book Review

"Through a series of articles spanning more than a decade, Professor Stephanos Bibas has proven himself a bold and penetrating critic of America's system of criminal procedure. His theme has been the gap between the morality embodied in our substantive criminal law and the morality (or, perhaps more accurately, the lack thereof) embodied in our procedural rules and practices. This theme now gets its fullest exposition in his provocative new book, The Machinery of Criminal Justice."

--Michael M. O'Hear, University of Pennsylvania Law Review Online

"His vision is a powerful one, he defends it with clarity and grace, and every idea he expresses is capable of starting an important conversation."

--Andrew Taslitz, Jotwell

Introduction: The Divergence of Theory, Reality, and Morality
Overview of the Book
Themes of the Book
Chapter I: The Long Drift from Morality Play to Assembly Line
A. Criminal Justice in the Early American Colonies
1. Small-Town Morality
2. Lay Justice
3. Room for Mercy
4. Reintegrative Punishment
B. Criminal Justice Since the American Revolution
1. The Changing Aims of Criminal Justice
2. Professionalization
3. The Birth of Plea Bargaining
4. The Hiding of Punishment Behind Prison Walls
5. The Decline of Mercy
Chapter II: Opaque, Unresponsive Criminal Justice
A. The Players
1. Dominant Insiders, Savvy and Self-Interested
2. Excluded Outsiders, Yearning for Justice
B. The Play of the Game
1. Round One: Insiders' Procedural Discretion Shapes the Rules in Action
2. Round Two: Outsiders Try to Check Insiders
3. Round Three: Insiders' Procedural Discretion Undercuts Reforms
4. Round Four: Outsiders, Egged on by Politicians, Take Matters into Their Own Hands
5. Round Five: Insiders Circumvent Even "Mandatory" Reforms
C. Costs of the Game
1. Clouding the Criminal Law's Substantive Message and Effectiveness
2. Undermining Legitimacy and Trust
3. Hindering Public Monitoring and Preferences
D. Defense Lawyers and Defendants' Distrust
1. Insider Defense Counsel's Interests and Pressures
2. Defendants' Overoptimism and Risk-Taking
3. Miscommunication, Mistrust, and Timing
Chapter III: Denial, Remorse, Apology, and Forgiveness
A. Denial and Equivocation
1. The Use of Pleas by Defendants in Denial
2. The Danger of Convicting the Innocent
3. The Costs of False Denial and the Value of Confession
4. The Value of Trials as Morality Plays
B. Remorse, Apology, and Forgiveness
1. The Irrelevance of Remorse and Apology in Contemporary Criminal Justice
2. Crime as a Relational Concept
3. Lessons from Noncriminal Contexts: Civil Mediation
Chapter IV: Whose Voices Belong in Criminal Justice?
A. The State's Monopoly on Criminal Justice
B. Incomplete Alternatives to the State's Assembly Line
1. Victims' Rights
2. Restorative Justice
3. Therapeutic Jurisprudence and Problem-Solving Courts
Chapter V: Popular Moral Discourse Versus Assembly-Line Efficiency
A. Efficiency Instead of Moral Judgment
B. Why Not Address Substantive Moral Goals?
Chapter VI: Returning Power to the Public in a Lawyer-Driven System
A. Macro-Level Reforms
1. From Idle Imprisonment to Work, Accountability, and Reform
2. Collateral Consequences and Reentry
B. Mid-Level Reforms to Include the Public
1. Greater Transparency
2. Increasing Public Participation

The Sexual Offences Referencer (2nd Edition)
A Practitioner’s Guide to Indictment and Sentencing
Eleanor Laws QC, HHJ Patricia Lees

Key Selling Points
- Sets out all the technical information - for historic and current offences - needed by practitioners and judges working on sexual offences in a single portable source
- Logical structure and practical layout allow the reader to find the information needed quickly and easily
- Includes the definitive Sentencing Guidelines
- Includes time-saving practical features such as model indictments and timelines
- Organized by offence, each chapter sets out an offence (giving its historic and current description) and all that relates to it in terms of indictments and sentence, including current sentencing guidelines and relevant case law

The Sexual Offences Referencer is an all-encompassing and invaluable guide containing all the technical information likely to be needed in sexual offences cases.

Summary
An easy to follow guide and referencer which contains all the technical information needed in sexual offences cases. The law in this area has expanded greatly in recent decades; many 'historic' cases are currently tried under the law existing at the time the offence was committed (and, if the abuse was lengthy, this will often straddle several pieces of legislation). Current editions of legal textbooks do not include the old laws that these historic cases fall under, so practitioners have to resort to a mix of old editions and new.

This book sets out the correct indictments and sentencing provisions for the different sexual offences dating back to 1943, to cover all cases which might be prosecuted. Anyone looking up a particular offence will find all the necessary technical information in one place. Each chapter sets out an offence (giving its historic and current description) and all that relates to it in terms of indictments and sentence, including current sentencing guidelines and relevant case law. The book also includes model indictments; timelines; the latest material from the Sentencing Guidelines Council; the Notification Requirements as they have been amended; and specified offences under the Criminal Justice Act 2003.

Contributor Bio
Eleanor Laws QC, Barrister, 6 Pump Court, HHJ Patricia Lees, Circuit Judge

Eleanor Laws QC is a barrister at 6 Pump Court. She is regularly instructed in all manner of criminal cases. Her particular area of expertise is in the prosecution and defence of serious sexual violence and child abuse cases. She is Specialist Advisory Counsel to Jersey Advocates in cases involving serious sexual allegations.

Her Honour Judge Patricia Lees sits as a judge on the South Eastern Circuit. Prior to her appointment as Circuit Judge, she was a barrister at 23 Essex Street, specializing in criminal litigation. HHJ Lees has extensive experience in all areas of criminal law, both prosecuting and defending, with particular expertise in cases involving sexual allegations.

Edward Rees QC, Richard Fisher, Richard Thomas

Key Selling Points
- A new edition of this popular Blackstone's Guide
- Clear, detailed overview of the Proceeds of Crime Act 2002 - an ideal introduction to those new to this complex area of law and practice
- Accessible commentary and analysis of the Act, and of the considerable body of decided cases
- Includes the full, amended text of the Act, as well as other essential materials, providing all you need in one resource

Provides a clear and accessible introduction to the Proceeds of Crime Act 2002 (POCA), which has been completely updated to contain all recent developments

Summary
The Proceeds of Crime Act 2002 (POCA) mainly came into force in March 2003, introducing a new anti-money laundering regime. It created the Asset Recovery Agency; introduced wide new powers in relation to the confiscation of criminal property; as well as new civil recovery and enforcement powers.

The fifth edition of this popular Blackstone's Guide provides a clear and accessible exploration of POCA. The book has been completely updated to include all developments, and amendments since it come into force. It includes the full updated text of POCA 2002, plus other essential materials.

The Blackstone's Guide Series delivers concise and accessible books covering the latest legislative changes and amendments. First published soon after enactment, they offer expert commentary by leading names on the scope, extent and effects of the legislation, plus a full copy of the Act itself. They provide a cost-effective solution to key information needs and are the perfect companion for any practitioner needing to get up to speed with the latest changes.

Criminalization

The Political Morality of the Criminal Law

R A Duff, Lindsay Farmer, S E Marshall, Massimo Renzo...

Key Selling Points

- The fourth volume in a ground-breaking series on criminalization - a major, neglected topic in the theory of criminal law
- Examines the questions fundamental to a complete theory of criminal law
- Includes a detailed introduction providing an overview of the central debates key to developing a general theory of criminalization
- An interdisciplinary study that deepens legal, sociological, and philosophical understanding of the issues surrounding criminalization

The fourth book in the landmark Criminalization series examines the political morality of the criminal law, exploring general principles and theories of criminalization.

Summary

The Criminalization series arose from an interdisciplinary investigation into criminalization, focusing on the principles that might guide decisions about what kinds of conduct should be criminalized, and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law’s specifications of offences?

The fourth book in the series examines the political morality of the criminal law, exploring general principles and theories of criminalization. Chapters provide accounts of the criminal law in the light of ambitious theories about moral and political philosophy - republicanism and contractarianism, or reflect upon the success of important theories of criminalization by viewing them in a novel light. Ideas that are fundamental to any complete theory of the criminal law - liberty, harm, and the effect on victims - are investigated in depth. Sociological investigation of the criminal law grounds a critical investigation into the principles of criminalization, both as a legislative matter, and with respect to criminalization practices, in contemporary and historical contexts.

The volume broadens our conceptions of the theory of criminalization, and clarifies the role of the series in the development of this theory. It is essential reading for all interested in legal, political, and social theories of criminalization.

Immigration Law Handbook (9th Edition)
Margaret Phelan, James Gillespie

Key Selling Points
- Provides all the relevant Immigration and Asylum legislation and related materials in one handy volume
- Incorporates the newly amended text of all key statutory provisions
- Well-regarded and established as the leading reference work in this area
- The essential text for re-accreditation

This book builds on the proven success of previous editions to offer the most up-to-date compilation of recent immigration legislation with annotations identifying changes in the law.

Summary
Now in its ninth edition, the Immigration Law Handbook continues to bring together all the key materials relevant to Immigration and Asylum Law in one volume, providing an essential reference tool for those working in the area.

This new edition includes the text of the Immigration Act 2014 which will make substantial changes to existing legislation, in particular the 1971 and 2002 acts and restricts access to housing and other services. Other texts provided include the new Dublin III EU regulations and recent UNHCR guidelines on refugee claims. This coverage of recent new legislation sits alongside existing important legislation to maintain the strengths of the handbook as a reference tool whilst providing the reader with up-to-date access to all new developments in a single volume.

The Immigration Law Handbook has established itself as the standard in the field and has become an invaluable resource for immigration practitioners including Asylum and Immigration Tribunal judges and barristers, and solicitors and caseworkers working in immigration, asylum, and human rights law.

Contributor Bio
Margaret Phelan, Barrister at Renaissance Chambers
James Gillespie, Retired Barrister

Margaret Phelan sits as a tribunal judge in the First-tier Tribunal. She has edited the Immigration Law Handbook since the first edition.

James Gillespie practised as a barrister specialising in immigration, asylum, and nationality law for 16 years before retiring from the bar in 2009. He has also taught and lectured widely on immigration law. During his years of practice he was recognised as one of the leading practitioners in the field of immigration law by the Chambers and Partners Guide to the UK Legal Professions. Prior to going to the bar he spent 7 years working for the Joint Council for the Welfare of Immigrants, advising on immigration law and representing clients in immigration appeals. He was a founder member of the Immigration Law Practitioners Association and served on its executive committee until 1992.

Climate Change Impacts on Ocean and Coastal Law
U.S. and International Perspectives
Randall S. Abate

Key Selling Points
- Effectively brings together the two worlds of climate change and ocean and coastal management
- Raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents
- Includes relevant details from authors with advanced degrees in marine science to help elucidate the nature and scope of the legal and policy challenges
- Thoroughly examines the impact of climate change in the Arctic and Antarctic regions
- Provides recommendations for how the law can respond to address climate change impacts on ocean and coastal resources
- Offers helpful comparative law perspectives on legal solutions and considers how international law needs to respond more effectively

Climate Change Impacts on Ocean and Coastal Law effectively unites the two worlds of climate change and ocean and coastal management.

Summary
Ocean and coastal law has grown rapidly in the past three decades as a specialty area within natural resources law and environmental law. The protection of oceans has received increased attention in the past decade because of sea-level rise, ocean acidification, the global overfishing crisis, widespread depletion of marine biodiversity such as marine mammals and coral reefs, and marine pollution. Paralleling the growth of ocean and coastal law, climate change regulation has emerged as a focus of international environmental diplomacy, and has gained increased attention in the wake of disturbing and abrupt climate change related impacts throughout the world that have profound implications for ocean and coastal regulation and marine resources.

Climate Change Impacts on Ocean and Coastal Law effectively unites these two worlds. It raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents to resources in the oceans and coasts of the U.S. and the world. This comprehensive work assembles the insights of global experts from academia and major NGOs (e.g., Center for International Environmental Law, Ocean Conservancy, and Environmental Law Institute) to address regulatory challenges from the perspectives of U.S. law, foreign domestic law, and international law.

Pearce & Stevens' Trusts and Equitable Obligations *(6th Edition)*
Robert Pearce, Warren Barr

**Key Selling Points**
- Provides detailed analysis of all key decisions, statutes, and current academic debates related to the law of equity and trusts, giving students a thorough grounding in the subject.
- A lively and stimulating writing style helps students engage with this often complex subject area.
- Includes comprehensive online resources for both students (flashcard glossary and updates) as well as lecturers (testbank and powerpoint slides).

Pearce & Stevens' Trusts and Equitable Obligations provides students with a detailed and stimulating account of the law of equity and trusts.

**Summary**
Written in a fresh and lively style and supported by a strong analytical framework, the sixth edition of *Pearce & Stevens' Trusts and Equitable Obligations* continues to provide students with a relevant and exciting examination of a subject that can seem remote and difficult.

The authors take a modern and conceptual approach to the wide array of topics covered in undergraduate equity and trusts modules, helping students explore the many ways trusts impact on every day life and in the world of finance and commerce. The text is accessible without compromising detailed critical comment, and engages with key issues such as the protection of privacy, enforcing informal promises, trusts and the family home, and assessing public interest in charities.

**Online Resource Centre**
The text is accompanied by an Online Resource Centre containing updates and a glossary of terms for students. For lecturers the site provides a test bank of multiple choice questions and PowerPoint slides to use in teaching.

**Contributor Bio**

A Practical Approach to Planning Law (13th Edition)
Michael Purdue, Victor Moore

Key Selling Points
- Clearly written and accessible, this book provides a step-by-step guide to planning law and practice
- Follows a planning application through the various stages, making it easy for practitioners to locate key information
- Extensively revised and updated to include full coverage of recent structural changes in the area

A detailed and concisely written guide to the complex subject of planning law, the thirteenth edition of this trusted resource provides a reliable overview of the planning system for both practitioners and students.

Summary
Planning law is one of the most rapidly moving legal areas, with major structural changes to the planning system occurring in recent years. Despite these attempts at simplification, it remains one of the most complex fields for both students and practitioners to navigate. In this continually evolving arena the thirteenth edition of A Practical Approach to Planning Law is an authoritative and reliable resource for all those working in the area, providing a comprehensive and systematic account of the principles and practice of planning law. The text guides the reader through each stage of the planning process, from permission applications through to disputes and appeals in a clear and accessible style.

Containing coverage of all recent cases as well as important legislative and policy developments since the publication of the previous edition, particularly those arising out of the Localism Act 2011, the Growth and Infrastructure Act 2013, the Enterprise and Regulation Reform Act 2013 and the National Planning Policy Framework, this new edition provides an invaluable introduction to the subject for professionals and students alike.

The A Practical Approach series is the perfect partner for practice work. Each title focuses on one field of the law, providing a comprehensive overview of the subject together with clear, practical advice and tips on issues likely to arise in practice. The books are also an excellent resource for those new to the law, where the expert overview and clear layout promote clarity and ease of understanding.

Contributor Bio
Michael Purdue, Emeritus Professor of Law, City University, Victor Moore, Barrister of Gray’s Inn, Emeritus Professor of Reading University

Michael Purdue is Emeritus Professor of Law at City University and is editor of the Journal of Planning and Environment Law.

Victor Moore is a barrister of Gray’s Inn and Professor Emeritus of the University of Reading. For many years he was editor of the Journal of Planning and Environment Law. He has written and lectured extensively on aspects of planning law in the USA, EU, Australia, Singapore, Hong Kong, and Japan.

Table Of Contents

Families, Relationships and Intimate Life (2nd Edition)
Deborah Dempsey, Jo Lindsay

Key Selling Points
- Comprehensive and the perfect size for a one semester course
- Author team offers a clear and consistent author voice
- Critical discussion questions and the inclusion of a wide range of examples (including popular TV series/movies/current affairs) makes the book a stimulating read and encourages students to analytically engage with ideas by drawing links between academic debates and popular discourse
- Takes diversity seriously and includes developments that are currently re-shaping families such as new technologies and social mobility.

Families, Relationships and Intimate Life, Second Edition is a thorough exploration of the controversies, contradictions and broad patterns that characterize contemporary relationships and families.

Summary
Families, Relationships and Intimate Life, Second Edition is a thorough exploration of the controversies, contradictions and broad patterns that characterize contemporary relationships and families. Beginning with the conceptual scaffolding of families in their historical and cultural context this text includes the key cultural differences of ethnicity, class and sexuality. Theoretical perspectives including functionalism, feminist approaches and reflexive modernization are also clearly outlined. Once the groundwork has been established this book delves into examining the complexity of contemporary family life, covering key elements in the life course - childhood, youth, partnering, parenting and ageing and both the positive and negative sides of family life including intimacy and violence.

No subrights have been specified.
Belinda Fehlberg, Rae Kaspiew, Jenni Millbank, Fiona Kelly

Key Selling Points
- Comprehensively updated to reflect the latest changes in family law
- The thematic approach distinguishes it from other family law textbooks in the market
- Scholarly, accessible and well-written by an authoritative author group
- Feminist and contemporary

Summary
Australian Family Law: The Contemporary Context 2nd Edition encourages critical thinking and a wide understanding of contemporary Australian family law. Description and analysis of the law is set in a broad context that includes policy debates surrounding the law and the family as well as discussion of relevant empirical and research literature. Recent years have seen a burgeoning of empirical research relevant to family law and policy, and this research enables the authors to convey a rich sense of the law in action, social norms (both attitudes and behaviors), and the contexts of the field.

This second edition has been comprehensively updated to reflect the latest changes in family law. It continues to take a thematic approach, and its use of interdisciplinary materials presents the substantive law in a highly contextualized way. This new edition includes a separate chapter on financial disputes, and expanded coverage of parenting and property disputes.

Australian Family Law (2nd Edition)
The Contemporary Context Teaching Materials
Belinda Fehlberg, Rae Kaspiew, Jenni Millbank, Fiona Kelly

Key Selling Points
- Comprehensively updated to reflect the latest cases in family law
- Questions to consider included at the end of each chapter

Summary
Australia Family Law Teaching Materials, Second Edition, includes carefully selected primary and secondary materials to assist with teaching and learning family law. Engagement with this material will help readers to develop essential skills in the use of primary sources (cases and legislation), and enable them to better assess the authors' views of the material and to form their own.

Jane Sendall

**Key Selling Points**
- Covers all family law topics taught on the LPC, including both adult and child law, making it suitable for a wide range of family law modules
- Provides focused, clearly written chapters which include summaries and self-test questions to help reinforce student learning
- Features case studies, examples, and sample documents to clarify abstract areas and demonstrate how family law works in practice, preparing students for common situations they may face in their future careers
- Accompanied by an extensive Online Resource Centre which includes thorough supporting material for all the cases in the book (including fully worked sample documentation), author podcasts, answers to self-test questions, and a testbank of ready-made questions for lecturers

Family Law Handbook takes a practical approach to family law and procedure, supporting students with a range of learning features such as self-test questions, chapter summaries, and diagrams.

**Summary**

A concise writing style and manageable chapters ensure focused learning, while chapter summaries and self-test questions help students to consolidate their knowledge and identify areas for further study. Throughout the book case studies and examples are used, demonstrating how family law applies in practice and helping to prepare students for their future careers. *Family Law Handbook* also features diagrams and flowcharts throughout, helping to improve understanding of complex processes or areas of difficulty.

This book is also accompanied by an extensive Online Resource Centre ([www.oxfordtextbooks.co.uk/orc/familylawhandbook2015/](http://www.oxfordtextbooks.co.uk/orc/familylawhandbook2015/)) which includes further detail and sample documents to support the case studies in the text; author podcasts; updates to the law post-publication; answers to the self-test questions in the book; and useful weblinks.

For lecturers, there is also a test bank of nearly 100 questions with feedback, for use in class-testing and assessments.

**Bromley's Family Law (11th Edition)**
Nigel Lowe, Gillian Douglas

**Key Selling Points**
- Comprehensive scope and content coverage ensures the text is suitable for a wide range of courses and is the go-to reference guide for both students and practitioners
- Nigel Lowe and Gillian Douglas continue Peter Bromley's legacy, providing a clear and accurate account of current family law practice while examining areas for development and debate
- Detailed discussion is clearly distilled and broken down throughout each chapter to ensure students new to the subject are informed, not overwhelmed
- Regular headings are used to signpost discussion and ensure easy navigation, helping readers to quickly find what they need whether in class, court, or office
- Pays particular attention to the international elements of family law, considering the leading cases from the EU and the cross-jurisdictional issues of the subject

**Summary**
Relied on by generations of students and practitioners alike, *Bromley's Family Law* remains the definitive guide to the subject.

Updated by experts in the area, Nigel Lowe and Gillian Douglas provide an accurate, detailed yet highly readable account of family law. The text presents a broad and comprehensive treatment of the key issues relating to adult and child law in a clear and distilled manner. Regular headings break up the text and allow easy navigation and quick reference for both students new to the subject and those in practice.

The new edition has been fully edited and updated to take account of the latest case law and legislation, while also reflecting new debates and emerging issues in the area. Particular attention is also paid to the increasingly significant international dimension of family law, with a new chapter on this area added to the 11th edition.

**Feminisms of Discontent: Global Contestations**
Ashleigh Barnes

**Key Selling Points**
- This edited volume focuses on a central plank of feminist politics, i.e. the struggle for equality.
- It contains important debates and raises questions that are critical to feminist struggles across the world.
- The volume covers a wide range of issues from around the world: feminist engagement with law; feminism's engagement with sexuality and queer politics; the idea of freedom and equality in the neoliberal frame; postcolonial feminism, etc.
- Well-known feminist scholars such as Brenda Cossman, Ratna Kapur, Aziza Ahmed, Margaret Thornton, etc. come together as contributors to this edited volume.
- A notable feature of the book is the range of essays—ranging from critical theory to human rights, to applying a queer lens to torture.
- This volume will be a useful contribution to feminism in India as well as globally.

This edited volume focuses on a central plank of feminist politics, i.e. the struggle for equality. It attempts to find answers to the following questions: In what ways have feminist pursuits brought about more equality in women's lives? Or has the struggle for equality produced more law and invited greater regulation into women's lives rather than transformation? Are there other ways in which to engage equality and the state? It points out that as feminism has gone mainstream, feminist discontent seems to have succumbed to respectability and the reward of inclusion. Feminism as a grand theory is probably over. However, feminism as an intellectual project needs critical reorientation.

In ten chapters, the volume covers a wide range of issues from around the world: feminist engagement with law; feminism’s engagement with sexuality and queer politics; the idea of freedom and equality in the neoliberal frame; postcolonial feminism, etc. Well-known feminist scholars such as Brenda Cossman, Ratna Kapur, Aziza Ahmed, Margaret Thornton, etc. come together from different locations—India, US, Europe, Australia, and Canada—for this critical assessment and questioning of feminist theory and politics. The volume critically engages certain currents in feminist theory and practice, such as 'subordination', 'dominance', 'structural', 'governance', 'cultural' and 'carceral' feminism. Pointing out the dangers of feminist analyses that rely on dualistic understandings of sex/gender as also the assumed inevitability of women's subordination and the harmfulness of (hetero)sexuality for women, this volume decry[s] such narrow and self-referential feminist paradigms. The volume also shows how these have not only failed to offer persuasive appraisals of contemporary international problems but have also ended up serving and legitimizing neoliberal and neoconservative projects.

Blackstone's Police Investigators' Q&A 2015
Paul Connor

Key Selling Points
• Sit your NIE exam with confidence - our multiple-choice questions are presented in the only format you will see in the exam (Type A)
• Written in partnership with the Investigators' Manual, with over 200 Q&As cross-referenced back to the official 2015 syllabus
• Each Q&A provides detailed and comprehensive answers, giving you the rationale for both correct and incorrect responses
• Includes invaluable guidance on revising for and taking the NIE, including a 14-week revision plan
• New for this year - includes questions covering key revisions to the PACE Codes, annual updates from the Criminal Procedure Rules, and significant case law decisions and new legislation

Designed to test trainee investigators studying for the National Investigators' Examination (NIE), this book presents over 200 multiple-choice questions set in same style of the exam.

Summary
Blackstone's Police Investigators' Q&A 2015 is the essential revision tool for all candidates sitting the National Investigators' Examination (NIE) examinations. Written in partnership with the best-selling Blackstone's Investigators' Manual, the only study guide endorsed by the College of Policing, the Q&A consists of over 200 multiple-choice questions arranged in the same order as the chapters in Manual, providing the most authoritative means of self-testing outside of the NIE.

With four parts, Evidence, Property Offences, Assaults, Drugs, Firearms & Gun Crime, and Sexual Offences, reflecting the Manual, Blackstone's Police Investigators' Q&A presents you with the only format of questions you will see in an NIE examination: Type A. Each question has a detailed and comprehensive answer that highlights not only the correct response, but also the reasoning behind the incorrect responses, allowing you to highlight any gaps or weaknesses in your knowledge. Full cross-references to the relevant Manual paragraphs and Keynotes encourage more effective studying, while a question checklist helps you track your progress. The introductory chapters also contain a useful section on how to study for the NIE, including advice on how to approach multiple-choice questions, practical exam techniques, and a 14-week revision plan.

Fully updated for the 2015 syllabus, including coverage of relevant new legislation, the Criminal Procedure Rules 2013, the Crime and Courts Act 2013, the Protection of Freedoms Act 2012, revisions to PACE Codes A, B, C, E, F, and H, and reflecting revised Manual chapters on sexual offences and RIPA.

This product is not endorsed by the College of Policing.

Blackstone's Police Investigators' Mock Examination Paper 2015
David Pinfield

Key Selling Points
• Test yourself with 80 questions, presented in the only format you will see in the exam (Type A)
• Refine your exam technique using the 2 hour time limit - don't risk running out of time and losing marks!
• Assess both your strengths and weaknesses - gain confidence from the results and make your revision more effective
• Includes a separate, sealed Answer Booklet with full explanations and cross-references to the College of Policing-endorsed Blackstone's Investigators' Manual 2015, as well as a helpful marking matrix

Designed in an exam format with 80 questions to be answered in two hours, this Mock Examination challenges your knowledge of all areas of the 2015 NIE syllabus, drawn from the Blackstone's Police Investigators' Manual 2015.

Summary
Blackstone's Police Investigators' Mock Examination Paper 2015 helps you prepare for your NIE multiple-choice examination, with 80 exclusive questions taken from across the syllabus and fully referenced to the Blackstone's Investigators' Manual 2015.

Split into two handy sections, the paper contains the mock exam booklet and answer sheet, and a second, sealed pack containing the answers and detailed marking matrix. Matching the only format of questions you will see in NIE examinations, the two hour time limit helps you gauge your revision progress and practice your exam technique. Once the exam is completed, the answers are provided with full explanations not only of the correct response but also with details of why the other responses were incorrect, and these are referenced back to the officially endorsed Blackstone's Investigators' Manual 2015. The paper tests you on all areas of the official syllabus found in the Manual and includes verification questions to simulate exact examination conditions. Updates for the 2015 syllabus include the Criminal Procedure Rules 2013, the Crime and Courts Act 2013, the Protection of Freedoms Act 2012, as well as revisions to PACE Codes A, B, C, E, F, and H.

Blackstone's Police Investigators' Mock Examination Paper 2015 can offer a comprehensive and evidence-based assessment of your exam preparedness, and help you plan to avoid unnecessary pitfalls.

Law for Social Workers (13th Edition)
Hugh Brayne, Helen Carr, David Goosey

Key Selling Points
- Features accessible discussion of recent, real-life cases, illustrating how the law works in practice and preparing you for the everyday situations you are likely to face when dealing with the service user
- Provides a clear and accurate account of the law in an easy-to-use and concise format which can be relied upon throughout all stages of your degree and in the workplace
- Includes 'The Social Worker's Toolkit', providing quick-reference advice and practical tips to assist you on placements and in your career as a professional social worker
- Covers the key topics relating to adult and child law as well as detail on the legal system, human rights, information sharing, and consent, making it the ideal companion text for all social work law modules
- Includes end of chapter exercises with online guidance, further reading advice, and chapter summaries to ensure understanding and assist with further research and assessment preparation
- Accompanied by a free Online Resource Centre which features relevant updates to the law, guidance on answering questions in the book, a glossary of key terms, and further reading advice and support. For lecturers, the website also features powerpoint slides and podcasts for use in lectures plus discussion notes and a customizable bank of questions for student testing

Written by a qualified social worker and experienced lecturer team, Law for Social Workers provides the perfect combination of legal explanation and practical insight.

Summary
Law for Social Workers has been supporting social work students and professionals for over 20 years. The ideal book to see you through both your course and career, the new edition features contributions from a practicing social worker and provides the perfect balance of accessible explanation and practical insight.

The new edition continues to provide an accurate, jargon-free account of the law social workers need to know, with helpful diagrams and case studies included throughout to explain areas of difficulty and ensure understanding for students and professionals at all levels.

The 13th edition also features 'The Social Worker's Toolkit', offering practical advice on topics such as going to court, preparing evidence, and writing reports, and provides the ideal support while on placement or in the workplace.

The book is accompanied by a fully interactive Online Resource Centre featuring updates on recent cases and changes to legislation, guidance on answering exercises in the book, a glossary explaining essential legal terminology, and video podcasts. For lecturers, resources include suggested lecture discussion points and powerpoint slides, plus a test bank of over 200 multiple choice questions for class-testing.

With its comprehensive coverage and practical focus, Law for Social Workers will be an invaluable guide throughout your degree and as you enter the workplace, equipping you with the essential legal knowledge to give you the confidence to practice.

The Death Penalty *(5th Edition)*
A Worldwide Perspective
Roger Hood, Carolyn Hoyle

Key Selling Points
- A completely up-to-date and substantially revised new edition, widely regarded as the leading authority on the death penalty in its international context
- Presents the latest information on developments relating to the death penalty from all over the world, including new publications, empirical research, debates, international law developments, official reports, and news reports
- Arranged thematically, with country or region-specific sections permitting easy navigation
- Quick-reference appendices allow the reader to easily see what stage of retention or abolition each country is at and the international covenants they have signed or ratified

The fifth edition of this renowned work charts the progress towards the goal of worldwide abolition of the death penalty internationally.

Summary
The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty. The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place. Emphasizing the impact of international human rights principles and evidence of abuse, the authors examine how this has fueled challenges to the death penalty and they analyze and appraise the likely obstacles, political and cultural, to further abolition. They discuss the cruel realities of the death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness, discrimination and conviction of the innocent: all violations of the right to life. They provide further evidence of the lack of a general deterrent effect; shed new light on the influence and limits of public opinion; and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns.

This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel, inhuman and degrading. Widely relied upon and fully updated to reflect the current state of affairs worldwide, this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal.

Detention under the Immigration Acts: Law and Practice
Rory Dunlop, Graham Denholm, Lisa Giovannetti QC

Key Selling Points
• The only text to provide a comprehensive account of the law relating to immigration detention which an increasing number of cases touch on
• Written by practitioners who represent both claimant and government interests, it provides a neutral and reliable analysis of the area
• Takes a practice led approach, addressing each aspect of immigration detention powers in turn, considering their scope and limitations, as well as available remedies for their breach or misuse
• Considers the impact of the ECHR, EU legislation, and other international law on the operation and scope of domestic detention powers and suggests arguments which are yet to be used in domestic courts

The only text to provide a comprehensive and detailed analysis of the law relating to immigration detention, this book also provides exploration of issues that are yet to be thoroughly examined in domestic jurisprudence.

Summary
The UK has some of the largest immigration detention facilities in Europe, holding as many as 3000 individuals at any point in time. Foreign nationals are held under immigration powers in a variety of circumstances including on arrival pending examination, whilst an asylum claim is considered in the Detained Fast Track, and pending administrative removal or deportation. The routine use of detention powers, particularly in relation to foreign national offenders, has increased dramatically in the years since 2006. Advising individuals detained under immigration powers is no longer a niche field. An increasing number of practitioners need access to a clear reference guide when faced with cases which touch on this issue.

Detention under the Immigration Acts: Law and Practice is the only text to provide a comprehensive and detailed account of the statutory powers underpinning immigration detention and the limitations on those powers afforded by the common law, the European Convention on Human Rights and the law of the European Union. It is an invaluable resource not only for those working predominantly in immigration but also practitioners whose work may touch on this increasingly complex area, whether from a civil or criminal perspective, as well as the judiciary and government officials with a need for clear legal guidance.

Taking a practice focused approach, the work addresses the procedural aspects of litigation challenging detention, from bail applications in the Tribunal through judicial review claims in the Administrative Court, to civil claims before the County Court and the Queen's Bench Division of the High Court. It offers unparalleled coverage of the many hundreds of domestic cases on the subject, saving practitioners valuable time in their legal research. It also examines, in more detail than has ever been done before, the case law of the European Court of Human Rights and the Court of Justice of the European Union and suggests arguments to challenge detention and seek damages that have not so far been used in domestic courts.

Written by an author team representing both claimant and government interests, key issues are considered from a neutral perspective, providing a balanced and detailed exploration of the common law and policy based principles governing the exercise of immigration detention powers.

Contributor Bio
Rory Dunlop, Barrister, 39 Essex Street,Graham Denholm, Barrister, 1 Pump Court

Rory Dunlop is a barrister at 39 Essex Street, specialising in immigration law. He is recommended by Chambers and Partners and Legal 500 as a specialist in immigration law. He acts both for claimants and the Government and has been instructed in many immigration detention cases, some against his co-author. He has previously worked at the Registry of the European Court of Human Rights, drafting several judgments in cases...
Graham Denholm is a barrister at 1 Pump Court specialising in public law with a focus on immigration and asylum work. He is recommended by Chambers and Partners and Legal 500 in immigration. He has specialised in immigration detention for many years, and has appeared in many of the leading cases in this area.

Lisa Giovanetti QC is a barrister at 39 Essex Street, her practice focusses on administrative and public law

Human Rights and European Law
Building New Legal Orders
Mary Arden

Key Selling Points
- An insider account of the impact of the EU and the European Court of Human Rights in Strasbourg on the domestic law of the UK
- Examines the difficulties of preserving individual rights in the face of the threat of terrorism and breaches of privacy
- Provides rare insight into the senior judiciary, drawing upon Arden's own direct experience in the Courts and of international dialogue
- The first of a two volume set of essays entitled Shaping Tomorrow's Law, which gathers speeches, articles, and unpublished material by a senior judge

An invaluable contribution to the debate on transnational courts and human rights; explains clearly how human rights law has evolved, and the difficult balances that judges have to strike when interpreting it.

Summary
Senior judges and politicians increasingly question the role of the EU and the European Court of Human Rights. Some call for a reconsideration of the influence of transnational courts in the legal life of the UK, while others argue for a repeal of the Human Rights Act in favour of a British Bill of Rights. Many perceive control of law-making as moving irreversibly away from the UK and into the hands of Europe. In contested domains like national security and individual freedoms there are concerns that the British national identity is being lost.

Against this backdrop of confusion, Mary Arden's voice is one of reason. A senior judge who has been at the heart of dialogue between domestic and international judges, Mary Arden is uniquely placed to discuss the impact of developments in human rights and European law. In this major new collection of her writings, Mary Arden clarifies the issues at stake with the new European legal orders. She explains the major developments in simple terms, addresses core criticisms of the EU and the ECHR, and examines the practical effects of these institutions on domestic legislation and case law.

In describing the far-reaching impact of EU law and the Human Rights Act, Mary Arden gives an insider's view of key conflicts including national security versus freedom of the individual, and freedom of the press versus the individual's right to privacy. She also outlines how domestic courts have been able to draw upon the decisions of Strasbourg in the key battlefields of media freedom, data protection, and national security.

Contributor Bio
Mary Arden, Member of the Court of Appeal of England and Wales and Head of International Relations for England and Wales, Court of Appeal of England and Wales

The Rt. Hon. Lady Justice Arden DBE was called to the Bar of England and Wales in 1971, and became a Queen's Counsel in 1986. She was appointed a Justice of the High Court of Justice of England and Wales in 1993, the first woman judge to be assigned to the High Court's Chancery Division. From 1996 to 1999 she was the Chair of the Law Commission of England and Wales. She was appointed a Lady Justice of Appeal in 2000. Lady Justice Arden is Head of International Judicial Relations for England and Wales. This makes her responsible for liaison with leading courts across the world. She is also a Member of the Permanent Court of Arbitration in The Hague and an ad hoc judge of the European Court of Human Rights in Strasbourg.

Table Of Contents
Preface, The Rt Hon The Lord Chief Justice of England and Wales
Introduction: Why this Collection?
SECTION A - Mastering a New System
Preface, Rt Hon Sian Elias, DBE PC, Chief Justice of New Zealand

Part I: Implementing Human Rights
1. Common Law in the Age of Human Rights
2. Building a Better Society

Commentary on the Paris Convention for the Protection of Industrial Property
Sam Ricketson

Key Selling Points
- The only specialised commentary on the Paris Convention for the Protection of Industrial Property 1883 and its associated agreements
- Analyses the Convention and associated intellectual property rights agreements including the TRIPS agreement
- Comprehensive commentary written by a highly respected authority in the field

This work provides a detailed commentary on the origins, development, and present operation of the Paris Convention for the Protection of Industrial Property 1883.

Summary
Written by a recognized leader in the field, this work provides the only specialized commentary on the Paris Convention and its associated agreements.

Professor Ricketson discusses the origins of the agreement, giving an overview of early debates about patent protection, before outlining the negotiations that led to the initial adoption of the Convention. He outlines the subsequent revisions of the Convention, and gives an overview of the present scope of the Convention, including the gradual expansion to include trade marks, designs and other industrial property titles, and its incorporation into the WTO through the TRIPS agreement.

The work explores a number of themes, including the broader significance of the agreement in relation to WIPO, the future significance of the Convention in the post-TRIPS environment, and why the Paris Convention has been less successful than its Berne counterpart.

A comprehensive overview of a key treaty, this work is essential reading for intellectual property policy makers, legal practitioners, and academics.

Contributor Bio
Sam Ricketson, Professor of Law, University of Melbourne

Sam Ricketson is a Professor of Law at the University of Melbourne. He has written, taught and advised widely in all areas of intellectual property law (copyright and designs, patents, trade marks and unfair competition, and breach of confidence), conflicts of law, trade practices and corporate law.

Table Of Contents

Part I: Origins of the Paris Convention
1. Beginnings
2. Moves Towards International Protection
3. Establishment of the Paris Union

Part II: Development and Growth of the Paris System
4. The Paris Union: A Work in Progress
5. The Situation Post-Stockholm: "Forty Years on, Growing Older and Older"

Part III: The Paris Convention and its Associated Agreements - Overarching Issues
6. Public International Law Questions: Interpretation and Application of the Paris Convention and Associated Agreements
7. The Paris Union and its Structure
8. Membership and Extent of the Paris Union - the Final Clauses of the Convention
9. Organizing Principles of the Paris Convention

Part IV: Subject Matter Protected
10. Patents and Utility Models
11. Industrial Designs
12. Trademarks and Trade Names
13. False Indications of Source, Unfair Competition, Trade Secrets and Appellations of Origin

**Part V: The Wider Context**
15. The Paris Convention and the Future

The War on Terror and the Laws of War (2nd Edition)
A Military Perspective
Geoffrey S. Corn, James A. Schoettler, Jr., Dru Brenner-Beck...

Key Selling Points
- The only current book applying the law of war to U.S. military practice that is both published outside the military and written exclusively by military officers.
- Includes a range of perspectives, to show the full scope of this contentious issue of armed conflict against transnational terrorist groups
- Offers a practical exposition of the challenges facing military officers on the battlefield
- Includes a Foreword by Major General Charles J. Dunlap

The only current book applying the law of war to U.S. military practice that is both published outside the military and written exclusively by military officers.

Summary
Many years after the United States initiated a military response to the terrorist attacks of September 11th, 2001, the nation continues to prosecute what it considers an armed conflict against transnational terrorist groups. Understanding how the law of armed conflict applies to and regulates military operations executed within the scope of this armed conflict against transnational non-state terrorist groups is as important today as it was in September 2001.

In The War on Terror and the Laws of War seven legal scholars, each with experience as military officers, focus on how to strike an effective balance between the necessity of using armed violence to subdue a threat to the nation with the humanitarian interest of mitigating the suffering inevitably associated with that use. Each chapter addresses a specific operational issue, including the national right of self-defense, military targeting and the use of drones, detention, interrogation, trial by military commission of captured terrorist operatives, and the impact of battlefield perspectives on counter-terrorism military operations, while illustrating how the law of armed conflict influences resolution of that issue. This Second Edition carries on the critical mission of continuing the ongoing dialogue about the law from an unabashedly military perspective, bringing practical wisdom to the contentious topic of applying international law to the battlefield.

Contributor Bio

Geoffrey S. Corn is The Presidential Research Professor of Law at South Texas College of Law in Houston Texas, who retired in 2004 from the U.S. Army as Lieutenant Colonel (Retired). Professor Corn's teaching and scholarship focuses on the law of armed conflict, national security law, criminal law and procedure, and prosecutorial ethics.

James A. Schoettler, Jr. is an Adjunct Professor of Law at the Georgetown University Law Center. He is a retired U.S. Army Colonel, with 30 years of service as a Judge Advocate on active duty and in the Army Reserve.

Dru Brenner-Beck is an attorney in private practice in Littleton, Colorado, and consults on international law matters. She served in the U.S. Army initially as a Military Intelligence officer, and then as a member of the Judge Advocate General's Corps. She is also the current President of the National Institute of Military Justice.

Victor M. Hansen is Associate Dean and Professor of Law at New England Law Boston. Professor Hansen holds a J.D., magna cum laude, from Lewis and Clark Law School. He is a co-author of the first edition of The War on Terror and the Laws of War. He previously served as a Lieutenant Colonel in the U.S. Army Judge Advocate General's Corps.

Richard B. "Dick" Jackson is the Special Assistant to the U.S. Army Judge Advocate General for Law of War Matters. He is a retired U.S. Army Colonel, with over 30 years of experience as an Infantryman and Judge Advocate. Mr. Jackson has written extensively and frequently lectured on law of war matters.

Eric Talbot Jensen is an Associate Professor at Brigham Young Law School in Provo,
Utah, where he teaches Public International Law, US National Security Law, Criminal Law, and the Law of Armed Conflict. He has written a number of law review articles appearing in such journals as the Michigan Journal of International Law, International Law Studies, and the Minnesota Journal of International Law.

Michael W. Lewis is a professor of law at Ohio Northern University School of Law. He has written extensively on various aspects of the laws of war and the conflict between the US and al Qaeda. He served in the U.S. Navy from 1987-95 where he flew F-14's from the aircraft carrier USS Independence.

Quotes

"For the second time a seasoned group of scholars with extensive military experience have written a lucid, balanced, and especially valuable analysis of the laws of war in an era of transnational terrorism. I know of no other collection that so effectively and seamlessly blends the rich perspectives drawn from military experience with thoughtful scholarly analysis. From threshold questions of the applicability of the laws of war to detailed examination of targeting, interrogation and treatment, detention and trial, this is a must-read." -William C. Banks, Director, Institute for National Security and Counterterrorism, Board of Advisors Distinguished Professor, Syracuse University College of Law

"Issues of targeting, detention, interrogation, and prosecution are among the most pressing and controversial questions in our politics today. Some say the treatment of these topics in the laws of war must evolve in order to account for the changing face of armed conflict, while others argue that the case for new rules has not been made, and in any event disagreement abounds as to when the laws of war apply at all. Unfortunately, we don't often hear the perspective of military practitioners in this debate. This indispensable volume closes that gap, and is a must-read for experts and novices alike." --Professor Robert M. Chesney, University of Texas School of Law, Member of the U.S. Dept. of Justice's Gitmo Task Force

"The authors' blend of scholarly perspective with military experience makes the discussion of intricate legal issues relating to the declared 'war on terror' more captivating." --Gentian Zyberi, International Law Observer

"The best new book you can read on the subject. . . Rarely does one get the chance to read a careful, academic analysis written from the vantage point of scholars with such extensive experience with so many different facets of the subject of their study" --Jeffrey Kahn, ConcurringOpinions.com

"This book is mandatory reading for both lawyers and policy makers involved in national security. While some people believe international law and the law of armed conflict are irrelevant in conflicts with terrorists that abide by neither, the authors thoughtfully argue that with advancements in applicable law for the law to retain legitimacy, and integration of law, policy, and strategy--we can win, but if we abandon the Rule of Law, we have already lost." -Walter B. Huffman, Dean Emeritus and Professor of Law, Texas Tech University School of Law, Major General, U. S. Army, Retired

"The passing of 'industrial' wars, for which the basic laws of armed conflict were written, to today's unconventional wars challenges the utility of our force and the legal and moral foundations upon which Americans must fight. The authors elucidate and guide the reader through these complexities with powerful analysis. This is a book for warriors at all levels who have to make the agonizing decisions in the conduct of war." -Lt. Gen. Harry E. "Ed" Soyster, US Army (ret)

Islamic Law and International Human Rights Law
Anver M. Emon, Mark S. Ellis, Benjamin Glahn

Key Selling Points
• Focuses on flashpoints in Islamic law and international human rights law, including freedom of speech and freedom of religion, women’s equality, and minority rights
• Deepens the understanding of the relationship between Islam and human rights by examining how fundamental freedoms are protected and limited in each system, not just the compatibility of particular rules
• Provides a challenging, original starting point for studying the subject, representing an excellent teaching resource

Deepening the discussion of the relationship between Islamic law and human rights, this volume gathers leading experts in both fields to examine how each system protects and limits fundamental freedoms.

Summary
The relationship between Islamic law and international human rights law has been the subject of considerable, and heated, debate in recent years. The usual starting point has been to test one system by the standards of the other, asking is Islamic law ‘compatible’ with international human rights standards, or vice versa. This approach quickly ends in acrimony and accusations of misunderstanding. By overlaying one set of norms on another we overlook the deeply contextual nature of how legal rules operate in a society, and meaningful comparison and discussion is impossible.

In this volume, leading experts in Islamic law and international human rights law attempt to deepen the understanding of human rights and Islam, paving the way for a more meaningful debate. Focusing on central areas of controversy, such as freedom of speech and religion, gender equality, and minority rights, the authors examine the contextual nature of how Islamic law and international human rights law are legitimately formed, interpreted, and applied within a community. They examine how these fundamental interests are recognized and protected within the law, and what restrictions are placed on the freedoms associated with them.

By examining how each system recognizes and limits fundamental freedoms, this volume clears the ground for exploring the relationship between Islamic law and international human rights law on a sounder footing. In doing so it offers a challenging and distinctive contribution to the literature on the subject, and will be an invaluable reference for students, academics, and policy-makers engaged in the legal and religious debates surrounding Islam and the West.

Contributor Bio
Anver M. Emon, Professor, Faculty of Law, University of Toronto, Mark S. Ellis, Executive Director, International Bar Association, Benjamin Glahn, Former Program Director, Salzburg Global Seminar

Anver M. Emon is professor of law at the Faculty of Law, University of Toronto. His research focuses on premodern and modern Islamic legal history and theory; premodern modes of governance and adjudication; and the role of Shari’ah both inside and outside the Muslim world. The author of Islamic Natural Law Theories (OUP, 2010) and Religious Pluralism and Islamic Law (OUP 2012), Professor Emon is the editor in chief of Middle East Law and Governance: An Interdisciplinary Journal, and a series editor of Oxford Islamic Legal Studies.

As Executive Director of the International Bar Association (IBA) Mark Ellis leads the foremost international organization of bar associations, law firms and individual lawyers in the world. Prior to joining the IBA, he spent ten years as the first Executive Director of the Central European and Eurasian Law Initiative (CEELI), a project of the American Bar Association (ABA). Providing technical legal assistance to twenty-eight countries in Central Europe and the former Soviet Union, and to the International Criminal Tribunal for the Former Yugoslavia (ICTY) in The Hague, CEELI remains the most extensive international pro bono legal assistance project ever undertaken by the US legal
community. He served as Legal Advisor to the Independent International Commission on Kosovo, chaired by Justice Richard J. Goldstone and was appointed by OSCE to advise on the creation of Serbia’s War Crimes Tribunal and was actively involved with the Iraqi High Tribunal.

Benjamin Glahn is the Former Deputy Chief Program Officer and Program Director at the Salzburg Global Seminar.

Key Selling Points

- Part of a unique new series of annual reports on armed conflicts around the world
- Provides a detailed and comprehensive analysis of each conflict in 2013 assessing its classification, belligerents, primary means and methods of warfare, applicable treaties and rules, and any allegations of war crimes
- Analyses key legal developments and controversies that arose in 201, including those related to drone strikes, sexual violence, chemical weapons, and the case law of national and international courts

This annual Report on armed conflicts around the world provides detailed information on each conflict which occurred in 2013.

Summary

This War Report provides detailed information on every armed conflict which took place during 2013, offering an unprecedented overview of the nature, range, and impact of these conflicts and the legal issues they created.

In Part I, the Report describes its criteria for the identification and classification of armed conflicts under international law, and the legal consequences that flow from this classification. It sets out a list of armed conflicts in 2013, categorizing each as international, non-international, or a military occupation, with estimates of civilian and military casualties. In Part II, each of the 28 conflicts identified in Part I are examined in more detail, with an overview of the belligerents, means and methods of warfare, the applicable treaties and rules, and any prosecutions for, investigations into, or robust allegations of war crimes.

Part III of the Report provides detailed thematic analysis of key legal developments which arose in the context of these conflicts, allowing for a more in-depth reflection on cross-cutting questions and controversies. The topics under investigation in this Report include US policy on drone strikes, the use of chemical weapons in Syria, the protection of persons with a disability, and national and international war crimes trials.

The Report gives a full and accessible overview of armed conflicts in 2013, making it the perfect first port of call for everyone working in the field.

The Oxford Handbook of the Use of Force in International Law
Marc Weller

Key Selling Points
- This Oxford Handbook provides the most comprehensive, authoritative, and detailed study into the use of force in international law yet available
- Over seventy experts offer an unparalleled assessment of the law of the use of force from a range of interdisciplinary perspectives
- Investigates key recent controversies in this field, including forcible humanitarian action and pro-democratic intervention, the expansive interpretation of self-defence, the ability of non-state actors to mount armed attacks of significant scale and destructive power, and the doctrine of exceptionalism

Summary
The prohibition of the use of force in international law is one of the major achievements of international law in the past century. The attempt to outlaw war as a means of national policy and to establish a system of collective security after both World Wars resulted in the creation of the United Nations Charter, which remains a principal point of reference for the law on the use of force to this day. There have, however, been considerable challenges to the law on the prohibition of the use of force over the past two decades.

This Oxford Handbook is a comprehensive and authoritative study of the modern law on the use of force. Over seventy experts in the field offer a detailed analysis, and to an extent a restatement, of the law in this area. The Handbook reviews the status of the law on the use of force, and assesses what changes, if any, have occurred in consequence to recent developments. It offers cutting-edge and up-to-date scholarship on all major aspects of the prohibition of the use of force. The work is set in context by an extensive introductory section, reviewing the history of the subject, recent challenges, and addressing major conceptual approaches. Its second part addresses collective security, in particular the law and practice of the United Nations organs, and of regional organizations and arrangements. It then considers the substance of the prohibition of the use of force, and of the right to self-defense and associated doctrines. The next section is devoted to armed action undertaken on behalf of peoples and populations. This includes self-determination conflicts, resistance to armed occupation, and forcible humanitarian and pro-democratic action. The possibility of the revival of classical, expansive justifications for the use of force is then addressed. This is matched by a final section considering new security challenges and the emerging law in relation to them. Finally, the key arguments developed in the book are tied together in a substantive conclusion. The Handbook will be essential reading for scholars and students of international law and the use of force, and legal advisers to both government and NGOs.

Contributor Bio
Marc Weller is Professor of International Law and International Constitutional Studies in the University of Cambridge and the Director of the Lauterpacht Centre for International Law. He became a member of the Faculty of Law of the University of Cambridge in 1990. From 1997-2000 he was Deputy Director of the Centre of International Studies. He has been Director of Graduate Education in the Department of Politics and International Studies of the University since 2008. Professor Weller holds Masters degrees from the Fletcher School of Law and Diplomacy and the University of Cambridge, and Doctorates in Law, in Economic and Social Sciences, and in International Law from the Universities of Frankfurt, Hamburg and Cambridge respectively.

Table Of Contents
I Introduction
1. The History of the Prohibition of the Use of Force, Randall Lesaffer
2. The Debate about the Prohibition of the Use of Force and Collective Security as a
Structural Element of International Relations Discourse Through the Centuries, Daniele Archibugi, Mariano Croce, and Andrea Salvatore
3. The Limitations of Traditional Rules and Institutions Relating to the Use of Force, Michael Glennon
4. The Enduring Relevance of Traditional Rules and Institutions Relating to the Use of Force, James Crawford

An Introduction to Contemporary International Law (3rd Edition)
A Policy-Oriented Perspective
Lung-chu Chen

Key Selling Points
• Applies the New Haven School approach explaining discrete aspects of the global decision process and their effects on the content of international legal norms
• Provides an in-depth treatment of the key features of the New Haven School of international law
• References both classic historical examples and contemporary events to illustrate international legal processes and principles
• Focuses on important trends in international law, including the movement from a state-centered system to a people-centered one
• Contributes to the development of a world community of human dignity through international law

An Introduction to Contemporary International Law: A Policy-Oriented Perspective introduces the reader to all major aspects of contemporary international law.

Summary
An Introduction to Contemporary International Law: A Policy-Oriented Perspective introduces the reader to all major aspects of contemporary international law. It applies the highly acclaimed approach developed by the New Haven School of International Law, holding international law as an ongoing process of authoritative decision through which the members of the world community identify, clarify, and secure their common interests. Unlike conventional works in international law, this book is organized and structured in terms of the process of decision making in the international arena, and references both classic historical examples and contemporary events to illustrate international legal processes and principles.

Using contemporary examples, this Third Edition builds on the previous editions by contextualizing and dramatizing recent events with reference to seven features that characterize the New Haven School approach to international law: participants, perspectives, arenas of decision, bases of power, strategies, outcomes, and effects. This new edition highlights cutting-edge ideas in international law, including the right to self-determination, the evolution of Taiwan statehood, the expanding scope of international concern and the duty of states to protect human rights, the trend towards greater accountability for states and individual decision-makers under international law, and the vital role individual responsibility plays in the emerging field of international criminal law. It offers a new generation the intellectual tools needed to act as responsible citizens in a world community seeking human dignity and human security for all people.

Contributor Bio

Dr. Lung-chu Chen is an internationally recognized scholar and Professor of Law at New York Law School, specializing in international law, human rights, and the United Nations. He previously served as Research Associate, Senior Research Associate, and Senior Research Scholar at Yale Law School. He received his LL.B. with first-place honors from National Taiwan University, his LL.M. from Northwestern University, and his LL.M. and J.S.D. from Yale University. While still a junior at the National Taiwan University, he ranked first of some four thousand participants in Taiwan's national examination for judgeship and other high governmental posts—a unique distinction in Taiwan's history.

He is founder and chairman of the Taiwan New Century Foundation (a think tank), founder and president of the New Century Institute (New York), and charter president and honorary president of the Taiwan United Nations Alliance (TAIUNA). He is a board member of the Policy Sciences Center, a former president of the Taiwanese Society of International Law, and a former national policy adviser to the president of Taiwan.

Formerly he was also chairman of the section on international law of the Association of
American Law Schools, a member of the executive council of the American Society of International Law, a director of the American Society of Comparative Law, and a member of the editorial board of its journal (American Journal of Comparative Law). He was chief editor of Human Rights, published by the American Bar Association Section on Individual Rights and Responsibilities. In addition, he served as vice president and a member of the governing council of the International League for Human Rights and president of the North America Taiwanese Professors' Association. He was a principal lecturer at the International Institute of Human Rights in Strasbourg, a training center for human rights experts founded by Nobel Peace Prize winner René Cassin.

His publications include Membership for Taiwan in the United Nations: Achieving Justice and Universality (editor), An Introduction to Contemporary International Law, Human Rights and World Public Order (with Myres S. McDougal and Harold D. Lasswell), and Formosa, China, and the United Nations (with Harold D. Lasswell). In addition, he has written and edited numerous books and articles in Chinese. Currently he is general editor of a series of books relating to the U.N. system published under the auspices of the Taiwan Institute for U.N. Studies, a project of the Taiwan New Century Foundation. He is also editor in chief of New Century Think Tank Forum, a quarterly in Chinese published jointly by the Taiwan New Century Foundation and the New Century Institute.

Quotes

"In the third edition of this most welcome and important book, Professor Lung-chu Chen enhances his already well-established reputation as a scholar in both the United States and in Asia. He applies a deep understanding of the policy science approach to explain contemporary international issues and the law that addresses them. His knowledge and ideas have importance for a wide variety of audiences." -Dame Rosalyn Higgins, Former President of the International Court of Justice

"Lung-chu Chen, distinguished international legal scholar and leading exponent of the New Haven School's approach to international law, offers a policy-oriented perspective on the process of international law that is as rich in detailed review of trends as it is in their critical appraisal in terms of human dignity goals. Professor Chen's book will be an indispensable text for students and scholars and the vade mecum for practitioners and diplomats." -W. Michael Reisman, Myres S. McDougal Professor of International Law, Yale Law School

"In his third edition of An Introduction to Contemporary International Law, Professor Lung-chu Chen has again produced an illuminating account of contemporary international law from the perspective of the New Haven School. This edition is fully updated, replete with examples drawn from topical events and placed in the political and social context of globalization. Current trends on institutionalization, the role of individuals, of civil society, human security, and many others are explored with rigor and freshness. This book is a must-read for scholars and practitioners of international law and relations." -Christine Chinkin, Professor of International Law, London School of Economics and Political Science

"The third edition of An Introduction to Contemporary International Law is a remarkable rarity, a masterfully updated overview and organization of international law in terms of a Realist-type process orientation and categorizations developed by the New Haven School of International Law. This unique and acclaimed work is a necessary addition to an adequate international law collection and will continue to guide numerous students and practitioners of international law." -Jordan J. Paust, Mike & Teresa Baker Law Center Professor, University of Houston Law Center

The Thin Justice of International Law
A Moral Reckoning of the Law of Nations
Steven R. Ratner

Key Selling Points
• Provides a new interdisciplinary approach to the core question of whether international law is just, integrating insights from law, politics, and ethics
• Examines the core components of the international legal system, and the extent to which they conform to an ethical vision of justice
• Considers a diverse range of areas of international law, from human rights to trade and investment

This book asks whether the core norms of international law are just by appraising them according to a standard of global justice grounded in the advancement of peace and protection of human rights.

Summary
In a world full of armed conflict and human misery, global justice remains one of the most compelling missions of our time. Understanding the promises and limitations of global justice demands a careful appreciation of international law, the web of binding norms and institutions that help govern the behavior of states and other global actors.

This book provides a new interdisciplinary approach to global justice, one that integrates the work and insights of international law and contemporary ethics. It asks whether the core norms of international law are just, appraising them according to a standard of global justice derived from the fundamental values of peace and the protection of human rights.

Through a combination of a careful explanation of the legal norms and philosophical argument, Ratner concludes that many international law norms meet such a standard of justice, even as distinct areas of injustice remain within the law and the verdict is still out on others. Among the subjects covered in the book are the rules on the use of force, self-determination, sovereign equality, the decision making procedures of key international organizations, the territorial scope of human rights obligations (including humanitarian intervention), and key areas of international economic law.

Ultimately, the book shows how an understanding of international law's moral foundations will enrich the global justice debate, while exposing the ethical consequences of different rules.

Contributor Bio
Steven R. Ratner, Bruno Simma Collegiate Professor of Law, University of Michigan Law School

Steven Ratner is the Bruno Simma Collegiate Professor of Law at the University of Michigan Law School. His research has focused on a range of contemporary challenges facing governments and international institutions, including ethnic conflict, territorial borders, implementation of peace agreements, regulation of foreign investment and global business, the normative orders concerning armed conflict, and accountability for human rights violations. For the last ten years his research has concerned issues at the intersection of ethics and international law. Outside the academy, he was a member of the UN Secretary-General's Group of Experts on Cambodia in 1998-99 and of the UN's Panel of Experts on Accountability in Sri Lanka in 2010-11. Since 2009, he has served on the State Department's Advisory Committee on International Law.

War Reparations and the UN Compensation Commission
Designing Compensation After Conflict
Christopher S. Gibson, Trevor M. Rajah, Timothy J....

Key Selling Points
• First collective work on the United Nations Claims Commission (UNCC) claims program by experts who have contributed to the Commission’s progress
• Facilitates informed research on the UNCC and its jurisprudence
• Provides in-depth analysis of the impact of the UNCC on the development and progress of international law in the areas of state responsibility and reparations

The first collective work on the United Nations Claims Commission (UNCC) claims program by experts who have contributed to the Commission’s progress.

Summary
The United Nations Compensation Commission (UNCC) is a claims reparation program created by the United Nations Security Council in May 1991, after the UN-authorized Allied Coalition Forces’ military operations terminated the seven-month invasion and occupation of Kuwait by Iraq and liberated Kuwait. The UNCC was established with the objectives to receive and decide claims from individuals, corporations, and governments against Iraq as arising directly from Iraq’s invasion and occupation of Kuwait; and to pay compensation for such claims.

War Reparations and the UN Compensation Commission: Designing Compensation After Conflict is the first collective work on the UNCC claims program by experts who have contributed to its progress, and who have assisted in paving the way for more informed research on the Commission and its jurisprudence. Given its unprecedented, serious and sustained effort within the international community, the two-decade long operations of the UNCC deserve considerable attention and in-depth analysis especially with respect to its impact on the development and progress of international law in the areas of State responsibility and reparations.

Contributor Bio
Christopher S. Gibson is the Associate Dean and Professor of Law at Suffolk University Law School in Boston. He served as a legal advisor at the UNCC and was in charge of the Category “C” claims (claims of individuals for under US$100,000). He also served as senior legal officer at the Iran–United States Claims Tribunal in The Hague, The Netherlands. He was a legal officer at the World Intellectual Property Organization’s (“WIPO”) Arbitration and Mediation Center, and Head of WIPO’s Electronic Commerce Law Section developing dispute resolution procedures for Internet-based domain name disputes. He co-authored (with Christopher R. Drahos) The Iran-U.S. Claims Tribunal at 25: The Cases Everyone Needs to Know for Investor-State & International Arbitration (Oxford, 2007).

Trevor Michael Rajah was the Executive Head of the UNCC (2013-2014). He previously worked at the UNCC as a legal officer on the Construction and Engineering claims (1998-2002). Presently, Mr. Rajah is employed by the United Nations Office on Drugs and Crime (UNODC) in Vienna, Austria. Before joining the United Nations, Mr. Rajah worked as a divisional legal manager in the financial services industry. He also practiced law in Canada and Zimbabwe. Mr. Rajah holds a Masters in Law (LLM) from the University of London, where he was a Foreign and Commonwealth Scholar. He is admitted as a solicitor in England and Wales; as a barrister and solicitor in Ontario, Canada; and as an attorney in Zimbabwe. He is also a Member of the Chartered Institute of Arbitrators, UK.

Timothy J. Feighery is a partner in the law firm of Arent Fox LLP in Washington, DC. He was previously a Chief of Section of the UNCC Legal Services Branch, responsible for non-Kuwaiti corporate claims and construction/engineering claims. He also served as Chairman of the US Foreign Claims Settlement Commission from 2011-2013, and as a Deputy Special Master of the September 11 Victims Compensation Fund.

Formalizing Displacement
International Law and Population Transfers
Umut Ozu

Key Selling Points
- Provides a detailed study into the 1922-34 exchange of minorities between Greece and Turkey, in which nearly two million people were forcibly relocated
- Examines how the enforced mass movement of people was formalized through international law
- Analyzes the role of the League of Nations and the Permanent Court of International Justice in the legitimation of population transfer
- Investigates the Ottoman Empire's significance for the development of minority protection, population transfer, and humanitarian intervention

In this book, Umut Ozu situates population transfer within the broader history of international law by examining its emergence as a legally formalized mechanism of nation-building in the early twentieth century.

Summary
Large-scale population transfers are immensely disruptive. Interestingly, though, their legal status has shifted considerably over time. In this book, Umut Ozu situates population transfer within the broader history of international law by examining its emergence as a legally formalized mechanism of nation-building in the early twentieth century. The book's principal focus is the 1922-34 compulsory exchange of minorities between Greece and Turkey, a crucially important endeavor whose legal dimensions remain under-scrutinized. Drawing upon historical sociology and economic history in addition to positive international law, the book interrogates received assumptions about international law's history by exploring the 'semi-peripheral' context within which legally formalized population transfers came to arise.

Supported by the League of Nations, the 1922-34 population exchange reconfigured the demographic composition of Greece and Turkey with the aim of stabilizing a region that was regarded neither as European nor as non-European. The scope and ambition of the undertaking was staggering: over one million were expelled from Turkey, and over a quarter of a million were expelled from Greece. The book begins by assessing minority protection's development into an instrument of intra-European governance during the course of the nineteenth and early twentieth centuries. It then shows how population transfer emerged in the 1910s and 1920s as a radical alternative to minority protection in Anatolia and the Balkans, focusing in particular on the 1922-3 Conference of Lausanne, at which a peace settlement formalizing the compulsory Greek-Turkish exchange was concluded. Finally, it analyses the Permanent Court of International Justice's 1925 advisory opinion in Exchange of Greek and Turkish Populations, contextualizing it in the wide-ranging debates concerning humanitarianism and internationalism that pervaded much of the exchange process.

Private International Law and Global Governance
Horatia Muir Watt, Diego P. Fernandez Arroyo

Key Selling Points
- Provides a critical approach to private international law in the context of global governance
- Explores the potential of private international law to reassert a significant governance function in respect of new forms of authority beyond the state
- Contributes to ongoing debates about the changing nature of law in a global era

Taking a critical approach to private international law, this volume examines its function and role in an era of global governance.

Summary
Contemporary debates about the changing nature of law engage theories of legal pluralism, political economy, social systems, international relations (or regime theory), global constitutionalism, and public international law. Such debates reveal a variety of emerging responses to distributional issues which arise beyond the Western welfare state and new conceptions of private transnational authority. However, private international law tends to stand aloof, claiming process-based neutrality or the apolitical nature of private law technique and refusing to recognize frontiers beyond than those of the nation-state. As a result, the discipline is paradoxically ill-equipped to deal with the most significant cross-border legal difficulties - from immigration to private financial regulation - which might have been expected to fall within its remit. Contributing little to the governance of transnational non-state power, it is largely complicit in its unhampered expansion. This is all the more a paradox given that the new thinking from other fields which seek to fill the void - theories of legal pluralism, peer networks, transnational substantive rules, privatized dispute resolution, and regime collision - have long been part of the daily fare of the conflict of laws. The crucial issue now is whether private international law can, or indeed should, survive as a discipline.

This volume lays the foundations for a critical approach to private international law in the global era. While the governance of global issues such as health, climate, and finance clearly implicates the law, and particularly international law, its private law dimension is generally invisible. This book develops the idea that the liberal divide between public and private international law has enabled the unregulated expansion of transnational private power in these various fields. It explores the potential of private international law to reassert a significant governance function in respect of new forms of authority beyond the state. To do so, it must shed a number of assumptions entrenched in the culture of the nation-state, but this will permit the discipline to expand its potential to confront major issues in global governance.

The Constitutional Foundations of European Contract Law
A Comparative Analysis
Kathleen Gutman

Key Selling Points
- The first monograph to provide a constitutional assessment of the EU's competence in European contract law
- Provides readers with a clear context for the debate about European contract law and its chronological development at the European level
- Covers significant developments, including the relevant changes brought by the Lisbon Treaty and initiatives contemplated at the European level, such as the Common Frame of Reference (CFR), the proposed Directive on consumer rights and an optional contract law instrument
- Comparisons drawn with contract law structure of the US offer the first extended comparative study of these federal contract law systems

Provides a thorough assessment of the extent of the European Union's competence to regulate contracts and offers a comprehensive comparative study of the contract law framework in the United States.

Summary
Situated within the context of the ongoing debate about European contract law, this book provides a detailed examination of the European Union's competence in the field of contract law.

It analyses the limits of Union competence in relation to several relevant Treaty provisions which potentially confer competence on the Union to adopt a comprehensive contract law instrument and the exercise of Union competence in connection with the operation of the principles of subsidiarity, proportionality and sincere cooperation. It also explores the viability of several alternative and complementary routes to the adoption of such an instrument, such as enhanced cooperation, an intergovernmental treaty and certain so-called "softer" models which include the American techniques of Restatements, uniform and model laws and the Uniform Commercial Code.

Setting forth a detailed account of the context for this debate and its chronological development at the European level, the book charts the discussions that have occurred within and outside the EU relating to the transnational competence to regulate contract law. Situating European constitutional law within the continued debate about European contract law, it also reflects upon the contract law structure of the United States and examines the viability of alternative and complementary routes to the adoption of a comprehensive instrument of substantive contract law.

EU Procedural Law
Koen Lenaerts, Ignace Maselis, Kathleen Gutman, Ja...

Key Selling Points
• A thorough overhaul of the work previously published as Procedural Law of the European Union, the leading authority on judicial protection in the EU
• A well-established text that is the first port of call for any lawyer litigating in the European courts, and academics studying the EU judicial system
• Covers significant institutional developments including the relevant changes brought by the entry into force of the Lisbon Treaty, and the ECJ’s new rules of procedure

The book provides a rigorously structured analysis of the EU system of judicial protection and procedure before the Union courts.

Summary
The European Union is unique amongst international organizations in that it has a highly developed and coherent system of judicial protection. The rights derived from Union law can be enforced in court, as opposed to other international organizations whereby enforceability is often far less certain. At the heart of the system of judicial protection in the European Union is the core principle of upholding the rule of law. As such, the stakes are high in the sense that the system of judicial protection in the European Union must live up to its promise in which individuals, Member States and Union institutions are all guaranteed a route by which to enforce Union law rights.

This book provides a rigorously structured analysis of the EU system of judicial protection and procedure before the Union courts. It examines the role and the competences of the Union courts and the types of actions that may be brought before them, such as the actions for infringement, annulment, and failure to act, as well as special forms of procedure, for example interim relief, appeals, and staff cases. In doing so, special attention is given to the fields of EU competition law and State aid. In addition it evaluates the relationship between the Court of Justice and the national courts through the preliminary ruling procedure and the interplay between EU law and the national procedural frameworks generally. Throughout, it takes account of significant institutional developments, including the relevant changes brought by the entry into force of the Lisbon Treaty and the amendments to the Statute of the Court of Justice of the European Union and the Rules of Procedure of the Court of Justice and the General Court.

Koen Lenaerts, Vice President of the Court of Justice and Professor of European Law, European Union and University of Leuven, Ignace Maselis, Legal Secretary, Court of Justice of the European Union, Court of Justice of the European Union, Kathleen Gutman, Affiliated Senior Researcher, Institute for European Law and University of Leuven, Institute for European Law and University of Leuven

Koen Lenaerts is a Judge of the Court of Justice of the European Union since 2003 and Vice President of the Court since 2012. He was a Judge of the Court of First Instance of the European Communities. He is also a Professor of EU Law at the University of Leuven. Among his extensive scientific activities, he is a member of the boards of several internationally recognized legal journals, the Board of Trustees of the Academy of European Law, Trier, and the Advisory Council of the British Institute of International and Comparative Law.

Ignace Maselis has been working as a referendaire since 1993 first at the Court of First Instance of the European Communities (now the General Court of the European Union) and presently at the Court of Justice of the European Union. He practiced EU law at the Brussels bar between 1987 and 1993. He holds a Lic. Jur. from the University of Leuven and an LL.M. from the University of Chicago.

Dr. Kathleen Gutman is an American-trained lawyer specialising in EU and International
Law and the comparative study of EU-US law. She has been awarded several advanced legal degrees from American and European institutions, including a J.D./LL.M. in International, Foreign, and Comparative Law from Duke University School of Law, as well as a M.A. in European Studies and a Ph.D. in Law from the Katholieke Universiteit Leuven. She has also worked as a summer associate in the Brussels office of Van Bael & Bellis and as a litigation associate in the New York office of Jones Day.

Janek Tomasz Nowak is a doctoral candidate in Law at the University of Leuven. He also teaches EU Law at the MCI Management Center Innsbruck, Austria. His main research interests include EU Procedural, Constitutional, and Administrative Law. He holds a Lic. Jur. and Cand. Jur. from the University of Antwerp, and an LL.M. from King's College London. He previously worked as a trainee at the Court of Justice of the European Union.

Table Of Contents

1. General Introduction
2. The European Courts
3. Cooperation Between National Courts and the Court of Justice: The Reference for a Preliminary Ruling

PART II: ENFORCEMENT OF UNION LAW
5. The Action for Infringement of Union Law by a Member State
6. Preliminary Rulings on the Interpretation of Union Law

PART III: PROTECTION AGAINST ACTS OF THE INSTITUTIONS
7. The Action for Annulment
8. The Action for Failure to Act
9. The Objection of Illegality
10. Preliminary Rulings on the Validity of Union Law
11. The Action for Damages
12. Application for an Opinion on the Compatibility with the Treaties of an International Agreement to be Concluded by the Union

PART IV: SPECIAL FORMS OF PROCEDURE
13. Proceedings for Interim Measures Before the Union Courts
14. Proceedings for Authorization to Serve a Garnishee Order on the Union
15. Unlimited Jurisdiction of the Union Courts in Respect of Actions Relating to Sanctions
16. Appeals
17. The Review Procedure
18. Proceedings Brought by Officials and Other Servants of the Union (Staff Cases)
19. Jurisdiction of the Union Courts to Give Judgment Pursuant to an Arbitration Clause or Special Agreement
20. Jurisdiction of the Union Courts over Disputes Relating to Intellectual Property Rights
21. Jurisdiction of the Court of Justice under Conventions Concluded by the Member States
22. Jurisdiction of the Court of Justice of the European Union with Regard to the Area of Freedom, Security, and Justice

PART V: PROCEDURE BEFORE THE UNION COURTS
23. Common Procedural Rules Applicable to Cases Before the Union Courts
24. Procedure in the Case of References for a Preliminary Ruling
25. Procedure in the Case of Direct Actions
26. Procedure in the Case of Appeals Against Decisions of the General Court

Key Selling Points
- Each Q&A is written by experts in the field, who are able to draw upon years of examination experience to point out common pitfalls and provide examples of ideal answers
- Every question is followed by a clear commentary indicating exactly what examiners are looking for, and how best to achieve it
- Bullet point answer plans and diagram answer plans clearly outline the best approach to take, and provide a strong foundation for constructing a good answer
- ‘Examiner's tip' boxes throughout the text offer bite-size advice to steer you away from common mistakes, or guidance on how to make your answer really stand out from the crowd
- The accessible and user-friendly structure of the book ensures chapters are easy to navigate and key information can be readily broken down and retained
- Further reading suggestions at the end of every chapter direct you to additional resources, to help develop and consolidate your existing knowledge

Q&A EU Law provides clear guidance from experienced examiners on how best to tackle exam questions, and gives students the opportunity to practice their exam technique and assess their progress.

Summary
If you're feeling overwhelmed by a sea of revision, let OUP's Questions and Answers series keep you afloat! Written by experienced examiners, the Q&As offer expert advice on what to expect from your exam, how best to prepare, and guidance on what examiners are really looking for. Revision isn't always plain sailing, but the Q&As will allow you to approach your exams with confidence.

Q&As will help you succeed by:
- identifying typical law exam questions
- giving you model answers for up to 50 essay and problem-based questions
- demonstrating how to structure a good answer
- helping you to avoid common mistakes
- advising you on how to make your answer stand out from the crowd
- teaching you how to use your existing knowledge to convey exactly what the examiner is looking for
- directing you to related further reading

When Humans Become Migrants
Study of the European Court of Human Rights with an Inter-American Counterpoint
Marie-Benedicte Dembour

Key Selling Points
- Examines the way in which two of the world's foremost human rights courts, the European Court of Human Rights and Inter-American Court of Human Rights, engage with claims lodged by migrants
- Assesses whether the two courts remain true to their purpose of upholding human rights in migrant cases, and shows the differences in their approaches
- Combines both a close analysis of the relevant case law with sociological insight and historical awareness
- Shows how the different social, moral, and political conceptions prevalent in Europe and Latin America can explain their different reasoning and contrasting outcomes

This book contrasts the European and Inter-American Courts of Human Rights, showing how their rulings differ on this issue. It argues that the Inter-American Court's approach is more sympathetic to the individuals involved.

Summary
The treatment of migrants is one of the most challenging issues that human rights, as a political philosophy, faces today. It has increasingly become a contentious issue for many governments and international organizations around the world. The controversies surrounding immigration can lead to practices at odds with the ethical message embodied in the concept of human rights, and the notion of 'migrants' as a group which should be treated in a distinct manner. This book examines the way in which two institutions tasked with ensuring the protection of human rights, the European Court of Human Rights and Inter-American Court of Human Rights, treat claims lodged by migrants. It combines legal, sociological, and historical analysis to show that the two courts were the product of different backgrounds, which led to differing attitudes towards migrants in their founding texts, and that these differences were reinforced in their developing case law.

The book assesses the case law of both courts in detail to argue that they approach migrant cases from fundamentally different perspectives. It asserts that the European Court of Human Rights treats migrants first as aliens, and then, but only as a second step in its reasoning, as human beings. By contrast, the Inter-American Court of Human Rights approaches migrants first as human beings, and secondly as foreigners (if they are). Dembour argues therefore that the Inter-American Court of Human Rights takes a fundamentally more human rights-driven approach to this issue. The book shows how these trends formed at the courts, and assesses whether their approaches have changed over time. It also assesses in detail the issue of the detention of irregular migrants. Ultimately it analyses whether the divergence in the case law of the two courts is likely to continue, or whether they could potentially adopt a more unified practice.

Private Law and the Rule of Law
Lisa M Austin, Dennis Klimchuk

Key Selling Points
- Addresses challenging new questions about the relationship between public and private law
- Provides new insights into the nature of law and the rule of law from leading academics in the field
- Brings together private law theorists and public law theorists on the general topic of private law and the rule of law

This book explores the idea that the rule of law instead concerns the conditions under which any relationship - that among citizens as well as that between citizens and the state - becomes subject to law.

Summary
The rule of law is widely perceived to be a public law doctrine, concerned with the way in which governmental authority conforms to the dictates of law. The goal of this book is to challenge this presumption. The chapters in this volume all consider the idea that the rule of law concerns the nature of law generally and the conditions under which any relationship - that among citizens as well as that between citizens and the state - becomes subject to law. Addressing two major questions, they ask if our understanding of the rule of law is enriched by considering how and to what degree it is expressed or realized in private law, and whether our understanding of the private law is enriched by adding the principles of the rule of law to the traditional list of core private law concepts. Bringing together leading philosophers of private and public law, this volume examines key questions in a little-explored field, and will be essential reading for all those interested in the rule of law and in private law theory.

EU Anti-Discrimination Law (2nd Edition)
Evelyn Ellis, Philippa Watson

Key Selling Points
• Provides comprehensive coverage of the now extensive body of law relating to anti-discrimination
• Aids understanding of the shortcomings of the law and suggests areas for further development
• Synthesizes the disparate areas of legislation and case law that impact on anti-discrimination law, including analysis of the changes wrought by the Lisbon Treaty and recent case law

EU Anti-Discrimination Law provides a detailed and critical analysis of the corpus of European Union law prohibiting discrimination on the grounds of sex, racial or ethnic origin, religion or belief, disability, age, and sexual orientation.

Summary
EU Anti-Discrimination Law provides a detailed and critical analysis of the corpus of European Union law prohibiting discrimination on the grounds of sex, racial or ethnic origin, religion or belief, disability, age, and sexual orientation. It takes into account the changes brought about by the Treaty of Lisbon and contains a thorough examination of the relevant case law of the Court of Justice of the EU. The book examines the background to the legislation and explains the essential characteristics and doctrines of EU law and their relevancy to the topic of anti-discrimination. It also analyses the increasingly significant general principles of EU law, the Charter of Fundamental Rights, and the relevant law flowing from the European Convention on Human Rights. The key concepts contained in anti-discrimination law are subjected to close scrutiny. The substantive provisions of the law on equal pay and the workplace and non-workplace provisions of the governing Directives are similarly examined, as are the numerous exceptions permitted to them. The complex rules governing the rights of pregnant women and those who have recently given birth are dealt with comprehensively and in a separate chapter. Equality in social security schemes is also discussed. The book concludes with an assessment of the practical utility of the existing law and the current proposals for its reform.

Making Money
Coin, Currency, and the Coming of Capitalism
Christine Desan

Key Selling Points
• An exciting new theory of the history of the modern monetary system, describing its origins and the eventual development of capitalism
• Examines the constitutional influences of currency and the impact of government on money throughout history
• Focuses on the added value of money as more than a simple commodity
An exciting new theory of the history of the modern monetary system

Summary
Money travels the modern world in disguise. It looks like a convention of human exchange - a commodity like gold or a medium like language. But its history reveals that money is a very different matter. It is an institution engineered by political communities to mark and mobilize resources. As societies change the way they create money, they change the market itself - along with the rules that structure it, the politics and ideas that shape it, and the benefits that flow from it.

One particularly dramatic transformation in money's design brought capitalism to England. For centuries, the English government monopolized money's creation. The Crown sold people coin for a fee in exchange for silver and gold. 'Commodity money' was a fragile and difficult medium; the first half of the book considers the kinds of exchange and credit it invited, as well as the politics it engendered. Capitalism arrived when the English reinvented money at the end of the 17th century. When it established the Bank of England, the government shared its monopoly over money creation for the first time with private investors, institutionalizing their self-interest as the pump that would produce the money supply. The second half of the book considers the monetary revolution that brought unprecedented possibilities and problems. The invention of circulating public debt, the breakdown of commodity money, the rise of commercial bank currency, and the coalescence of ideological commitments that came to be identified with the Gold Standard - all contributed to the abundant and unstable medium that is modern money. All flowed as well from a collision between the individual incentives and public claims at the heart of the system. The drama had constitutional dimension: money, as its history reveals, is a mode of governance in a material world. That character undermines claims in economics about money's neutrality. The monetary design innovated in England would later spread, producing the global architecture of modern money.

Contributor Bio
Christine Desan, Leo Gottlieb Professor of Law, Harvard Law School

Christine A. Desan is the Leo Gottlieb Professor of Law at Harvard Law School. She teaches about the international monetary system, the constitutional law of money, constitutional history, political economy, and legal theory. She is the co-founder of Harvard’s Program on the Study of Capitalism; with its co-director, Professor Sven Beckert (History), she has taught the Program's anchoring research seminar, the Workshop on the Political Economy of Modern Capitalism, since 2005. Desan's research explores money as a legal and political project, one that configures the market it sets out to measure.

Imprisoned by the Past
Warren McCleskey and the American Death Penalty
Jeffrey L. Kirchmeier

Key Selling Points
• Examines the long history of the American death penalty and its connection to the case of Warren McCleskey, one of the most important Supreme Court cases in history.
• Provides one of the most thorough examinations of the history of the American death penalty.
• Gives readers an understanding of the historical forces behind abolition and adoption of death penalty.
• Provides a unique understanding of the death penalty in the context of a compelling human story.

Summary
In 1987, the United States Supreme Court decided a case that could have ended the death penalty in the United States. *Imprisoned by the Past: Warren McCleskey and the American Death Penalty* examines the long history of the American death penalty and its connection to the case of Warren McCleskey, revealing how that case marked a turning point for the history of the death penalty. In this book, Jeffrey L. Kirchmeier explores one of the most important Supreme Court cases in history, a case that raised important questions about race and punishment, and ultimately changed the way we understand the death penalty today.

McCleskey's case resulted in one of the most important Supreme Court decisions in U.S. history, where the Court confronted evidence of racial discrimination in the administration of capital punishment. The case currently marks the last time that the Supreme Court had a realistic chance of completely striking down capital punishment. As such, the case also marked a turning point in the death penalty debate in the country.

Going back nearly four centuries, this book connects McCleskey's life and crime to the issues that have haunted the American death penalty debate since the first executions by early settlers through the modern twenty-first century death penalty. *Imprisoned by the Past* ties together three unique American stories. First, the book considers the changing American death penalty across centuries where drastic changes have occurred in the last fifty years. Second, the book discusses the role that race played in that history. And third, the book tells the story of Warren McCleskey and how his life and legal case brought together the other two narratives.

Contributor Bio
Jeffrey L. Kirchmeier is a Professor of Law at City University of New York School of Law. He received his B.A. and J.D. degrees from Case Western Reserve University. Before joining the CUNY Law faculty, he was an Associate at Arnold & Porter in Washington, D.C., and he taught at Tulane School of Law and Arizona State University College of Law. For several years, he was a staff attorney at the Arizona Capital Representation Project.

Professor Kirchmeier is a member and former Chair of the Capital Punishment Committee of the New York City Bar Association, and has appeared before a New York Assembly joint committee regarding the reinstatement of the New York death penalty. He is the author of numerous law review articles on the subject of criminal procedure, constitutional law, and the death penalty.

Quotes
"In *McCleskey v. Kemp*, the Supreme Court egregiously blinked-finding that patterns of life-or-death decisions in Georgia cases could be explained on no basis other than race, yet approving Georgia’s use of the death penalty nonetheless. *Imprisoned by the Past*
for the first time exposes the complex and disturbing reasons why the Supreme Court stumbled so badly in McCleskey and how the nation has been struggling ever since to extricate itself from a flawed and historically tainted punishment." -James S. Liebman, author of The Wrong Carlos: Anatomy of a Wrongful Execution

"Imprisoned by the Past is an important and compelling history of the United States death penalty. By placing that history next to the story of Warren McCleskey and the role of race, Jeff Kirchmeier provides new insight into the legacy of capital punishment and the status of the death penalty today. Anyone interested in understanding the sweeping scope of death penalty history and its human story will want to read this book." -Sister Helen Prejean, author of Dead Man Walking and The Death of Innocents

"The Definitive examination of a case that might have revolutionized criminal Justice in the United States." - Evan J. Mandery, author of A Wild Justice: The Death and Resurrection of Capital Punishment in America

"This is an incredible book and indeed one of the most important death penalty books that has appeared on American bookshelves in recent decades. It is bound to be adopted in courses in Criminal Law and Criminology, and, in addition, will be widely read by practitioners and the wider public who are looking for a first-rate introduction to the way the death penalty works, and does not work, in modern American society." -Michael L. Radelet, co-author of In Spite of Innocence: Erroneous Convictions in Capital Cases

Table Of Contents

Preface
Introduction
Part A - Prologue
Prologue: America's Marietta

Part B - A Killing in Georgia
Chapter 1: A Death in Dixie

An Independent, Colonial Judiciary: A History of the Bombay High Court during the British Raj, 1862-1947
Abhinav Chandrachud

Key Selling Points
- There is no book of this kind.
- The book unravels the history of one of the most important courts in the country, exploring the court's colonial past.
- The book examines the backgrounds and lives of the 83 judges-Britons and Indians-who served on the Bombay High Court during the colonial era.
- The book attempts to unravel complex changes which took place in Indian society, the legal profession, the law and legal culture during the colonial era.

This book attempts to understand why British colonial institutions like the Bombay High Court flourished even after India became independent.

Summary
In 2012, the Bombay High Court celebrated the 150th year of its existence. As one of three high courts first set up in colonial India in 1862, it functioned as a court of original and appellate jurisdiction during the British Raj for over 80 years, occupying the topmost rung of the judicial hierarchy in the all-important Bombay Presidency. Yet, remarkably little is known of how the court functioned during the colonial era. The historiography of the court is quite literally anecdotal. The most well known books written on the history of the court focus on humorous (at times, possibly apocryphal) stories about 'eminent' judges and 'great' lawyers, bordering on hagiography. Examining the backgrounds and lives of the 83 judges-Britons and Indians-who served on the Bombay High Court during the colonial era, and by exploring the court's colonial past, this book attempts to understand why British colonial institutions like the Bombay High Court flourished even after India became independent. In the process, this book will attempt to unravel complex changes which took place in Indian society, the legal profession, the law, and the legal culture during the colonial era.

Margaret Wilkie, Peter Luxton, Rosalind Malcolm

Key Selling Points
- Each Q&A is written by experts in the field, who are able to draw upon years of examination experience to point out common pitfalls and provide examples of ideal answers
- Every question is followed by a clear commentary indicating exactly what examiners are looking for, and how best to achieve it
- Bullet point answer plans and diagram answer plans clearly outline the best approach to take, and provide a strong foundation for constructing a good answer
- 'Examiner's tip' boxes throughout the text offer bite-size advice to steer you away from common mistakes, or guidance on how to make your answer really stand out from the crowd
- The accessible and user-friendly structure of the book ensures chapters are easy to navigate and key information can be readily broken down and retained
- Further reading suggestions at the end of every chapter direct you to additional resources, to help develop and consolidate your existing knowledge

Q&A Land Law provides clear guidance from experienced examiners on how best to tackle exam questions, and gives students the opportunity to practice their exam technique and assess their progress.

Summary
If you're feeling overwhelmed by a sea of revision, let OUP's Questions and Answers series keep you afloat! Written by experienced examiners, the Q&As offer expert advice on what to expect from your exam, how best to prepare, and guidance on what examiners are really looking for. Revision isn't always plain sailing, but the Q&As will allow you to approach your exams with confidence.

Q&As will help you succeed by:
- identifying typical law exam questions
- giving you model answers for up to 50 essay and problem-based questions
- demonstrating how to structure a good answer
- helping you to avoid common mistakes
- advising you on how to make your answer stand out from the crowd
- teaching you how to use your existing knowledge to convey exactly what the examiner is looking for
- directing you to related further reading

The New Law of Torts (3rd Edition)
Danuta Mendelson

Key Selling Points
• Clear navigation with case summaries clearly differentiated in the text
• Up-dated with the latest legislative and judicial development as well as the recent major cases, reflecting the changing nature of tort law
• The book 'tells the story' of torts with case summaries and historical underpinnings, and strong binding author commentary and analysis
• Case examples are well explained and there is an excellent range of cases in both the text and accompanying case book

The New Law of Torts Third Edition continues to question whether foundational principles and policies of torts law, reflect the social and moral values of modern Australian society.

Summary

The New Law of Torts Third Edition continues to question whether foundational principles and policies of torts law, reflect the social and moral values of modern Australian society. Living up to its name as The New Law of Torts, this book has been up-dated with the latest legislative and judicial development as well as the recent major cases, reflecting the changing nature of tort law.

This is an essential and accessible text as it provides a clear and succinct discussion of the interface between the statutory regime in each jurisdiction and the common law. It comprehensively covers the law as it is applicable to the whole of Australia. The book has clearly delineated parts, sections and topics for each genus of torts (trespass, action on the case, statutory wrongs, etc.), and each species (battery, assault, negligence, nuisance). Headings and sub-headings provide useful breaks in the text, and selected cases are used not only as authorities, but also as illustrations of principle and judicial reasoning.

Introducing Anaesthesia
Paul Greig, Nicholas Crabtree

Key Selling Points
• Logically structured to take trainees from the basics of equipment, devices, monitoring and pharmacology to the planning and conducting of anaesthesia to dealing with common emergencies
• Content is mapped to the Royal College of Anaesthetists’ Initial Assessment of Competency which trainees must undertake after the first three to six months of training
• Includes videos of anaesthetics issues such as machine checks, emergency drills and advanced life support
• Each chapter finishes with self-assessment questions to review learning
• Highly illustrated with excellent reader-friendly learning features

Explains the scientific principles and clinical practice of general anaesthesia for those starting out in the specialty.

Summary
Introducing Anaesthesia is a must-have guide for new trainees beginning their specialty training in anaesthesia. It clearly explains the basics of anaesthesiology including scientific principles, pharmacology and clinical practice as well as how to deal with common emergencies. The content addresses what a trainee needs to learn in the first three to six months of specialty training and maps to the Royal College of Anaesthetists’ Initial Assessment of Competency.

Designed to provide structured support and learning, Introducing Anaesthesia builds confidence via the inclusion of diagrams and videos which demonstrate techniques and competencies. Clearly written and focused on the initial hurdles which all newcomers to anaesthesia need to overcome, this is an indispensable guide to the the principles and techniques required for trainees to anaesthetize patients on their own and to pass work-based assessments.

This book is ideal for new anaesthetic trainees and for those responsible for their training, mentoring and assessment. Trainees in acute medicine and emergency medicine who need to gain experience in anaesthesiology as well as nurses and operating department practitioners will find this text very useful.

Contributor Bio
Paul Greig, Specialist Registrar in Anaesthesia, Nuffield Division of Anaesthetics, John Radcliffe Hospital, Oxford University Hospitals NHS Trust, UK, Nicholas Crabtree, Consultant Anaesthetist, Honorary Senior Clinical Lecturer, Nuffield Division of Anaesthetics, John Radcliffe Hospital, Oxford University Hospitals NHS Trust, UK

Paul Greig Consultant Anaesthetist/Clinical Research Fellow, University of Oxford, MBChB BSc FRCA
Paul completed his anaesthetics training in 2012 after which he was appointed as a Clinical Research Fellow with the University of Oxford where he now combines clinical work with academic research and teaching. Paul is based in the Oxford Simulation, Teaching and Research Centre, and has taught on a wide variety of courses provided by the centre. His particular interests are in the areas of human factors and non-technical skills, resuscitation, and airway management. He teaches candidates from a wide variety of backgrounds in medicine and the allied professions, and is involved both with the design and delivery of courses. He is currently working in the Nuffield Department of Clinical Neurosciences and the Department of Experimental Psychology.

Dr. Nick Crabtree Consultant Anaesthetist, honorary senior clinical lecturer, Lead for the Simulation Research Programme, Oxford, MBChB FRCA PGCertMedEd
Nick was appointed a consultant in anaesthesia in 2009 and enjoys the clinical challenges of colorectal, emergency and trauma anaesthesia. He completed a fellowship in simulation and medical education at St. Michaels’ Hospital, University of Toronto, Canada. Nick set up and runs an advanced training module in simulation and medical
education for senior anaesthetic trainees wishing to develop an interest in this area. He is course director for Anaesthetic Crisis Resource Management, Train the Trainer and Anaesthetic Assistants.

Atrial Fibrillation (OxCard Library)
Mohammad Shenasa, A. John Camm

Key Selling Points
• Written by leading authorities in the field with vast experience in practical medicine
• Concise and practical pocket guide for those who care for patients afflicted by Atrial Fibrillation
• Comprehensively covers all aspects in the management of Atrial Fibrillation, from the history of the condition to preventive procedures
• A must have resource for cardiologists, trainees and related healthcare professionals

From history of the condition and subsets of patients, to therapeutic and preventive procedures, this title comprehensively covers all aspects in managing this increasingly prevalent disorder.

Summary
Atrial Fibrillation is becoming a twenty-first century epidemic. It remains the most common form of sustained arrhythmia with significant mortality, morbidity and cost to the health care system. It is the most common cause of hospital admissions among all arrhythmias. Its prevalence increases with the aging population and is often associated with many other cardiac and noncardiac conditions, most notably congestive heart failure, hypertension, diabetes, and coronary artery disease. Although significant progress in understanding the epidemiology, natural history and mechanism has been made, the antiarrhythmic therapy in patients with Atrial Fibrillation is less satisfactory.

Management of Atrial Fibrillation: A Practical Approach is the perfect pocket guide for those who care for patients afflicted by Atrial Fibrillation. From the history of the condition and the subsets of patients, to therapeutic and preventive procedures, Management of Atrial Fibrillation comprehensively covers all aspects in managing this increasingly prevalent disorder. Written by leading authorities in the field with vast experience in practical medicine, the book creates a clinically orientated, evidence based “fast fact” type resource for cardiologists, trainees and related healthcare professionals.

Contributor Bio
Mohammad Shenasa, Attending Physician, Department of Cardiovascular Services, O'Connor Hospital, Heart & Rhythm Medical Group, San Jose, California, USA, A. John Camm, Professor of Clinical Cardiology, Department of Clinical Sciences, St. George's and University of London, London, UK

Professor John Camm qualified in 1971. He worked at Guy's Hospital before working at St. Bartholomew's Hospital, London. In 1986 he moved to St. George's Hospital Medical School in London as Professor of Clinical Cardiology (British Heart Foundation). Professor Camm was elected the Chairman of Medicine in October 1990, a post rotated from in 1995. He is now the Chairman of the Division of Cardiac and Vascular Sciences at St. George's University of London. His major speciality is cardiac arrhythmias but he is also much involved in clinical cardiac electrophysiology, cardiac pacemakers, risk stratification in post myocardial infarction, heart failure and cardiomyopathy patients. He has a major interest in cardiovascular safety of cardiac and non-cardiac drugs. John has given over 1500 lectures to national and international audiences, written more than 1000 peer review papers and over 250 detailed reviews. He has authored and edited numerous books.

Table Of Contents
1. The Epidemiology of Atrial Fibrillation, Christopher McLeod & Bernard J. Gersh
2. What should be done when Atrial Fibrillation first presents, James A. Reiffel
3. Workup of Patients with Atrial Fibrillation, Bart A. Mulder & Isabelle C. Van Gelder
4. Atrial Fibrillation in Different Clinical Subsets, Mohammad Shenasa & Shahrzad Rouhani
5. Management of Atrial Fibrillation, Antiarrhythmic Selection, Etiology Based, Irina
6. Anticoagulation Selection and Stroke Prevention, Christos Dresios & Gregory Y.H. Lip
7. When to Refer Patients for Non Pharmacological Therapies (AF ablation, Atrioventricular nodal ablation, Pacer/ICD and Left Atrial Appendage closure), L. Brent Mitchell
8. Summary Guidelines for Management of Atrial Fibrillation, Cevher Ozcan & Anne Curtis

Caring for the Heart
Mayo Clinic and the Rise of Specialization
W Bruce Fye

Key Selling Points

- April 12, 2015 will be the 70th anniversary of President Franklin Roosevelt's death from a cerebral hemorrhage (stroke). Chapter 7 will generate a lot of interest because I argue that it is likely that Roosevelt would have lost the 1944 election to Thomas Dewey if the public had become aware of the president's hypertensive heart disease. The White House physician lied repeatedly to the press, and the FBI came to Rochester to intimidate individuals at the Mayo Clinic who were talking privately about rumors that the president had "serious heart disease."
- Discusses the Mayo Clinic as the world's oldest and largest multispecialty group practice, and why this institution has been a national leader in health care since the early twentieth century.
- Each chapter is designed to be read separately, as a self-contained study of a specific theme, technology, or cluster of related techniques.

This groundbreaking book describes developments in the diagnosis and treatment of heart disease, explains how the Mayo Clinic became a world-famous medical center, and reveals how new technologies and procedures promoted medical specialization.

Summary

This groundbreaking book weaves together three important themes. It describes major developments in the diagnosis and treatment of heart disease in the twentieth century, explains how the Mayo Clinic evolved from a family practice in Minnesota into one of the world's leading medical centers, and reveals how the invention of new technologies and procedures promoted specialization among physicians and surgeons. 

Caring for the Heart is written for general readers as well as health care professionals, historians, and policy analysts. Unlike traditional institutional or disease-focused histories, this book places individuals and events in national and international contexts that emphasize the interplay of medical, scientific, technological, social, political, and economic forces that have resulted in contemporary heart care. Patient stories and media perspectives are included throughout to help general readers understand the medical and technological developments that are described.

The book is a synthetic study, but it is written so that readers may pick and choose the chapters of most interest to them. Another feature of the book is that readers may follow the stories without looking at the notes. Those who are interested in delving deeper into the main topics will find a wealth of carefully chosen references that offer greater detail and additional perspectives. The descriptions and interpretations that fill the book benefit from the fact that the author has been a practicing cardiologist and medical historian for almost four decades.

This is mainly a twentieth-century story, but it begins earlier--before there were physicians who were identified as cardiologists and at a time when medical specialization was just emerging in America. The final chapter, which addresses present-day concerns about health care costs, counterbalances earlier ones that might be read as celebrations of new technologies.

Contributor Bio

W. Bruce Fye, M.D. retired recently as a consultant in the Division of Cardiovascular Diseases at Mayo Clinic. Born and raised in Pennsylvania, he received his undergraduate and medical degrees from Johns Hopkins, where he was elected to Phi Beta Kappa and Alpha Omega Alpha. He completed a medical residency at New York Hospital-Cornell Medical Center in Manhattan before returning to Johns Hopkins for his cardiology fellowship. Selected as a Robert Wood Johnson Clinical Scholar, he also received a master's degree from the Institute of the History of Medicine at Hopkins.

In 1978, Dr. Fye joined the Marshfield Clinic in Wisconsin, where he established the echocardiography laboratory. He was chair of the Cardiology Department from 1981 to 1999 and was vice-chief of staff of St. Joseph's Hospital in Marshfield from 1991 to 1999. He joined the Cardiovascular Division of the Mayo Clinic in 2000. A Professor of Medicine and the History of Medicine, he was the founding Medical Director of the Mayo
Clinic Center for the History of Medicine.

He is the author of more than 100 historical papers and two books, The Development of American Physiology: Scientific Medicine in the 19th Century (1987) and American Cardiology: The History of a Specialty and Its College (1996). Oxford University Press will publish his third book, Caring for the Heart: Mayo Clinic and the Rise of Specialization, early in 2015. Dr. Fye is a past president of the American College of Cardiology, the American Association for the History of Medicine, and the American Osler Society.

He met his wife Lois in high school, and they recently celebrated their 45th wedding anniversary. They have two daughters and two grandsons.

Table Of Contents

List of Figures and Tables
Foreword by Rosemary A. Stevens
Preface (with Acknowledgements)
Introduction
Section One: Inventing the Mayo Clinic and Cardiology
Chapter 1 The Nineteenth-Century Origins of the Mayo Practice
Chapter 2 The Mayos' Invention of Multispecialty Group Practice
Chapter 3 The Development of an Academic Medical Center in Rochester
Chapter 4 Patient Care and Clinical Research in the 1920s
Chapter 5 The Electrocardiograph and the Birth of Cardiology
Chapter 6 Challenges and Changes during the Depression
Section Two: Developments in the Diagnosis and Treatment of Heart Disease
Chapter 7 President Roosevelt's Secret Hypertensive Heart Disease
Chapter 8 The Reinvention of the American Heart Association, and the Invention of Cardiac Catheterization
Chapter 9 Surgeons Begin Trying to Treat Heart Disease
Chapter 10 Pioneering Open-Heart Surgery at the University of Minnesota and the Mayo Clinic
Chapter 11 The Expansion of Open-Heart Surgery and Cardiac Catheterization
Chapter 12 Beyond Mid-Century: Two Decades of Growth and Change
Section Three: Technologies Transform Heart Care and Stimulate Subspecialization
Chapter 13 Creating Coronary Care Units and Empowering Nurses
Chapter 14 Coronary Angiography: The Cleveland Clinic Leads the Way
Chapter 15 Coronary Artery Bypass Surgery Stimulates the Growth of Angiography
Chapter 16 Transforming Cardiac Catheters into Treatment Tools
Chapter 17 Analyzing and Managing Abnormal Heart Rhythms
Chapter 18 Seeing the Heart: Echocardiography and Other Imaging Technologies
Chapter 19 Treating Heart Failure and Preventing Cardiovascular Disease
Chapter 20 Challenges and Opportunities around the New Millennium
Appendix Alphabetical List of the Subjects of Oral Histories
Notes
Index

Mayo Clinic Guide to Cardiac Magnetic Resonance Imaging (2nd Edition)
Kiaran McGee, Matthew Martinez, Eric Williamson

Key Selling Points
• Board style questions with clearly explained and illustrated answers.
• Well described clinical imaging protocols and case studies in an easy-to-follow format.
• Current and state-of-the-art imaging protocols.
This clinical handbook of cardiac MR imaging is a straightforward how-to text for technologists, physicians, and physicists.

Summary
The Mayo Clinic Guide to Magnetic Resonance Imaging, Second Edition, is an updated version of the popular first edition of the same title. This handy reference text and soon to be classic text is designed to educate physicists, technologists and clinicians in the basics of cardiac MRI. A significantly expanded and reworked clinical imaging section provides numerous imaging protocols for the most commonly indicated cardiac MRI examinations as well as a plethora of well illustrated and described clinical examples. This text is a must have for anyone interested in developing their own cardiovascular MR imaging practice or advancing their existing skills. The addition of case-based questions and answers add a new dimension to this expanded second edition.

Contributor Bio

Matthew W. Martinez, MD
Director, Cardiovascular Imaging, Lehigh Valley Health Network, Allentown, Pennsylvania

Eric E. Williamson, MD
Chair, Division of Cardiovascular Radiology, Mayo Clinic, Rochester, Minnesota; Associate Professor of Radiology, Mayo Clinic College of Medicine

Table Of Contents
Section I: Basic Principles of Cardiac MRI
1 ECG Gating and Associated Artifacts Matthew W. Martinez, MD, and Kiaran P. McGee, PhD
2 Cardiac Anatomy Matthew W. Martinez, MD
3 Standard Imaging Planes in Cardiac MR Imaging Matthew W. Martinez, MD, Eric E. Williamson, MD, and Kiaran P. McGee, PhD
4 Pulse Sequence Basics Kiaran P. McGee, MD, and Matthew A. Bernstein, PhD
5 Modular Cardiac MR Imaging Protocols Phillip M. Young, MD, Eric E. Williamson, MD, and James F. Glockner, MD

Section II: Clinical Applications and Case Studies
6 Myocardial Ischemia and Infarction Thomas A. Foley, MD
7 Nonischemic Myocardial Disease Nila J. Akhtar, MD, Matthew W. Martinez, MD, and Eric E. Williamson, MD
8 Pericardial Disease Phillip M. Young, MD
9 Cardiac Masses Ethany L. Cullen, MD, and Philip A. Araoz, MD
10 Congenital Disease Nandan S. Anavekar, MB, BCh, and Paul R. Julsrud, MD
11 Valvular Heart Disease James F. Glockner, MD, PhD

Section III: Troubleshooting-MRI Safety and Artifacts
12 Common MR Imaging Artifacts Kiaran P. McGee, PhD, and Matthew A. Bernstein, PhD
Section IV: Review Questions
14 Board-Type Questions and Answers Kiaran P. McGee, PhD, Matthew W. Martinez, MD, and Eric E. Williamson, MD

The ESC Textbook of Intensive and Acute Cardiovascular Care (2nd Edition)
Marco Tubaro, Pascal Vranckx, Susanna Price, Chris...

Key Selling Points
- Comprehensive coverage of all the aspects of intensive acute and cardiac care
- Diverse and intriguing chapter content including non-cardiac disease and ethical issues
- Numerous new chapters that will increase the reader's knowledge on the subject
- Section devoted to biomarkers and the importance of laboratory medicine
- Digital version annually updated
- Closely aligned with the ACCA core training curriculum

The official textbook of the Acute Cardiovascular Care Association (ACCA). The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment.

Summary
The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACCA) of the ESC. This new updated edition continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care. The textbook is addressed to all those involved in intensive and acute cardiac care, from cardiologists to emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment, but also organisational issues, cooperation among professionals, and interaction with other specialties in medicine.

The largest section of the textbook is devoted to non-cardiac disease which could acutely involve the cardiovascular system. Other noteworthy chapters are on ethical issues - which are so important in acute cardiac care, such as patient safety, donor organ management and palliative care. A unique characteristic of the textbook is the presence of a whole section devoted to biomarkers, which underline the growing importance of laboratory medicine in the field of intensive and acute cardiac care.

A particular asset of the textbook is the digital version available on Oxford Medicine Online, which has additional online features including an extra chapter on lung ultrasound and many more images and videos, as well as a full list of references from all chapters. The online version is updated by the same authors on a yearly basis and is available with the print version and separately on a subscription basis, allowing easy access to content in digital and mobile optimised format. The textbook aligns directly with the core training curriculum for ACCA.

Contributor Bio
Marco Tubaro, Head ICCU, Cardiovascular Department, San Filippo Neri Hospital, Rome, Italy, Pascal Vranckx, Medical Director ICCU, Cardiology and Critical Care Medicine, ICCU Hartcentrum Hasselt, Belgium, Susanna Price, Consultant Cardiologist and Intensivist, Royal Brompton Hospital, London, UK, Christiaan Vrints, Head of Cardiology Department, University Hospital of Antwerp, Belgium

Marco Tubaro is head of the ICCU at San Filippo Neri hospital in Rome. He is a member of the founding board of the WG Acute Cardiac Care (now Acute Cardiovascular Care Association) of the ESC and was previously national secretary of ANMCO (Italian association of hospital cardiologists). A visiting professor at Camerino University in Italy, Tubaro is an author of more than 370 papers.

Pascal Vranckx is a consultant in interventional cardiology and medical director of the Cardiac Intensive Care Unit at Hartcentrum in Hasselt, Belgium. He is a research affiliate to the department of cardiology, Erasmus Medical Center in Rotterdam, The Netherlands. He is also clinical consultant and chair of the Clinical Events Committee Core Laboratories at Cardialysis in Rotterdam, The Netherlands.

Pascal Vranckx has authored over 70 publications and over 10 chapters in textbooks and is an associate editor of the ESC Textbook of Acute Cardiology and Intensive Care
Susanna Price trained in both cardiology and intensive care medicine, and is a Consultant Cardiologist and Intensivist at the Royal Brompton Hospital, London. Her main interests are intensive care cardiology, adult congenital heart disease, and critical and peri-operative/peri-procedural echocardiography. She developed a national training programme in ALS-compliant peri-resuscitation echocardiography, endorsed by the BSE and supported by the Resuscitation Council. Dr Price sits on a number of committees including Chair of the Accreditation/Certification Committee in Acute Cardiac Care(ESC), a member of the Working Group Intensive Care Echocardiography (ESICM), the Executive committee European trans-catheter valve replacement/repair registry(ESC), Accreditation Committee(BSE), Education & Training Committee, Intensive Care Society and the ESC Task Force MCQs and Professional Standards.

Christiaan Vrints is Past-President of the Executive ACCA Board, and a Nucleus Member of the Association. He is Professor of cardiology at the University of Antwerp and Head of the Department of Cardiology at the University Hospital of Antwerp, Belgium.

Table Of Contents

Introduction
1. Introduction: intensive and acute cardiac care
2. Clinical competence and certification in intensive and acute cardiac care
3. Patient safety and clinical governance
4. Databases, registries and quality of care
The pre-hospital phase and the emergency department
5. Sudden cardiac death: epidemiology and prevention
6. Cardiopulmonary resuscitation and the post-cardiac arrest syndrome
7. The emergency medical system
8. Chest pain and the chest pain units
9. Acute dyspnoea in the ED
The Intensive Cardiac Care Unit
10. Recommendations for the structure, organization and operation of the ICCUs
11. The intensive cardiac care team
12. The heart team
13. Ethical issues in cardiac arrest and acute cardiac care: a European perspective
Monitoring and investigations in the ICU
14. Pathophysiology and clinical assessment of the cardiovascular system
15. The respiratory system
16. Monitoring the neurological conditions of the acute cardiac care patients
17. Monitoring of the kidney, liver and other vital organs
18. Blood gas analysis: acid-base and fluid and electrolyte disorders
19. Chest x-rays
20. Echocardiography and thoracic ultrasound
21. Ultrasound-guided vascular access
22. Cardiac computed tomography
23. Cardiac MRI
Procedures in Intensive Cardiac Care Unit
24. Principles of mechanical ventilation
25. Non-invasive ventilation
26. Temporary pacing
27. Pericardiocentesis
28. Chest tubes
29. Renal support therapy
30. Mechanical circulatory support
31. Implanted cardiac support devices
32. Nutrition support in acute cardiac care
33. Physiotherapy in critically ill patients
34. Donor organ management
The laboratory in Intensive and Acute Cardiac Care
35. The use of biomarkers in acute cardiovascular disease
36. Biomarkers in acute coronary syndromes
37. Biomarkers in acute heart failure
38. Biomarkers of coagulation and thrombosis
39. Biomarkers of renal and hepatic failure

**Acute coronary syndromes**
40. Atherosclerosis and thrombosis
41. The universal definition of myocardial infarction
42. Systems of care for patients with acute coronary syndromes
43. ST segment elevation myocardial infarction
44. Anticoagulants and antiplatelet drugs in acute coronary syndromes
45. Mechanical complications of myocardial infarction
46. Non ST segment elevation myocardial infarction
47. Percutaneous coronary interventions in patients with acute coronary syndromes
48. Coronary artery bypass graft
49. Cardiogenic shock in patients with acute coronary syndromes
50. Age and gender considerations in ACS

**Acute heart failure**
51. Acute heart failure: epidemiology, classification and pathophysiology
52. Acute heart failure: early pharmacological treatment
53. Non pharmacologic therapy of acute heart failure
54. Cardiac surgery and transplantation in acute heart failure

**Arrhythmias**
55. Conduction disturbances and pacemaker
56. Atrial fibrillation and supraventricular arrhythmias
57. Ventricular tachyarrhythmias and ICD

**Other acute cardiovascular conditions**
58. Myocarditis and pericarditis
59. Acute valve disease and endocarditis
60. Congenital heart disease in adults
61. Aortic emergencies
62. Cardiac complications in trauma
63. Cardiac emergencies in pregnancy

**Concomitant acute conditions**
64. Acute respiratory failure and acute respiratory distress syndrome
65. Pulmonary hypertension
66. Pulmonary embolism
67. Stroke
68. Acute kidney injury
69. Hyperglycaemia, diabetes and other endocrine emergencies
70. Acute haemostatic disorders
71. Bleeding, anaemia and transfusion
72. Infection, sepsis and multiorgan dysfunction syndrome
73. Acute pain in the ICU
74. Acute cognitive disorders: recognition and management of delirium in the ICU
75. Special conditions in the immunosuppressed patient
76. Peri-operative cardiac care of the high risk non-cardiac patient
77. Peri-procedural and peri-operative management of the high risk cardiac patient
78. Palliative care in the ICU

Illustrated Questions in Orthodontics
Claire Nightingale, Jonathan Sandy

Key Selling Points
- Quality revision resource mapped to undergraduate curriculum, with extensive feedback to put each question in clinical context
- Fully illustrated with colour clinical photographs and x-rays to demonstrate key orthodontic problems and presentations
- Detailed coverage of common orthodontic presentations to prepare readers to treat and manage simple problems
- Useful foundation for postgraduate study of orthodontics

The ultimate revision resource for undergraduate dentists looking to consolidate their knowledge and succeed in their exams.

Summary
Illustrated Questions in Orthodontics takes a problem-based approach to orthodontics, offering a unique resource for undergraduate dentists.

This book contains a comprehensive set of questions mapped to undergraduate orthodontics curricula, including chapters on examination and diagnosis, treatment planning, pathology, appliances, and anchorage. Each chapter is packed with high-quality clinical photographs and x-rays to help readers to test their skills in identifying and describing various orthodontic problems and presentations. Furthermore, every question is answered with extensive feedback, setting each topic in a clinical context in order to teach as well as test.

The ideal revision resource for undergraduate dentists looking to test and consolidate their knowledge ahead of placements and exams, Illustrated Questions in Orthodontics will also form a useful tool for postgraduate dentists and orthodontic therapists.

Contributor Bio

**Illuminating Disease**  
*An Introduction to Green Fluorescent Proteins*  
Marc Zimmer

**Key Selling Points**
- An accessible introduction to green fluorescent proteins, a revolutionary bioimaging technique.
- Features a color insert with several award-winning images of fluorescent proteins.
- Written by Marc Zimmer, a significant researcher in the development of GFP and a science writer who contributes to several prominent publications.

An illustrated introduction to green fluorescent proteins, one of the most important medical research techniques currently available.

**Summary**

Green fluorescent proteins have been floating in the ocean for more than 160 million years, but it took a curious scientist, fascinated by pinpricks of green light, to begin unlocking their potential. Now these jellyfish proteins have become one of the most important tools available to researchers in modern medicine and biology. By using them to illuminate other proteins that were previously invisible even under a microscope, scientists are now able to observe facets of disease that would have otherwise gone undetected. Green fluorescent proteins are used in over three million experiments a year and have proved invaluable for tasks such as tracking HIV, breeding bird flu-resistant chickens, and confirming the existence of cancerous stem cells.

In *Illuminating Disease*, Marc Zimmer introduces us to these revolutionary proteins, acquainting readers both with the researchers responsible for the proteins' discovery as well as their wide utility. The book details the history of genetically modified fluorescent parasites and viruses, which provide scientists with lifesaving information about the spread of diseases. Green fluorescent proteins allow scientists and doctors to understand diseases better by quite literally illuminating various microscopic interactions occurring in living cells that otherwise would have gone unseen.

The book is richly illustrated, showing the visually striking uses of green fluorescent proteins, and many of these scans have won awards in biological imaging competitions. An ideal introduction for students and advanced researchers alike, *Illuminating Disease* is an accessible yet deeply probing investigation into one of the most important developments in medical research of the last several decades.

**Contributor Bio**

**Marc Zimmer** is Professor of Chemistry at Connecticut College. He has published articles on science and medicine for the *Los Angeles Times*, *USA Today*, and the *Huffington Post*, among many other publications.

**Quotes**

"When the Nobel Prize in chemistry was awarded for the discovery of green fluorescent protein (GFP) in 2008, the Nobel Committee called GFP a guiding star for biochemistry enabling processes that were previously invisible, such as cancer cells spreading, to be strikingly visible. Marc Zimmer, has written a "glowing account" of how GFP and its red, blue, yellow and orange cousins have revolutionized bio-medical research and enabled every major disease, both cause and effect, to "light-up" in the laboratory for researchers to visualize, understand and eventually conquer them. This exciting and landmark book on the wonderful story of GFP is written with great clarity, warmth and for everyone." --Dr. Robert M. Hoffman, President, Anticancer, Inc.

"I am tempted to say that this book is to GFP what "the double helix" is to DNA. Zimmer's pleasant and captivating account features a whole range of scientific problems, framed with personal stories and anecdotes. Zimmer manages to tell stories across many fields of disease (cancer, heart, brain, infections) that are not usually put together into one volume and thus provides a rare unifying read across biology. The
nicely illustrated book clearly is a must-read for all students of biology." -- Friedrich Frischnecht, Department of Parasitology, University of Heidelberg Medical School

"For many years, GFP attracted keen attention of scientists because of its unique biochemistry and practical usefulness, and simply due to its aesthetic beauty. Dr. Zimmer describes a lot of facts of medicine and basic biology, but at the same time does not forget to explain all basics to non-scientist readers, often suggesting surprising and illustrative parallels with everyday life. The book is full of stories of people who made key discoveries and technical breakthroughs in the field, and it shows an exciting flow of appearance and implementation of scientific ideas." -- Sergey Lukyanov, Shemyakin and Ovchinnikov Institute of Bioorganic Chemistry

Health Measurement Scales (5th Edition)
A practical guide to their development and use
David L. Streiner, Geoffrey R. Norman, John Cairne...

Key Selling Points
• Topics presented in the order that scales are constructed
• Assumes minimal knowledge of statistics
• Written in a conversational tone
• Readers can use these steps to construct their own scales
A practical guide for clinicians who are developing tools to measure subjective states, attitudes, or non-tangible outcomes in their patients, suitable for those who have no knowledge of statistics.

Summary
Clinicians and those in health sciences are frequently called upon to measure subjective states such as attitudes, feelings, quality of life, educational achievement and aptitude, and learning style in their patients. This fifth edition of Health Measurement Scales enables these groups to both develop scales to measure non-tangible health outcomes, and better evaluate and differentiate between existing tools.

Health Measurement Scales is the ultimate guide to developing and validating measurement scales that are to be used in the health sciences. The book covers how the individual items are developed; various biases that can affect responses (e.g. social desirability, yea-saying, framing); various response options; how to select the best items in the set; how to combine them into a scale; and finally how to determine the reliability and validity of the scale. It concludes with a discussion of ethical issues that may be encountered, and guidelines for reporting the results of the scale development process. Appendices include a comprehensive guide to finding existing scales, and a brief introduction to exploratory and confirmatory factor analysis, making this book a must-read for any practitioner dealing with this kind of data.

Challenging Concepts in Obstetrics and Gynaecology
Cases with Expert Commentary
Natasha Hezelgrave, Danielle Abbott, Andrew Shennan...

Key Selling Points

• Features 'Real-world' cases, giving the reader confidence in clinic, on the ward, or delivery suite.
• Complex cases examined from a multidisciplinary approach with consideration of diagnostic procedures, practical skills, evidence base, and the application of national and international guidelines.
• Brings together the most up-to-date evidence, management strategies, guidelines, and controversies in management, that the reader would have ordinarily had to collate from individual sources.
• Expert input by internationally-renowned specialists and professors provides a unique insight into the management of often rare but important obstetrics and gynaecology cases.
• An ample number of illustrations makes the reading experience as transferable to everyday clinical practice as possible.
• Cases are punctuated by "Learning Points", "Clinical Tips", and "Evidence Base" boxes, highlighted in the text to enhance the learning process.

A case-based guide to difficult scenarios faced in both fields, covering many of the major sub-speciality areas of each.

Summary

Challenging Concepts in Obstetrics and Gynaecology is a case-based guide to difficult scenarios faced in both fields, covering many of the major sub-speciality areas of each. The 24 cases have been selected to cover a spectrum of challenges in obstetrics and gynaecology. Recognising that any attempt to cover the whole curriculum is impossible, the authors have instead chosen specific, challenging scenarios that are commonly encountered in clinical practice, but by no means have simple answers or outcomes.

Complex cases are examined from a multidisciplinary approach with consideration of diagnostic procedures, practical skills, evidence base, and the application of national and international guidelines. There is also a summary of evidence from the medical literature in various subspecialty areas of obstetrics and gynaecology, alongside current controversies in management. Cases are punctuated by easy-to-read "Learning Points", "Clinical Tips", and "Evidence Base" boxes, speeding the learning process as well as providing a handy dip-into guide for those just refreshing their memory.

Each case is set off by an 'Expert Commentary' written by an internationally-renowned expert in each field, leaving the reader with both a solid base of knowledge and a nuanced view of current challenges in obstetrics and gynaecology. This collaboration between trainees and experts provides a unique insight into the management of complex and often rare but important obstetrics and gynaecology cases, within a highly user-friendly format and a ready-made means of self-learning and self-testing. Challenging Concepts in Obstetrics and Gynaecology makes for a useful, relevant and interesting read, enabling the reader to readily transfer the knowledge gained to everyday clinical practice.

Health Care in Canada
Antonia Maioni

Key Selling Points

• One of the main issues of the new millennium. Health care - with its complicated tangle of problems and tribulations - is on everyone's minds. Here are the facts, clearly presented by an expert with a proven ability to give concise and uncluttered accounts of complex issues. No other book provides such a comprehensive and opinion-free consolidation of the major topics in Canada.

• Canadian scope. Each country has a unique history and politics feeding into its organization of health care funding and delivery. In addition, Canada has specific demographics and geography that have fed into our distinct network of systems. Maioni looks specifically to Canada, with international comparisons where relevant.

• Astute and insightful. Maioni is routinely asked to write for many of Canada's major news sources given her clear, cut and unbiased understanding of apparently difficult and snarled issues.

• Past, present, and future. Public insurance systems in Canada emerged in a specific set of historical and political circumstances - from 1960s Saskatchewan to current innovations in health care and fiscal arrangements, all are efficiently summarized here.

• An excellent framework for understanding debates over reform. Maioni's view-at-30,000-feet map of our systems helps explain problem areas - waiting lists, overcrowding of emergency rooms, fee-for-service medicine, extra-billing, or the need for more team-based medical models.

• Comparative. A fascinating and revealing look at how Canada's systems of health care compares and contrasts to those of the United States and Britain.

• Explores a changing climate. Day surgery, drug therapies, and chronic disease management now play a greater role than they have in the past. Similarly financing the increasing costs of health care has changed and will continue to change, for example as health accords conclude and provinces take on more responsibility.

• Financing. A clear summary of how much is being spent, what the money is being spent on, and who is paying.

• A direct look at rising costs. Maioni evaluates the specific drivers of health care costs in Canada, looking at how these are managed now, and how they may be managed in future as expensive new drugs and technologies continue to be developed.

Summary

Known for her in-depth knowledge and clarity of style, Antonia Maioni wades into the complicated world of health care in Canada and emerges with a concise roadmap of how the different systems work together. Instead of an ideological argument about how things should be, Maioni's unbiased account describes how they actually are. Any Canadian who has ever spent too long in an emergency room or wondered about the costs of new medical technologies will find this both fascinating and essential reading.

Maioni condenses years of research and teaching into accessible accounts of key issues: the political history that led to our current organization; the current division of responsibilities between provinces and the federal government; the financing of health care; and the ways our systems contrast with other comparable Western countries. An overview of Canada's political history in health care is a thought-provoking entry into the development of our system over time. With origins in urbanization, postwar medicine, labour unrest, and early liberalism, health care as we now know it is the result of surprisingly hard-fought political battle whose outcomes, Maioni argues, could not have been predicted. Key figures like Tommy Douglas and Thomas "Duff" Pattullo, Leonard Marsh, and Claude Castonguay played pivotal roles in devising the origins of our insurance system. Canadians are constantly surprised by the different system south of the border; Maioni’s chapter on the evolution of Medicare in America from John F. Kennedy to Barack Obama is a compelling account of two countries and two networks that diverged over time. Similarly, a look at the European systems - in particular Britain - shows that while there are similarities like health care delivery free at the point of service, there are also some essential differences such as the capitation process.
Maioni also explores how our systems are organized in Canada around several basic tents. In theory, health care in Canada is characterized by comprehensive benefits, portability, universality, and accessibility. But change is in the air: how, for example, should we organize team-based efforts, outpatient drug therapies, home and care long term care? Should mental health be included? There have been reforms in recent decades, and other reforms will likely be needed in future. Money, of course, is a key issue. Maioni's chapter on funding reveals how money flows through the public purse via governments and their agencies. There are a mix of health care financing modes emerging from a "single payer" system. Maioni usefully breaks down the numbers: for example, we spend roughly 12 per cent of our GDP on health care and about $6000 per individual. Maioni also looks at how spending has changed over time, noting relative increases for example in drug costs and long-term care facilities. As the burden on the public sector increases, governments must develop smart cost control strategies.

Spitting Blood
The history of tuberculosis
Helen Bynum

Key Selling Points
- Explores the history and growing scientific understanding of tuberculosis, as well as the changing attitudes and approaches to its treatment from antiquity to the present day
- Written in an engaging and informative style
- A fascinating mix of cultural and social history, and the development of the disease, including the discoveries made by Robert Koch
- Begins with some famous case histories of 'spitting blood' - Katherine Mansfield, Vivienne Leigh, and Samuel Johnson

Tracks the historical development of the disease, and considers the challenges it presents to the modern world.

Summary
Tuberculosis is characterized as a social disease and few have been more inextricably linked with human history. There is evidence from the archaeological record that Mycobacterium tuberculosis and its human hosts have been together for a very long time. The very mention of tuberculosis brings to mind romantic images of great literary figures pouring out their souls in creative works as their bodies were being decimated by consumption. It is a disease that at various times has had a certain glamour associated with it.

From the medieval period to the modern day, Helen Bynum explores the history and development of tuberculosis throughout the world, touching on the various discoveries that have emerged about the disease over time, and focussing on the experimental approaches of Jean-Antoine Villemin (1827-92) and Robert Koch (1842-1910). Bynum also examines the place tuberculosis holds in the popular imagination and its role in various forms of the dramatic arts.

The story of tuberculosis since the 1950s is complex, and Bynum describes the picture emerging from the World Health Organization of the difficulties that attended the management of the disease in the developing world. In the meantime, tuberculosis has emerged again in the West, both among the urban underclass and in association with a new infection - HIV. The disease has returned with a vengeance - in drug-resistant form. The story of tuberculosis is far from over.

Structure and Processes of Care
Betty R. Ferrell

Key Selling Points
- Provides an overview of palliative nursing care, reviews National Consensus Project guidelines, and offers tools for initiating and maintaining palliative care programs
- Highlights nurses' role are the center of the palliative care team
- Published in conjunction with the Hospice and Palliative Nursing Association

Summary
The first volume in the HPNA Palliative Nursing Series, Structure and Processes of Care provides an overview of palliative nursing care, reviews National Consensus Project guidelines, and offers tools for initiating and maintaining palliative care programs. The content of the concise, clinically-focused volumes in the HPNA series prepares nurses for certification exams as well as quick-reference in daily practice. Plentiful tables, figures, and practical tools such as assessment instruments, pharmacology tables, and patient teaching points make these volumes useful resources for nurses.

Contributor Bio

2. Hospital-Based Palliative Care
3. Home Care and Hospice Care
4. The Intensive Care Unit
5. Palliative Care Nursing in the Outpatient Setting
6. Long-Term Care: Focus on Nursing Homes
7. Clinical Interventions, Economic Impact, and Palliative Care
**Physical Aspects of Care**

Pain, Nausea and Vomiting, Dysphagia, and Bowel Management

Betty R. Ferrell, Judith A. Paice

**Key Selling Points**

- Provides an overview of the principles of symptom assessment and management for symptoms including: pain, fatigue, nausea and vomiting, constipation, diarrhea, obstruction, and ascites.
- Highlights nurses' role are the center of the palliative care team
- Published in conjunction with the Hospice and Palliative Nursing Association
- Provides an overview of the principles of symptom assessment and management for symptoms including: pain, fatigue, nausea and vomiting, constipation, diarrhea, obstruction, and ascites.

**Summary**

Palliative care is an essential element of our health care system and becoming increasingly significant amidst an aging society and organizations struggling to provide both compassionate and cost effective care. Palliative care is also characterized by a strong interdisciplinary approach. Nurses are at the center of the palliative care team across settings and populations. The second volume in the HPNA Palliative Nursing Series, Physical Aspects of Care: Pain, Nausea and Vomiting, Fatigue and Bowel Management, provides an overview of the principles of symptom assessment and management for symptoms including: pain, fatigue, nausea and vomiting, constipation, diarrhea, obstruction, and ascites. The content of the concise, clinically-focused volumes in the HPNA series prepares nurses for certification exams as well as quick-reference in daily practice. Plentiful tables, figures, and practical tools such as assessment instruments, pharmacology tables, and patient teaching points make these volumes useful resources for nurses.

Betty R. Ferrell, Nessa Coyle, Judith Paice

Key Selling Points
- Addresses the practical aspects of nursing care including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care in relation to a variety of care settings and patient populations.
- Each chapter includes case examples and a strong evidence base to support the highest quality of care.
- Highlights the nurse’s vital role as part of an integrated palliative care team.
The definitive text on nursing care of the seriously ill and dying. It is the key resource for nurses working in the field of palliative care.

Summary
This landmark text is the key resource for nurses working in the field of palliative care. Edited by renowned nursing experts, and written by a dynamic team of internationally known authorities in nursing and palliative medicine, the Oxford Textbook of Palliative Nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end of a patient’s life and beyond. The text is distinctively developed to highlight the nurse’s vital role as part of an integrated palliative care team. Various care settings are discussed including the hospital, ICU, home care, and hospice. Chapters focus on the practical aspects of nursing care, including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care. New to the fourth edition are chapters on the National Consensus Project for Quality Palliative Care Guidelines, palliative care of veterans, palliative care in rural settings, disaster situations, palliative care in Eastern Europe, and palliative care in the Philippines.

Psycho-Oncology
(2nd Edition)
A Quick Reference on the Psychosocial Dimensions of Cancer Symptom Management
Jimmie C. Holland, Mitch Golant, Donna B. Greenberg...

Key Selling Points
- Sections describing problems unique to each type of cancer aid clinicians in tailoring their approach to a particular case.
- Practical pharmacological and non-pharmacological interventions outline treatment options and indicate when a referral to a psychiatrist, therapist or other resource may be needed.
- Appendix includes comprehensive listing of resources for children with cancer and their family members

A comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of adults living with cancer and their families.

Summary
Psycho-Oncology is a comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of adults living with cancer and their families. Chapters cover a wide range of topics including screening tools and interventions, psychiatric emergencies and disorders, physical symptom management, communication issues, and issues specific to common cancer sites. A resource section is appended to provide information on national services and programs. This book features contributions from experts designed to help clinicians review, anticipate and respond to emotional issues that often arise in the context of treating cancer patients. Numerous cross-references and succinct tables and figures make this concise reference easy to use. Psycho-Oncology is an ideal resource for helping oncologists and nurses recognize when it may be best to refer patients to their mental health colleagues and for those who are establishing or adding psychosocial components to existing clinics.

**Pediatric Psycho-Oncology** *(2nd Edition)*

A Quick Reference on the Psychosocial Dimensions of Cancer Symptom Management
Lori S. Wiener, Maryland Pao, Anne E. Kazak, Mary ...

**Key Selling Points**
- Sections describing problems unique to each type of cancer aid clinicians in tailoring their approach to a particular case.
- Practical pharmacological and non-pharmacological interventions outline treatment options and indicate when a referral to a psychiatrist, therapist or other resource may be needed.
- Includes information relevant for adolescents and survivors transitioning to adult care.
- Appendix includes comprehensive listing of resources for children with cancer and their family members.

A comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of adolescents living with cancer and their families.

**Summary**
Pediatric Psycho-Oncology is a comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of adolescents living with cancer and their families. Chapters cover a wide range of topics including psychological aspects of particular pediatric cancers and their treatments, how to talk to a child and family at critical times during the disease course, genetic testing, individual, family, educational, psychological and psychiatric interventions, and caring for international patients. Each chapter highlights the necessity of embracing an interdisciplinary approach to ensure that each child has the best options for living with cancer and, when cure is not possible, that death occurs with as much dignity as possible for the child and family. An extensive resource section is appended to provide information on written, online, video, community, national and international services and programs. This book features contributions from experts designed to help clinicians review, anticipate and respond to emotional issues that often arise in the context of treating pediatric cancer patients. Numerous cross-references and succinct tables and figures make this concise reference easy to use. Pediatric Psycho-Oncology is an ideal resource for helping pediatric oncologists and nurses recognize when it may be best to refer patients to their mental health colleagues and for those who are establishing pediatric oncology services or adding psychosocial components to existing clinics.

**Psycho-Oncology (3rd Edition)**
Jimmie C. Holland, William S. Breitbart, Paul B. J...

**Key Selling Points**
- This book is the seminal text of the psycho-oncology field
- Covers topics including cognitive dysfunction caused by chemotherapy, major 'somatopsychic' symptoms caused by proinflammatory cytokines, evidence-based clinical practice guidelines from around the world, survivorship issues, psychotherapeutic interventions, and psychopharmacologic interventions
- Developed in collaboration with the American Psychosocial Society and the International Psycho-oncology Society

The most comprehensive overview of the psychological issues involved in the care of persons with cancer and the psychological, social, and behavioral factors that contribute to cancer risk and survival.

**Summary**
Originally published by Oxford in 1998, Psycho-Oncology was the first comprehensive text in the field and remains the gold standard today. Edited by a team of leading experts in psycho-oncology, spearheaded by Dr. Jimmie C. Holland, the founder of the field, the text reflects the interdisciplinary nature and global reach of this growing field. Thoroughly updated and developed in collaboration with the American Psychosocial Society and the International Psycho-oncology Society, the third edition is a current, comprehensive reference for psychiatrists, psychologists, oncologists, hospice workers, and social workers seeking to understand and manage the psychological issues involved in the care of persons with cancer and the psychological, social, and behavioral factors that contribute to cancer risk and survival. New to this edition are chapters on gender-based and geriatric issues and expanded coverage of underserved populations, community based programs, and caregiver training and education.

The Antibody Molecule
From antitoxins to therapeutic antibodies
Antony R. Rees

Key Selling Points
- An authoritative and engaging history of medical developments within immunology
- Combines biography of the key figures involved in the research, as well as reviews of their clinical findings
- Highly illustrated with over 100 images

This fascinating book examines the literature of the time, turning points, and controversies. A must read for immunologists and life scientists, as well as historians of science and medicine.

Summary
The Antibody Molecule follows the extraordinary journey of the medics and scientists who shaped the course of medical advances in the field of immunology. One of the oldest of the medical sciences, immunology has a history that has seen chemists, physicists and biologists alike seeking to unravel the most complex system in the human body outside the brain. This book charts its intriguing history, from the genetic basis of antibody diversity, through the understanding of the mechanism by which the immune system’s first line of defence works, to breakthroughs in crystallography and the exploitation of immunoglobulins as therapeutic platforms to treat cancer, inflammation and allergy.

Tracing the developments in immunology in chronological order, Professor Antony R. Rees presents the historical contexts of the periods in rich detail, bringing them to life with quotes and illustrations. This fascinating book examines the literature of the time, turning points, and controversies. A must read for immunologists and life scientists, as well as historians of science and medicine.

Contributor Bio
Antony R. Rees, Formely Chief Scientific Officer (CSO), Biotage AB, Uppsala, Sweden and Professor Emeritus and Honorary DSc, University of Bath, UK

Anthony Rees is currently Chief Scientific Officer for the biotechnology company Biotage, Sweden. He was lecturer in Molecular Biophysics and Student of Christ Church from 1980 to 1990 at the University of Oxford. From 1990-1997 he was Professor and Head of the School of Biology and Biochemistry, University of Bath where he is an Emeritus Professor and holds an Honorary Doctor of Science. In 1989 he was a scientific cofounder with Graham Richards of Oxford Molecular, which became one of the earliest UK biotechnology companies to be listed on the London Stock Exchange. He has been visiting Professor at the Universities of Montpellier and Lund, scientific director of the French company Synt:em, CEO of the Swedish company MIP Technologies and Chairman of the Board of the antibody technology company, F-star. He is a member of the American Association for the History of Science and has published more than 120 scientific papers, a number of books and is an inventor on more than 30 patents.

Table Of Contents
1. Antibody pre-history: The emergence of empirical immunology
2. Pre-molecular immunology: The dawn of mechanism
3. Structural chemistry: Locks, keys and colloids
4. The foundations of antibody-antigen recognition emerge
5. The cellular reformation
6. The molecular path unfolds
7. Uncovering the origins of antibody diversity
8. Immunoglobulin constant regions
9. Effector functions of constant regions
10. Transmission and catabolism of IgG
11. The structural context of antibody diversity
12. Monoclonal antibodies and the mechanisms of hypermutation
13. Antibody structure prediction and development of humanization strategies
14. Antibody engineering: Improving on natural immunity
15. Case study I: Prevention of respiratory syncytial virus illness
16. Therapeutic antibodies: Case study 2: Targeting breast cancer
17. Antibodies: The therapeutic future

50 Studies Every Internist Should Know
Kristopher Swiger, Joshua R. Thomas, Steven Hochman...

Key Selling Points
• The majority of the study summaries have been reviewed for accuracy by the original study authors
• Each chapter starts with a quotation putting the findings in context
• Each study is supplemented by a clinical case which allows readers to apply research findings to real-world situations

Presents summaries and analysis of 50 studies that have shaped the practice of internal medicine—a must-read for health care professionals and anyone who wants to learn about the data behind clinical practice.

Summary
50 Studies Every Internist Should Know presents key studies that have shaped the practice of internal medicine. Selected using a rigorous methodology, the studies cover topics including: preventative medicine, endocrinology, hematology and oncology, musculoskeletal diseases, nephrology, gastroenterology, infectious diseases, cardiology, pulmonology, geriatrics and palliative care, and mental health. For each study, a concise summary is presented with an emphasis on the results and limitations of the study and its implications for practice. An illustrative clinical case concludes each review, followed by brief information on other relevant studies. This book is a must-read for health care professionals and anyone who wants to learn more about the data behind clinical practice.

Table Of Contents
Section 1. Preventive Medicine
1. Preventing Diabetes: The Diabetes Prevention Program
2. Dietary Approaches to Stop Hypertension (DASH)
3. Aspirin for the Primary Prevention of Cardiovascular Disease: The Physicians' Health Study and the Women's Health Study
4. Postmenopausal Hormone Therapy: The Women's Health Initiative
5. The Cochrane Review of Screening Mammography
6. The European Randomized Study of Screening for Prostate Cancer
7. Screening for Lung Cancer with Low-Dose Computed Tomography vs. Chest Radiography: The National Lung Screening Trial (NLST)

Section 2. Endocrinology
8. Treating Elevated Blood Sugar Levels in Patients with Type 2 Diabetes: the United Kingdom Prospective Diabetes Study (UKPDS)
9. Intensive versus conservative blood sugar control for patients with type 2 diabetes: the ACCORD trial
10. Intensive vs. Conventional Glycemic Control in Type 1 Diabetes Mellitus (DCCT)

11. Intensive vs. Conservative Blood Pressure Control in Patients with Type 2 Diabetes

Section 3. Hematology and Oncology

12. Choice of Anticoagulant for Prevention of Recurrent Venous Thromboembolism in Patients with Cancer

14. Phase I Study of Imatinib (STI571) in Patients with Chronic Myelogenous Leukemia

Section 4. Musculoskeletal Diseases

15. Magnetic Resonance Imaging for Low Back Pain

16. Early therapy for rheumatoid arthritis: The TICORA Study

Section 5. Nephrology

17. Revascularization vs. Medical Therapy for Renal Artery Stenosis

18. Correcting Anemia in Chronic Kidney Disease: The CHOIR Study

19. Early versus Late Initiation of Dialysis: The IDEAL Trial

Section 6. Gastroenterology

20. Use of IV Albumin in Patients with Cirrhosis and Spontaneous Bacterial Peritonitis

21. Early use of transjugular intrahepatic portosystemic shunt (TIPS) in patients with cirrhosis and variceal bleeding

Section 7. Infectious Diseases

22. Methicillin-Resistant S. aureus Infections among Patients in the Emergency Department

23. Antibiotic Therapy in Exacerbations of Chronic Obstructive Pulmonary Disease

24. Early versus Delayed Antiretroviral Therapy for Patients with HIV: The NA-ACCORD Study

Section 8. Cardiology

25. Statins in Healthy Patients with an Elevated C-Reactive Protein: The JUPITER Trial

26. The Scandinavian Simvastatin Survival Study (4S)

27. Choosing First-Line Therapy for Hypertension: The ALLHAT Trial

28. Rate Control versus Rhythm Control for Atrial Fibrillation: The AFFIRM Trial

29. Initial Treatment of Stable Coronary Artery Disease: The COURAGE Trial

30. Early Invasive vs. Conservative Management for Unstable Angina or Non-ST-Elevation Myocardial Infarction: The RITA 3 Trial

31. MADIT II: Prophylactic Defibrillator Implantation in Patients with Low Ejection Fraction Following Myocardial Infarction

32. Captopril in Patients with Left Ventricular Dysfunction after Myocardial Infarction: The SAVE Trial
33. Spironolactone in Advanced Heart Failure: The RALES Trial
34. The African American Heart Failure Trial (A-HeFT)
35. Intraaortic Balloon Support for Myocardial Infarction with Cardiogenic Shock (IABP-SHOCK II)

Section 9. Pulmonary and Critical Care Medicine
36. Intensive versus Conventional Glucose Control in Critically Ill Patients
37. Red Cell Transfusion in Critically Ill Patients: The TRICC Trial
38. Noninvasive Ventilation for Acute Exacerbations of Chronic Obstructive Pulmonary Disease
39. Low Tidal Volume Ventilation in Acute Respiratory Distress Syndrome/Acute Lung Injury
40. Comparison of routine vs. on-demand chest radiographs in mechanically-ventilated adults in the intensive care unit
41. Early Goal-Directed Therapy in Sepsis
42. Dopamine vs. norepinephrine in the treatment of shock
43. Daily Interruption of Sedative Infusions in Critically Ill Patients Undergoing Mechanical Ventilation
44. A Comparison of Four Methods of Weaning Patients from Mechanical Ventilation

Section 10. Geriatrics and Palliative Care
45. Behavioral versus Pharmacological Treatment for Insomnia in the Elderly
46. Treatment of Hypertension in the Elderly
47. Use of feeding tubes in patients with dementia
48. Early Palliative Care in Non-Small-Cell Lung Cancer

Section 11. Mental Health
49. Initial Treatment of Depression
50. Symptom-Triggered vs. Fixed Dose Therapy for Alcohol Withdrawal
The Ethics of Surgery
Conflicts and Controversies
Robert M. Sade

Key Selling Points
- Surgical ethics was only recently recognized as a subdivision of biomedical ethics; few other books specifically address this field.
- Most of the articles in the book are debates, a format that emphasizes the wide range of controversies that characterize contemporary biomedical ethics.
- Most of the authors of the papers are surgeons, giving a real-world cast to the discussions and arguments; the exchanges are enriched by an admixture of lawyers, sociologists, philosophers and others with expertise in ethics.
A compendium of articles from recent surgical literature that address ethical issues chosen by surgeons because they are controversial and pertinent to the practice of surgery.

Summary
According to popular belief, technical skill is far more important for surgeons than thoughtful deliberation. Nothing could be further from the truth. Although surgeons must sometimes make decisions rapidly on the basis of incomplete evidence and must respond to unexpected catastrophes in the operating room rapidly, those events are intermittent - most of the time surgeons deliberate on diagnostic problems and thoughtfully manage postoperative care, which is often intellectually challenging.
The relationship of surgeons with their patients is, in a real sense, far more intimate and trusting than that of any other professional, a claim that is supported by the fact that patients surrender their bodies to their surgeons in a state of total helplessness and vulnerability when they undergo anesthesia. Because of that responsibility, no other professional group has a greater sense of dedication to the welfare of their patients than surgeons.
Surgical culture is deeply steeped in ethics, and surgeons confront and resolve ethical dilemmas as much or more than most other professionals, although they often may not recognize the situations they resolve are problems in ethics - they are just part of the daily routine. This book is a compendium of articles from the recent surgical literature that address ethical issues chosen by surgeons because they are controversial and pertinent to the practice of surgery. The reader will not find a great deal of sophisticated dissection of fine philosophical distinctions in these discussions of ethical conflicts and controversies in surgery. Instead, they will discover differing viewpoints from thoughtful essayists, mostly surgeons, whose feet are firmly in contact with the ground and who have extensive experience in the real world of surgery, medicine, and law.

Contributor Bio
Robert M. Sade, MD, is Distinguished University Professor, Professor of Cardiothoracic Surgery and Director of the Institute of Human Values in Health Care at the Medical University of South Carolina, where he also is Director of the Clinical Research Ethics Program. At MUSC, he created the Section of Pediatric Cardiac Surgery in 1975 and has concentrated mainly on biomedical ethics for the last two decades. He has written several hundred articles, book chapters, and books on cardiothoracic surgery, medical education, biomedical ethics, and health policy.

Twenty Things to Know about Deep Brain Stimulation
Erwin B. Montgomery, Jr.

Key Selling Points
- An iconoclast in-depth analysis of the current understanding of DBS: efficacy, safety, indications, selection criteria and post-operative management.
- This book is an epistemic analysis of the presumptions, assumptions and fallacies of DBS.
- It provides the revolutionary potential and the complexity of DBS in changing healthcare delivery, and the ethics are discussed in detail.
Provides the revolutionary potential and the complexity of DBS in changing healthcare delivery; the ethics are discussed in detail.

Summary
Twenty Things to Know About Deep Brain Stimulation is an extensive and in-depth critical analysis of the field of Deep Brain Stimulation (DBS) from what many may consider a revolutionary perspective. This book demonstrates the unique nature and incredible promise of DBS and shows how it is unparalleled as a therapeutic intervention. Dr. Montgomery provides an epistemic analysis of the presuppositions, assumptions and fallacies underlying current clinical understanding of DBS as well as the physiology and pathophysiology affected by DBS. Reviews of the safety and efficacy for a number of conditions, patient selections and issues in the post-operative management are also included. Given the revolutionary potential and the complexity of DBS in an ever changing healthcare delivery context, the ethics of DBS are discussed in detail.

Redefining Recovery from Aphasia
Dalia Cahana-Amitay, Martin Albert

Key Selling Points
• Explains how the brain creates language.
• Offers new approaches to aphasia therapy.
• Redefines the concept of recovery from aphasia.

Focuses on two fundamental aspects of brain-language relations: one concerns the neural organization of language in the healthy brain; the other challenges current approaches to treatment of aphasia and offers a new theory for recovery from aphasia.

Summary
This book focuses on two fundamental aspects of brain-language relations: one concerns the neural organization of language in the healthy brain; the other challenges current approaches to treatment of aphasia and offers a new theory for recovery from aphasia. The essence of the book lies in the phrase neural multifunctionality: the constant and dynamic incorporation of non-linguistic functions into language models of the intact brain. The book makes the claim that language is a construction, created as we use it, and cannot be understood as being supported by neurally based linguistic networks only. Rather, language emerges from the constant and dynamic interaction among neural networks subserving cognitive, affective, and praxic functions with neural networks subserving lexical retrieval (naming), sentence processing (comprehension), and discourse (communication, conversation). In persons with stroke-induced aphasia, neural networks for executive system function, attention, memory, motor system function, visual system function, and emotion interact with neural networks for language to produce the aphasia profile and to influence recovery from aphasia. Consequently, neural multifunctionality in aphasia explains individual differences in the lesion-deficit model and continued recovery over time, redefining the concept of recovery from aphasia and offering new opportunities for treatment.

Quotes
"Aphasia, an impairment of propositional language caused by brain dysfunction, is one of the most common and disabling disorders afflicting humans. This important book, written by two world renowned aphasiologists, makes a paradigmatic shift. These authors address aphasic disorders and recovery by examining nonlinguistic neurobehavioral factors, such as emotions, praxis, and executive functions. These nonlinguistic functions are mediated by functional networks that are independent, but strongly interconnected with the primary language areas and thus play an important role in supporting recovery and adaptation. This important book is critical reading for those clinicians, educators and investigators who deal with people who are suffering with aphasia."

-- Kenneth M Heilman, MD, The James E. Rooks Jr. Distinguished Professor of Neurology, University of Florida College of Medicine, Gainesville

"Redefining Recovery from Aphasia is a unique book, tying information from
speech/language pathology, neurology, neurolinguistics, and cognitive neuroscience in general into a unified approach to recovery from aphasia. The disparate strands of information which these authors bring together not only illuminate the process of recovery from stroke or brain injury causing aphasia, but also provide insight into new approaches to aphasia rehabilitation. The key concept is "multifunctionality", how the language cortex can recover, with help from structures in the brain more specialized in functions such as attention, short-term and long-term memory, executive function, emotion, praxis, and visual processing. The book should be of interest to all who deal with patients with aphasia, including physiatrists, neurologists, speech/language pathologists, neuropsychologists, and linguists." Howard Kirshner, MD, Professor and Vice Chair, Neurology, Vanderbilt University Medical Center

Imaging in Neurodegenerative Disorders
Luca Saba

Key Selling Points

- Covers state of the art and evolving imaging modalities and research, making this a key resource for all modern techniques
- Chapters are written by world leaders in the field, ensuring clarity and precision throughout the book
- This book offers a synergy between the fields of radiology, neurology and neuroradiology, allowing the reader to have a complete vision of the pathology and its diagnosis
- Summarizes the latest developments in imaging techniques and other new diagnostic methods as applied to the neurodegenerative disorders.

Summary

Diagnosing neurodegenerative diseases can prove particularly intimidating to clinicians, because many times the diagnosis cannot be critically "confirmed" by a simple test. New imaging modalities have advanced to the point of high resolution, morphological, metabolic and functional analysis. Computed tomography, magnetic resonance, nuclear medicine and molecular imaging have recently emerged as outstanding non-invasive techniques for the study of the neurodegenerative disorders.

*Imaging in Neurodegenerative Disorders* covers all the imaging techniques and new exciting methods like new tracers, biomarker, metabolomic and gene-array profiling, potential for applying such techniques clinically, and offers present and future applications as applied to the neurodegenerative disorders with the most world renowned scientists in these fields. This book is an invaluable resource for researchers, clinicians, and trainees in neuroscience, neurology, psychiatry, and radiology.

Contributor Bio

Luca Saba, *Assistant Professor of Radiology, University of Cagliari, Italy*

Luca Saba received the MD from the University of Cagliari, Italy in 2002. Today he works in the Azienda Ospedaliero Universitaria of Cagliari. Dr Saba research fields are focused on Multi-Detector-Row Computed Tomography, Magnetic Resonance, Ultrasound, Neuroradiology, and Diagnostic in Vascular Sciences. Dr. Saba has won 15 scientific and extracurricular awards during his career. He has presented more than 450 papers and posters in National and International Congress (RSNA, ESGAR, ECR, ISR, AOCR, AINR, JRS, SIRM, AINR). He wrote 18 book-chapters and he is Editor of 7 books in the field of Computed Tomography, Cardiovascular, Plastic Surgery, Gynecological Imaging and Neurodegenerative imaging. He is member of the Italian Society of Radiology (SIRM), European Society of Radiology (ESR), Radiological Society of North America (RSNA), American Roentgen Ray Society (ARRS) and European Society of Neuroradiology (ESNR) and serves as Reviewer of more than 30 scientific journals.

Table Of Contents

**Section 1: Introduction**
1. Epidemiology of neurodegenerative diseases, Giancarlo Logroscino and Rosanna Tortelli
2. Metabolomics of neurodegenerative disorders, Luigi Barberini, Luca Saba, Claudia Fattuoni, Matteo Fraschini, and Francesco Marrosu
3. Transcriptome profiling in neurodegenerative disorders, James D Mills and Michael Janitz
4. Health economic considerations in neurodegenerative disorders, Thomas Rapp, Pauline Chauvin, Nadège Costa, and Laurent Molinier

**Section 2: Imaging Technique**
6. Computed Tomography, Michele Anzidei
7. General principles of Magnetic Resonance Imaging, Aart J. Nederveen, Matthan W.A. Caan, and Marion Smits
8. Nuclear medicine and radiology, Juergen Dukart and Bogdan Draganski
9. Molecular imaging and neurodegenerative diseases, Vivekanandan Palaninathan, Sivakumar Balasubramanian, D. Sakti Kumar
10. PET imaging in neurodegenerative disorders - evolving techniques and new tracers, Christopher Kobylecki, Alexander Gerhard, and Karl Herholz
11. Radiopharmaceuticals for molecular imaging of neurodegenerative diseases, Shankar Vallabhajosula, Brigitte Vallabhajosula, and Lilja Solnes

Section 3: Neurodegeneration: Cognition
14. Frontotemporal dementia, Jennifer L. Whitwell
15. Dementia with Lewy Bodies, Claire Henchcliffe and Thomas Tropea

Section 4: Neuroregeneration: Movement
17. Parkinson's disease: Clinical and Imaging Features, Ana M. Franceschi, Sofia Pina, and Mauricio Castillo
18. Progressive Supranuclear Palsy (PSP), Dominic Paviour
19. Imaging in Huntington's disease, SJA van den Bogaard and RAC Roos
20. Multiple system atrophy, Keita Sakurai

Section 5: Neurodegeneration: Strength
21. Amyotrophic Lateral Sclerosis, Martin R. Turner

Section 6: Neurodegeneration: Coordination
22. Spinocerebellar Atrophies, Ana Solodkin, Gulin Oz, and Christopher M Gomez
23. Imaging in Neurodegenerative Disorder- Friedreich Ataxia, Hamed Akhlaghi, Martin B. Delatycki, Nellie Georgiou-Karistianis, and Gary F. Egan
24. Neuroimaging in human prion diseases, Damien Galanaud

Section 7: Neurodegeneration: PNS\ANS
25. Amyloidosis, Erez Nossek & Tali Jonas Kimchi
26. Metabolic and toxin related neurodegeneration, Amogh Hedge and CC Tchoyoson Lim

Section 8: Neurodegeneration: Myelin
27. Demyelinating diseases, Eytan Raz
28. Charcot-Marie-Tooth disease, Jose Berciano and Elena Gallardo

Section 9: Neurodegeneration: Trauma
30. Clinical benefit of dopamine transporter imaging in movement disorders and dementia, Jan Boijj, Francoise J Siepel, Tirza C Buter, and Dag Aarsland
31. Neurodegeneration post trauma: Brain, Erin D. Bigler
32. Neurodegeneration post trauma: spine, J.A. Petersen, Spyros S. Kollias
33. Neurodegeneration post trauma: Peripheral nerves, Duan Xiao-Hui and Jun Shen

Section 10: Neuroimaging after therapy
34. Functional imaging of neurosurgery in Parkinson's disease, A.L. Bartels, R. Hilker
35. Neuroimaging after Cell-Based Therapy, Tsui A, Piccini P
Cognitive Impairment and Dementia in Parkinson's Disease (2nd Edition)
Murat Emre

Key Selling Points

• Dementia has been increasingly the focus of research and practice in recent years and a large body of knowledge has been accumulated. Despite these developments there have been relatively few books published on dementia with Parkinson's disease. With contributions from experts in the field, this edited volume will cover all aspects of the disease and detail the current status of knowledge.
• Edited by Murat Emre, an expert and leader in the field.
• The chapters are very comprehensive and the chapter contributors are all expert researchers in the field of Parkinson's disease at an international level.
• The book's contents aim to robustly address the pertinent issues both clinically and scientifically. This should allow the prospective audience a good understanding of current expert opinion as well as providing a reference for the uninitiated.

The importance and clinical relevance of cognitive impairment and dementia in Parkinson's disease is emphasized, followed by discussion of future research directions and expectations.

Summary

In this edited volume, experts on the treatment of dementia associated with Parkinson's Disease (PD) describes in detail the current status of knowledge in their respective area of expertise. The importance and clinical relevance of cognitive impairment and dementia in PD is emphasized, all relevant aspects including epidemiology, full and detailed spectrum of clinical features, current knowledge on pathology, neurochemistry and genetics, findings in auxiliary investigations, relation to other neurodegenerative disorders, diagnostic process and management are described, rounded-up by discussion of future research directions and expectations. The text is complemented and enriched with tables, figures and is heavily referenced thereby capturing all relevant literature.

Contributor Bio

Murat Emre, Professor of Neurology, Department of Neurology, Behavioral Neurology and Movement Disorders Unit, Istanbul Faculty of Medicine, Istanbul University, Turkey

Professor Murat Emre was born in 1956 in Eregli, Turkey. After studying medicine at the Istanbul Faculty of Medicine he trained in Neuroscience and Clinical Neurology at the University of Zurich. He then worked in the fields of neurorehabilitation and clinical research in Switzerland for several years. He trained in movement disorders with Prof. David Marsden at the Queen Square National Hospital for Nervous Diseases, London and in behavioral neurology with Prof. Marsel Mesulam at the Beth Israel Hospital and Harvard Medical School. In 1996 he was appointed as Professor of Neurology at the Istanbul Faculty of Medicine where he started the Behavioral Neurology and Movement Disorders Unit, which he has been chairing since then. His research interests are in Parkinson's disease and related disorders, in particular cognitive aspects of the disease, Alzheimer's disease and related dementias.

Table Of Contents

1. Introduction, Murat Emre
2. Epidemiology of dementia associated with Parkinson's disease, Dag Aarsland and Alexandra Bernadotte
3. General features, mode of onset and course of dementia in Parkinson's disease, Murat Emre
4. Cognitive profile in Parkinson's disease dementia, Kolbjorn Bronnick
5. Neuropsychiatric symptoms in Parkinson's disease dementia, Eugenia Mamikonyan and Daniel Weintraub
6. Interaction between affect and executive functions in Parkinson's disease, Paolo Barone and Gabriella Santangelo
7. Motor symptoms and phenotype in patients with Parkinson's disease dementia, David
9. Disorders of sleep and autonomic function in Parkinson's disease dementia, Eduardo Tolosa Judith Navarro-Otano and Alex Iranzo
10. Structural and functional neuroimaging in patients with Parkinson's disease dementia, Gordon W Duncan, Michael J Firbank and John T O'Brien
11. Biomarkers for cognitive impairment and dementia in Parkinson's disease, Guido Alves, Kenn Freddy Pedersen, Jan Petter Larsen
12. Electrophysiological and other auxiliary investigations in patients with Parkinson's disease dementia, Yasuyuki Okuma and Yoshikuni Mizuno
13. Genetic basis of dementia in Parkinson's disease, Rita Guerreiro and Andrew Singleton
15. Pathological correlates of dementia in Parkinson's disease, Gonzalo J. Revuelta, Guttalu K Kumaraswamy and Carol F. Lippa
16. Epidemiology, diagnosis and correlates of Mild Cognitive Impairment in Parkinson's disease, Elise Caccappolo and Karen Marder
17. The pathophysiological and prognostic heterogeneity of Mild Cognitive Impairment in Parkinson's disease, SE Winder-Rhodes, RA Barker, CH Williams-Gray
18. Spectrum of Lewy body dementias: relationship of Parkinson's disease dementia to dementia with Lewy bodies, Clive Ballard, Sara Garcia-Ptacek, Inger van Steenoven, Dag Aarsland
19. Spectrum of disorders with dementia and Parkinsonism, Jaime Kulisevsky and Javier Pagonabarraga
20. Diagnosis of dementia in Parkinson's disease, Murat Emre
21. Management of Parkinson's disease, dementia and dementia with Lewy bodies, Ian McKeith and Murat Emre
22. Parkinson's disease: what will the future bring?, John Hardy

Brain Renaissance
From Vesalius to Contemporary Neuroscience
Marco Catani, Stefano Sandrone

Key Selling Points
• Introduces the fascinating life of Andreas Vesalius, the greatest anatomist of all time.
• Explains the method of brain dissections in the context of the exploratory spirit that fuelled great explorations of Renaissance.
• Tells a 500 years story behind some of the most important discoveries in neuroscience.
• Provides a modern translation from Latin of Vesalius’ original book on the brain. Andreas Vesalius is the greatest anatomist of all time. Brain Renaissance translates and comments upon those chapters dedicated to the brain, and learns how his words still resonate in neuroscience today.

Summary
Brain Renaissance, from Vesalius to contemporary neuroscience is published on the 500th anniversary of the birth and the 450th anniversary of the death of Vesalius. The authors translated those Latin chapters of the Fabrica dedicated to the brain, a milestone in the history of neuroscience. Many chapters are accompanied by a commentary tracking the discoveries that paved the way to our modern understanding of the brain - from the pineal gland that regulates sleep, the fornix and mammillary bodies for memory, the colliculi for auditory and visual perception, and the cerebellum for motor control, to the corpus callosum for interhemispheric cross-talk, the neural correlates of senses, and the methods for dissections. The chapters constitute a primer for those interested in the brain and history of neuroscience. The translation, written with modern anatomical terminology in mind, provides direct access to Vesalius’ original work on the brain. Those interested in reading the words of the Renaissance master will find the book an invaluable addition to their Vesalian collection.

Brain Renaissance pays a tribute to the work of the pioneers of neuroscience and to the lives of those with brain disorders, through whose suffering most discoveries are made. It’s an unforgettable journey inspired by the work of the great anatomist, whose words still resonate today.

Table Of Contents
- Preface
- Introduction 1: The Anatomy of an anatomist
- Introduction 2: A brief history of neuroscience from Vesalius to the connectome
- Chapter 1: The brain is fabricated for the sake of the supreme spirit, the senses, and also the movement that depends upon our will
- Chapter 2: On the dura membrane that surrounds the brain, and the small membrane covering the skull under the skin

- Chapter 3: On the tenuis cerebral membranes

- Chapter 4: On the number, position, shape, convolutions and substance of the brain and cerebellum
  Commentary: Scratching the surface of complexity

- Chapter 5: On the corpus callosum of the brain and the septum of the right and left ventricles
  Commentary: A tale of anarchic hands and split brains

- Chapter 6: On the cerebral ventricle
  Commentary: The liquor of our souls

- Chapter 7: On the brain structure that expert dissectors have compared to a tortoise-like vault
  Commentary: A memory thread in the brain

- Chapter 8: On the cerebral gland resembling a pine nut
  Commentary: From the seat of the soul to the SAD lamps

- Chapter 9: On the testes [i.e. superior colliculi] and buttocks [i.e. inferior colliculi] of the brain
  Commentary: Sex on the hills

- Chapter 10: On the processes of that [part of the] cerebellum that resembles a worm [i.e. vermis], and the tendons that contain them
  Commentary: More than a little brain

- Chapter 11: On the infundibulum, the glandule that receives the cerebral phlegm and the other ducts that cleanse it
  Commentary: The axis of survival

- Chapter 12: On the networks of the brain believed to be similar to the reticular plexus and the placenta
  Commentary: The net of wonder

- Chapter 13: On the organ of smell

- Chapter 14: On the eye, the instrument of vision

- Chapter 15: On the organ of hearing

- Chapter 16: On the organ of taste

- Chapter 17: On the organ of touch

- Chapter 18: How to dissect the brain and all the organs referred to in this brain

- Appendix: Select Figures from Andreas Vesalius

- Index

Cerebral Cortex
Architecture, Connections, and the Dual Origin Concept
Deepak Pandya, Ben Cipolli, Michale Petrides

Key Selling Points
• It explores the underlying principle of the organization of the cerebral cortex using the dual nature of the origin of the cerebral cortex.
• This book provides a different way of understanding the current behavioral studies, neuroimaging observations and promises a new approach to future studies.
Provides a new view of the organization of the cerebral cortex. It explores the underlying principle of the organization of the cerebral cortex using the dual nature of the origin of the cerebral cortex.

Summary
Cerebral Cortex is a comprehensive and detailed work covering the dual nature of the organization of the architecture and connections of the cerebral cortex. After establishing the evolutionary approach of the cerebral cortex's origin, the authors have systematically analyzed, in detail, the common principle underlying the structure and connections of sensory and motor systems. This important book describes the frontal, limbic, and multimodal association areas, as well as the long fiber pathways in a similar manner. The anatomical investigations have been complimented with current clinical and experimental observations, as well as neuroimaging studies. This unique approach, exploring the underlying principle of the architecture and connections of the cerebral cortex, has previously never been undertaken. In the concluding chapter of the book, the authors have provided the usefulness of such an approach for future investigations. Cerebral Cortex provides extensive illustrations, along with historical references to each sensory, motor and association systems.

**Becoming a Nurse: An Evidence-based Approach**

*Maria Fedoruk, Anne Hofmeyer*

### Key Selling Points
- New chapters:
  - Interprofessional collaboration
  - Cultural diversity in healthcare
  - Research in clinical practice
  - Translating knowledge into practice
  - Health information systems and technologies
- New systematic structure and revised pedagogy for improved clarity and consistency

A clear and concise introduction to the contexts of the contemporary nursing environment.

### Summary

*Becoming a Nurse: An Evidence-based Approach (second edition)* is a clear and concise introduction to the contexts of the contemporary nursing environment. The second edition takes an evidence-based approach to equip student nurses with the core knowledge and skills necessary for their undergraduate program and clinical placement and to take into their careers. Written with every day, accessible language and a systematic structure, *Becoming a Nurse* covers key topics in nursing including the Australian healthcare system, communication technologies, leadership and evidence-based practice.

Each chapter is rich with features to support student learning and competency development, and has been updated throughout to include the latest references and research in nursing. The second edition includes new chapters on interprofessional collaboration, cultural diversity in healthcare, research in clinical practice, translating knowledge into practice, and health information systems and technologies.

**Oxford American Handbook of Oncology (2nd Edition)**
Gary H. Lyman

**Key Selling Points**
- Evidence-based guidance on clinical decision making, treatment options, and therapeutic regimens
- Algorithms, practice guidelines, highlight tables, and landmark references
- Covers cancer biology, genetics, prevention and screening, and complications and supportive care

The essential ready reference for medical students, residents, and clinical oncologists seeking a current, portable resource on the delivery of sophisticated cancer care.

**Summary**
The Oxford American Handbook of Oncology is the essential reference for medical students, residents, and clinical oncologists seeking a current, portable resource on the delivery of sophisticated cancer care. Chapters focus on the immediate information needs in clinical decision making including treatment choices. Algorithms, best practice guidelines, highlighted tables, and targeted lists of landmark references enhance the concise text. For the second edition biologic therapies and therapeutic regimens and options and clinical trial information have been rigorously updated throughout.

**Table Of Contents**

Part 1 Background
1 Molecular cancer biology
2 Etiology and epidemiology

Part 2 Cancer prevention and screening
3 Cancer prevention
4 Cancer screening
5 Genetic screening

Part 3 Principles of management
6 Principles of cancer treatment
7 Surgical oncology
8 Principles of radiation oncology
9 Principles of chemotherapy
10 Hematopoietic stem cell transplantation
11 Hormone therapy
12 Targeted therapies
13 Gene therapy and immunotherapy for cancer
14 Complementary and alternative medicine
15 Clinical trials

Part 4 Complications and supportive care
16 Anemia and fatigue
17 Febrile neutropenia
18 Pain management
19 Venous thromboembolism
20 Metabolic emergencies
21 Paraneoplastic syndromes
22 Superior vena cava syndrome and raised intracranial pressure
23 Spinal cord compression
24 Other obstructive complications
25 Late effects of cancer treatment
26 End-of-life care
Part 5 Specific cancers
27 Thoracic cancers
28 Breast cancer
29 Gastrointestinal cancer I: esophagus, stomach, small intestine, carcinoid
30 Gastrointestinal cancer II: pancreas, biliary tract, hepatocellular
31 Gastrointestinal cancer III: colorectal, anus
32 Endocrine cancers
33 Genitourinary cancer I: renal, bladder, ureter, penile carcinomas
34 Genitourinary cancer II: prostate cancer
35 Genitourinary cancer III: testicular cancer
36 Gynecological cancer
37 Tumors of the central nervous system
38 Head and neck cancers
39 Cutaneous malignancies
40 Soft tissue and bone sarcomas
41 Acute leukemia
42 Chronic leukemias and myelodysplastic syndromes
43 Multiple myeloma
44 Malignant lymphoma
45 Cancer of unknown primary (CUP)

Basic Science for Core Medical Training and the MRCP
Neil Herring, Robert Wilkins

Key Selling Points
- Provides a concise overview of the basic sciences relevant to clinical medicine, to act as a primer for MRCP Part 1 preparation
- Covers common examination errors and areas of misunderstanding to aid learning
- Includes sample MCQ questions to illustrate clinical and exam relevance

An indispensable part of a candidate's MRCP preparation. This book directly links to the Royal College exam and follows the same systems-based approach as the syllabus.

Summary
Providing a clear explanation of the relevant medical science behind the individual medical specialties, Basic Science for Core Medical Training and the MRCP, is an indispensable part of a candidate's MRCP preparation. Directly linked to the Royal College exam, the book follows the same systems-based approach as the syllabus for accurate and effective revision.

With full coverage of basic science for the medical specialities, the book features material on genetics, cellular, molecular and membrane biology, and biochemistry. Content is presented in an illustrated and easy-to-read format, ensuring that the basic science for each medical specialty is more approachable and accessible. A focus on how the basic sciences aid understanding of clinical practice is reinforced through key tables of differential diagnoses and pharmacology.

Ten multiple choice questions at the end of each chapter consolidate learning and enable candidates to test their knowledge. The book also covers common examination errors and areas of misunderstanding to aid learning and help candidates avoid common pitfalls.

Contributor Bio

Health Promotion
Ideology, Discipline, and Specialism
John Kemm

Key Selling Points
- A comprehensive exploration of health promotion from both a theoretical and practical point of view
- Clear proposals for developing health promotion as a profession, and how it could contribute to the health of populations
- Up-to-date and timely examination of legislation
- Packed with examples and case studies

An exploration of the theoretical and practical difficulties that the field of health promotion faces and how it might develop in the future.

Summary
Health Promotion: Ideology, Discipline, and Specialism is a thorough examination of the field, advancing clear proposals for its development and future, and is essential reading for those needing an understanding of the theoretical background, historical context, or the challenges that health promotion faces today. Health promotion is a term which has been used varyingly to describe an ideology, a discipline, or a profession, and has subtly different meanings when used in each of these ways. Dr John Kemm presents a nuanced understanding of the complexities of the field, and careful consideration of the theoretical and practical difficulties involved.

With the core belief that health promotion has a vital contribution to make to the health of populations, this book is packed with the knowledge and tools necessary to help people contribute in real and practical ways to health promotion. Its timely examination of the strategies and legislation of successive governments in the UK informs the ongoing debate on heath policy. The importance of health education is explored, including a look at the new possibilities that technological developments will bring. From the wealth of examples and cases studies used to illustrate the ethical principles underlying health promotion, to the examination of the concepts of environmental and lifestyle determinants of health, it is a comprehensive look at health promotion and will be a perfect resource for practitioners and students alike.

Contributor Bio
John Kemm, JK Public Health Consulting, UK, Director

John Kemm retired from the English National Health Service in 2010 and is now director of a public health consulting firm JK Public Health Consulting, He has 35 years experience of public health and the NHS, and throughout his career he has been a keen supporter of health promotion. He has held many senior NHS and academic posts including Director of the West Midlands Public Health Observatory, Deputy Regional Director of Health for the West Midlands, Director of Public Health for Health Promotion Wales, Consultant in Public Health Medicine for South Birmingham Health Authority and Senior Lecturer in Public Health and Epidemiology at Birmingham Medical School. Throughout his career he has been a keen supporter of health promotion.

Table Of Contents
1. Introduction - Mapping the issues
2. A history of health promotion
3. Evidence for health promotion
4. The determinants of health
5. Assessing need and planning
6. What governments can do
7. Supporting individual behaviour change
8. Health education
9. Ethics of health promotion
10. The wider public health workforce
11. Health promotion specialists
12. Settings
13. Community development
14. Social marketing
15. Changing lifestyle with health promotion - Some examples
16. Evaluation
17. Partnership and influencing people and organisations
18. The way forward

Nutrition and Lifestyle for Pregnancy and Breastfeeding
Peter Gluckman, Mark Hanson, Chong Yap Seng, Anne Bardsley

Key Selling Points
- Accessible explanations of the scientific background, helping health care providers to understand the impact of parental nutrition and lifestyle on offspring development and lifelong health
- Clear and consistent presentation of summaries and recommendations
- Based on the latest research and analysis of nutrient needs
Explains the practical implications of new discoveries in 'life-course biology' and provides an informed resource on parental nutritional and lifestyle factors affecting offspring development.

Summary
Explaining the practical implications of new discoveries in 'life-course biology', Nutrition and Lifestyle for Pregnancy and Breastfeeding is an informed resource on factors that affect offspring development. The impact of parental lifestyle and behavioural choices influence not only fetal development and birth outcomes, but also postnatal development, yet guidance on appropriate diet, behaviour, and exposures during pregnancy is often confusing and contradictory. With accessible explanations of the latest scientific research, and clear summaries and recommendations, this book is a valuable and authoritative guide for all levels of health care providers.

The authors provide an overview of the background evidence, highlighting the importance of lifestyle choices prior to and during pregnancy. In-depth discussions of nutritional and lifestyle factors that impact on pregnancy and offspring outcomes are based on the latest research and exploration of key scientific studies. Nutrition and Lifestyle for Pregnancy and Breastfeeding is a manual offering both scientific and clinical evidence to empower health care providers and ensure they have the information necessary to confidently care for prospective and new parents.

Contributor Bio
Peter Gluckman, University Distinguished Professor; Professor of Paediatric and Perinatal Biology; and Head, Centre of Human Evolution, Adaptation and Disease, The University of Auckland, New Zealand, Mark Hanson, Director, Academic Unit of Human Development and Health; Director, Institute of Developmental Sciences and British Heart Foundation Professor of Cardiovascular Science, University of Southampton, UK, Chong Yap Seng, Senior Consultant, National University Hospital, Women's Centre, Singapore, Anne Bardsley, Research Associate, The Liggins Institute, University of Auckland, New Zealand

Professor Gluckman trained in paediatrics and endocrinology at the Universities of Otago and Auckland, and the University of California, San Francisco. He returned to the University of Auckland to establish a research group in perinatal physiology, and later served as executive Dean of the Faculty of Medicine and Health Sciences and was the foundation director of the Liggins Institute, where he now heads the Centre of Human Evolution, Adaptation and Disease. His research encompasses the regulation of fetal and postnatal growth, nutrition, obesity and diabetes, the developmental origins of metabolic disease, the evolutionary-developmental biology-medical interface, and epigenetic epidemiology. He is a fellow of the Royal Society of NZ, a Companion of the NZ Order of Merit, and in 2009 was conferred a knighthood. He was appointed University Distinguished Professor by the University of Auckland in 2001, when he was also awarded New Zealand's highest scientific award, the Rutherford Medal.

Professor Hanson's research concerns several aspects of development and health, ranging from how the environment during our development (before and after birth) can affect the risk of chronic diseases such as hypertension and obesity, to population studies aimed at the early identification of risk, so that timely preventative interventions can be made. The group is exploring the epigenetic processes which relate to such risks, and which may serve as valuable early life biomarkers. His Unit works on these problems in both developed and developing countries in many parts of the world. Mark
has pioneered a hospital research lab based education programme for adolescents, LifeLab, in Southampton. This aims to promote health and science literacy in students through context-specific curriculum material and a visit to a research lab, giving them hands-on experience of current research tools and engaging them with biomedical science under the heading of "Me, My Health and My Children’s Health".

Associate Professor Chong Yap Seng is a Senior Consultant in the Department of Obstetrics and Gynecology, National University Hospital. As the Consultant in charge of the Delivery Suite in NUH since 2001, Yap Seng balances interests in high-risk obstetrics with natural childbirth and breastfeeding advocacy. He is also an active researcher with special interest in fetal growth and early development. He is the Principal Investigator of the National Research Foundation Metabolic Translational and Clinical Research Flagship Programme and an Adjunct Principal Investigator in the Singapore Institute for Clinical Sciences, Agency for Science, Technology and Research. His other research interests include strategies to promote breastfeeding, the genetic epidemiology of pregnancy-related disorders, and intrapartum and postpartum management issues.

Dr Bardsley trained in molecular and developmental biology at the University of Colorado, (Boulder, CO, USA), where she explored the phenomenon of maternal effect genes, and later carried out research in developmental genetics at Lund University (Sweden) and the University of Auckland. She spent 13 years as writer and editor for a suite of biomedical journals before returning to a research position at the Liggins Institute at the University of Auckland in 2012.

Table Of Contents

**Section 1: Fundamentals of healthy nutrition and lifestyle**
1. The importance of nutrition and lifestyle to healthy development
2. Conceptual background to healthy growth and development

**Section 2: Nutritional requirements of pregnancy and breastfeeding**
3. Practicalities: understanding nutrient recommendations
4. Macronutrients and fibre
5. Polyunsaturated Fatty Acids (PUFAs)
6. Vitamin A
7. Vitamin B1 - Thiamine
8. Vitamin B2 - Riboflavin
9. Vitamin B3 - Niacin
10. Vitamin B6 - Pyridoxine
11. Vitamin B7 - Biotin
12. Vitamin B9 - Folate
13. Vitamin B12 - Cobalamin

15. Vitamin D
16. Vitamin K
17. Vitamins C and E and other antioxidants
18. Calcium
19. Iodine
20. Iron
21. Magnesium
22. Potassium
23. Selenium
24. Copper
25. Zinc
26. Manganese
27. Prebiotics and probiotics

**Section 3: A healthy lifestyle for a healthy pregnancy**
28. Preconception maternal body composition and gestational weight gain
29. Exercise and Physical Activity in Pregnancy
30. Foods, exposures, and lifestyle risk factors
31. Cultural and Traditional Food Practice
32. Traditional and Herbal Remedies
33. Maternal stress
34. Maternal age
35. Paternal factors

**Section 4: A management guide - from before conception to weaning**
Social Determinants of Health
A Comparative Approach
Alan Davidson

Key Selling Points
- Comprehensive! Introduces students to historical foundations of population health.
- Accessible! The straightforward tone and contemporary examples ensure student engagement and understanding.
- Balanced! Up-to-date coverage of Canadian and international determinants of health and health policy emphasizes that health is a global issue.
- Relevant! Written by an epidemiologist specifically for health science students.
- Helpful! In-text resources include case studies, "Pause and Reflect" boxes, critical thinking questions, suggested readings and websites, and a full glossary of key terms.

Introduces the various elements that determine the health of individuals in their communities. The text takes a macro-level approach, focusing on population health in "Anglo-American" countries and examines social, economic, and political commonalities and differences.

Summary

Social Determinants of Health: A Comparative Approach introduces the various elements that determine the health of individuals in their communities. The text takes a macro-level approach, focusing on population health rather than strictly on individual health. Social Determinants of Health focuses on "Anglo-American" countries—Canada, the United States, the United Kingdom, and Australia—examining the commonalities and differences socially, economically, and politically.

The text begins by outlining the background, theory, and evidence for a population health perspective. This is followed by discussion of environmental factors, such as employment, housing, and diet, and social factors such as gender, support and well-being, and being an Aboriginal person. The text concludes with an overview of the social patterning of health-relevant behaviour and the politics of health-related policy. Written in an accessible manner, Social Determinants of Health further engages students by offering case studies and "Pause and Reflect" boxes, as well as end-of-chapter questions, suggested readings, and websites.

6. Health of Aboriginal Peoples
Synopsis
Who Are the Aboriginal Peoples?
**Oxford Textbook of Violence Prevention**
*Epidemiology, Evidence, and Policy*
Peter D. Donnelly, Catherine L. Ward

**Key Selling Points**
- An extensive global perspective, written by an international team of experts
- Analyses how a public health approach can help to prevent violence
- Multidisciplinary examination of interpersonal violence

Provides an extensive global account of the global mortality and morbidity burden caused by violence through examining the causes of violence, and what can be done to prevent and reduce violence.

**Summary**
Violence has always been, and is to this day, a primary cause of tension and suffering the world over. More than half a million people are murdered each year around the world, making homicide the leading cause of death among people aged 15-44. *The Oxford Textbook of Violence Prevention* brings together an international team of experts to provide an extensive global account of the mortality and morbidity burden caused by violence. It does this by examining the causes of violence, and what can be done to prevent and reduce violence.

Divided into six sections, the textbook analyses how a public health approach can help to prevent violence. This multidisciplinary book tackles interpersonal violence in all its forms. Early chapters describe epidemiology and consequences, followed by chapters that present the current state of the evidence in interventions. Policies for violence reduction are discussed, and finally recommendations are made for researchers, practitioners, and policy-makers. *The Oxford Textbook of Violence Prevention* is an essential resource for anyone involved in seeking to reduce the role of violence in modern society.

**Contributor Bio**

Peter D. Donnelly, *Professor of Public Health Medicine, University of St Andrews, Scotland, UK*, Catherine L. Ward, *Associate Professor, Department of Psychology, and Safety and Violence Initiative, University of Cape Town, South Africa*

A graduate of Edinburgh Medical School, Peter Donnelly joined the University of St Andrews as Professor of Public Health Medicine in 2008. His research focus is on two areas, violence reduction and the evaluating gang member rehabilitation initiative in Glasgow, conducting pilot studies of technology aimed at reducing alcohol related violence and exploring sports event related domestic abuse.

Peter's other area of interest is in Health Systems; their organisation, funding, governance and accountability and how they can be optimised to maximise patient benefit and to reduce health inequalities. He chairs the steering group of the Scottish clinical leadership development program and is a member of the NHS Scotland leadership board.

He is a member of the technical board of the New York based Milbank Memorial Fund and is on the steering group of the WHO Violence Prevention Alliance. From 2004 - 2008 he was Deputy Chief Medical Officer to the Scottish Government.

Catherine L. Ward is an Associate Professor in the Department of Psychology at the University of Cape Town, South Africa. She holds a PhD in Clinical-Community Psychology from the University of South Carolina, USA. Her research interests are in violence prevention from the perspective of children's development, and particularly in public health approaches to this.

Cathy serves on the Steering Committee of the University of Cape Town's Safety and Violence Initiative, an interdisciplinary research initiative that seeks to understand
violence and promote safety. The Safety and Violence Initiative is a member of the World Health Organization's Violence Prevention Alliance (VPA), and Cathy herself co-leads the VPA Parenting Project Group with Christopher Mikton from WHO and Theresa Kilbane from UNICEF. In addition, she is on the Editorial Boards for the South African Crime Quarterly, Psychosocial Interventions, and Child Abuse and Neglect journals.

The Public Health Response to 2009 H1N1: A Systems Perspective
Michael A. Stoto, Melissa A. Higdon

Key Selling Points
- Distills important lessons and insights about public health emergency preparedness from the U.S. and global H1N1 experience
- Identifies the implications for measuring the level of preparedness in current public health systems
- Illustrates a variety of rigorous qualitative research approaches that can be used to analyze the response to future public health emergencies
- Highly relevant to newer outbreaks of flu and pathogens such as Ebola

Draws lessons from the public health system’s response to the 2009 influenza pandemic, offering a collection of chapters that are highly relevant to all public health emergencies.

Summary
The 2009 H1N1 pandemic tested the limits of the public health emergency preparedness systems in the US and abroad. The successes and failures from this pandemic remain relevant, particularly as pathogens like MER-CoV and Ebola continue to proliferate. As the world’s population continues to travel farther and with more frequency than ever before, the lessons of 2009 stand as important touchstones for future public health infrastructures and interventions.

The Public Health Response to 2009 H1N1: A Systems Perspective draws lessons from the public health system’s response to the influenza pandemic, offering a collection of chapters that are highly relevant to all public health emergencies. Not simply a historical case study, this analysis employs a systems perspective that encompasses both government health agencies and community-based entities such as care providers, schools, and media. The chapters demonstrate rigorous qualitative research approaches that can be used to analyze public health system responses to both pathogens and a wide variety of other public health emergencies.

With contributions from a broad panel of experts, the book will be useful for anyone seeking to learn from pH1N1 and to see public health systems in current, specific contexts. The Public Health Response to 2009 H1N1 draws important insights from this global event and will help improve public health emergency preparedness systems for future pandemics.

Contributor Bio
Michael A. Stoto, PhD, is a Professor of Health Systems Administration and Population Health at Georgetown University. As an epidemiologist, statistician, and health policy analyst, Professor Stoto’s research focuses on public health practice, especially with regard to preparedness; the evaluation of public health interventions, and infectious disease policy, and public health practice.

Melissa A. Higdon, MPH, is a Health Care Program Manager at the Institute for Strategy and Competitiveness at Harvard Business School. Previously, Ms. Higdon was a Research Assistant at Harvard School of Public Health in the Department of Society, Human Development, and Health working public health emergency preparedness research, primarily working on a grant funded by the Centers for Disease Control and Prevention. Ms. Higdon’s graduate degree is largely focused on health policy.

Table Of Contents
Chapter 1: Introduction
Michael A. Stoto

Chapter 2: Did Advances in Global Surveillance and Notification Systems Make a Difference in the 2009 H1N1 Pandemic?
Chapter 3: The Effectiveness of U.S. Public Health Surveillance Systems for Situational Awareness during the 2009 H1N1 Pandemic
Michael A. Stoto

Chapter 4: Variability in School Closure Decisions in Response to 2009 H1N1
Tamar Klaiman, John D. Kraemer, and Michael A. Stoto

Chapter 5: Wearing Many Hats: Lessons About Emergency Preparedness and Routine Public Health from the H1N1 Response
Matthew W. Lewis, Edward W. Chan, Christopher Nelson, Andrew S. Hackbarth, Christine Vaughan, Alonzo Plough, and Brit K. Oiulfstad

Chapter 6: Variation in the local management of publicly purchased antiviral drugs during the 2009 H1N1 influenza pandemic
Jennifer Coleman Hunter, Daniela C. Rodriguez, Tomas J. Aragon

Chapter 7: The H1N1 Response from the Perspective of State and Territorial Immunization Program Managers: Managing the Vaccination Campaign
Allison T. Chamberlain, Melissa A. Higdon, Katherine Seib, and Ellen A. S. Whitney

Chapter 8: Implementing a national vaccination campaign at the state and local level: Massachusetts case study
Michael A. Stoto and Melissa Higdon

Chapter 9: The Italian Response to the 2009 H1N1 Pandemic
Elena Savoia, Pierluigi Macini, and Maria Pia Fantini

Chapter 10: Local Health Department Vaccination Success During 2009 H1N1
Tamar Klaiman, Katherine O'Connell, and Michael A. Stoto

Chapter 11: Public Communication during 2009 H1N1 Pandemic
Elena Savoia, Leesa Lin, and K. Viswanath

Chapter 12: Obstacles to pH1N1 Vaccine Availability: the Complex Contracting Relationship between Vaccine Manufacturers, WHO, Donor and Beneficiary Governments
Sam Halabi

Chapter 13: Implications for Policy and Practice
Michael A. Stoto

Interventional Radiology Cases
Anne M. Covey, Bradley Pua, Allison Aguado, David ...

Key Selling Points
- Over 500 high-quality images provide a visual resource for honing diagnostic skills
- Concisely reviews radiologic findings, differential diagnoses, teaching points, plus next steps in clinical management
- Includes multi-modality imaging of both trauma and non-trauma conditions
Features 104 cases that cover the spectrum of benign and malignant conditions and imaging modalities for a practical, easy-to-use review guide.

Summary
In 104 cases featuring over 500, high-quality images, Interventional Radiology Cases is a thorough and accessible review of the interventional procedures that radiology residents are expected to be familiar with upon completion of residency and general radiologists need to know for recertification examinations. The cases present both benign and malignant conditions and all pertinent imaging modalities incorporated including: CT, MR, PET, fluoroscopy, and ultrasound. Part of the Cases in Radiology series, this book follows the easy-to-use format of question and answer in which the patient history is provided on the first page of the case, and radiologic findings, differential diagnosis, teaching points, next steps in management, and suggestions for furthering reading are revealed on the following page.

85. Popliteal Entrapment  
86. Portal Vein Embolization to Induce Contralateral Hepatic Hypertrophy
87. Takayasu's Arteritis with Ascending Aortic Aneurysm
88. Leriche Syndrome
89. Thoracic Outlet Syndrome and Subclavian Artery Aneurysm
90. Variant Hepatic Arterial Anatomy: Replaced Right Hepatic Artery
91. Venous Malformation Sclerosis
92. Subclavian Steal
93. Arteriovenous Malformation (AVM)
94. Ruptured Appendix
95. Pelvic Abscess - Transgluteal Drainage
96. Transrectal Aspiration of Prostatic Abscess
97. Chemical Sclerosis of Traumatic Lymphocele
98. Small Bowel Fistula
99. Loculated Effusion Treated with Tunneled Pleural Catheter
100. Anastomotic Leak
101. Esophageal Leak, S/P Covered Stent and Surgical Chest Tube placement with Persistent Loculated Infected Collection (Empyema)
102. Pericardial Drain
103. Needle tract Seeding Post Biopsy of Hepatocellular Carcinoma
104. Left Kyphoplasty and Right Vertebroplasty
**Practical Radiation Protection in Healthcare** *(2nd Edition)*

Colin J Martin, David G Sutton

**Key Selling Points**
*•* Fully revised and updated to cover new requirements linked to the increased knowledge of radiation effects, and the development of new technology
*•* Comprehensive coverage of all major areas of application of radiation protection in healthcare
*•* Includes multiple examples of assessments to aid learning and tables of data for use in calculations

Provides a practical guide for medical physicists and others involved with radiation protection in the healthcare environment.

**Summary**

The application of radiation to medical problems plays an ever-increasing role in diagnosis and treatment of disease. It is essential that medical physicists have the knowledge, understanding and practical skills to implement radiation protection as new techniques are developed. *Practical Radiation Protection in Healthcare* provides a practical guide for medical physicists and others involved with radiation protection in the healthcare environment. The guidance is based on principles set out in current recommendations of the International Commission for Radiological Protection and methods developed by a variety of professional bodies.

Written by practitioners experienced in the field this practical reference manual covers both established techniques and new areas of application. This new edition has been fully revised and updated to cover new requirements linked to the increased knowledge of radiation effects, and the development of new technology. Each specialist area is covered in a separate chapter to allow easy reference with individual chapters being assigned to different types of non-ionising radiations. Tabulated data is included to allow the reader to carry out calculations for situations encountered frequently without reference to further texts.

**Contributor Bio**

Colin J Martin, Honorary Senior Lecturer, University of Glasgow, UK, David G Sutton, Head of Medical Physics Department, Ninewells Hospital, Dundee, UK

Colin Martin has worked as a hospital-based Medical Physicist in Radiation Protection and Diagnostic Radiology in Scotland for 30 years. He is now an honorary senior lecturer with the University of Glasgow, UK. His research has involved radiation protection in medicine, optimisation of radiation protection in diagnostic radiology and non-ionising radiations. Dr Martin is a member of Committee 3 of ICRP (Protection in Medicine) and of IAEA committees, and has been involved in medical exposure projects as an expert for the IAEA. He is a member of Editorial Boards for the Journal of Radiological Protection and Radiation Protection Dosimetry.

David Sutton has worked as a hospital-based Medical Physicist for over 30 years. His work and research has involved the physics of nuclear medicine, radiation protection in medicine, and the optimisation of radiation protection in diagnostic radiology. Dr Sutton is chair of the UK radiation protection accreditation body RPA2000, has been involved in several UK medical physics initiatives and has acted as an expert for the IAEA. He is an associate editor of the British Journal of Radiology.

**Table Of Contents**

**Part I. Ionising Radiations: Hazards, Detection and Measurement**
1. The Development of Radiation Protection, *C J Martin*
2. Interaction of Ionising Radiations with Matter, *C J Martin and D Sutton*
3. Biological Effects of Ionising Radiation, *C J Martin and A Wojcik*
4. Radiation Measurements, *S Green and R G Zamenhof*

**Part II. Protection Against Ionising Radiations**
5. Ionising Radiation Legislation, C J Martin, P Allisy-Roberts and J Le Heron
6. Principles and Control Methods, K E Goldstone Operational Radiation Protection
7. Operational Radiation Protection, D G Sutton
8. Personal Monitoring, D H Temperton
9. Control of Radioactive Substances, Jill Reay and David Sutton
10. Intervention, Incidents and Emergencies, C J Martin and J Robertson

**Part III. Ionising Radiation in Medicine and Research**
11. Risk Control in Medicine, C J Martin and D G Sutton
12. Diagnostic Radiology: Equipment, J R Williams
15. CT Dosimetry, C L Chapple and I McLean
16. Interventional Radiology, C J Martin and D G Sutton
17. Nuclear Medicine and Radionuclide Laboratories, S Batchelor and B Walmsley
18. The Nuclear Medicine Patient, C Greaves and M J Dunn

**Part IV. Non-Ionising Radiation**
21. Lasers, H Moseley
22. Non-Coherent Optical Radiation Sources, D K Taylor
23. Electromagnetic Fields, J W Hand
24. Magnetic Resonance, B Condon and J MacFarlane
25. Ultrasound, S D Pye and B Zequri

Alternative Perspectives on Psychiatric Validation
Peter Zachar, Drozdstoj St. Stoyanov, Massimiliano...

Key Selling Points
Tackles a vitally important topic in mental health— one seldom given the attention it deserves. Tackles a vitally important topic in mental health— one seldom given the attention it deserves. Tackles a vitally important topic in mental health— one seldom given the attention it deserves. Includes chapters by some of the leading philosophers, psychiatrists, and psychologists of our day. Includes chapters by some of the leading philosophers, psychiatrists, and psychologists of our day. Includes chapters by some of the leading philosophers, psychiatrists, and psychologists of our day.

• Throughout - places these issues within an historical context
A group of leading thinkers in psychiatry, psychology, and philosophy offer alternative perspectives that address both the scientific and clinical aspects of psychiatric validation, emphasizing throughout their philosophical and historical considerations.

Summary
Many of the current debates about validity in psychiatry and psychology are predicated on the unexpected failure to validate commonly used diagnostic categories. The recognition of this failure has resulted in, what Thomas Kuhn calls, a period of extraordinary science in which validation problems are given increased weight, alternatives are proposed, methodologies are debated, and philosophical and historical analyses are seen as more relevant than usual.

In this important new book in the IPPP series, a group of leading thinkers in psychiatry, psychology, and philosophy offer alternative perspectives that address both the scientific and clinical aspects of psychiatric validation, emphasizing throughout their philosophical and historical considerations.

This is a book that all psychiatrists, as well as philosophers with an interest in psychiatry, will find thought provoking and valuable.

Contributor Bio
Peter Zachar, Professor of Psychology, Auburn University Montgomery, USA, Drozdstoj St. Stoyanov, Full Professor, Department of Psychiatry and Medical Psychology, Faculty of Medicine, Medical University of Plovdiv, Massimiliano Aragona, Professor of General Psychology, Faculty of Philosophy and School of Psychiatry, La Sapienza University, Rome, Italy, Assen Jablensky, Winthrop Professor of Psychiatry, University of Western Australia, Australia

Peter Zachar graduated from Loras College in Dubuque, Iowa with degrees in philosophy and psychology. After doing volunteer work in the inner city of Chicago, he returned to graduate school and completed a Ph.D. in psychology at Southern Illinois University. He worked for two years as an agency psychologist in a rural community mental health center before obtaining an academic position at Auburn University Montgomery in 1995. Promoted to Full Professor in 2005, he served eight years as Chair of the Department of Psychology from 2003 to 2011. His primary area of scholarship is philosophical issues in psychiatric classification. Zachar has authored two books - Psychological Concepts and Biological Psychiatry - A Philosophical Analysis (John Benjamins, 2000) and A Metaphysics of Psychopathology (MIT Press, 2014).

Drozdstoj (Drossi) Stoyanov was born on July, 20th 1980 in Sofia, Bulgaria. He graduated from the high school in 1996 and received his MD from the Medical University of Sofia in 2002. He presented a PhD thesis in the field of theory and methodology of neuroscience in 2005; certified in December 2007 by the Government Specialty Board with the rank of Psychiatrist and awarded Postgraduate Certificate in Philosophy of Mental Health from the University of Central Lancashire, United Kingdom in October 2010.

Dr Stoyanov was tenured as Associate Professor in the Medical University of Plovdiv in 2008 and hold the position of Vice Dean for International Affairs of its Faculty of Public...
Health from 2009 to 2011; since 2011 appointed in the Faculty of Medicine, Department of Psychiatry and Medical Psychology and Special Advisor Strategic Partnerships to the Vice Rector.

1994: University Degree in Medicine, Sapienza University, Rome (Italy)
1998: Post-graduate degree in Psychiatry, Sapienza University, Rome (Italy)
1999: Inscription in the list of Psychotherapists, Reggio Calabria (Italy)
2004: University Degree in Philosophy, Sapienza University, Rome (Italy)
Since 2000: Psychiatrist of the Italian National Health Service, since 2005 clinical and scientific director of the Day Hospitalization Service for Eating Disorders of the ASL RMD, Rome, Italy
Since 2004 Professor at the Faculty of Philosophy, Sapienza University, Rome (Italy)
Since 2012 Professor at the S. Andrea Hospital School of Psychiatry, Sapienza University, Rome (Italy)

Assen Jablensky, MD, is Winthrop Professor of Psychiatry at The University of Western Australia in Perth and Consultant Psychiatrist at Royal Perth Hospital. From 1975 to 1987, he held a senior position with the World Health Organization in Geneva, where he was Co-Principal Investigator of the influential WHO Ten-Country Study of Schizophrenia and one of the leading experts in the development of the ICD-10 classification of mental disorders. Currently he is a member of the WHO International Advisory Group for the revision of the ICD-10 classification of mental disorders. The main focus of his research is on psychiatric epidemiology, genetics, and classification of mental disorders. Prof Jablensky has over 350 publications, of which 172 are articles in peer-reviewed research journals.

Experiences of Depression
A study in phenomenology
Matthew Ratcliffe

Key Selling Points
• The most detailed account to date of the phenomenology of depression, making it of considerable interest to anyone seeking to understand or relate to experiences of depression
• Brings together research in phenomenology, philosophy of mind and psychology, psychiatry and several other disciplines meaning it will be of interest to a wide academic audience
• Makes clear the relevance of philosophical research to the understanding of depression and vice versa. It will appeal to both philosophers and clinical practitioners
• Clearly written throughout with as little technical language as possible so it is intelligible to any educated person seeking to understand experiences of depression
• Includes a more generally applicable method for phenomenological enquiry, as well as a phenomenological analysis that can be employed to understand human experience in general and, more specifically, the many different forms of anomalous experience that arise in psychiatric illness
• Offers a detailed account of depression experiences by drawing on work in phenomenology, philosophy of mind and psychology, and several other disciplines

Summary
Experiences of Depression is a philosophical exploration of what it is like to be depressed. In this important new book, Matthew Ratcliffe develops a detailed account of depression experiences by drawing on work in phenomenology, philosophy of mind, and several other disciplines. In so doing, he makes clear how phenomenological research can contribute to psychiatry, by helping us to better understand patients' experiences, as well as informing classification, diagnosis, and treatment.

Throughout the book, Ratcliffe also emphasizes the relevance of depression to philosophical enquiry. He proposes that, by reflecting on how experiences of depression differ from 'healthy' forms of experience, we can refine our understanding of both. Hence phenomenological research of this kind has much wider applicability. He further shows how the study of depression experiences can inform philosophical approaches to a range of topics, including interpersonal understanding and empathy, free will, the experience of time, the nature of emotion and feeling, what it is to believe something, and what it is to hope.

This book will be of interest to anyone seeking to understand and relate to experiences of depression, including philosophers, psychiatrists, clinical psychologists, therapists, and those who have been directly or indirectly affected by depression.

Contributor Bio
Matthew Ratcliffe, Professor of Philosophy, Durham University, UK, Department of Philosophy, Durham University

Matthew Ratcliffe is Professor of Philosophy at Durham University, UK. Most of his research addresses issues in phenomenology, philosophy of psychology and philosophy of psychiatry. He is author of Rethinking Commonsense Psychology: A Critique of Folk Psychology, Theory of Mind and Simulation (Palgrave, 2007) and Feelings of Being: Phenomenology, Psychiatry and the Sense of Reality (Oxford University Press, 2008).

1. The World of Depression
2. Experiencing the Possible
3. Depression and the Body
4. Loss of Hope
Psychiatric Expert Testimony: Emerging Applications
Kenneth J. Weiss, Clarence Watson

Key Selling Points
• A unique overview of the cutting edge of forensic psychiatry
• The only text that provides a practical treatment of the science behind human development and the uses of technology as they enter the courtroom
• Includes expert discussion on hot topics like neuroimaging and criminal culpability, fMRI for lie detection, and designer drugs and criminal responsibility:

This is the only text providing a practical treatment of the science behind human development and the uses of technology as they enter the courtroom.

Summary
Psychiatric Expert Testimony: Emerging Applications is for practitioners who need to be at the cutting edge of admissibility in court. The book avoids standard applications, such as the insanity defense and specific capacity assessments, in favor of those that may be controversial or require evidentiary hearings. It is divided into two broad areas: human development and its deviations; and science and technology. In each chapter, the reader will find a discussion of the science behind the testimony and, where applicable, relevant case law. In the human development area, there are discussions of the genesis of moral thinking, how early trauma can affect behavior, how to approach the child witness, and how Autism Spectrum Disorder is regarded in criminal justice. In the technology area, there are diverse discussions, including sleep disorders, fMRI lie detection, the uses of neuroimaging, traumatic encephalopathy, and designer drugs. Dr. Weiss and Dr. Watson provide a framework for understanding why and how the justice system needs expert testimony and the instances where there is resistance to it. Unlike other books, which either treat the subject generally or in a prescriptive manner, Psychiatric Expert Testimony: Emerging Applications provides a foundation for practitioners to use available science and then to fashion their own work product. In this way, the expert is not held to a formula or format. By using the content of Emerging Applications, the practitioner will be better able to fashion expert reports and field questions during evidentiary hearings.

Contributor Bio
Kenneth J. Weiss, M.D
Clinical Professor of Psychiatry, Perelman School of Medicine, University of Pennsylvania

Clarence Watson, J.D., M.D.
Clinical Assistant Professor of Psychiatry, Perelman School of Medicine, University of Pennsylvania

Quotes
In Psychiatric Expert Testimony: Emerging Applications, Weiss and Watson have assembled valuable contributions on contemporary topics related to many of the scientific advances of the last two decades. From the general (e.g., human development and criminal culpability; autism spectrum disorders and criminal justice) to the specific (e.g., fMRI and veracity; sleep disorders and criminal responsibility), these chapters are well-chosen for their relevance to hard questions directed toward forensic mental health experts. This is a very useful book for informing legal practice with science.
Kirk Heilbrun, PhD
Drexel University

A comprehensive and contemporary consideration of the role of expert testimony in civil and criminal cases, focusing on cutting-edge issues that, until now, have screamed out for this sort of careful and thoughtful analysis. Drs Weiss and Watson and their colleagues have done a superlative job.
Michael L. Perlin
Professor of Law
New York Law School

One thing: In almost all chapters, the legal references are a mess, and that will be very problematic for lawyers who might otherwise purchase this excellent book. A good legal researcher could clean it all up in an hour or two, and I'd advise that you retain someone to do that.

"It is clear that the chapter authors are very knowledgeable in their areas. Readers get a good grasp of the topic, supplemented by excellent case examples." -- Doody's Life Sciences Book Review

Table Of Contents

Foreword: Robert L. Sadoff, M.D.
Introduction: Kenneth J. Weiss, M.D. and Clarence Watson, J.D., M.D.
Chapter 1. Expert Testimony: Legal Principles: Clarence Watson, J.D., M.D.
Chapter 2. Criminal Culpability: A Developmental Approach: Nicole Foubister, M.D. and Frank K. Tedeschi, M.D.
Chapter 4. Stress, Trauma, and the Developing Brain: John K. Northrop, M.D., Ph.D. and Steven J. Berkowitz, M.D.
Chapter 6. Using fMRI for Lie Detection: Ready for Court? Octavio Choi, M.D., Ph.D.
Chapter 7. Sleep Disorders and Criminal Responsibility: Clarence Watson, J.D., M.D., Mark R. Pressman, Ph.D., and Kenneth J. Weiss, M.D.
Chapter 8. Neuroimaging and Criminal Culpability: Susan E. Rushing, M.D., J.D. and Daniel Langleben, M.D.
Chapter 9. Chronic Traumatic Encephalopathy: Manish A. Fozdar, M.D. and Helen M. Farrell, M.D.
Chapter 10. Designer Drugs and Criminal Responsibility: Samson Gurmu, M.D. and Kenneth J. Weiss, M.D.

**DSM-5® and the Law**

*Changes and Challenges*

Charles Scott

**Key Selling Points**

- First book to address how DSM-5 addresses the law and forensic evaluations
- Makes extensive use of vignettes to illustrate key points
- Provides an 8 step process to accurately record a DSM-5 diagnosis
- Provides a suggested forensic report template to replace the DSM-IV multiaxial format
- Provides specific guidelines on how to assess malingering under the new DSM-5 manual and criteria

Summary

The Diagnostic and Statistical Manual (DSM) is the most widely used and accepted scheme for diagnosing mental disorders in the United States and beyond. DSM-5 was released with profound changes revealed in the required diagnostic process, specific criteria for previously established diagnoses, as well as the addition and deletion of specific mental disorders. *DSM-5® and the Law* provides an excellent summary of the DSM-5 diagnostic changes and the implications of these changes in various types of criminal and civil litigation. It also provides practical guidelines on how to correctly use the DSM-5 diagnostic process to record diagnoses in a forensic report. Furthermore, *DSM-5® and the Law* highlights unique aspects of the assessment of malingering based on DSM-5 alterations of DSM-IV.

Special features include a summary of relevant diagnostic changes to each chapter topic, an application of the DSM-5 to a wide range of civil and criminal forensic evaluations, practical vignettes throughout the chapters to illustrate key forensic points, chapter tables to highlight relevant information, and focused summary points at the conclusion of each chapter. The reader is provided specific guidance on a range of evidence-based approaches to rate severity of psychotic disorders and a range of considerations for assessing disability.

This is the first book to apply how the DSM-5 changes will impact the specific forensic evaluations with practical guidance on how to face new challenges posed.

**Contributor Bio**

Dr. Scott is a Professor of Clinical Psychiatry and Chief of the Psychiatry and the Law Division at the University of California, Davis. He is a Past-President of the American Academy of Psychiatry and the Law (AAPL) and has been a national instructor for the AAPL Annual Forensic Psychiatry Review Course for over 15 years. He serves as a consultant to the California Department of State Hospitals statewide implementation of DSM-5.

**Quotes**

"This book clearly explains sophisticated nuances of DSM-5 diagnoses that will protect you from making errors on the witness stand. A must-have for all forensic clinicians." -- Phillip J. Resnick, M.D., Case Western Reserve University, Cleveland, OH

"Dr. Scott has provided a comprehensive, scholarly, and insightful review of the process of development of the DSM-5, the American Psychiatric Association's most up-to-date psychiatric diagnostic classification system, and the implications of the changes embodied in the DSM-5 for the field of forensic psychiatry. The chapter authors, experts in their respective fields, have applied their breadth of knowledge and expertise to the analysis of the DSM-5's changes as they relate to criminal, civil, disability, and educational forensic evaluations, including the assessment of malingering. Dr. Scott has masterfully organized this volume such that it provides both in-depth information and practical guidance that will be of invaluable assistance to forensic psychiatrists in addressing the controversies associated with the DSM-5 that may arise in the
courtroom and in incorporating DSM-5's changes into their forensic practices." -- Liza Gold, Georgetown University School of Medicine

Table Of Contents

1. DSM-5: Development and Implementation
   Jessica Ferranti, M.D.

2. DSM-5 and Major Diagnostic Changes
   William Newman, M.D. and Brian Holoyda, M.D.

3. DSM-5: Diagnosing and Report Writing
   Charles Scott, M.D.

4. DSM-5 and Psychiatric Evaluations of Individuals in the Criminal Justice System
   Richard Frierson, M.D.

5. DSM-5: Competencies and the Criminal Justice System
   Stephen Noffsinger, M.D. and Jennifer Piel, J.D, M.D.

6. DSM-5 and Not Guilty by Reason of Insanity and Diminished Mens Rea Defenses
   Stephen Noffsinger, M.D. and Jennifer Piel, J.D, M.D.

7. DSM-5 and Civil Competencies
   Robert Weinstock, M.D, Jennifer Piel, J.D, M.D, and Gregory B. Leong, M.D.

8. DSM-5 and Personal Injury Litigation
   Charles Scott, M.D, Ryan Wagoner, M.D, and Mace Beckson, M.D.

9. DSM-5 and Disability Evaluations
   John Greene, M.D. and Charles Scott, M.D.

10. DSM-5 and Education Evaluations in School Aged Children
    Anne McBride, M.D.

11. DSM-5 and Malingering
    Barbara McDermott, Ph.D. and Charles Scott, M.D.
Psychiatric Care of the Medical Patient (3rd Edition)
Barry S. Fogel, Donna B. Greenberg

Key Selling Points
- Comes with access to the digital book on Oxford Medicine Online
- A classic textbook of medical psychiatry covering a wide range of topics including herbal and nutritional treatments, management of conflicting second opinions, and adapting the physical examination to the medical psychiatric context.

Summary
The third edition of Psychiatric Care of the Medical Patient brings a classic reference text into the twenty-first century. It combines critical scholarship with the voice of expert clinicians who work at the interface of psychiatry with medical specialties. It is meant to be read for pleasure as well as consulted as a reference. The editors have worked with the authors to bring a consistent perspective to the book - one that sees the medical psychiatrist as an agent for bringing a more comprehensive perspective to medical care. Even seasoned and knowledgeable practitioners will find much that is new to them in this book.

The volume covers topics in depth that other books in the field may not cover at all, such as the use of herbal and nutritional therapies for medical-psychiatric symptoms and syndromes, and the choice of questionnaires to supplement history-taking. It looks at old topics in a new way: The chapter on the physical examination applies psychometric considerations to the Babinski sign, describes the method and application of quantitative bedside olfactory testing, and discusses smartphone apps to improve the sensitivity of the examination.

Psychiatric Care of the Medical Patient, 3rd Edition provides concepts and information to facilitate the dialogue between psychiatrists and general medical specialists - minimizing psychiatric jargon and speaking in the common language of caring and curious physicians.

Contributor Bio

**Barry S. Fogel, MD** is a graduate of the UCSF School of Medicine; he also holds advanced degrees in mathematics and in management. He was a resident in neurology in the Harvard–Longwood program and a resident in psychiatry at Stanford; he is certified by the ABPN in neurology and psychiatry and by the UCNS in behavioral neurology and neuropsychiatry. Together with the late Dr. Alan Stoudemire he re-defined and popularized the concept of medical psychiatry in a series of articles and books. In 1988 he co-founded the American Neuropsychiatric Association. His work experience includes directing a medical psychiatric inpatient unit, leading the psychiatric service at a state hospital, consulting to healthcare systems, and working as an expert witness. He is the co-founder and principal scientist for two companies: PointRight Inc., a healthcare data analytics company specializing in post-acute care, and Synchroneuron Inc., a CNS specialty pharmaceutical company. He also is an inventor with numerous patents in the areas of pharmaceuticals, medical devices, and computer software.

**Donna B. Greenberg, MD** is a graduate of University of Rochester School of Medicine. She completed residencies in internal medicine at Boston City Hospital and in psychiatry at the Massachusetts General Hospital. She completed the fellowship in psychosomatic medicine at MGH. She is certified by the ABIM in Internal Medicine and the ABPN in Psychiatry. She has practiced and taught medical psychiatry and psychiatric oncology at the Massachusetts General Hospital and Harvard Medical School for over 30 years, with a special focus on the education of medical students.

Quotes
"Psychiatric Care of the Medical Patient, Third Edition has set a new standard for texts in this area. Fundamentally the book is a true compendium of what the Psychosomatic Psychiatrist must have. It is impossible for a clinician to remember all of this data so it is
mandatory that such a book be at their fingertips!" - Thomas N. Wise, MD, Professor of Psychiatry, Johns Hopkins University School of Medicine, Baltimore, MD

"The third edition of Psychiatric Care of the Medical Patient extends the philosophy that guided the first two editions: that Medical Psychiatry is a distinct subspecialty taking advantage of physicians' full breadth of psychiatric capabilities combined with detailed knowledge of one or more medical-surgical specialties. This is a landmark textbook that should be on the shelf of every physician who cares for patients with comorbid mental and medical disorders." - James R. Rundell, MD, Professor of Psychiatry and Psychology, Mayo Clinic, Rochester, MN

Index
Personality Disorders (Oxford Psychiatry Library)
Giles Newton-Howes

Key Selling Points
- User friendly for busy clinicians
- Provides practical advice highlighted with useful 'key points'
- Diagnostic material is presented in the context of DSM-5 and ICD-11
- Helps clinicians to understand how the diagnosis of personality disorder developed, what it means, how it is characterised and what to do to help patients with personality disorders.

Summary
Part of the Oxford Psychiatry Library (OPL) series, this pocketbook is an essential resource for clinicians, providing guidance on how the diagnosis of personality disorder has developed, what it means, how it is characterised and how best to help patients with personality disorders. This easy-to-use text is ideal for busy clinicians, providing practical advice highlighted with useful 'key points'. The book's structure will take into account the likely major changes in diagnosis as diagnostic classification systems are reviewed (DSM-V and ICD), ensuring it remains a useful tool for clinicians to refer to. This book will serve as a practical reference for psychiatrists, psychiatric trainees, clinical psychologists, GPs with a special interest in mental health, and other mental health clinicians.

Contributor Bio
Giles Newton-Howes, Senior Lecturer, Wellington School of Medicine, Otago University

Dr Newton-Howes graduated in medicine from the University of Otago in 1998 and undertook his training in Psychiatry on the St Marys and Charing Cross training schemes in London. He has worked as a general adult psychiatrist and currently works in the Regional Personality Disorder Service for Capital and Cost District Health Board in New Zealand and as a senior lecturer in the department of psychological medicine at the University of Otago, Wellington. His research interest include the effect of personality on mental state disorder and the interactions between psychiatry and society.

Schizophrenia (Oxford Psychiatry Library) 2nd Edition
David Castle, Peter Buckley

Key Selling Points
- Covers in detail not only the biological and psychological basis of schizophrenia, but also the aetiology and treatment options
- The authors are well known and highly respected
- A comprehensive pocketbook that is relevant to a range of students, trainees and specialists

Outlines the diagnosis, evaluation and treatment of patients with schizophrenia and highlights some of the special considerations clinicians need to be aware of.

Summary
Part of the Oxford Psychiatry Library of pocketbooks, this user-friendly and practical guide will outline the diagnosis, evaluation and treatment of patients with schizophrenia. Co-authored by two global experts on the management of patients with psychosis, this pocketbook will serve as a useful guide for psychiatrists, trainees, psychiatric specialist nurses, and interested general practitioners.

Schizophrenia is one of the most disabling mental illnesses and is also highly prevalent, occurring in approximately 1% of the population and affecting both men and women equally. The disorder has a typical onset of between 15 and 35 years of age and is characterised by impairments in reality, most commonly hallucinations and delusions. It is a highly complex condition and is often confused with other mental disorders such as bipolar disorder. This new edition will cover new DSM-5 diagnostic criteria and to reflect new data and include new longitudinal studies on psychiatric and medical comorbidity, Genetic and environmental factors, new drug therapies, adherence and the role of depots, new advances in psychosocial therapies (CBT, ACT, & cognitive remediation) and includes an updated and expanded appendix.

Contributor Bio
David Castle, Chair of Psychiatry, St Vincent's Hospital, Peter Buckley, Professor and Chairman, Department of Psychiatry and Behavioral Health,

Professor David J Castle MBChB MSc MD MRCPsych FRANZCP is the Chair of psychiatry at St Vincent's Mental Health and The University of Melbourne, Australia. He has extensive clinical and research experience across a wide array of psychiatric issues. In the area of schizophrenia, he has published widely on aspects as diverse as epidemiology, aetiology, gender differences, the role of substance use, and pharmacological and psychosocial treatments. He has published 12 books, including the British Medical Association Mental Health Book of the Year for 2005, "Marijuana and Madness" (co-edited with Prof Robin Murray, Institute of Psychiatry, London).

Prof. Peter F. Buckley, MD, is a professor and chairman of the Department of Psychiatry and Behavioral Health at the Medical College of Georgia in Augusta, Georgia, USA. Dr. Buckley completed his medical degree, residency in psychiatry, and schizophrenia fellowship at University College Dublin, School of Medicine in Ireland. His career in psychiatry has focused on the many aspects of schizophrenia, including treatment strategies and the management of treatment refractory schizophrenia, brain imaging, and the pharmacological management of comorbid conditions such as depression, substance abuse, and aggression.

Oxford Textbook of Correctional Psychiatry
Robert Trestman, Kenneth Appelbaum, Jeffrey Metzne...
Jeffrey L. Metzner received his M.D. from the University of Maryland Medical School in 1975 and completed his psychiatric residency at the University of Colorado's Department of Psychiatry during 1979. He is a Clinical Professor of Psychiatry at the University of Colorado School of Medicine in Denver, Colorado, where he is also Associate Director of the forensic fellowship program.

Dr. Metzner has written extensively on the psychiatric care of prison populations. He has provided consultation to judges, special masters, monitors, state departments of corrections, city and county jails, U.S. Department of Justice, the National Prison Project, and others involved in the field of correctional psychiatry in over 36 states.

Quotes

The Oxford Textbook of Correctional Psychiatry is an important step toward informing public policy makers, correctional administrators, and correctional health professionals about the complexity of identifying and treating prisoners with mental illness and related conditions. The book is comprehensive and readable. It explains physicians' dual duties of non-maleficence and beneficence, while taking readers on a journey that acquaints them with the evidence-based practices and interventions that are known to reduce morbidity and mortality. The authors explore pharmaceutical and non-pharmaceutical interventions with cogent balance.

Robert B. Greifinger MD
Professor of Health and Criminal Justice and Distinguished Research Fellow at John Jay College of Criminal Justice

In this multi-authored text editors Bob Trestman, Ken Appelbaum, and Jeff Metzner have put together an invaluable resource for all psychiatrists interested in treating patients in correctional psychiatry. Chapters are written by the leading United States and International experts in correctional psychiatry. The text comprehensively covers the waterfront of what any psychiatrist interested in treating patients or improving systems in corrections needs to know. I highly recommend this book for both novice and experienced practitioners.

Jeffrey S. Janofsky, M.D.
Director, Psychiatry and Law Program
Johns Hopkins University School of Medicine

The editors have used their encyclopedic vision of correctional psychiatry along with a group of prominent contributors to create an outstanding resource. The text provides theoretical and practical insights into the clinical, legal and ethical issues that are relevant to correctional psychiatry and easily earns its place as a must read for forensic mental health professionals, educators, and trainees. Attorneys, administrators of jails and prisons, and policy makers will also find this well written text a valuable resource.

J. Richard Ciccone, Professor of Psychiatry, University of Rochester School of Medicine and Dentistry

The publication of this Oxford Textbook of Correctional Psychiatry, edited by three renowned correctional psychiatrists, could not be timelier as correctional psychiatry has undergone extraordinarily dramatic changes in recent years. This is the first textbook devoted solely to correctional psychiatry - which is now recognized as a critical component of community psychiatry. The breadth and depth of this textbook is epitomized by the fact that there are thirteen sections each of which contain separate chapters - by major authorities - usually of profound depth. Topics often neglected or omitted are thoroughly elucidated and, most importantly, accompanied by suggestions for the clinical practitioner. This textbook is a superb resource and will, no doubt, be the "gold standard" in correctional psychiatry for the foreseeable future.

Henry C. Weinstein, MD
Clinical Professor of Psychiatry
New York University Medical Center

"At last, a truly comprehensive textbook on correctional psychiatry! Edited by well known leaders in correctional psychiatry, the Oxford Textbook of Correctional Psychiatry, addresses all aspects of correctional psychiatry, including little discussed, but critical and useful topics. Each chapter is concise, cogent, clearly written, and therefore remarkably easy, pleasureful to read. As a comprehensive text of the numerous mental health challenges as well as the structures, procedures, cultures and dynamics within correctional systems, the Oxford Textbook belongs in the professional
"In this multi-authored text, editors Trestman, Appelbaum, and Metzner have put together an invaluable resource for all psychiatrists interested in treating patients in correctional psychiatry. I highly recommend this book for both novice and experienced practitioners." -- Jeffrey S. Janofsky, M.D., Associate Professor of Psychiatry and Behavior Sciences, Director, Psychiatry and Law Program, Johns Hopkins University School of Medicine

Composition in the Digital World  
Conversations with 21st Century American Composers  
Robert Raines

Key Selling Points
- In depth interviews with leading composers of contemporary classical music
- Explores the impact of digital technology on the creative process
- Covers subjects ranging from the source of inspiration, to work habits, to the business of music

Summary
American composers are at the forefront of a renaissance in concert music, in the process expanding the very definition of the category. The impact of digital technology on the creative process and the unprecedented diversity of contemporary composers are arguably among the catalysts driving the rebirth.

In this series of personal interviews with some of the most prominent composers of art music currently working on the American music scene, composer and educator Robert Raines leads the intimate conversations through subjects ranging from the source of inspiration to work habits, the realities of the business of music, and the impact of technology on music and life in the 21st century. The musicians who participated in these conversations are as different from one another as might be imagined, both in styles of music and approaches to life and art, resulting in a series of stories that offer a kaleidoscopic view of the many paths to creativity, yet a common thread that runs through the interviews is the passionate artistic drive that is shared by all. The inspirational stories of struggles and successes, told in the artists' own words and distinctively framed by their individual personalities - humorous, curmudgeonly, serious, serene, and playful by turns - is a delightful and thought-provoking journey full of personal insights, advice, and sharp observations on composing music in a changing, technology-driven world.

A loving homage to the artistic spirit, this book is a must-read for students of composition, professors and scholars of music, composers and aspiring composers, and anyone interested in the subjective process of writing music. This rich and entertaining collection provides a unique glimpse into the workings of the creative spirit in the digital age.

Contributor Bio
As a composer, musician, educator, and creative director, Robert's career has spanned both music and visual arts, creating award-winning work in both fields. Raised in New York City's Greenwich Village by parents who were active in the arts, he was immersed in music, theater, literature, and the visual arts from an early age. His experience includes working for a number of years as a guitarist and composer in New York City, producing as well as performing on many recordings of jazz, blues, and popular music. He now composes full time and has written for theater and film in addition to concert music.

Quotes
"What a rare opportunity to eavesdrop on personal conversations with such a diverse and impressive group of American composers. Robert Raines masterfully engages each artist to share insights, reflections, and experiences -- a collection that will surely change how you view contemporary composition."--Darla S. Hanley, PhD, Dean of the Professional Education Division, Berklee College of Music

"This fascinating book will make a valuable addition to a course in contemporary music for music majors and non-majors alike, as well as a springboard for one-on-one discussion in the composition studio."-- Peter Spencer, DMA, Professor Emeritus, Music Theory and Composition, Florida State University

Berlioz on Music
Selected Criticism 1824-1837
Katherine Kolb, Samuel N. Rosenberg

Key Selling Points
• Unprecedented translations of articles from Berlioz's most important fourteen years of writing, presented in chronological order
• Engaging and accessible English translation of a notoriously difficult text
• Compelling entry point into the life and writing of one of the most important figures of 19th century French cultural life

Unprecedented translations of articles from Berlioz's most important fourteen years of writing, presented in chronological order

Summary
As a composer, Hector Berlioz embodied his century as the quintessential Romantic artist. Niccolo Paganini called him "Beethoven's only heir," and for a young Richard Wagner, he was dazzling as a composer, orchestra conductor, and critic. But Berlioz was known as much for his writings as for his music, and for decades Berlioz scholars have stressed the need for a good English-language anthology of his criticism. Featuring new translations and commentary by Katherine Kolb and Samuel N. Rosenberg, Berlioz on Music: Selected Criticism 1824-1837 is that volume.

Berlioz's centrality as a critic results from his literary brilliance, his location in Paris -- the music capital of the nineteenth century -- and his 28-year tenure at the powerful Journal des débats. As one of its founding editors and principal writers, Berlioz contributed about 250 articles to the publication. Berlioz on Music comprises articles from the first 14 years of Berlioz's public writings, given in chronological order and, with few exceptions, in their entirety. Following chronology affords an overview of Berlioz's evolution as critic and of a key phase in the development of modern musical culture. The volume also presents explanatory data in engagingly composed introductions and footnotes, which elucidate Berlioz's references to persons, musical and literary works, historical events, and more. The reader is allowed to follow musical events during one of the richest periods in French cultural history, including the revolutionary decade surrounding 1830, a year marked by Victor Hugo's victory for the Romantics in the Classical bastion of the Théâtre-Français, by the premiere of Berlioz's Fantastic Symphony, and by the toppling of the Restoration monarchy. The result is an engaging collection of Berlioz's lively prose, presented with scholarly rigor and rendered in accessible English. Music historians, both professional and amateur, as well 19th century European history enthusiasts will find Berlioz on Music a compelling introduction to one of the richest periods of French culture.

Contributor Bio

Katherine Kolb is Professor Emerita of French and German at Southeastern Louisiana University. She also founded and directed the Kolb-Proust Archive at the University of Illinois-Urbana, where she collaborated on the first anthology of Marcel Proust's correspondance (Marcel Proust, Lettres, Plon 2004).

Samuel N. Rosenberg is Professor Emeritus of French and Italian at Indiana University, where he taught language and linguistics -- including translation -- and literature of the Middle Ages. His translations, like his philological scholarship, have appeared in a wide variety of publications both American and French.

Quotes

"This is a finely-judged anthology, impeccably presented and all the more valuable for its inclusion of some lesser-known treasures from the composer's early critical career. Rosenberg's translations give us Berlioz at full throttle, while Kolb's accompanying texts combine wisdom and empathy as they deftly set the scene." - Katharine Ellis, University of Bristol, author of Music Criticism in Nineteenth-Century France: La Revue et Gazette musicale de Paris, 1834-1880
"Katherine Kolb's searching essay on the role and function of music criticism in the early 19th century provides a brilliant introduction to this selection of articles written by Berlioz in his early years, years when his views on music were as colourfully expressed as the orchestration of the Symphonie fantastique and as deeply felt as the love scene in Roméo et Juliette." - Hugh Macdonald, General Editor of the New Berlioz Edition, author of Beethoven's Century (2008), Music in 1853 (2012) and Bizet (2014)

"Berlioz was forced to write criticism for a living, and hated the necessity, but he wrote marvellously, using his position to attack what was bad and exalt what was good, with the enthusiasm and caustic humour that were his trademarks. He collected and revised some of it later in books; but this welcome anthology shows him at grips with the day-to-day Paris music scene, at the moment of putting pen to paper." - David Cairns, author of Berlioz(2000).

Table Of Contents

Contents
1. MUSICAL POLEMIC: On "Dilettanti"
2. MUSICAL POLEMIC: On Armide and Gluck
3. THE ARTS. Observations on Classical Music and Romantic Music, Le Correspondant, October 22, 1830
4. Beethoven and the Egyptian Pyramids; Weber's Freischütz; Beethoven's "Pastoral" Symphony
5. Liszt, Chopin, and Ferdinand Hiller; launching of the Fantastic Symphony
6. MUSIC REVIEW: Mozart's Don Giovanni at the Théâtre-Italien; Beethoven quartets
7. MUSIC REVIEW: Beethoven by the Müller Quartet; Chopin; Mozart's Don Giovanni vs. Don Juan; Handel festival in London
8. MUSIC REVIEW: Women performers; violinist Hauman's communicative emotion; Beethoven's Fifth Symphony and Shakespeare's Othello; Cherubini aria sung by Ponchard; rarity of great singers
9. Gluck (Part I). Gazette musicale de Paris, June 1, 1834. Biographical sketch; "critique admirative" of monologue from II Telemaco
10. MUSIC REVIEW: Turkish music; Beethoven's "Eroica" booed in Bordeaux; musical conditions in the provinces; oasis of progress in Lyon
11. MUSIC REVIEW: Jealousy vs. solidarity among artists; trials of young composers; ironies on Conservatoire training; Henri Reber quartets; Liszt performs in his piano trio
12. Music Review: Choron, voice teacher and propagator of sacred music of the past; funeral service at the Invalides: Mozart Requiem, Jommelli, and Palestrina
13. Funeral service for Choron; Decline of religious music in France; destruction of old-regime choir schools; church ban on women singers
14. Rossini's William Tell (Part I)
15. BOIELDIEU: Funeral music for Boieldieu; survey of requiems; Cherubini
16. NOTICE TO READERS IDLE ENOUGH TO READ MY ARTICLES: Satirical announcement of Berlioz's upcoming concert, conducted by Girard; amusing summary of Harold in Italy
17. IPHIGENIA IN TAURIS (Part I): Early enthusiasm for Gluck; life-changing first experience of Gluck's masterpiece at the Opéra (1821).
18. Music review: à Elle, Letters for Piano by Chrétien Urhan
19. THEATRE-ITALIEN: Gabussi's Ermanni
21. CONCERT SOCIETY OF THE CONSERVATOIRE: First Concert [8th season]
22. LE MOINE, text by émilien Pacini, music by G. Meyerbeer
23. THIRD CONCERT AT THE CONSERVATOIRE: Symphonies by Haydn and Beethoven
24. Music REVIEW: Royal Academy of Music: Premiere of la Juive, opera in five acts by MM.
25. Music Review. Concert by the Pupils of Choron at the Hôtel de Ville
27. SIXTH CONSERVATOIRE CONCERT: Analysis of Beethoven's Fifth Symphony
28. CONCERT BY M. LISZT
29. REQUIEM at the Invalides
30. ON THE SCORE OF ZAMPA
31. MUSIC REVIEW: Bellini's I Puritani at the Théâtre-Italien, Cherubini's Treatise on Counterpoint—or a volume of poetry by Chaudesaiques
32. MOZART'S DON JUAN
34. OPÉRA-Comique. Concerts. Virtuosos and composers
35. First concert [of the season] at the Conservatoire: scene from Mozart's Idomeneo eclipses Beethoven's Seventh Symphony
36. LES HUGUENOTS: Acts 4 and 5
37. Concerts at the Conservatoire: The Magic Flute and The Mysteries of Isis
38. LISZT
39. ANTOINE REICHA
40. MUSICAL ENTERTAINMENTS: Le Siège de Corinthe at the Opéra; M. Ole Bull; M. Labarre and his harp school; Music of public festivals
41. PROGRESS OF MUSICAL EDUCATION IN FRANCE: M. Joseph Mainzer and M. Aubéry du Boulley
42. Polytechnical Society: Awards ceremony
43. OPéra: William Tell. Debut of Duprez
44. Royal Academy of Music: Premiere of La Chatte métamorphosée en femme, ballet

The Country Music Reader
Travis D. Stimeling

Key Selling Points
• Offers access to numerous out-of-print primary sources.
• Each reading is accompanied by an insightful introduction and bibliography for further reading.
• Ideal companion for professional scholars and students alike.

An anthology of primary source readings encompassing the history of country music from circa 1900 to the present, offering firsthand insight into the changing role of country music within both the music industry and American culture.

Summary
In The Country Music Reader Travis D. Stimeling provides an anthology of primary source readings from newspapers, magazines, and fan ephemera encompassing the history of country music from circa 1900 to the present. Presenting conversations that have shaped historical understandings of country music, it brings the voices of country artists and songwriters, music industry insiders, critics, and fans together in a vibrant conversation about a widely loved yet seldom studied genre of American popular music. Situating each source chronologically within its specific musical or cultural context, Stimeling traces the history of country music from the fiddle contests and ballad collections of the late nineteenth and early twentieth centuries through the most recent developments in contemporary country music. Drawing from a vast array of sources including popular magazines, fan newsletters, trade publications, and artist biographies, The Country Music Reader offers firsthand insight into the changing role of country music within both the music industry and American cultural, and presents a rich resource for university students, popular music scholars, and country music fans alike.

Contributor Bio
Travis D. Stimeling is an Assistant Professor of Music History at West Virginia University. He is the author of Cosmic Cowboys and New Hicks: The Countercultural Sounds of Austin’s Progressive Country Music Scene (OUP, 2011) and has published widely on American music topics.

Sounds French
Globalization, Cultural Communities and Pop Music in France, 1958-1980
Jonathyne Briggs

Key Selling Points
- Offers a fresh look at the role of popular music in postwar French culture.
- Includes discussion of less investigated examples of French music.
- Draws on a combination of theoretical models from the fields of history, cultural studies, and new musicology.
Offers a fresh look at the role of popular music in postwar French culture

Summary
Sounds French examines the history of popular music in France between the arrival of rock and roll in 1958 and the collapse of the first wave of punk in 1980, and the connections between musical genres and concepts of community in French society. During this period, scholars have tended to view the social upheavals associated with postwar reconstruction as part of debates concerning national identity in French culture and politics, a tendency that developed from political figures' and intellectuals' concerns with French national identity. In this book, author Jonathyne Briggs reorients the scholarship away from an exclusive focus on national identity and instead towards an investigation of other identities that develop as a result of the increased globalization of culture.

Popular music, at once individual and communal, fixed and plastic, offers an illuminating window into such transformations in social structures through the ways in which musicians, musical consumers, and critical intermediaries re-imagined themselves as part of novel cultural communities, whether local, national, or supranational in nature. Briggs argues that national identity was but one of a panoply of identities in flux during the postwar period in France, demonstrating that the development of hybridized forms of popular music provided the French with a method for expressing and understanding that flux. Drawing upon an array of printed and aural sources, including music publications, sound recordings, record sleeves, biographies, and cultural criticism, Sounds French is an essential new look at popular music in postwar France.

Contributor Bio
Jonathyne Briggs is an associate professor of history at Indiana University Northwest, where he teaches on European youth culture and the history of pop music. He has published extensively on French popular music in the 1960s and '70s in journals and collections. He lives in Chicago, still toys with his favorite guitar, and hopes that someday Daft Punk will play at his house.

Understanding Sound Tracks Through Film Theory
Elsie Walker

Key Selling Points
- Covers such a broad range of theoretical approaches to sound tracks for a general scholarly audience
- Emphasizes transferable skills of close aural analysis
- Deals with an exceptionally broad range of films
- Includes a glossary of terms
- Features over a hundred film stills that enliven the reading experience

Breaks new ground by redirecting the arguments of foundational texts within film theory to film sound tracks.

Summary
Understanding Sound Tracks Through Film Theory breaks new ground by redirecting the arguments of foundational texts within film theory to film sound tracks. Walker includes sustained analyses of particular films according to a range of theoretical approaches: psychoanalysis, feminism, genre studies, post-colonialism, and queer theory. The films come from disparate temporal and industrial contexts: from Classical Hollywood Gothic melodrama (Rebecca) to contemporary, critically-acclaimed science fiction (Gravity). Along with sound tracks from canonical American films including The Searchers and To Have and Have Not, Walker analyzes independent Australasian films: examples include Heavenly Creatures, a New Zealand film that uses music to empower its queer female protagonists; and Ten Canoes, the first Australian feature film with a script entirely in Aboriginal languages. Understanding Sound Tracks Through Film Theory thus not only calls new attention to the significance of sound tracks, but also focuses on the sonic power of characters representing those whose voices have all too often been drowned out.

Understanding Sound Tracks Through Film Theory is both rigorous and accessible to all students and scholars with a grasp of cinematic and musical structures. Moreover, the book brings together film studies, musicology, history, politics, and culture and therefore resonates across the liberal arts.

Contributor Bio
Elsie Walker is Associate Professor of Film Studies at Salisbury University, Maryland. She has taught film in three countries (New Zealand and England, as well as the United States) and she has published many articles on film, sound tracks, and adaptations of Shakespeare. She co-edited Conversations With Directors (2008), and she is coeditor-in-chief of Literature/Film Quarterly.

Quotes
"Elsie Walker's multifaceted approach in Understanding Sound Tracks Through Film Theory provides a rich, strategic bridging of musicology to the venerable and varied tenets of film theory. Rigorously researched, it is pioneering inquiry, crowned by a bevy of stimulating analyses." -- Ron Sadoff, Director, NYU Steinhardt Film Music and co-founder, Music and the Moving Image

"Deftly negotiating the territory between introducing theoretical concepts and developing nuanced analyses, Walker's approach is ideally suited to engaging those new to considering how profoundly music and sound influence the experience of cinema." -- Robynn J. Stilwell, Georgetown University

The films come from disparate temporal and industrial contexts: from Classical Hollywood Gothic melodrama (Rebecca) to contemporary, critically-acclaimed science fiction (Gravity). Along with sound tracks from canonical American films including The Searchers and To Have and Have Not, Walker analyzes independent Australasian films: examples include Heavenly Creatures, a New Zealand film that uses music to empower its queer female protagonists; and Ten Canoes, the first Australian feature film with a script entirely in Aboriginal languages. Understanding Sound Tracks Through Film Theory thus not only calls new attention to the significance of sound tracks, but also focuses on the sonic power of characters representing those whose voices have all too often been drowned out.

Understanding Sound Tracks Through Film Theory is both rigorous and accessible to all students and scholars with a grasp of cinematic and musical structures. Moreover, the book brings together film studies, musicology, history, politics, and culture and therefore resonates across the liberal arts.

Contributor Bio

Elsie Walker is Associate Professor of Film Studies at Salisbury University, Maryland. She has taught film in three countries (New Zealand and England, as well as the United States) and she has published many articles on film, sound tracks, and adaptations of Shakespeare. She co-edited Conversations With Directors (2008), and she is coeditor-in-chief of Literature/Film Quarterly.

Quotes
"Elsie Walker's multifaceted approach in Understanding Sound Tracks Through Film Theory provides a rich, strategic bridging of musicology to the venerable and varied tenets of film theory. Rigorously researched, it is pioneering inquiry, crowned by a bevy of stimulating analyses." --Ron Sadoff, Director, NYU Steinhardt Film Music and co-founder, Music and the Moving Image

"Deftly negotiating the territory between introducing theoretical concepts and developing nuanced analyses, Walker's approach is ideally suited to engaging those new to considering how profoundly music and sound influence the experience of cinema." --Robynn J. Stilwell, Georgetown University

Including Everyone
Creating Music Classrooms Where All Children Learn
Judith Jellison

Key Selling Points
- Comprehensive coverage of the topic, useful for teachers at all levels and all settings
- Approach grounded in principles prevalent in special education practices and law
- Provides extensive resources, including strategies, adaptations, instructional materials, and ideas for group activities

Summary
Many practical books for music educators who work with special needs students focus on students' disabilities, rather than on the inclusive classroom more generally. In Including Everyone: Creating Music Classrooms Where All Children Learn, veteran teacher and pedagogue Judith Jellison offers a new approach that identifies broader principles of inclusive music instruction writ large. As she demonstrates in this aptly-titled book, the perceived impediments to successfully including the wide diversity of children in schools in meaningful music instruction often stem not from insurmountable obstacles but from a lack of imagination. How do teachers and parents create diverse musical communities in which all children develop skills, deepen understanding, and cultivate independence in a culture of accomplishment and joy?

Including Everyone equips music teachers with five principles of effective instruction for mixed special needs / traditional settings that are applicable in both classroom and rehearsal rooms alike. These five guidelines lay out Jellison's argument for a new way to teach music that shifts attention away from thinking of children in terms of symptoms. The effective teacher, argues Jellison, will strive to offer a curriculum that will not only allow the child with a disability to be more successful, but will also apply to and improve instruction for typically developing students.

In this compelling new book, Judith Jellison illustrates what it takes to imagine, create, and realize possibilities for all children in ways that inspire parents, teachers, and the children themselves to take part in collaborative music making. Her book helps readers recognize how this most central component of human culture is one that allows everyone to participate, learn, and grow. Jellison is a leader in her field, and the wealth of knowledge she makes available in this book is extensive and valuable. It should aid her peers and inspire a new generation of student teachers.

Contributor Bio

Judith Jellison is the Mary D. Bold Regents Professor of Music in the Sarah and Ernest Butler School of Music at the University of Texas at Austin where she is a member of the Academy of Distinguished Teachers and holds the title of University Distinguished Teaching Professor.

Quotes

"Judith Jellison has written a landmark book that music and special educators will use as a guide for how to include and teach all children with exceptionalities." - Kimberly McCord, Professor of Music Education, School of Music, Illinois State University

"[A] substantial addition to the literature on music education for students who are struggling in school and those with disabilities. Jellison addresses some of the most important initiatives in education today, as well as the attitudes and principles that govern successful inclusion practices." - Alice-Ann Darrow, Irvin Cooper Professor of Music Education and Music Therapy, College of Music, Florida State University

Interactive Composition
Strategies Using Ableton Live and Max for Live
V.J. Manzo, Will Kuhn

Key Selling Points
• Ideal for beginners and intermediate Ableton users
• Covers the full range of electronic music styles, with both historical context and practical applications
• Offers useful learning exercises for readers to complete
• Features a comprehensive companion website with practical examples
Empowers readers with the skills and insight needed to compose and perform electronic popular music in a variety of popular styles.

Summary
Interactive Composition empowers readers with all of the practical skills and insights they need to compose and perform electronic popular music in a variety of popular styles. The book begins by introducing all of the tools involved in creating interactive compositions through the software Ableton Live and Max for Live. The following chapters then put the tools to use by both describing particular musical styles and also teaching readers how to compose and perform within these styles using the software. As readers progresses through the book, they will learn to use the software to facilitate their own unique compositional objectives.

This book takes readers through all of the steps in designing interactive music compositions. It is geared toward both beginners as well as intermediate and advanced readers, and so readers with even little experience working with digital audio software will quickly learn how to design powerful systems that facilitate their unique compositional ideas.

A particular feature of this book is that it discusses the historical context of several electronic music styles used by DJs, electronic musicians, and other artists, and then describes, using software, the technical process used in the composition and performance of these styles. Each chapter leads readers to create an original composition in a given style and also discusses the techniques that can be used to perform the piece in an idiomatic fashion.

Kodaly in the Kindergarten Classroom
Developing the Creative Brain in the 21st Century
Micheal Houalah, Philip Tacka

Key Selling Points
- First comprehensive handbook to apply Kodaly concepts to teaching music in early childhood classrooms
- Fully integrated with Kodaly Today
- Based on ten years of field-testing with kindergarten music teachers in variety of locations
- Features methodology specifically developed for the 21st century

First comprehensive handbook to apply Kodaly concepts to teaching music in early childhood classrooms

Summary
Since the mid-twentieth century, Zoltán Kodály's child-developmental philosophy for teaching music has had significant positive impact on music education around the world, and is now at the core of music teaching in the United States and other English speaking countries. Kodály in the Kindergarten Classroom is the first comprehensive handbook to update and apply the Kodály concepts to teaching music in early childhood classrooms.

Kodály in the Kindergarten Classroom provides teachers with a step-by-step road map for developing children's performance, creative movement, and literacy skills in an organic and thoughtful manner. Through six years of field-testing with music kindergarten teachers in the United States, Great Britain, and Hungary (the home country of Zoltán Kodály), authors Micheál Houalah and Philip Tacka have developed a methodology specifically for 21st century classrooms. Houalah and Tacka use the latest research findings in cognition and perception to create a system not only appropriate for kindergarteners' particular developmental stages but also one which integrates vertically between kindergarten and elementary music classes. The methods outlined in this volume encourage greater musical ability and creativity in children by teaching kindergarteners to sing, move, play instruments, and develop music literacy skills. In addition, Kodály in the Kindergarten Classroom promotes critical thinking, problem solving, and collaboration skills. Although the book uses the Kodály philosophy, its methodology has also been tested by teachers certified in Orff and Dalcroze, and has proven an essential guide for teachers no matter what their personal philosophy and specific training might be.

Over 100 children's books are incorporated into Kodály in the Kindergarten Classroom, as well as 35 detailed lesson plans that demonstrate how music and literacy curriculum goals are transformed into tangible musical objectives. Scholarly yet practical and accessible, this volume is sure to be an essential guide for kindergarten and early childhood music teachers everywhere.

Contributor Bio

Drs. Micheál Houalah and Philip Tacka are co-authors of: Kodály Today: A Cognitive Approach to Elementary Music Education and From Sound to Symbol: Fundamentals of Music published by Oxford University Press, the Sound Thinking Series published by Boosey & Hawkes including Music for Sight-Singing and Ear Training Volumes I & II and Sound Thinking: Developing Musical Literacy Volumes I & II, Zoltán Kodály: A Guide to Research (Garland Publishing Inc.), and numerous articles published both here and abroad. Both have presented papers both nationally and internationally on aspects of music theory, music history and Kodály studies and perception and cognition. They are faculty members for the Kodály Certification Program at the University of Texas.

The Positive Pianist
How Flow Can Bring Passion to Practice and Performance
Thomas J. Parente

Key Selling Points
- Introduces Mihaly Csikszentmihalyi's concept of flow to piano playing
- Uses psychological theory to improve music performance and practice
- Includes companion website with 45 videos

Summary
In The Positive Pianist: How Flow Can Bring Passion to Practice and Performance, author Thomas J. Parente applies the concept of flow to the practice of piano playing, demonstrating how student musicians can experience enjoyment and confidence from succeeding at something that challenges them to an engaging level. By using Mihaly Csikszentmihalyi's theory of flow to musical performance, Parente shows that linking productivity and enjoyment in piano playing has a positive impact on students, motivating them to practice more in order to experience flow again; this creates optimal learning conditions for piano practicing. As the chapters progress, Parente shows students how to evaluate their own progress and offers teachers the tools to impart on their students an optimal practice method: one informed by flow. Parente argues for an objective, goal-oriented backdrop that will lead piano students to achieve greater confidence, accuracy, and musicality. The Positive Pianist draws on the author's forty years of teaching experience and research to show piano students and their teachers how to develop a productive, focused mental state when practicing the piano.

Contributor Bio
Dr. Thomas J. Parente is an Associate Professor of Piano at Westminster Choir College of Rider University, and maintains an active studio of private piano students. A frequent clinician, he has presented workshops, courses, and clinics both nationally and internationally.

Quotes
"This is a well-written, thoughtful treatise on a vital part of our profession, and the language Parente employs befits the intelligence and integrity of the author and his targeted audience. I recommend it for all piano majors." - Tony Caramia, Professor of Piano, Eastman School of Music

"Thomas Parente’s focus on research-based learning and positive flow makes The Positive Pianist a unique and welcome addition to the field of piano pedagogy." - Scott McBride Smith, Cordelia Brown Murphy Professor of Piano Pedagogy, School of Music, University of Kansas

With Passionate Voice
Re-Creative Singing in Sixteenth-Century England and Italy
Robert Toft

Key Selling Points
- The first practical guide to the art of re-creative singing in the sixteenth century (c. 1500 - c. 1620)
- Demonstrates how vocalists today can use these methods to personalize music
- Uses musical and non-musical historical documents to reconstruct 16th century singing

The first practical guide to the art of re-creative singing in the sixteenth century

Summary
Musicians in the 16th century had a vastly different understanding of the structure and performance of music than today's performers. In order to transform inexpressively notated music into passionate declamation, Renaissance singers treated scores freely, and it was expected that each would personalize the music through various modifications, which included ornamentation. Their role was one of musical re-creation rather than of simple interpretation—the score represented a blueprint, not a master plan, upon which they as performer built the music. As is now commonly recognized, this flexible approach to scores changed over the centuries; the notation on the page itself became an ostensible musical Urtext and performers began following it much more closely, their sole purpose being to reproduce what was thought to be the composer's intentions. Yet in recent years, scholars and performers are once again freeing themselves from the written page—but the tools for doing so have long been out of reach.

With Passionate Voice gives these tools to modern singers of Renaissance music, enabling them to learn and master the art of "re-creative singing." Providing a much-needed historically-informed perspective, author Robert Toft discusses the music of composers ranging from Marchetto Cara to John Dowland in the context of late Renaissance rhetoric, modal theory (and its antecedents in language), and performance traditions. Focusing on period practice in England and Italy, the two countries which produced the music of greatest interest to today's performers, Toft reconstructs the style of sung delivery through contemporary treatises on music, rhetoric and oratory. Toft remains faithful to the ways these principles were explained in the period, and thus breathes new life into this vital art form. With Passionate Voice is sure to be essential for vocalists, teachers and coaches of early music repertoire.

Contributor Bio

Robert Toft has pursued a career as a vocal coach, accompanist, and researcher. He has published five books on the performance practices of singing between the 16th and 19th centuries and has given master classes, workshops, and lectures on historically-informed performance in Australia, Britain, Canada, Ireland, Switzerland, and the USA. He is Professor of Music at Western University in London, Canada.

Master Singers
Advice from the Stage
Donald George, Lucy Mauro

Key Selling Points
• Features interviews with some of today's foremost opera singers
• Offers invaluable insights on life as a professional opera singer
• Easy to use format with interview quotes grouped by topic

Summary
There is often a dichotomy between the academic approach to singing that voice students learn in the studio and what professional singers do on the operatic and concert stage. Great singers at the top of the performing profession achieve their place with much analysis and awareness of their technique, art, interpretation and stagecraft that goes far beyond academic study and develops over years of experience, exposure, and the occasional embarrassing error. Master Singers brings these insights to the student, teacher, and emerging professional singer, giving them many needed signs and signals along the road to achieving their own artistry and established career.

Through interviews with some of today's most accomplished and renowned concert and operatic singers, including Stephanie Blythe, David Daniels, Joyce DiDonato, Denyce Graves, Thomas Hampson, Jonas Kaufmann, Simon Keenlyside, and Ewa Podles, Master Singers provides vocalists making the transition from student to professional with indispensable advice on matters ranging from technique and its practical application for effective stage projection to the practicalities of the business of professional singing and maintaining a career to recommendations for vocal hygiene and longevity in singing.

Rather than relying on a traditional one-singer-at-a-time structure, Donald George and Lucy Mauro distill answers to a range of essential, probing questions into a thematic approach, creating not a standard interview book but a true reference for emerging professional singers. An indispensable resource and reliable guide, Master Singers will find its place on the bookshelf of singers of this generation and the next.

Contributor Bio
Donald George's career as a lyric tenor has spanned the great opera and concert stages of the world, from La Scala, Milan to Berlin, Paris, Vienna, Barcelona, Buenos Aires, and Tokyo, among many others, working with such conductors as Bernstein, Masur, Tate, Menuhin and Jurowski. He has recorded for such labels as Sony, Phillips Classic, Naxos, Delos, Bavarian Radio, and Teldec. In 2008 he joined the faculty of The Crane School of Music, SUNY Potsdam as Professor of Voice. His students are regional and national competition winners and are singing in numerous professional venues in Europe and North America. He resides in Germany and New York.

Lucy Mauro, pianist, is an Associate Professor at West Virginia University. The Journal of Singing calls her "a perfect partner". Her recordings with tenor Donald George on the Delos label have been acclaimed in Gramophone and selected as a Recording of the Year 2011 by MusicWeb International, among other recognitions. Their latest CD, Songs and Arias of Joseph Weigl, was recorded in conjunction with the Esterházy Festival in Austria. Her website with Donald George is www.duodrama.net.

The 21st Century Singer
Making the Leap from the University into the World
Susan Mohini Kane

Key Selling Points
- Includes exercises in both practical planning and introspection
- A holistic approach to professional development for classical singers new to the job market
- Reframes the field of singing and highlights new career paths

Summary
The vast majority of singers with a degree in performance are un- or under-employed in their field. Despite the fact that talented singers are discovered every day, there are far too few jobs in the field of classical music to accommodate all of them, a problem evidenced by regular reports of opera companies and symphony orchestras closing their doors. Young classical singers, particularly recent graduates of music programs, need not only artistic ability, but also intelligence and an acute business sense to navigate the world of professional singing.

In The 21st-Century Singer: Making the Leap from the University into the World, author Susan Mohini Kane has created a user-friendly guide for these recent graduates. Kane combines the benefits of an instructional manual with those of a self-reflective workbook to provide emerging classical singers with both practical and inspirational advice. She begins with a section on self-evaluation, allowing readers to define what motivates their desire to sing professionally and reflect on their passions, before moving on to career advice. In the sections that follow, Kane presents a variety of career paths, such as singing, teaching, and consulting-realistic alternatives to the rise to stardom as an “overnight sensation” that so few will experience and provides the reader with the tools to develop a concrete plan for whichever path they decide to pursue. Other sections offer instruction on how to develop support systems, train oneself holistically, and take advantage of the newest technological resources available for professional self-promotion. With its dual emphasis on artistic motivation and modern-day business sense, The 21st-Century Singer will prove an essential text for anyone pursuing a professional singing career.

Contributor Bio
Professor of voice and opera and professional classical singer, Susan Mohini Kane truly bridges the gap between the university and the world. She performs with local symphonies and opera companies as well as doing concerts and recitals with her own duo: Kristof & Kane. Her CD, A Moment of Joy is available on iTunes and she is working on another for health and wellness communities. Kane teaches Bridging the Gap and opera workshops, master classes, voice lessons, and courses at universities and opera training programs throughout the United States and Internationally.

The Broadway Song
A Singer's Guide
Mark Ross Clark

Key Selling Points
- Practical advice for every performer of musical theater
- Includes concise contextual information
- Features interviews with key performers, composers, and lyricists
- Over 100 classic and contemporary songs covered

Summary
Truly powerful vocal performance in musical theater is more than just the sum of good vocal tone and correct notes. As experienced teacher, director, and performer Mark Ross Clark lays out in *The Broadway Song*, powerful performance communicates the central function of a song within the context of the surrounding narrative, or the "truth" of a song. Because unstaged performances of a song, such as auditions, are key to the success of all aspiring singers, Clark provides here the essential practical manual that will help performers choose the right pieces for their vocal abilities and identify the key truths of them.

Clark begins by walking readers conceptually through how a song's truth is based in contexts: what show is a song from? Which character sings it? When in the show does it occur? Answering these questions will lead readers to more convincing performances that are grounded in the text, music, character, context, and larger environment (setting, time frame, and circumstances). *The Broadway Song* provides a comprehensive guide to the formal characteristics of key Broadway songs on a song-by-song basis, including main voice type, secondary voice qualities (such as soprano-lyric or alto-comic), range and tessitura, as well as larger contextual materials about the source -- from the musical's background, information about the character singing, and synoptic narrative information for the song -- that provide the performer a way into the character. Clark moreover brings his wide-ranging and extensive experience as a director, performer, and teacher to bear in his performance notes on the individual pieces. Additionally, he includes excerpts from short interviews with artists that provide insight into the song from the perspective of those who first created (or re-created) it. The interviews, conducted with composers, lyricists, performers, and -- in one case -- book collaborators, are snapshots into the creative process, and act as conduits to further study of the selected songs.

Contributor Bio

Mark Ross Clark is Director of Opera and Musical Theater at the University of Louisiana--Monroe and the artistic director of the Louisiana Lyric Opera. He has performed, taught, and directed nationally and internationally in opera, operetta, music theater, and concert, and is the author of *Guide to the Aria Repertoire* (Indiana University Press, 2007) and *Singing, Acting, and Movement in Opera: A Guide to Singer-etics* (Indiana University Press, 2009).

Dennis Shrock

Key Selling Points
- Includes 132 compositions presented in full score
- Spans the entirety of choral music history from the medieval era to the twenty-first century
- Supplements Dennis Shrock's Choral Repertoire (Oxford 2009) with scores representing the music of the composers discussed most prominently in that volume

Summary
Choral Scores is an anthology of music exemplifying distinctive choral repertoire by the most noteworthy composers throughout the history of Western music. A companion volume to Denis Shrock's Choral Repertoire (Oxford 2009), it presents works of salient importance to the development of choral music in Western culture, representing the music of the composers, eras, and movements discussed most prominently in that volume. Including 132 compositions by 124 different composers, each presented unabridged and in full score, and spanning the entirety of Western music history, from the medieval era through the twentieth century, and into the twenty-first, Choral Scores is the most thorough, and up-to-date collection of choral music available. Complete with an appendix offering literal translations of texts, as well as composer and genre indices, Choral Scores is an essential reference for choral scholars, teachers, and students alike.

Contributor Bio
Dennis Shrock is Director of Choral Activities at Texas Christian University and author of Choral Repertoire (Oxford University Press) and Performance Practices in the Classical Era (GIA).

Table Of Contents
Introduction
Acknowledgments

Poetics of Dance
Body, Image, and Space in the Historical Avant-Gardes
Gabriele Brandstetter

Key Selling Points
- Classic text in dance studies now available in English
- Includes 54 illustrations

Summary
When it was first published in Germany in 1995, *Poetics of Dance* was already seen as a path-breaking publication, the first to explore the relationships between the birth of modern dance, new developments in the visual arts, and the renewal of literature and drama in the form of avant-garde theatrical and movement productions of the early twentieth-century. Author Gabriele Brandstetter established in this book not only a relation between dance and critical theory, but in fact a full interdisciplinary methodology that quickly found foothold with other areas of research within dance studies.

The book looks at dance at the beginnings of the 20th century, the time during which modern dance first began to make its radical departure from the aesthetics of classical ballet. Brandstetter traces modern dance's connection to new innovations and trends in visual and literary arts to argue that modern dance is in fact the preeminent symbol of modernity. As Brandstetter demonstrates, the aesthetic renewal of dance vocabulary which was pursued by modern dancers on both sides of the Atlantic - Isadora Duncan and Loie Fuller, Valeska Gert and Oskar Schlemmer, Vaslav Nijinsky and Michel Fokine - unfurled itself in new ideas about gender and subjectivity in the arts more generally, thus reflecting the modern experience of life and the self-understanding of the individual as an individual.

As a whole, the book makes an important contribution to the theory of modernity.

Contributor Bio
A scholar of widespread international recognition, Gabriele Brandstetter is Professor for Theatre and Dance Studies at the Freie Universität Berlin, where she founded and directs the Centre for Movement Studies. She is also co-director of the International Research Center "Interweaving Performance Cultures". She is author of three scholarly books and editor or co-editor of ten scholarly books on dance and movement.

Table Of Contents

Introduction
Part I: Pathos Formulas. Body-Image and Danced Figuration
1. Dance in the Museum: Body and Memory
2. Patterns of Femininity and the Body-Image of Dance
3. Delirium of Movement and Trance Dance
4. The Dancer as Muse

Dancers as Diplomats
American Choreography in Cultural Exchange
Clare Croft

Key Selling Points
- Based on nearly 80 unpublished interviews with dancers
- Blends interviews and choreographic analysis
- Includes analysis of contemporary dance programs and companies
- One of the first books to consider dance as part of Cold War culture—in conversation with Cold War studies
- New theoretical intervention, "the diva stance," a primarily corporeal disordering of gender norms
Charters the role of dance and dancers in American cultural diplomacy

Summary
Dancers as Diplomats chronicles the role of dance and dancers in American cultural diplomacy. In the early decades of the Cold War and the twenty-first century, American dancers toured the globe on tours sponsored by the US State Department. Dancers as Diplomats tells the story of how these tours shaped and sometimes re-imagined ideas of the United States in unexpected, often sensational circumstances—pirouetting in Moscow as the Cuban Missile Crisis unfolded and dancing in Burma shortly before the country held its first democratic elections.

Based on more than seventy interviews with dancers who traveled on the tours, the book looks at a wide range of American dance companies, among them New York City Ballet, Alvin Ailey American Dance Theater, the Martha Graham Dance Company, Urban Bush Women, ODC/Dance, Ronald K. Brown/Evidence, and the Trey McIntyre Project, among others. During the Cold War, companies danced everywhere from the Soviet Union to Vietnam, just months before the US abandoned Saigon. In the post 9/11 era, dance companies traveled to Asia and Latin America, sub-Saharan Africa and the Middle East.

Contributor Bio
Clare Croft is Assistant Professor in the Department of Dance at the University of Michigan.

Quotes
"Smoothly written with strong, coherent narrative, Dancers as Diplomats confirms the importance of dance in US cultural exchange. Researching across Cold War and Post-9/11 ideologies of nation and cultural diplomacy, Croft demonstrates how the international exposure of American dance remains inextricably bound up with Washington-based political economies. An essential offering for anyone interested in cultural studies, dance history, or international affairs, Dancers as Diplomats proves that performance might always exceed governmental guidelines and intentions."--Thomas F. DeFrantz, Duke University

"Deeply researched, beautifully written, and brilliantly argued, Croft's stunning study of dance and U.S. cultural diplomacy sets a new bar for the field. Dancers as Diplomats is indispensable reading for scholars of dance, gender, and cultural diplomacy as well as those concerned with the arc of U.S. cultural politics from the Cold War to the present."--Penny Von Eschen, Professor of History and American Culture, University of Michigan

Music Direction for the Stage
A View from the Podium
Joseph Church

Key Selling Points
- Exhaustive reference and resource for all musicians in musical theater
- Written by one of Broadway's foremost music directors
- Offers practical sections on vocal coaching, orchestral rehearsal, vocal and dance arranging, and underscoring and cueing of dialogue, amongst many more
- Extensively illustrated with photographs and musical scores

One of Broadway's foremost music directors emerges from the orchestra pit to tell how the music is put into a musical show.

Summary
Theater music directors must draw on a remarkably broad range of musical skills. Not only do they conduct during rehearsals and performances, but they must also be adept arrangers, choral directors, vocal coaches, and accompanists. Like a record producer, the successful music director must have the flexibility to adjust as needed to a multifaceted job description, one which changes with each production and often with each performer.

In Music Direction for the Stage, veteran music director and instructor Joseph Church demystifies the job in a book that offers aspiring and practicing music directors the practical tips and instruction they need in order to mount a successful musical production. Church, one of Broadway's foremost music directors, emerges from the orchestra pit to tell how the music is put into a musical show. He gives particular attention to the music itself, explaining how a music director can best plan the task of learning, analyzing, and teaching each new piece. Based on his years of professional experience, he offers a practical discussion of a music director's methods of analyzing, learning, and practicing a score, thoroughly illustrated by examples from the repertoire.

The book also describes how a music director can effectively approach dramatic and choreographic rehearsals, including key tips on cueing music to dialogue and staging, determining incidental music and underscoring, making musical adjustments and revisions in rehearsal, and adjusting style and tempo to performers' needs. A key theme of the book is effective collaboration with other professionals, from the production team to the creative team to the performers themselves, all grounded in Church's real-world experience with professional, amateur, and even student performances. He concludes with a look at music direction as a career, offering invaluable advice on how the enterprising music director can find work and gain standing in the field.

Contributor Bio

JOSEPH CHURCH is best known for his work as music director and supervisor of two groundbreaking Broadway musicals, The Who's Tommy and The Lion King. He has worked on countless other productions as music director, conductor, keyboardist, and/or arranger, on and Off-Broadway, nationwide, and worldwide, among them, In The Heights, Sister Act, Les Miserables, Little Shop Of Horrors, Randy Newman's Faust, and Radio City's Christmas Spectacular. Also an active composer, he has written for film, television, the concert stage, and over thirty plays and musicals.

Quotes

"If you're interested in the world of musical theater, I know you'll enjoy and learn from Joe Church's, Music Direction For The Stage: A View From the Podium." -- Alan Menken

"It's a good thing Joe Church is around to tell us the real deal from the conductor's podium - you couldn't ask for a better guide!" -- Jason Robert Brown

"Being a Music Director for the theatre is an art that requires passion, taste, musicianship, and a powerful sense of playwriting. Really, someone ought to write a book about it - and now someone has! This is a brilliant, necessary and useful book, and you'll be happy you own it." -- Richard Maltby Jr.
"An extraordinary achievement! Joe Church has created an insightful, informative guide which is sure to become the standard reference for music directors as well as an essential text for aspiring music directors. We've needed this book for a long time!"--Brent Wagner, Chair, Musical Theatre Department, The University of Michigan

A Socio-political History of Marathi Theatre

Thirty Nights

Makarand Sathe

Key Selling Points

• Major reference work on Marathi theatre; covers 175 years of its history since its inception
• Makarand Sathe is a well-known figure in Marathi theatre
• Detailed introduction by Kumar Ketkar

Presents a detailed history of the development of modern Marathi theatre

Summary

Exploring the major trends in Marathi theatre, this three-volume set presents a detailed history of the development of modern Marathi theatre. The work is written in the form of a dialogue between a writer and a clown, where the clown goes on to educate the writer, by narrating to him the history of Marathi theatre, taking him through its inception in 1842 to 1985. Originally written in Marathi, this encyclopaedic work would narrate a social history of Maharashtra and of India as seen through the window of theatre. The narration proceeds through thirty nights, loosely following the structure of Arabian Nights, woven around the question, 'Who am I?' The methodology that Sathe follows is complex but systematic and logical as it is predicated on a sound understanding of both history and culture. He views theatre as a cultural construct shaped by the dialectical interaction between the playwright and the cultural political ethos around. The three volumes present the various stages of the historical development of modern Marathi theatre. The conversations between the writer and the clown take place at night; each night is progressively devoted to the discussion of certain historical stages.

Contributor Bio

Makarand Sathe, Playwright/Novelist

Makarand Sathe, an architect by profession, has been writing plays, novels, articles, and films in Marathi for last two decades. His plays have been performed at national and international festivals.

Table Of Contents

Preface
Acknowledgements
Introduction by Kumar Ketkar

Volume One

Night One

Epilogue: It so happened
Introduction: First period, 1843 to 1880
First I plays: VishnudasBhave- Sita Swayanvar (mythological plays)
First plays: Mahatma Jyotiba Phule - Truteeya Ratna
First plays: Bookish/historical plays, V.J. Kirtane- 'Thorale Madhavrao Peshawe'

Night Two

Initial social plays: Raghunath Shankarshastri Abhyankar - Prabodhvidyutarthat Swair Sakesha
M. B. Chitale-Manorama
First (translated) political play: Deenabandhu Mitra/ V. M. Walvekar - Neeldarpan

Night Three

Introduction-Farces
N. H. Bhagwat- More L.L. B. Prahasan
First period-1843 to 1880: Epilogue

Night Four

Second phase-1880 to 1930: Introduction
Beginning of musicals: Sangeetrangabhoomi: Annasaheb Kirloskar, SangeetShakuntal, and Sangeet Saubhadra
Early orthodox, cultural nationalist prose plays: Narayan Bapujikani:
*Taranishikshanatika, Sammativayachakayada*
Reformist social plays: Govind Ballal Deval-Sangeet Sharada

**Night Five**
Beginning of political plays: Shankar Moro Ranade: *'Adhikardon Vivechanaathava
Sthanik Swarajya Vataghat'*
W. R. Shiralkar: *Rana Bhimdevathava Khara Rajput*; B. H. Patwardhan: *Ranasimhaani Bakulaathava Prachin Rajyakranciche Chitra*
Tilak and Marathi theatre

**Night Six**
Political plays of the second phase: Krishnaji Prabhakar Khadilkar, an introduction
Krishnaji Prabhakarkhadilkar: *Sawai Madhavrao Yancha Mrityu, Kichakavadh*, and
*Bhaubandaki*
Cultural nationalist plays, second stage: Damodar Vishvanath Nevalkar - *TarakMarak, Danddhari, Dharmarahasya*

**Night Seven**
The second phase of Khadilkar's plays: *Sangeet Manapman, Sangeet Draupad*,
*Sangeet Menaka*
Colonial censorship and response given by theatre
*Melas* and *Satyashodhakijalasas*
Some more socio-political plays and discussion of historical plays: N C Kelkar-Totayache band, GovindraoTembe-Sangeet Patwardhan, and Krishnaji Hari Dirit-Raja Satvadhir

**Night Eight**
Start of experimental theatre: Ram Ganesh Gaddkari - *Sangeetpremasanyas, Sangeetekachpyala, and Sangeetmooknayak*
Diwakar-Mag To Diwa Konta?
Theatre before 1930: Women and female impersonators

**Night Nine**
A playwright who started many socio-political trends:
Mama Warerkar-Kunjvihari
B. V. alias Mama Warerkar-Hach Mulacha Bap, Sannyasacha Sansar, Satthece Gulam,
*Turungachya Darat*

**Night Ten**
Plays in favour of armed revolt and a different kind of social reform:
V. D. Savarkar-Ushshyap, Sanyasta Khadaga, Uttarkriya
Plays related to religious tensions and conversions: Shri Shankaracharya Kurtakoti-
*Gangasammati Athava Hidukaran Manyata*

**Night Eleven**
Initial Leftist Plays/ plays about labour: B. V. Alias Mama Warerkar-Sonyacha Kalas,
Madhavrao Narayan Joshi-Sangeet Giraniwali, Ganeshshastri Phatak-Maizijnamin
Changes in political theatre after 1920: M. N. Joshi-Sthanik Swarajya
V. S. Khandekar-Rankache Rajya, P.K. Atre-Mee Ubha Aahe

**Night Twelve**
Some other socio-political currents 1: K. H. Dirit-Sundarmath; V. H. Aundhkhar-
*Bebandshahi, Agyrahun Sutka*; Different representation of Gandhism-Y. N. Tipnis:
*Rajranjan*; Remembering Tilak-B. N. Pande: *Sangeet Punaragaman*
Some other socio-political currents 2: VasudevKhare-Ugramangal
G. V. Shetye- Rakshabandhan; Veer Vamanrao Joshi's Discussion plays:
*Dharmasinhasan, Ranadumdubhi*
Second period, 1880 to 1930: Epilogue

**Night Thirteen**
Third period, 1930 to 1955: An introduction

Vasant Bapat - Sarvaklayan; P.L. Deshpande - Pudhari Pahije
Nilu Phule - Yera Gabalyache Kaam Nohe; Ram Nagarkar, Dada Kondke - Laal Cheenchya
Aakramanacha Farce; Jaywant Dalvi - Vatvaghool

Night Eighteen
First phase: 1950 to 1985: An introduction
The playwright who woke up Marathi theatre that was trapped in entertainment and pseudo-sentimentality with a start and forced it to grapple with reality: Vijay Tendulkar - Shrimanta

Night Nineteen
Four pillars of entertainment oriented commercial middle class Marathi theatre: One: Bal Kolhatkar - Duritanche Timir Jao
Two: P. L. Deshpande (First Phase) - Tuze Aahe Tujpashi
Three: Vasant Kanetkar (First Phase) - Vedyachegharunhat
Vasant Kanetkar - Prema tujharangakasa, Raigadala Jeva Jag Yete, Ashrunchi Zali Phule
Four: V. V. Shirwalkar - Natsamrat

Night Twenty
Vijay Tendulkar (The Second Stage) - Gidhade
Vijay Tendulkar - Shantata! Court Chalu Ahe
A remarkably experimental playwright: Khanolkar - Ek Shunya Bajirao
Khanolkar - Avadhya

Night Twenty-One
The second stage, 1965 to 1975-80: An introduction
Vijay Tendulkar (The Third Stage) - Ghashiram Kotwal
Vijay Tendulkar - Sakharam Binder

Night Twenty-Two
Playwrights who took experimentation to the next level:
Mahesh Elkunchwar - (The First Stage) Introduction
Mahesh Elkunchwar - Garbo, Vasanakand, Party
Mature political theatre: G.P. Deshpande (First stage) - Udhvasta Dharmashala

Night Twenty Three
Satish Alekar (The First Stage) - Mahanirvan
Satish Alekar - Begam Barve
Satish Alekar - Mahapur
Achyut Vaze - Chal Re Bhpalya Tunuk Tunuk

Volume Three
Night Twenty Four
Commercial theatre at the next stage: Jayawant Dalvi (The First Stage) - Sandhyachhaya, Barrister
Jayawant Dalvi - Suryasta
Kanetkar (Second stage) - Beimaan; P.L. Deshpande (The Second Stage) - Ti Phularani

Night Twenty Five
Incisive Political theatre-Dalit theatre: An introduction
M.B. Chitnis - Yugayatra; B. S. Shinde - Kalokhachya Garbhat; Premanand Gajvi - Ghotbhar Pani, Devnavari
Premanand Gajvi - Tanmajori; Texas Gaikwad-Amhi Deshache Marekari; Ramnath Chavan - Sakshipuram, Baamanwada
Datta Bhagat - Khelia, Vata Palwata

Night Twenty Six
The third stage, 1975-1985: An introduction
Vijay Tendulkar (Third Phase) - Kamala, Kanyadan

Night Twenty Seven
Mahesh Elkunchwar (Second Phase) - The Trilogy of 'Wada Chirebandi': An introduction
Mahesh Elkunchwar: Trilogy - Wada Chirebandi, Magna Talyakathi, Yugant

Night Twenty Eight
Ratnakar Matkari - Lokakatha 78; P.L. Deshpande (Third Phase) - Teen Paishacha Tamasha
The Good Life
Unifying the Philosophy and Psychology of Well-Being
Michael Bishop

Key Selling Points
- Proposes a new approach to the study of well-being and an original theory of well-being
- Redefines Positive Psychology and connects it to the philosophical study of well-being
- Explains philosophy and positive psychology's respective literatures on well-being in understandable, straightforward, and concise language, bringing them into dialogue in innovative and productive ways

Proposes a new approach to the study of well-being and an original theory of well-being

Summary
Philosophers defend theories of what well-being is but ignore what psychologists have learned about it, while psychologists learn about well-being but lack a theory of what it is. In The Good Life, Michael Bishop brings together these complementary investigations and proposes a powerful, new theory for understanding well-being.

The network theory holds that to have well-being is to be "stuck" in a self-perpetuating cycle of positive emotions, attitudes, traits and accomplishments. For someone with well-being, these states -- states such as joy and contentment, optimism and adventurousness, extraversion and perseverance, strong relationships, professional success and good health -- build upon and foster each other. They form a kind of positive causal network (PCN), so that a person high in well-being finds herself in a positive cycle or "groove." A person with a lesser degree of well-being might possess only fragments of such a network -- some positive feelings, attitudes, traits or successes, but not enough to kick start a full-blown, self-perpetuating network.

Although recent years have seen an explosion of psychological research into well-being, this discipline, often called Positive Psychology, has no consensus definition. The network theory provides a new framework for understanding Positive Psychology. When psychologists investigate correlations and causal connections among positive emotions, attitudes, traits, and accomplishments, they are studying the structure of PCNs. And when they identify states that establish, strengthen or extinguish PCNs, they are studying the dynamics of PCNs. Positive Psychology, then, is the study of the structure and dynamics of positive causal networks.

The Good Life represents a new, inclusive approach to the study of well-being, an approach committed to the proposition that discovering the nature of well-being requires the knowledge and skills of both the philosopher in her armchair and the scientist in her lab. The resulting theory provides a powerful, unified foundation for future scientific and philosophical investigations into well-being and the good life.

Quotes
"This is the very best sort of interdisciplinary scholarship, in service of theory that is both philosophically and empirically perspicuous. Well-being is a topic of obvious philosophical interest, and psychological research on the subject is endlessly fascinating. The Good Life is a novel and substantial contribution to a burgeoning field, and will interest a broad range of philosophers, psychologists, and political theorists. For anyone wondering about the new 'science of happiness,' an indispensable volume."
-- John Doris, Washington University in St. Louis

"This important and engaging book brings a fresh perspective to the study of well-being. Michael Bishop proposes a new inclusive approach that takes the investigation into the nature of well-being to be a genuinely interdisciplinary venture, requiring the talents of
both philosophers and scientists. Using this inclusive approach, Bishop defends an original and compelling theory of well-being, the network theory. Psychologists and philosophers interested in well-being will benefit equally from this book, which offers a walkable path out of troubling theoretical disorder and frustrating philosophical stalemate.” --Valerie Tiberius, University of Minnesota

Reconstructing Reality
Models, Mathematics, and Simulations
Margaret Morrison

Key Selling Points
- Addresses several issues that are significant for the philosophical literature as well as subjects of interest to philosophically-minded scientists
- Puts forward the rather controversial thesis that in certain contexts computer simulation can function as method for experimental measurement
- Emphasizes the importance of and reliance on simulation in larger experimental contexts, paying particular attention to the search for the Higgs boson at the Large Hadron Collider
- Argues that the traditional distinction between experiment and simulation is no longer applicable and needs to be rethought

Summary
Attempts to understand various aspects of the empirical world often rely on modelling processes that involve a reconstruction of systems under investigation. Typically the reconstruction uses mathematical frameworks like gauge theory and renormalization group methods, but more recently simulations also have become an indispensable tool for investigation.

This book is a philosophical examination of techniques and assumptions related to modelling and simulation with the goal of showing how these abstract descriptions can contribute to our understanding of the physical world. Particular issues include the role of fictional models in science, how mathematical formalisms can yield physical information, and how we should approach the use of inconsistent models for specific types of systems. It also addresses the role of simulation, specifically the conditions under which simulation can be seen as a technique for measurement, replacing more traditional experimental approaches. Inherent worries about the legitimacy of simulation “knowledge” are also addressed, including an analysis of verification and validation and the role of simulation data in the search for the Higgs boson. In light of the significant role played by simulation in the Large Hadron Collider experiments, it is argued that the traditional distinction between simulation and experiment is no longer applicable in some contexts of modern science. Consequently, a re-evaluation of the way and extent to which simulation delivers empirical knowledge is required.

“This is a, lively, stimulating, and important book by one of the main scholars contributing to current topics and debates in our field. It will be a major resource for philosophers of science, their students, scientists interested in examining scientific practice, and the general scientifically literate public.”-Bas van Fraassen, Distinguished Professor of Philosophy, San Francisco State University

Imagination and Convention
Distinguishing Grammar and Inference in Language
Ernie Lepore, Matthew Stone

Key Selling Points
- A radical new theory of linguistic understanding
- Offers a trenchant critique of leading theories of the relation between semantics and pragmatics
- Informed by empirical study of a wide range of linguistic phenomena
- Draws together philosophy, linguistics, and cognitive science

Summary
What do speakers mean? What do they convey? What do they reveal? How do they invite us to think? Communication exploits conventional rules, deliberate choices, and many other faculties. How? A common answer invokes simple meanings and general ways to reinterpret them, as in H. P. Grice’s theory of conversational implicature. Lepore and Stone show such answers are unsatisfactory. Instead, they argue that language provides diverse tools for making ideas public, and that communication recruits distinct kinds of imagination. The work synthesizes results from across cognitive science into a profoundly new account of meaning in language.

Contributor Bio
Ernie Lepore is Board of Governors Professor of Philosophy and an Acting Director of the Center for Cognitive Science at Rutgers.

Matthew Stone is Associate Professor in the Department of Computer Science and Center for Cognitive Science at Rutgers.

The Artful Species
Aesthetics, Art, and Evolution
Stephen Davies

Key Selling Points
- A powerful new account of art and evolution
- A leading expert draws together aesthetics and art theory with the scientific study of humans and animals
- Lucid and compelling -- no philosophical or scientific background assumed
A fascinating exploration of the idea that art should be understood as an element of human evolution

Summary
The Artful Species explores the idea that our aesthetic responses and art behaviors are connected to our evolved human nature. Our humanoid forerunners displayed aesthetic sensibilities hundreds of thousands of years ago and the art standing of prehistoric cave paintings is virtually uncontested.

In Part One, Stephen Davies analyses the key concepts of the aesthetic, art, and evolution, and explores how they might be related. He considers a range of issues, including whether animals have aesthetic tastes and whether art is not only universal but cross-culturally comprehensible.

Part Two examines the many aesthetic interests humans take in animals and how these reflect our biological interests, and the idea that our environmental and landscape preferences are rooted in the experiences of our distant ancestors. In considering the controversial subject of human beauty, evolutionary psychologists have traditionally focused on female physical attractiveness in the context of mate selection, but Davies presents a broader view which decouples human beauty from mate choice and explains why it goes more with social performance and self-presentation.

Part Three asks if the arts, together or singly, are biological adaptations, incidental byproducts of nonart adaptations, or so removed from biology that they rate as purely cultural technologies. Davies does not conclusively support any one of the many positions considered here, but argues that there are grounds, nevertheless, for seeing art as part of human nature. Art serves as a powerful and complex signal of human fitness, and so cannot be incidental to biology. Indeed, aesthetic responses and art behaviors are the touchstones of our humanity.

Contributor Bio
Stephen Davies teaches philosophy at The University of Auckland. He writes mainly about aesthetics and the philosophy of art, and has written extensively on the definition of art, the ontological character of artworks, cross-cultural aesthetics, the expression of emotion in art, and the interpretation and evaluation of art. His books include Musical Works and Performances (Clarendon, 2001), Themes in the Philosophy of Music (OUP, 2003), The Philosophy of Art (Blackwell, 2006), Philosophical Perspectives on Art (OUP, 2007), and Musical Understandings (OUP, 2011).

Quotes
"Artifacts possessing aesthetic sensibility have been discovered that date back to humankind's earliest ancestors. When this discovery is coupled with the idea that art and its appreciation remain a prominent part of human history, the question of the connection between evolution, art, and one's aesthetic sense becomes significant. Davies offers a thorough and engaging exploration of this precise question."--CHOICE

Table Of Contents
Introduction to Part One
1. The aesthetic
2. The nature of art
3. The theory of evolution
4. How might the aesthetic, art, and evolution be related?

In Other Shoes
Music, Metaphor, Empathy, Existence
Kendall L. Walton

Key Selling Points
- Collects essays on issues concerning music, metaphor, empathy, and existence from acclaimed philosopher Kendall L. Walton
- Emphasizes similarities between music and poetry, lyric poetry especially
- Proposes that an important function of much poetry is to provide readers with words to express themselves
- Abandons the author's previous account of fictionality
Kendall L. Walton wrestles with philosophical issues concerning music, metaphor, empathy, existence, fiction, and expressiveness in the arts.

Summary
In fifteen essays—one new, two newly revised and expanded, three with new postscripts—Kendall L. Walton wrestles with philosophical issues concerning music, metaphor, empathy, existence, fiction, and expressiveness in the arts. These subjects are intertwined in striking and surprising ways. By exploring connections among them, appealing sometimes to notions of imagining oneself in shoes different from one’s own, Walton creates a wide-ranging mosaic of innovative insights.

Contributor Bio
After considering a career in music, Kendall Walton found his natural home in philosophy, earning a B.A. at Berkeley and his Ph.D. from Cornell University. He taught for many years at the University of Michigan, and more recently at Stanford University. His writings include the groundbreaking Mimesis as Make-believe (1990), and a companion volume to the present one, Marvelous Images: On Values and the Arts (2008). Walton is a fellow of the American Academy of Arts and Sciences and a past president of the American Society for Aesthetics.

Oxford Studies in Ancient Philosophy, Volume 47  
Brad Inwood

Key Selling Points
- The leading forum for new work in ancient philosophy  
- Excellent range of topics  
- An illustrious line-up of contributors

Summary
Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy. The articles may be of substantial length, and include critical notices of major books. OSAP is now published twice yearly, in both hardback and paperback.

'The serial Oxford Studies in Ancient Philosophy (OSAP) is fairly regarded as the leading venue for publication in ancient philosophy. It is where one looks to find the state-of-the-art. That the serial, which presents itself more as an anthology than as a journal, has traditionally allowed space for lengthier studies, has tended only to add to its prestige; it is as if OSAP thus declares that, since it allows as much space as the merits of the subject require, it can be more entirely devoted to the best and most serious scholarship.'

Michael Pakaluk, Bryn Mawr Classical Review

Contributor Bio
Brad Inwood, University of Toronto

Brad Inwood is University Professor of Classics and Philosophy at the University of Toronto.

Table Of Contents
On 'Logos' in Heraclitus, Mark A. Johnstone
Ignorance and Akrasia-Denial in the Protagoras, Agnes Gellen Callard
Appearance, Perception, and Non-Rational Belief: Republic 602 C-603 A, Damien Storey
Between Perception and Scientific Knowledge: Aristotle's Account of Experience, Pieter Sjoerd Hasper and Joel Yurdin
Reasoning and the Unity of Aristotle's Account of Animal Motion, Patricio A. Fernandez
Non-Virtuous Intellectual States in Aristotle's Ethics, Pavlos Kontos
Learned and Wise: Cotta the Sceptic in Cicero's On the Nature of the Gods, J. P. F. Wynne
Galen on the Therapy of Distress and the Limits of Emotional Therapy, David H. Kaufman

Philosophos
Plato's Missing Dialogue
Mary Louise Gill

Key Selling Points
- Ambitious new theory of the aims and interrelations of Plato's great late works
- Offers fresh insight into Plato's metaphysics, epistemology, and method
- Will revitalise debate on Plato's conception of philosophy
A bold new explanation of the fact that the dialog which Plato promised to write on the Philosopher is missing.

Summary
Plato famously promised to complement the Sophist and the Statesman with another work on a third sort of expert, the philosopher—but we do not have this final dialogue. Mary Louise Gill argues that Plato promised the Philosopher, but did not write it, in order to stimulate his audience and encourage his readers to work out, for themselves, the portrait it would have contained. The Sophist and Statesman are themselves members of a larger series starting with the Theaetetus, Plato's investigation of knowledge, and the whole series relies on the Parmenides, the second part of which presents a philosophical exercise, introduced as the first step in a larger philosophical program. Gill contends that the dialogues leading up to the missing Philosopher, though they reach some substantive conclusions, are philosophical exercises of various sorts designed to train students in dialectic, the philosopher's method; and that a second version of the Parmenides exercise, closely patterned on it, spans parts of the Theaetetus and Sophist and brings the philosopher into view. This is the exercise about being, the subject-matter studied by Plato's philosopher. Plato hides the pieces of the puzzle and its solution in plain sight, forcing his students (and modern readers) to dig out the pieces and reconstruct the project. Gill reveals how, in finding the philosopher through the exercise, the student becomes a philosopher by mastering his methods. She shows that the target of Plato's exercise is internally related to its pedagogical purpose.

Plutarch and his Roman Readers
Philip A. Stadter

Key Selling Points
• Explores a broad range of issues and topics raised by Plutarch's works
• Organizes chapters by themes, allowing a clearer understanding of the key issues being discussed
• Includes a consideration of the post-classical reception of Plutarch's Parallel Lives by two leading figures of the eighteenth century, Joseph Addison and Alexander Hamilton

Summary
Plutarch's focus on the great leaders of the classical world, his anecdotal style, and his self-presentation as a good-natured friend and wise counsellor have appealed over the centuries to a wide audience, persons as diverse as Beethoven and Benjamin Franklin, Shakespeare and Harry Truman. This collection of essays on Plutarch's Parallel Lives examines the moral issues Plutarch recognized behind political leadership, and relates his writings to the audience of leading generals and administrators of the Roman empire which he aimed to influence, and to the larger social and political context of the reigns of the Flavian emperors and their successors, Nerva and Trajan, during which he wrote. The essays explore Plutarch's considered views on how his contemporaries could - and we ourselves can - learn from the successes and failures of the great men of the past.

Virtue and Reason in Plato and Aristotle
A.W. Price

Key Selling Points
• Examines human action within the context of the question of what makes a life good
• Illuminates fundamental aspects of human life: reasoning, virtue, character, emotion
• Insightful new interpretation of Plato and Aristotle
• No expertise in ancient philosophy assumed

Examines human action within the context of the question of what makes a life good

Summary
In this authoritative discussion of the philosophy of Plato and Aristotle, A. W. Price considers four related areas: eudaimonia, or living and acting well, as the ultimate end of action; virtues of character in relation to the emotions, and to one another; practical reasoning, especially from an end to ways or means; and acrasia, or action that is contrary to the agent's own judgement of what is best. The focal concept is that of eudaimonia, which both Plato and Aristotle view as an abstract goal that is valuable enough to motivate action. Virtue has a double role to play in making its achievement possible, both in proposing subordinate ends apt to the context, and in protecting the agent against temptations to discard them too easily. For both purposes, Price suggests that virtues need to form a unity—but one that can be conceived in various ways. Among the tasks of deliberation is to work out how, and whether, to pursue some putative end in context. Aristotle returns to early Plato in finding it problematic that one should consciously sacrifice acting well to some incidental attraction; Plato later finds this possible by postulating schism within the soul. Price maintains that it is their emphasis upon the centrality of action within human life that makes the reflections of these ancient philosophers perennially relevant.

Contributor Bio
A. W. Price was educated at Winchester and Oxford, and has taught chiefly at York and in London. He has maintained an interest both in current ethical theory, and in the moral psychology of Greek philosophers, especially Plato and Aristotle. This is his fourth book.

Quotes
"Virtue and Reason is a treasure trove of enlightening commentary, insightful arguments, and a keen view of the most important and perennial aspects of Plato's and Aristotle's genius."—Dimitrios Dentsoras, Notre Dame Philosophical Reviews

Method and Metaphysics
Essays in Ancient Philosophy I
Jonathan Barnes, Maddalena Bonelli

Key Selling Points
- Twenty-six uncollected essays by one of the leading authors in ancient philosophy
- Includes rare and relatively unknown works
- Translates several essays into English for the first time
- Essential reading for all students and scholars of ancient philosophy

Summary
Method and Metaphysics presents twenty-six essays in ancient philosophy by Jonathan Barnes, one of the most admired and influential scholars of his generation. The essays span four decades of his career, and are drawn from a wide variety of sources: many of them will be relatively unknown even to specialists in ancient philosophy. Several essays are now translated from the original French and made available in English for the first time; others have been substantially revised for republication.

The volume opens with eight essays about the interpretation of ancient philosophical texts, and about the relationship between philosophy and its history. The next five essays examine the methods of ancient philosophers. The third section comprises thirteen essays about metaphysical topics, from the Presocratics to the late Platonists. This collection will be a rich feast for students and scholars of ancient philosophy.

Form without Matter
Empedocles and Aristotle on Color Perception
Mark Eli Kalderon

Key Selling Points
• A novel approach to philosophy of perception
• Discusses neglected topics in Aristotle's psychology
• Sheds new light on a key theme in ancient philosophy

Summary
Mark Eli Kalderon presents an original study in the philosophy of perception written in the medium of historiography. He considers the phenomenology and metaphysics of sensory presentation through the examination of an ancient *aporia*. Specifically, he argues that a puzzle about perception at a distance is behind Empedocles' theory of vision. Empedocles conceives of perception as a mode of material assimilation, but this raises a puzzle about color vision, since color vision seems to present colors that inhere in distant objects. But if the colors inhere in distant objects how can they be taken in by the organ of sight and so be palpable to sense? Aristotle purports to resolve this puzzle in his definition of perception as the assimilation of sensible form without the matter of the perceived particular. Aristotle explicitly criticizes Empedocles, though he is keen to retain the idea that perception is a mode of assimilation, if not a material mode. Aristotle's notorious definition has long puzzled commentators. Kalderon shows how, read in light of Empedoclean puzzlement about the sensory presentation of remote objects, Aristotle's definition of perception can be better understood. Moreover, when so read, the resulting conception of perception is both attractive and defensible.

**Knowing Right From Wrong**  
Kieran Setiya

**Key Selling Points**
- Ambitious monograph from a leading young philosopher
- An original view on ethical knowledge, which answers the most radical sceptical challenges
- Connects recent developments in epistemology with moral philosophy

Kieran Setiya argues that if there is objective ethical knowledge, human nature is its source

**Summary**
Can we have objective knowledge of right and wrong, of how we should live and what there is reason to do? The thought that we can is beset by sceptical problems. In the face of radical disagreement, can we be sure that we are not deceived? If the facts are independent of what we think, is our reliability a mere coincidence? Can it be anything but luck when our beliefs are true? In Knowing Right From Wrong, Kieran Setiya confronts these questions in their most compelling and articulate forms: the argument from ethical disagreement; the argument from reliability and coincidence; and the argument from accidental truth. In order to resist the inference from disagreement to scepticism, he argues, we must reject epistemologies of intuition, coherence, and reflective equilibrium. The problem of disagreement can be solved only if the basic standards of epistemology in ethics are biased towards the truth. In order to solve the problem of coincidence, we must embrace arguments for reliability in ethics that rely on ethical beliefs. Such arguments do not beg the question in an epistemically damaging way. And in order to make sense of ethical knowledge as non-accidental truth, we must give up the independence of ethical fact and belief. We can do so without implausible predictions of convergence or relativity if the facts are bound to us through the natural history of human life. If there is objective ethical knowledge, human nature is its source.

**Contributor Bio**

Kieran Setiya is Professor of Philosophy at the University of Pittsburgh. He works in action theory, epistemology, and ethics, and is the author of Reasons without Rationalism (Princeton University Press, 2007).

**Quotes**

"I am happy to commend an excellent contribution to a perennially contested area. All philosophers can profit from this book, and should admire the meticulous craftsmanship and the modesty and intelligence of its explorations."--Simon Blackburn, *Times Literary Supplement*

"A rich and provocative contribution to moral epistemology and to ethical theory more generally -- one that is well worth reading."--Charlie Kurth, *Notre Dame Philosophical Reviews*

Kantian Conceptual Geography
Nathaniel Jason Goldberg

Key Selling Points
- Engages in conceptual geography by surveying how issues of the utmost importance to analytic epistemology, philosophy of language, and metaphysics conceptually relate
- Relies on a historical view to produce a conceptual map of contemporary issues
- Explores the applicability of Kant's theoretical philosophy (including epistemology and metaphysics) to contemporary analytic philosophy
- Proposes a new account of linguistic meaning and shows that it is preferable to existing accounts of meaning in the analytic literature

Summary
This is a work in Kantian conceptual geography. It explores issues in analytic epistemology, philosophy of language, and metaphysics in particular by appealing to theses drawn from Immanuel Kant's *Critique of Pure Reason*. Those issues include the nature of the subjective, objective, and empirical; potential scopes of the subjective; what can (and cannot) be said about a subject-independent reality; analyticity, syntheticity, apriority, and aposteriority; constitutive principles, acquisitive principles, and empirical claims; meaning, indeterminacy, and incommensurability; logically possible versus subjectively empirical worlds; and the nature of empirical truth.

Part One introduces two theses drawn from the *Critique*. The first, Empirical Dualism, concerns the subjective, objective, and empirical. The second, Subjective Principlism, concerns principles that might bear on the empirical. Part Two examines work of influential analytic philosophers to reveal how conceptually expansive the territory formed by Empirical Dualism and Subjective Principlism is. Part Three defends that territory by defending Empirical Dualism and Subjective Principlism themselves. Part Four discloses two new lands within the territory that have so far remained uncharted. The first is a Kantian account of meaning, which is shown to be superior to other accounts of meaning in the analytic literature. The second are Kantian thoughts on truth, which illuminate the nature of empirical truth itself. Finally Part Five shows how engaging in Kantian conceptual geography enriches epistemology, philosophy of language, and metaphysics generally.

Contributor Bio
Nathaniel Goldberg is Associate Professor of Philosophy at Washington and Lee University, in Lexington, Virginia. He researches at the intersection of epistemology, metaphysics, and philosophy of language, and has an abiding interest in Kant.

**Transformative Experience**
L. A. Paul

**Key Selling Points**
- Ground-breaking work on a new subject
- Changes the way we think about the decisions we make in life
- Interdisciplinary, accessible, and highly readable

How should we make choices when we know so little about our futures? L. A. Paul argues that we must view life decisions as choices to make discoveries about the nature of experience.

**Summary**
As we live our lives, we repeatedly make decisions that shape our future circumstances and affect the sort of person we will be. When choosing whether to start a family, or deciding on a career, we often think we can assess the options by imagining what different experiences would be like for us. L. A. Paul argues that, for choices involving dramatically new experiences, we are confronted by the brute fact that we can know very little about our subjective futures. This has serious implications for our decisions. If we make life choices in the way we naturally and intuitively want to--by considering what we care about, and what our future selves will be like if we choose to have the experience--we only learn what we really need to know after we have already committed ourselves. If we try to escape the dilemma by avoiding an experience, we have still made a choice.

Choosing rationally, then, may require us to regard big life decisions as choices to make discoveries, small and large, about the intrinsic nature of experience, and to recognize that part of the value of living authentically is to experience one's life and preferences in whatever way they may evolve in the wake of the choices one makes.

Using classic philosophical examples about the nature of consciousness, and drawing on recent work in normative decision theory, cognitive science, epistemology, and the philosophy of mind, Paul develops a rigorous account of transformative experience that sheds light on how we should understand real-world experience and our capacity to rationally map our subjective futures.

Essays in Collective Epistemology

Jennifer Lackey

Key Selling Points
- All papers are brand new and previously unpublished
- Written by some of the leading scholars in epistemology
- Essential reading for anyone working in this fast-growing discipline
- Will point the way for future debates
A team of leading experts in the field present new, cutting edge theories, insights, and approaches in collective epistemology.

Summary
We often talk about groups believing, knowing, and testifying. For instance, we ask whether the Bush Administration had good reasons for believing that Saddam Hussein had weapons of mass destruction, or whether BP knew that its equipment was faulty before the oil spill in the Gulf of Mexico. Epistemic claims of this sort often have enormous significance, given the ways they bear on the moral and legal responsibilities of collective entities. Despite the importance of these epistemic claims, there has been surprisingly little philosophical work shedding light on these phenomena, their consequences, and the broader implications that follow for epistemology in general. Essays in Collective Epistemology aims to fill this gap in the literature by bringing together new papers in this area by some of the leading figures in social epistemology.

The volume is divided into four parts and contains ten articles written on a range of topics in collective epistemology. All of the papers focus on fundamental issues framing the epistemological literature on groups, and offer new insights or developments to the current debates: some do so by providing novel examinations of the epistemological relationship that groups bear to their members, while others point to new, cutting edge approaches to theorizing about concepts and issues related to collective entities. Anyone working in epistemology, or concerned with issues involving the social dimensions of knowledge, should find the papers in this book both interesting and valuable.

Contributor Bio
Jennifer Lackey is Professor of Philosophy at Northwestern University. Her recent research focuses on the epistemology of groups, the epistemology of testimony, norms of assertion, and the epistemic significance of disagreement. She has co-edited (with Ernest Sosa) The Epistemology of Testimony (OUP, 2006) and (with David Christensen) The Epistemology of Disagreement: New Essays (OUP, 2013) and is the author of Learning from Words: Testimony as a Source of Knowledge (OUP, 2008). She is the recipient of a Mellon Foundation Grant for a Sawyer Seminar (2014), the Charles A. Ryskamp Research Fellowship from the American Council of Learned Societies (2007), and a Summer Stipend from the National Endowment for the Humanities (2002). She is also winner of the Young Epistemologist Prize (2005).

Self-Knowledge for Humans
Quassim Cassam

Key Selling Points
• Ambitious original work from a leading philosopher
• Explores neglected types of self-knowledge, including knowledge of our characters, values, and emotions
• Draws on ideas from psychology, literature, and economics
• Written in an unusually clear and accessible style

Summary
Human beings are not model epistemic citizens. Our reasoning can be careless and uncritical, and our beliefs, desires, and other attitudes aren't always as they ought rationally to be. Our beliefs can be eccentric, our desires irrational and our hopes hopelessly unrealistic. Our attitudes are influenced by a wide range of non-epistemic or non-rational factors, including our character, our emotions and powerful unconscious biases. Yet we are rarely conscious of such influences. Self-ignorance is not something to which human beings are immune.

In this book Quassim Cassam develops an account of self-knowledge which tries to do justice to these and other respects in which humans aren't model epistemic citizens. He rejects rationalist and other mainstream philosophical accounts of self-knowledge on the grounds that, in more than one sense, they aren't accounts of self-knowledge for humans. Instead he defends the view that inferences from behavioural and psychological evidence are a basic source of human self-knowledge. On this account, self-knowledge is a genuine cognitive achievement and self-ignorance is almost always on the cards.

As well as explaining knowledge of our own states of mind, Cassam also accounts for what he calls 'substantial' self-knowledge, including knowledge of our values, emotions, and character. He criticizes philosophical accounts of self-knowledge for neglecting substantial self-knowledge, and concludes with a discussion of the value of self-knowledge.

This book tries to do for philosophy what behavioural economics tries to do for economics. Just as behavioural economics is the economics of homo sapiens, as distinct from the economics of an ideally rational and self-homo economicus, so Cassam argues that philosophy should focus on the human predicament rather on the reasoning and self-knowledge of an idealized homo philosophicus.

Contributor Bio

**A Naturalistic Epistemology**

*Selected Papers*

Hilary Kornblith

**Key Selling Points**

- Selected essays by a leading expert
- A distinctive approach to how we come to have knowledge of the world
- Illustrates the interaction between philosophy and psychology

**Summary**

This volume draws together influential work by Hilary Kornblith on naturalistic epistemology. The naturalistic approach sees epistemology not as a matter of analysis of concepts, but as an explanatory project constrained and informed by work in the cognitive sciences. These essays expound and defend Kornblith's distinctive view of how we come to have knowledge of the world. He offers critical discussion of alternative approaches, such as foundationalism, the coherence theory of justification, internalism, and externalism; and he discusses social epistemology, the role of intuitions in philosophical theorizing, epistemic normativity, and the ways in which philosophical theories may be informed by empirical considerations. Kornblith aims to show how an epistemology which is based in the sciences of cognition may provide the understanding and intellectual illumination which has always been the goal of philosophical theorizing.

**Contributor Bio**

Hilary Kornblith, *University of Massachusetts, Amherst*

Rethinking the Good
Moral Ideals and the Nature of Practical Reasoning
Larry S. Temkin

Key Selling Points
• The author is a well-respected moral philosopher.
• He develops an original and systematic argument here, which will make a significant contribution to the field.
Temkin develops an original and systematic argument here, which will make a significant contribution to the field.

Summary
In choosing between moral alternatives -- choosing between various forms of ethical action -- we typically make calculations of the following kind: A is better than B; B is better than C; therefore A is better than C. These inferences use the principle of transitivity and are fundamental to many forms of practical and theoretical theorizing, not just in moral and ethical theory but in economics. Indeed they are so common as to be almost invisible. What Larry Temkin's book shows is that, shockingly, if we want to continue making plausible judgments, we cannot continue to make these assumptions.

Temkin shows that we are committed to various moral ideals that are, surprisingly, fundamentally incompatible with the idea that "better than" can be transitive. His book develops many examples where value judgments that we accept and find attractive, are incompatible with transitivity. While this might seem to leave two options -- reject transitivity, or reject some of our normative commitments in order to keep it -- Temkin is neutral on which path to follow, only making the case that a choice is necessary, and that the cost either way will be high. Temkin's book is a very original and deeply unsettling work of skeptical philosophy that mounts an important new challenge to contemporary ethics.

Contributor Bio
Larry S. Temkin is Distinguished Professor and Chair of Philosophy at Rutgers, the State University of New Jersey.

Quotes
"... [A] great work of philosophy... both groundshaking and crafted with near-perfect precision... one of the most important works in ethics to appear in recent decades, sure to be studied closely by philosophers and non-philosophers alike for decades to come... [a] brilliant and exciting book." --Melinda Roberts, Analysis

"Larry Temkin's monumental book Rethinking the Good is by far the most resourceful and penetrating investigation into the various aspects of the value of outcomes to date." -- Ingmar Persson, Law, Ethics, and Philosophy

"A real tour de force..." --Véronique Munoz-Dardé, The Journal of Moral Philosophy

"...a rich and challenging work, and a profound contribution." --Richard Kraut, Notre Dame Philosophical Reviews

"Rethinking the Good is the most powerful challenge to our understanding of axiology and normative theory in contemporary philosophy to date. Calling it a classic or a masterpiece is an understatement: it is a true milestone with which we enter a new stage in the study of value theory."
--Oscar Horta, Law, Ethics, and Philosophy

"The most important work in choice theory and social choice in some time." --Tyler Cowen, MARGINALREVOLUTION

"Larry Temkin's magnum opus, Rethinking the Good... is unquestionably one of the grandest, most significant, and most profound works on value and practical reasoning..."
This book is about some of the most profound issues in human life... its challenging and sophisticated arguments will be sources of insight and inspiration for anyone who reflects on them.
--Roger Crisp, Oxford University

"Rethinking the Good is a genuinely awe-inspiring achievement. ...Its discussions of a broad range of the deepest and most perplexing issues in normative ethics are unsurpassed in imaginativeness, subtlety, and rigor... Temkin's rich and brilliant book will transform our understanding of many of the most important problems in ethical theory."
--Jeff McMahan, Oxford University

"Rethinking the Good threatens to overturn some of our most deeply entrenched beliefs about our various values and practical reasoning.... [It is] an utterly original work of philosophy, almost breath-takingly so."
--Shelly Kagan, Yale University

"It is a rich and challenging work, and a profound contribution to that part of moral philosophy that seeks a ground for decision-making in the evaluation of states of affairs."
--Richard Kraut, Notre Dame Philosophical Reviews

"Larry Temkin's Rethinking the Good threatens to overturn some of our most deeply entrenched beliefs about our various values and practical reasoning. The issues that Temkin discusses are completely central to moral philosophy and beyond, and Temkin's conclusions are deeply unsettling. Indeed, I think it fair to say that they are so surprising that most people will simply assume that they must be wrong. But as Temkin painstakingly demonstrates, there are no easy solutions to the problems that he discusses--there is no way to avoid giving up something to which we are pretty deeply committed. Rethinking the Good is, in its way, an utterly original work of philosophy, almost breathtakingly so."
--Shelly Kagan, Yale University

"This book is about some of the most profound issues in human life, including our own good, and how to weigh the good of one person against that of others. Its conclusions have significant implications for the very possibility of practical rationality, and its challenging and sophisticated arguments will be sources of insight and inspiration for anyone who reflects on them."
--Roger Crisp, St. Anne's College, Oxford

"Rethinking the Good is a genuinely awe-inspiring achievement. Its discussions of a broad range of the deepest and most perplexing issues in normative ethics are unsurpassed in imaginativeness, subtlety, and rigor. On the foundational but extraordinarily difficult issue of whether our moral reasons are 'person-affecting' or impersonal in character, or whether there are reasons of both sorts that may conflict, it contains the best discussion I know of since the appearance of Parfit's seminal arguments in Reasons and Persons. Temkin's rich and brilliant book will transform our understanding of many of the most important problems in ethical theory."
--Jeff McMahan, author of The Ethics of Killing and Killing in War

The Geometry of Desert
Shelly Kagan

Key Selling Points

- This book explores a range of questions about the nature of moral desert that have been largely overlooked in the philosophical literature.
- Using graphs to illustrate the wide range of rival views, this book reveals desert to be a far more complex value than most of us have recognized.

An exploration of the hidden complexity of moral desert.

Summary

People differ in terms of how morally deserving they are. And it is a good thing if people get what they deserve. Accordingly, it is important to work out an adequate theory of moral desert. But while certain aspects of such a theory have been frequently discussed in the philosophical literature, many others have been surprisingly neglected. For example, if it is indeed true that it is morally good for people to get what they deserve, does it always do the same amount of good when someone gets what they deserve? Or does it matter how deserving the person is? If we cannot give someone exactly what they deserve, is it better to give too much or better to give too little? Does being twice as virtuous make you twice as deserving? And how are we to take into account the thought that what you deserve depends in part on how others are doing? The Geometry of Desert explores a number of these less familiar questions, using graphs to illustrate the various possible answers. The result is a more careful investigation into the nature of moral desert than has ever previously been offered, one that reveals desert to have a hidden complexity that most of us have failed to recognize.

Contributor Bio

Shelly Kagan is the Clark Professor of Philosophy at Yale, where he has taught since 1995. He was an undergraduate at Wesleyan University, and received his PhD in philosophy from Princeton University in 1982. Before coming to Yale, Professor Kagan taught at the University of Pittsburgh and at the University of Illinois at Chicago. He is the author of Death, The Limits of Morality, and the textbook, Normative Ethics. Videos of his undergraduate course on Death have been extremely popular online.

Quotes

"The Geometry of Desert is a model of analytic rigor, clarity, and thoroughness. An enormous amount of thought, care, and effort went into writing this book, which explores the possibilities for the design and use of graphs in numerous settings and with considerable originality and inventiveness."--Saul Smilansky, Notre Dame Philosophical Reviews

"Every few years a book appears that every philosopher, at least every philosopher in a particular field, must read. This volume by Kagan is such a book. It will be the subject of many graduate seminars and dissertations in the coming years.... Essential."--H. Oberdiek, CHOICE

"The Geometry of Desert is an extraordinary accomplishment. It is the most comprehensive and thoughtful discussion of the topic of desert in the literature."--Larry Temkin, Rutgers University

The Variety of Values
Essays on Morality, Meaning, and Love
Susan Wolf

Key Selling Points
- The first collection of Susan Wolf's essays.
- The volume brings together articles on related themes, some from sources that are difficult to access.
- Includes a substantive introduction by Wolf, which traces connections among her essays.

Summary
For over thirty years Susan Wolf has been writing about moral and nonmoral values and the relation between them. This volume collects Wolf's most important essays on the topics of morality, love, and meaning, ranging from her classic essay "Moral Saints" to her most recent "The Importance of Love."

Wolf's essays warn us against the common tendency to classify values in terms of a dichotomy that contrasts the personal, self-interested, or egoistic with the impersonal, altruistic or moral. On Wolf's view, this tendency ignores or distorts the significance of such values as love, beauty, and truth, and neglects the importance of meaningfulness as a dimension of the good life.

These essays show us how a self-conscious recognition of the variety of values leads to new understandings of the point, the content, and the limits of morality and to new ways of thinking about happiness and well-being.

Contributor Bio
Susan Wolf is the Edna J. Koury Distinguished Professor of Philosophy at the University of North Carolina at Chapel Hill. Her work focuses chiefly on ethics and its close relations in philosophy of mind, philosophy of action, political philosophy, and aesthetics. She is author of Freedom Within Reason (OUP, 1990) and Meaning in Life and Why It Matters (Princeton, 2010), and co-editor, with Christopher Grau of Understanding Love: Philosophy, Film, and Fiction (OUP, 2014).

The Variety of Values
Essays on Morality, Meaning, and Love
Susan Wolf

Key Selling Points
• The first collection of Susan Wolf's essays.
• The volume brings together articles on related themes, some from sources that are difficult to access.
• Includes a substantive introduction by Wolf, which traces connections among her essays.

Summary
For over thirty years Susan Wolf has been writing about moral and nonmoral values and the relation between them. This volume collects Wolf's most important essays on the topics of morality, love, and meaning, ranging from her classic essay "Moral Saints" to her most recent "The Importance of Love."

Wolf's essays warn us against the common tendency to classify values in terms of a dichotomy that contrasts the personal, self-interested, or egoistic with the impersonal, altruistic or moral. On Wolf's view, this tendency ignores or distorts the significance of such values as love, beauty, and truth, and neglects the importance of meaningfulness as a dimension of the good life.

These essays show us how a self-conscious recognition of the variety of values leads to new understandings of the point, the content, and the limits of morality and to new ways of thinking about happiness and well-being.

Contributor Bio
Susan Wolf is the Edna J. Koury Distinguished Professor of Philosophy at the University of North Carolina at Chapel Hill. Her work focuses chiefly on ethics and its close relations in philosophy of mind, philosophy of action, political philosophy, and aesthetics. She is author of Freedom Within Reason (OUP, 1990) and Meaning in Life and Why It Matters (Princeton, 2010), and co-editor, with Christopher Grau of Understanding Love: Philosophy, Film, and Fiction (OUP, 2014).

Moral Psychology and Human Agency
Philosophical Essays on the Science of Ethics
Justin D’Arms, Daniel Jacobson

Key Selling Points
- New essays on a hot topic
- Written by leading experts in the field
- At the intersection of philosophy and psychology

This volume examines the implications of developments in the science of ethics for philosophical theorizing about moral psychology and human agency.

Summary
These nine original essays examine the moral and philosophical implications of developments in the science of ethics, the growing movement that seeks to use recent empirical findings to answer long-standing ethical questions. Efforts to make moral psychology a thoroughly empirical discipline have divided philosophers along methodological fault lines, isolating discussions that will profit more from intellectual exchange. This volume takes an even-handed approach, including essays from advocates of empirical ethics as well as those who are sceptical of some of its central claims. Some of these essays make novel use of empirical findings to develop philosophical research programs regarding such crucial moral phenomena as desire, emotion, and memory. Others bring new critical scrutiny to bear on some of the most influential proposals of the empirical ethics movement, including the claim that evolution undermines moral realism, the effort to recruit a dual-process model of the mind to support consequentialism against other moral theories, and the claim that ordinary evaluative judgments are seldom if ever sensitive to reasons, because moral reasoning is merely the post hoc rationalization of unthinking emotional response.

Contributor Bio
Justin D’Arms and Daniel Jacobson are Professors of Philosophy at Rgw Ohio State University and the University of Michigan, respectively. They have co-authored ten papers on issues surrounding morality and the emotions, and the sentimentalist tradition in ethics. Their work has been published in a variety of distinguished journals and edited volumes, supported by numerous major grants, and presented in lectures throughout the world.

Emotion and Value
Sabine Roeser, Cain Todd

Key Selling Points
• The first book to bring together philosophers of emotion and value theory
• Provides state of the art overviews of current debates
• Illuminates the relationship of the emotions to a wide range of topics, including ethics, aesthetics, and self-understanding

A collection of new work by leading philosophers on emotion and value

Summary
This volume brings together new work by leading philosophers on the topics of emotion and value, and explores issues at their intersection. Philosophers and psychologists working on the emotions have reached something of a consensus about the complex, inter-related nature of the affective and cognitive components of emotions, and have increasingly focussed on the important epistemological role that emotions play in giving us access to values. At the same time, an increasing number of philosophers have become attracted to analyses of value that give emotions a prominent place in evaluative judgements and experiences. The work undertaken in each of these areas has important implications for current research on topics such as the role that emotions play in practical rationality and moral psychology, the connection between imagination and emotion in the appreciation of fiction, and more generally with the ability of emotions to discern axiological saliences and to ground (or fail to ground) the objectivity of ethical or aesthetic value judgements. This volume makes a unique contribution to scholarship on emotion and value by bringing together top authors from these lines of research. In addition, the volume contains a number of contributions that explore various links between the emotions and self-understanding, touching on a range of themes that include depression, empathy, agency, guilt, and self-trust. All of these issues are approached from a number of different perspectives in order to present the reader with a wide view of this extremely rich terrain and to demonstrate how the latest thinking in a number of currently intensive areas of research is deeply interconnected.

Contributor Bio

Sabine Roeser is professor of ethics at the philosophy Department of the University of Delft, The Netherlands, where she holds a distinguished Antoni van Leeuwenhoek Chair. She is head of a research group on 'Moral Emotions and Risk Politics'. Her research has been funded by several major grants from the Dutch science foundation NWO, and she publishes on ethics, emotions, and risk. She is author of the monograph Moral Emotions and Intuitions (Palgrave Macmillan, 2011).

Cain Todd has been Lecturer in Philosophy at Lancaster University since completing his PhD in philosophy at the University of Cambridge in 2003. He has held visiting positions at the University of Geneva and the Institut Jean Nicod, and from 2011 to 2013 he was co-leader of the project 'Imagination, Emotion, and Value' funded by the Swiss National Science Foundation at the University of Fribourg, Switzerland. His main research areas are aesthetics, philosophy of mind, and value theory, and in addition to publishing a number of articles in these areas he is the author of The Philosophy of Wine: a case of truth, beauty, and intoxication (Acumen Press, 2010).

Table Of Contents

1. Emotion and Value: Introduction, Sabine Roeser and Cain Todd
Part I. Emotion and the Nature of Value
2. In what Sense are Emotions Evaluations?, Julien Deonna and Fabrice Teroni
3. Evaluative Phenomenology, Michelle Montague
4. Emotion, Attention, and the Nature of Value, Michael Brady
5. Emotions as Unitary States, Jonathan Dancy
6. Relatively Fitting Emotions and Apparently Objective Values, Cain Todd
Part II. Emotion, Evaluation, and Justification
7. Emotion, Evaluative Perception, and Epistemic Justification, Adam Pelser
8. Why Recalcitrant Emotions Are Not Irrational, Sabine Doring
9. Surprise, Adam Morton
10. Emotions Fit for Fictions, Greg Currie

**Part III. Emotion, Value and the Self**
11. Emotional Self-trust, Linda Zagzebski
12. Self-empathy and Moral Repair, Nancy Sherman
13. Emotions and the Virtues of Self-understanding, Michael Lacewing
14. Emotion and Agency, Jan Slaby and Philipp Wuschner
15. Evaluating Existential Despair, Matthew Ratcliffe

From Rationality to Equality
James P. Sterba

Key Selling Points
- A new argument for equality
- Ambitious and pioneering work in moral and political philosophy
- Responsive to recent criticism and alternative accounts
- Lively and engaging

Summary
Most contemporary moral and political philosophers would like to have an argument showing that morality is rationally required. In From Rationality to Equality, James P. Sterba provides just such an argument and further shows that morality, so justified, requires substantial equality. His argument from rationality to morality is based on the principle of non-question-beggingness and has two forms. The first assumes that the egoist is willing to argue for egoism non-question-beggingly, and the second only assumes that the egoist is willing to assent to premises she actually needs to achieve her egoistic goals. Either way, he argues, morality is rationally (i.e., non-question-beggingly) preferable to egoism.

Sterba’s argument from morality to equality non-question-beggingly starts with assumptions that are acceptable from a libertarian perspective, the view that appears to endorse the least enforcement of morality, and then shows that this perspective requires a right to welfare which, when extended to distant peoples and future generations, leads to equality. He defends his two-part argument against recent critics, and shows how it is preferable not only to alternative attempts to justify morality, but also to alternative attempts to show that morality leads to a right to welfare and/or to equality.

Contributor Bio
James P. Sterba, University of Notre Dame

James P. Sterba is Professor of Philosophy at the University of Notre Dame. His previous publications include Three Challenges to Ethics (OUP, 2001), The Triumph of Practice over Theory in Ethics (OUP, 2005), and Does Feminism Discriminate Against Men?--A Debate, with Warren Farrell (OUP, 2007). He is past president of the American Philosophical Association (Central Division) and several other organizations.

Quotes
"James P. Sterba has put together a clearly written, closely and thoroughly argued, and well-organized book that advances arguments that address two fundamental questions in ethics and social theory."
--Social Theory and Practice

Table Of Contents

Oxford Studies in Agency and Responsibility, Volume 2
'Freedom and Resentment' at 50
David Shoemaker, Neal Tognazzini

Key Selling Points
- A special volume in an outstanding new series
- New perspectives on a key philosophical text
- Written by leading figures in the field

This special volume of Oxford Studies in Agency and Responsibility presents ten new papers marking the fiftieth anniversary of P. F. Strawson's landmark essay, "Freedom and Resentment.

Summary
Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes in moral philosophy and philosophy of action.

This special volume in the series presents ten new papers marking the fiftieth anniversary of P. F. Strawson's landmark essay, "Freedom and Resentment." Some of the papers offer critical interpretation of Strawson's essay, some expand on his insights into the nature of interpersonal relationships, and some develop his overall themes in new and challenging directions.

Contributor Bio

David Shoemaker is an Associate Professor in the Department of Philosophy and Murphy Institute at Tulane University. He has published forty articles and is the author, co-author, or editor of four books, several of which are about agency, responsibility, and/or personal identity.

Neal Tognazzini is an Assistant Professor in the Department of Philosophy at The College of William & Mary. He works at the intersection of metaphysics and ethics on problems of agency, free will, and moral responsibility. He is the author of more than twenty articles and is co-editor of Blame: Its Nature and Norms (OUP, 2013).

Table Of Contents

Editors' Introduction, David Shoemaker and Neal Tognazzini
1. Freedom and the Self: Feeling and Belief, Galen Strawson

Oxford Studies in Normative Ethics, Volume 4
Mark Timmons

Key Selling Points
- The only periodical publication devoted to normative ethics
- Designed to complement Oxford Studies in Metaethics
- The latest work by leading scholars
- Ranges widely over moral theories and issues
- All papers published here for the first time

The only periodical publication devoted to normative ethics

Summary
Oxford Studies in Normative Ethics is an annual forum for new work in normative ethical theory. Leading philosophers present original contributions to our understanding of a wide range of moral issues and positions, from analysis of competing approaches to normative ethics (including moral realism, constructivism, and expressivism) to questions of how we should act and live well. OSNE will be an essential resource for scholars and students working in moral philosophy.

Contributor Bio
Mark Timmons is Professor of Philosophy at the University of Arizona. He is the author of Morality Without Foundations (OUP, 1998), and editor of Kant's Metaphysics of Morals (OUP, 2002).

Table Of Contents

Introduction
1. Why Virtue Ethics Does Not Have a Problem with Right Action, Julia Annas
2. Must Kantian Contractualism and Rule Consequentialism Converge?, Brad Hooker
3. Moral by Virtue of Virtue, Earl Conee
4. Lack of Virtue and Vice: Studies of Agression and Their Implications for the Empirical Adequacy of Character, Christian Miller
5. Contractualism and the Conditional Fallacy, Jussi Suikkanen
6. Acting Wrongly by Trying, Matthew Hanser
7. Russian Deontology and the Possibility of Moral Expertise, Eric Wiland
8. What is Goodness Good For?, Christian Piller
10. Virtue Ethics and the Demands of Social Morality, Bradford Cokelet

Building Better Beings
A Theory of Moral Responsibility
Manuel Vargas

Key Selling Points
- An original and revisionist account of moral responsibility, by a leading expert in the field
- Defends our ordinary, common-sense convictions about free will and agency
- Draws on recent debates in social psychology, and illuminates the relationship between moral philosophy and legal practice
A compelling and state-of-the-art defense of moral responsibility

Summary
Building Better Beings presents a new theory of moral responsibility. Beginning with a discussion of ordinary convictions about responsibility and free will and their implications for a philosophical theory, Manuel Vargas argues that no theory can do justice to all the things we want from a theory of free will and moral responsibility. He goes on to show how we can nevertheless justify our responsibility practices and provide a normatively and naturalistically adequate account of responsible agency, blame, and desert.

Three ideas are central to Vargas' account: the agency cultivation model, circumstantialism about powers, and revisionism about responsibility and free will. On Vargas' account, responsibility norms and practices are justified by their effects. In particular, the agency cultivation model holds that responsibility practices help mold us into creatures that respond to moral considerations. Moreover, the abilities that matter for responsibility and free will are not metaphysically prior features of agents in isolation from social contexts. Instead, they are functions of both agents and their normatively structured contexts. This is the idea of circumstantialism about the powers required for responsibility. Third, Vargas argues that an adequate theory of responsibility will be revisionist, or at odds with important strands of ordinary convictions about free will and moral responsibility. Building Better Beings provides a compelling and state-of-the-art defense of moral responsibility in the face of growing philosophical and scientific skepticism about free will and moral responsibility.

Contributor Bio

Manuel Vargas is Professor of Philosophy and Law at the University of San Francisco. His principal areas of research include responsibility, moral psychology, and Latin American philosophy. He received his joint-PhD in philosophy from Stanford University. He is the co-author of Four Views on Free Will (Blackwell, 2007) with John Fischer, Robert Kane, and Derk Pereboom, and co-editor of Rational and Social Agency: On Themes in the Philosophy of Michael Bratman (OUP, forthcoming) with Gideon Yaffe.

Motivational Internalism
Gunnar Björnsson, Fredrik Björklund, Caj Strandberg...

Key Selling Points
• The first volume focused on motivational internalism
• Provides both overview and in-depth examination of wide-ranging but scattered debates
• Distinguishes important threads and trends in contemporary metaethics

Summary
Motivational internalism—the idea that there is an intrinsic or necessary connection between moral judgment and moral motivation—is a central thesis in a number of metaethical debates. In conjunction with a Humean picture of motivation, it provides a challenge for cognitivist theories that take moral judgments to concern objective aspects of reality. Versions of internalism have potential implications for moral absolutism, realism, non-naturalism, and rationalism. Being a constraint on more detailed conceptions of moral motivation and moral judgment, it is also directly relevant to wider issues in moral psychology. But internalism is a controversial thesis, and the apparent possibility of amoralists and the rejection of strong forms of internalism have also been seen as problems for non-cognitivists.

This volume's thirteen new essays and introduction are meant to help readers appreciate state-of-the-art research on internalism, to identify connections between various aspects of the debate, and to deepen discussion of a number of central aspects of metaethics. The introductory chapter provides a structured overview of the debate with a focus on the last two decades, while the book's three main sections focus on what evidence there is for or against various versions of internalism, the relevance of versions of internalism for wider metaethical issues, and different ways of accommodating both internalist and externalist aspects of moral practice, respectively.

Contributor Bio
Gunnar Björnsson, Caj Strandberg, Ragnar Francén Olinder, John Eriksson, and Fredrik Björklund have published widely on issues related to the volume published. Their papers have appeared in journals such as Mind, Ethics, Journal of Philosophy, Philosophy and Phenomenological Research, Noûs, Philosophical Studies, Journal of Ethics, and Australasian Journal of Philosophy.

The Biological Foundations of Bioethics
Tim Lewens

Key Selling Points
- At the intersection of philosophy and science
- Presents Lewens' influential papers on bioethics together for the first time
- A clear and concise summary of the state of play
- Points the way for future debates

Summary
Much recent thought on the ethics of new biomedical technologies, and work in ethics and political philosophy more generally, is committed to hidden and contestable views about the nature of biological reality. This selection of essays by Tim Lewens, a leading expert in the field, teases out these biological foundations of bioethical writing and subjects them to scrutiny. The topics covered include human enhancement, the risks of technical progress, the alleged moral threat of synthetic biology, the reality of human nature, the relevance of evolutionary psychology to social policy, the nature of the distinction between health and disease, and justice in healthcare decision-making.

Contributor Bio

Achievement
Gwen Bradford

Key Selling Points
- The first monograph on a fascinating topic
- Written in a clear, engaging, and accessible style

Summary
From the magisterial to the mundane, achievements play a role in the best kind of human life, and many people think that they are of such importance that they are worth pursuing at the expense of serious sacrifices. Yet for all that, no philosophers have devoted more than a few short passages to discerning what makes achievements valuable, or even what makes something an achievement to begin with. Gwen Bradford presents the first systematic account of what achievements are, and what it is about them that makes them worth doing. It turns out that more things count as achievements than we might have thought, and that what makes them valuable isn't something we usually think of as good. It turns out that difficulty, perhaps surprisingly, plays a central part in characterizing achievements and their value: achievements are worth the effort. But just what does it mean for something to be difficult, and why is it valuable? A thorough analysis of the nature of difficulty is given, and ultimately, the best account of the value of achievements taps into perfectionist axiology. But not just any perfectionist theory of value will do, and in this book we see a new perfectionist theory developed that succeeds in capturing the value of achievement better than its predecessors.

Bound
Essays on free will and responsibility
Shaun Nichols

Key Selling Points
• Ground-breaking work on free will and responsibility
• At the intersection of philosophy and psychology

Summary
The problem of free will arises from ordinary, commonsense reflection. Shaun Nichols examines these ordinary attitudes from a naturalistic perspective. He offers a psychological account of the origins of the problem of free will. According to his account the problem arises because of two naturally emerging ways of thinking about ourselves and the world, one of which makes determinism plausible while the other makes determinism implausible. Although contemporary cognitive science does not settle whether choices are determined, Nichols argues that our belief in indeterminist choice is grounded in faulty inference and should be regarded as unjustified. However, even if our belief in indeterminist choice is false, it's a further substantive question whether that means that free will doesn't exist. Nichols argues that, because of the flexibility of reference, there is no single answer to whether free will exists. In some contexts, it will be true to say 'free will exists'; in other contexts, it will be false to say that. With this substantive background in place, Bound promotes a pragmatic approach to prescriptive issues. In some contexts, the prevailing practical considerations suggest that we should deny the existence of free will and moral responsibility; in other contexts the practical considerations suggest that we should affirm free will and moral responsibility. This allows for the possibility that in some contexts, it is morally apt to exact retributive punishment; in other contexts, it can be apt to take up the exonerating attitude of hard incompatibilism.

Doing and Allowing Harm
Fiona Woollard

Key Selling Points
- Explores a key issue in moral philosophy
- Presents persuasive new arguments
- Clearly written

Summary
Doing harm seems much harder to justify than merely allowing harm. If a boulder is rushing towards Bob, you may refuse to save Bob's life by driving your car into the path of the boulder if doing so would cost you your own life. You may not push the boulder towards Bob to save your own life. This principle—the Doctrine of Doing and Allowing—requires defence. Does the distinction between doing and allowing fall apart under scrutiny? When lives are at stake, how can it matter whether harm is done or allowed? Drawing on detailed analysis of the distinction between doing and allowing, Fiona Woollard argues that the Doctrine of Doing and Allowing is best understood as a principle that protects us from harmful imposition. Such protection against imposition is necessary for morality to recognize anything as genuinely belonging to a person, even that person's own body. As morality must recognize each person's body as belonging to her, the Doctrine of Doing and Allowing should be accepted. Woollard defends a moderate account of our obligations to aid, tackling arguments by Peter Singer and Peter Unger that we must give most of our money away and arguments from Robert Nozick that obligations to aid are incompatible with self-ownership.

Contributor Bio
Fiona Woollard, University of Southampton

Fiona Woollard has been a Lecturer in Philosophy at the University of Southampton since September 2010. She was born and raised in Scotland. She studied Philosophy and Mathematics at Magdalen College, Oxford, before returning to Scotland to do an M.Litt in Philosophy at the University of St Andrews. She completed her PhD at the University of Reading in 2008 and then held a temporary lectureship at the University of Sheffield for two years. She has research interests in normative ethics, applied ethics, and the philosophy of sex and pregnancy, and has published on topics including the distinction between doing and allowing harm, climate change and the non-identity problem, the moral significance of numbers, pornography, and the norm of monogamy.

The Ethics of Embryonic Stem Cell Research
Katrien Devolder

Key Selling Points
- Brand new work on a controversial debate
- Introduces a clear, ethical position on a major problem
- A philosophical approach that will shed light on other ethical debates

Summary
Embryonic stem cell research holds unique promise for developing therapies for currently incurable diseases and conditions, and for important biomedical research. However, the process through which embryonic stem cells are obtained involves the destruction of early human embryos. Katrien Devolder focuses on the tension between the popular view that an embryo should never be deliberately harmed or destroyed, and the view that embryonic stem cell research, because of its enormous promise, must go forward. She provides an in-depth ethical analysis of the major philosophical and political attempts to resolve this tension. One such attempt involves the development of a middle ground position, which accepts only types or aspects of embryonic stem cell research deemed compatible with the view that the embryo has a significant moral status. An example is the position that it can be permissible to derive stem cells from embryos left over from in vitro fertilisation but not from embryos created for research. Others have advocated a technical solution. Several techniques have been proposed for deriving embryonic stem cells, or their functional equivalents, without harming embryos. An example is the induced pluripotent stem cell technique. Through highlighting inconsistencies in the arguments for these positions, Devolder argues that the central tension in the embryonic stem cell debate remains unresolved. This conclusion has important implications for the stem cell debate, as well as for policies inspired by this debate.

Contributor Bio
Katrien Devolder, Ghent University

Katrien Devolder obtained a PhD in Philosophy at Ghent University in 2006, after which she was awarded a six-year Postdoctoral Research Fellowship by the Research Foundation Flanders. She conducted her postdoctoral work at the Bioethics Institute Ghent, Department of Philosophy and Moral Sciences, at Ghent University, as well as during long-term academic visits at several other universities, including the University of Oxford, Harvard University, and Princeton University. Between 2012 and 2014 she worked as an Assistant Professor at Ghent University, and from October 2014 onwards, she will be a Marie Curie Fellow at the Oxford Uehiro Centre for Practical Ethics, Faculty of Philosophy, University of Oxford.

Hard Luck
How Luck Undermines Free Will and Moral Responsibility
Neil Levy

Key Selling Points
- Presents an original philosophical approach to the role of luck in our lives
- Engages with key issues that animate the free will debate today
- Provides detailed analysis of a broad range of theories and approaches
- Essential reading for anyone interested in freedom and moral responsibility

Summary
The concept of luck has played an important role in debates concerning free will and moral responsibility, yet participants in these debates have relied upon an intuitive notion of what luck is. Neil Levy develops an account of luck, which is then applied to the free will debate. He argues that the standard luck objection succeeds against common accounts of libertarian free will, but that it is possible to amend libertarian accounts so that they are no more vulnerable to luck than is compatibilism. But compatibilist accounts of luck are themselves vulnerable to a powerful luck objection: historical compatibilisms cannot satisfactorily explain how agents can take responsibility for their constitutive luck; non-historical compatibilisms run into insurmountable difficulties with the epistemic condition on control over action. Levy argues that because epistemic conditions on control are so demanding that they are rarely satisfied, agents are not blameworthy for performing actions that they take to be best in a given situation. It follows that if there are any actions for which agents are responsible, they are akratic actions; but even these are unacceptably subject to luck. Levy goes on to discuss recent non-historical compatibilisms, and argues that they do not offer a viable alternative to control-based compatibilisms. He suggests that luck undermines our freedom and moral responsibility no matter whether determinism is true or not.

Contributor Bio
Neil Levy is Head of Neuroethics at the Florey Neuroscience Institutes and Director of Research at the Oxford Centre for Neuroethics. He is the author of five previous books and many articles, on a wide range of topics including applied ethics, free will and moral responsibility, philosophical psychology, and philosophy of mind. He divides his time between Melbourne, Australia, and Oxford, England.

The Poverty of Conceptual Truth
Kant's Analytic/Synthetic Distinction and the Limits of Metaphysics
R. Lanier Anderson

Key Selling Points
- An original interpretation of a crucial turning-point in the history of philosophy
- Traces the development of Kant's philosophy in new ways
- Written by a leading expert in the field

Summary
The Poverty of Conceptual Truth is based on a simple idea. Kant's distinction between analytic and synthetic judgments underwrites a powerful argument against the metaphysical program of his Leibnizian-Wolffian predecessors—an argument from fundamental limits on its expressive power. In that tradition, metaphysics promised to reveal the deep rational structure of the world through a systematic philosophy consisting of strictly conceptual truths, which flow from a logically perspicuous relation of 'containment' among concepts. That is, all truths would be 'analytic,' in Kant's sense. Kant's distinction shows to the contrary that far reaching and scientifically indispensable parts of our knowledge of the world (including mathematics, the foundations of natural science, all knowledge from experience, and the central principles of metaphysics itself) are essentially synthetic and could never be restated in analytic form. Thus, the metaphysics of Kant's predecessors is doomed, because knowledge crucial to any adequate theory of the world cannot even be expressed in the idiom to which it restricts itself (and which was the basis of its claim to provide a transparently rational account of things). Traditional metaphysics founders on the expressive poverty of conceptual truth.

To establish these claims, R. Lanier Anderson shows how Kant's distinction can be given a clear basis within traditional logic, and traces Kant's long, difficult path to discovering it. Once analyticity is framed in clear logical terms, it is possible to reconstruct compelling arguments that elementary mathematics must be synthetic, and then to show how similar considerations about irreducible syntheticy animate Kant's famous arguments against traditional metaphysics in the Critique of Pure Reason.

Contributor Bio
R. Lanier Anderson, Stanford University

R. Lanier Anderson is Associate Professor of Philosophy (and by courtesy, of German Studies) at Stanford University, where he currently chairs the Philosophy Department. He works in the history of late modern philosophy with primary focus on Kant and nineteenth century philosophy, and is the author of a numerous articles about Kant, Nietzsche, and the neo-Kantian movement. His other research interests include Nietzsche's moral psychology and various topics in the philosophy of Montaigne.

Table of Contents

Introduction
1. Containment Analyticity and Kant's Problem of Synthetic Judgment

Part I--The Traditional Logic of Concept Containment and its (alleged) Metaphysical Implications
2. Containment and the Traditional Logic of Concepts
3. The Wolffian Paradigm
4. Narrowness and Trade-offs: Conceptual Truth in the 'Leibnizian-Wolffian' Philosophy

Part II--A Difficult Birth: the Emergence of Kant's Analytic/Synthetic Distinction
5. Three Versions of Analyticity
6. Methodological Beginnings: Analysis and Synthesis in the Published pre-Critical Works
7. Making Synthetic Judgments Analytic: Kant's Long Road toward Logical Analyticity in the Reflexionen

Part III--Ineliminable Synthetic Truth in Elementary Mathematics
8. The Logic of Concepts and a 'Two Step' Syntheticy Argument
9. Kant on the Synthetocity of Elementary Mathematics
Part IV--The Poverty of Conceptual Truth and the Master Argument of the 'Transcendental Dialectic'
10. The Master Argument
11. The Soul and the World: the Master Argument in Kant's 'Paralogisms' and 'Antinomy'
12. The Master Argument in the Critique of Rational Theology

Epilogue
13. Empirical Concept Formation and the Systematic Role of Logical Division
Appendix 1: Kant's Criticisms of the Ontological Argument in 1763
Four Strands of Reflexionen on the Emerging Analytic/Synthetic Distinction
Friedman and the Phenomenological Reading

Oxford Studies in Medieval Philosophy

*Volume 2*

Robert Pasnau

**Key Selling Points**
- The second volume in a prestigious series
- Aims to be the leading forum for new work in this field
- Covers all areas of philosophy in Europe and the Middle East, from c. 400 to 1600 AD
- Illuminates and enlivens this neglected historical period in philosophical thought
- All papers published here for the first time

Oxford Studies in Medieval Philosophy showcases the best new scholarly work on philosophy from the end of antiquity into the Renaissance.

**Summary**

*Oxford Studies in Medieval Philosophy* showcases the best scholarly research in this flourishing field. The series covers all aspects of medieval philosophy, including the Latin, Arabic, and Hebrew traditions, and runs from the end of antiquity into the Renaissance. It publishes new work by leading scholars in the field, and combines historical scholarship with philosophical acuteness. The papers will address a wide range of topics, from political philosophy to ethics, and logic to metaphysics. *OSMP* is an essential resource for anyone working in the area.

**Contributor Bio**

**Robert Pasnau** is Professor of Philosophy at the University of Colorado at Boulder. He received his PhD in 1994 from Cornell University, and has published widely on the history of philosophy. He won the APA Book Prize for *Thomas Aquinas on Human Nature* (CUP, 2002), and has more recently published *The Cambridge History of Medieval Philosophy* (CUP, 2010) and *Metaphysical Themes 1274-1671* (OUP, 2011).

**Table Of Contents**

**Articles**
- Explaining Exact Resemblance: Gilbert of Poitiers's *Conformitas* Theory Reconsidered, *Christophe Erismann*
- I See Dead People: Disembodied Souls and Aquinas's 'Two-Person' Problem, *Christina Van Dyke*
- Aquinas and Scotus on the Source of Contingency, *Gloria Frost*
- Peter John Olivi and Peter Auriol on Conceptual Thought, *Han Thomas Adriaenssen*

**Discussion**
- Aquinas on Spiritual Change, *Paul Hoffman*

**Text**
- Pseudo-Joscelin: The Treatise on Genera and Species, *Peter King*

**Critical Notice**
- Critical Study of Fabrizio Amerini's *Aquinas on the Beginning and End of Human Life*, *Patrick Toner*

Getting Causes from Powers
Stephen Mumford, Rani Lill Anjum

Key Selling Points
• A radical new theory of causation
• The first thoroughly dispositional approach to the subject
• Introduces surprising results and conclusions
• Engages with a variety of topics central to philosophy
A radical new theory of causation

Summary
Causation is everywhere in the world: it features in every science and technology. But how much do we truly understand it? Do we know what it means to say that one thing is a cause of another and do we understand what in the world drives causation? Getting Causes from Powers develops a new and original theory of causation based on an ontology of real powers or dispositions. Others have already suggested that this ought to be possible, but no one has yet performed the detailed work. Stephen Mumford and Rani Lill Anjum argue here that the completed theory will not look exactly as anyone has yet anticipated, and that a thoroughly dispositional theory of causation has some surprising features, for instance with respect to modality. The book is not restricted to the metaphysics of causation, but treats a variety of topics such as explanation, perception, modelling, the logic of causal claims, transitivity, and nonlinearity, and the empirical credentials of the theory are tested with reference to biology.

Contributor Bio

Stephen Mumford is Professor of Metaphysics and Head of the School of Humanities at the University of Nottingham. He gained his PhD from Leeds in 1994 and then wrote Dispositions (OUP 1998), Laws in Nature (Routledge 2004), and David Armstrong (Acumen 2007), as well as editing Russell on Metaphysics (Routledge 2003) and George Molnar's Powers (OUP 2003). He was co-investigator in the AHRC-funded project Metaphysics of Science and has been Chair of the British Philosophy of Sport Association. He is currently writing a book on sport: Watching Sport: Aesthetics, Ethics and Emotions.

Rani Lill Anjum is an Associate Professor at the Norwegian University of Life Sciences. She received her doctorate from the University of Tromso, funded by the FRIHUM program at the Norwegian Research Council (NFR). Anjum has recently finished a three-year postdoctoral project at Tromso and Nottingham on causation and dispositions (also funded by FRIHUM).

Passions and Projections
Themes from the Philosophy of Simon Blackburn
Robert N. Johnson, Michael Smith

Key Selling Points
- New essays on a leading philosopher of our times
- Illuminates the work of Simon Blackburn, and engages critically with key themes
- Covers a range of subjects in central areas of philosophy
14 original essays exploring the philosophy of Simon Blackburn

Summary
This volume presents fourteen original essays which explore the philosophy of Simon Blackburn, one of the UK's most influential contemporary philosophers. Blackburn is best known to the general public for his attempts to make philosophy accessible to those with little or no formal training, but in professional circles his reputation is based on a lifetime pursuit of his distinctive version of a projectivist and anti-realist research program. As he sees things, we must always try first to understand and explain what we are doing when we think and talk as we do. This research program reaches into nearly all of the main areas of philosophy: metaphysics, epistemology, philosophy of mind, moral philosophy, and moral psychology. The books and articles he has written provide us with perhaps the most comprehensive statement and defense of projectivism and anti-realism since Hume. The essays collected here document the range and influence of Blackburn's work. They reveal, among other things, the resourcefulness of his distinctive brand of philosophical pragmatism.

Contributor Bio

Robert Johnson is Professor of Philosophy and Chair of the Philosophy Department at the University of Missouri, Columbia, and was a student of Blackburn's at UNC Chapel Hill in the 1990s.

Michael Smith is McCosh Professor of Philosophy and Chair of the Philosophy Department at Princeton University; he was a student of Blackburn's at Oxford University in the 1980s.

Table Of Contents

Introduction, Robert Johnson and Michael Smith
Apologia pro Vita Sua, Simon Blackburn

Part One: Metaphysics and Epistemology
1. Defending Folk Psychology: The Limits of Coalitions, Louise Antony
2. Causation, Projection, Inference, and Agency, Helen Beebee
3. Singular Belief, Frank Jackson
5. The Metaphysics of Artistic Expression: A Case Study in Projectivism, Robert Kraut
6. The Impossible Necessity of 'Filling in Space', Rae Langton
8. From Quasi-Realism to Global Expressivism—and Back Again?, Huw Price

Part Two: Metaethics and Moral Psychology
9. Another World: The Metaethics and Metametaethics of Reasons Fundamentalism, Jamie Dreier
10. Improving Sensibilities, Allan Gibbard
11. Modest Quasi-Realism and the Problem of Deep Moral Error, Terry Horgan and Mark Timmons
12. Just How Do Passions Rule? The (More) Compleat Humean, Peter Railton
13. Higher-Order Attitudes, Frege's Abyss, and the Truth in Propositions, Mark Schroeder
14. The Fugitive Thought: Blackburn on Reasons, R. Jay Wallace

Objective Becoming
Bradford Skow

Key Selling Points
- A bold new treatment of time
- Illuminates the debate in relation to relativity theory, and to our more everyday 'experience' of time
- The only recent monograph on the subject

Summary
Bradford Skow presents an original defense of the 'block universe' theory of time, often said to be a theory according to which time does not pass. Along the way, he provides in-depth discussions of alternative theories of time, including those in which there is 'robust passage' of time or 'objective becoming': presentism, the moving spotlight theory of time, the growing block theory of time, and the 'branching time' theory of time. Skow explains why the moving spotlight theory is the best of these arguments, and rebuts several popular arguments against the thesis that time passes. He surveys the problems that the special theory of relativity has been thought to raise for objective becoming, and suggests ways in which fans of objective becoming may reconcile their view with relativistic physics. The last third of the book aims to clarify and evaluate the argument that we should believe that time passes because, somehow, the passage of time is given to us in experience. He isolates three separate arguments this idea suggests, and explains why they fail.

Oxford Studies in Experimental Philosophy, Volume 1
Joshua Knobe, Tania Lombrozo, Shaun Nichols

Key Selling Points
- The inaugural volume in a groundbreaking series
- Addresses controversial debates and challenges accepted methods
- At the intersection of philosophy and psychology
- Essential reading for anyone working in the area

The place to go to see outstanding new work in the field.

Summary
The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues. Oxford Studies in Experimental Philosophy will be the place to go to see outstanding new work in the field. It will feature papers by philosophers, papers by psychologists, and papers co-authored by people in both disciplines. The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions.

The inaugural volume is roughly structured into four sections. The first three papers focus on recent developments in moral psychology, a topic that has seen lively debate and a great deal of progress over the last decade. The second section highlights three contributions that bring new methods to moral psychology: formal modeling and special populations. The third section brings together four papers that adopt an experimental philosophy approach to novel topics, including intuitive dualism, generics, joint action, and happiness. And the last two papers provide critical and historical context to the development of experimental philosophy.

Contributor Bio

Joshua Knobe is a professor at Yale University, appointed both in the Program in Cognitive Science and in the Department of Philosophy. Much of his research is concerned with the impact of moral judgments on people's intuitions about matters that might at first appear to be entirely non-moral in nature.

Tania Lombrozo is an Associate Professor of Psychology at the University of California, Berkeley. Her research combines methods and insights from philosophy and psychology to address questions about explanation and understanding, learning, causal reasoning, conceptual representation, and social cognition. She is also a regular blogger for NPR's 13.7: Cosmos & Culture.

Shaun Nichols is Professor of Philosophy at the University of Arizona. His books include Sentimental Rules (2004), Bound (2014) and, co-authored with Stephen Stich, Mindreading (2003). His current research focuses on the psychological underpinnings of philosophical problems.

Table Of Contents

Introduction
1. Huck vs. Jojo: Moral Ignorance and the (A)Symmetry of Praise and Blame, David Faraci and David Shoemaker
3. Doing, Allowing, and Enabling Harm: An Empirical Investigation, Christian Barry, Matthew Lindauer, Gerhard Overland
6. The Concept of Intentional Action in High Functioning Autism, Edouard Machery and...
Tiziana Zalla
8. Carving up the Social World with Generics, Sarah-Jane Leslie
9. Flavors of "Togetherness": Experimental Philosophy and Theories of Joint Action, Deborah Tollefsen, Roger Kreuz, Rick Dale
10. The Good in Happiness, Jonathan Phillips, Sven Nyholm, Shen-yi Liao
11. Causal Reasoning: Philosophy and Experiment, James Woodward

Self and Other
Exploring Subjectivity, Empathy, and Shame
Dan Zahavi

Key Selling Points
- Original work by a leading scholar of his generation
- Brings together analytic philosophy and phenomenology
- A new answer to the question of what selfhood is, and how we should understand it

Summary
Can you be a self on your own or only together with others? Is selfhood a built-in feature of experience or rather socially constructed? How do we at all come to understand others? Does empathy amount to and allow for a distinct experiential acquaintance with others, and if so, what does that tell us about the nature of selfhood and social cognition? Does a strong emphasis on the first-personal character of consciousness prohibit a satisfactory account of intersubjectivity or is the former rather a necessary requirement for the latter?

Engaging with debates and findings in classical phenomenology, in philosophy of mind and in various empirical disciplines, Dan Zahavi's new book Self and Other offers answers to these questions. Discussing such diverse topics as self-consciousness, phenomenal externalism, mindless coping, mirror self-recognition, autism, theory of mind, embodied simulation, joint attention, shame, time-consciousness, embodiment, narrativity, self-disorders, expressivity and Buddhist no-self accounts, Zahavi argues that any theory of consciousness that wishes to take the subjective dimension of our experiential life seriously must endorse a minimalist notion of self. At the same time, however, he also contends that an adequate account of the self has to recognize its multifaceted character, and that various complementary accounts must be integrated, if we are to do justice to its complexity. Thus, while arguing that the most fundamental level of selfhood is not socially constructed and not constitutively dependent upon others, Zahavi also acknowledges that there are dimensions of the self and types of self-experience that are other-mediated. The final part of the book exemplifies this claim through a close analysis of shame.

Contributor Bio
Dan Zahavi, University of Copenhagen

Dan Zahavi is Professor of Philosophy and Director of Center for Subjectivity Research at the University of Copenhagen. He was elected member of Institut International de Philosophie in 2001 and of the Royal Danish Academy of Sciences and Letters in 2007. From 2001 to 2007 he served as president of the Nordic Society for Phenomenology, and he is currently co-editor in chief of Phenomenology and the Cognitive Sciences. In his systematic work, Zahavi has mainly been investigating the nature of selfhood, self-consciousness, and intersubjectivity. His most important publications include Husserl und die transzendente Intersubjektivität (Kluwer, 1996), Self-awareness and Alterity (Northwestern University Press, 1999), Husserl's Phenomenology (Stanford University Press, 2003), Subjectivity and Selfhood (MIT Press, 2005), and, with Shaun Gallagher, The Phenomenological Mind (Routledge, 2008).

How Attention Engenders Experience
Jesse J. Prinz

Key Selling Points
- The most systematic integration of neuroscientific and philosophical research on consciousness
- Presents a controversial new theory of consciousness
- Reviews scientific and philosophical theories of consciousness
- Advances a new theory of the psychological and neurophysiological correlates of conscious experience.

Summary
The problem of consciousness continues to be a subject of great debate in cognitive science. Synthesizing decades of research, The Conscious Brain advances a new theory of the psychological and neurophysiological correlates of conscious experience.

Prinz’s account of consciousness makes two main claims: first consciousness always arises at a particular stage of perceptual processing, the intermediate level, and, second, consciousness depends on attention. Attention changes the flow of information allowing perceptual information to access memory systems. Neurobiologically, this change in flow depends on synchronized neural firing. Neural synchrony is also implicated in the unity of consciousness and in the temporal duration of experience.

Prinz also explores the limits of consciousness. We have no direct experience of our thoughts, no experience of motor commands, and no experience of a conscious self. All consciousness is perceptual, and it functions to make perceptual information available to systems that allows for flexible behavior.

Prinz concludes by discussing prevailing philosophical puzzles. He provides a neuroscientifically grounded response to the leading argument for dualism, and argues that materialists need not choose between functional and neurobiological approaches, but can instead combine these into neurofunctional response to the mind-body problem.

The Conscious Brain brings neuroscientific evidence to bear on enduring philosophical questions, while also surveying, challenging, and extending philosophical and scientific theories of consciousness. All readers interested in the nature of consciousness will find Prinz's work of great interest.

British Ethical Theorists from Sidgwick to Ewing
Thomas Hurka

Key Selling Points
- The first history of this school of moral philosophy
- Explores the work of lesser-known writers within the movement alongside their more popular contemporaries
- Offers penetrating critical assessments of key arguments in ethics
- Illuminates the relevance of historical study to contemporary moral debates
The first full historical study of a key strand in the development of modern moral philosophy

Summary
Thomas Hurka presents the first full historical study of an important strand in the development of modern moral philosophy. His subject is a series of British ethical theorists from the late nineteenth century to the mid-twentieth century, who shared key assumptions that made them a unified and distinctive school. The best-known of them are Henry Sidgwick, G. E. Moore, and W. D. Ross; others include Hastings Rashdall, H. A. Prichard, C. D. Broad, and A. C. Ewing. They disagreed on some important topics, especially in normative ethics. Thus some were consequentialists and others deontologists: Sidgwick thought only pleasure is good while others emphasized perfectionist goods such as knowledge, aesthetic appreciation, and virtue. But all were non-naturalists and intuitionists in metaethics, holding that moral judgements can be objectively true, have a distinctive subject-matter, and are known by direct insight. They also had similar views about how ethical theory should proceed and what are relevant arguments in it; their disagreements therefore took place on common ground.

Hurka recovers the history of this under-appreciated group by showing what its members thought, how they influenced each other, and how their ideas changed through time. He also identifies the shared assumptions that made their school unified and distinctive, and assesses their contributions critically, both when they debated each other and when they agreed. One of his themes is that that their general approach to ethics was more fruitful philosophically than many better-known ones of both earlier and later times.

Contributor Bio
Thomas Hurka is Chancellor Henry N.R. Jackman Distinguished Professor of Philosophical Studies at the University of Toronto and taught previously at the University of Calgary. He is the author of several books primarily in the theory of value--Perfectionism (OUP, 1993), Virtue, Vice, and Value (OUP, 2001), and The Best Things in Life (OUP, 2011)--and is the author of Underivative Duty: British Moral Philosophers from Sidgwick to Ewing (OUP, 2011), as well as numerous articles in moral and political philosophy. For a time he was a weekly ethics columnist for the Globe and Mail newspaper.

Descartes and the First Cartesians
Roger Ariew

Key Selling Points
- Ground-breaking account of the influence and dissemination of Descartes's ideas
- Written by one of the world's leading scholars on the subject
- Will be of interest to anyone interested in early modern thought and intellectual history

Roger Ariew presents a new account of Descartes as a philosopher who sought to engage his contemporaries and society.

Summary
.Descartes and the First Cartesians adopts the perspective that we should not approach Rene Descartes as a solitary thinker, but as a philosopher who constructs a dialogue with his contemporaries, so as to engage them and elements of his society into his philosophical enterprise. Roger Ariew argues that an important aspect of this engagement concerns the endeavor to establish Cartesian philosophy in the Schools, that is, to replace Aristotle as the authority there. Descartes wrote the Principles of Philosophy as something of a rival to Scholastic textbooks, initially conceiving the project as a comparison of his philosophy and that of the Scholastics. Still, what Descartes produced was inadequate for the task. The topics of Scholastic textbooks ranged more broadly than those of Descartes; they usually had quadripartite arrangements mirroring the structure of the collegiate curriculum, divided as they typically were into logic, ethics, physics, and metaphysics. But Descartes produced at best only what could be called a general metaphysics and a partial physics. These deficiencies in the Cartesian program and in its aspiration to replace Scholastic philosophy in the schools caused the Cartesians to rush in to fill the voids. The attempt to publish a Cartesian textbook that would mirror what was taught in the schools began in the 1650s with Jacques Du Roure and culminated in the 1690s with Pierre-Sylvain Regis and Antoine Le Grand. Ariew's original account thus considers the reception of Descartes' work, and establishes the significance of his philosophical enterprise in relation to the textbooks of the first Cartesians and in contrast with late Scholastic textbooks.

Contributor Bio
Roger Ariew joined the Philosophy Department at the University of South Florida in 2004 after a postdoctoral position at the University of Chicago, and many years at Virginia Tech. His principal interests concern the relations between philosophy, science, and society in the early modern period. He is the author of Descartes and the Last Scholastics (Cornell University Press, 1999), with a second, revised and expanded edition published as Descartes among the Scholastics (2011), co-author of The A to Z of Descartes and Cartesian Philosophy (Scarecrow Press, 2010), and editor and translator of such works as Descartes, Philosophical Essays and Correspondence (Hackett, 2000). He has been awarded multiple fellowships and research grants by the National Endowment for the Humanities and the National Science Foundation. He is currently working on a complete historical-critical edition and English translation of Descartes' correspondence, with Theo Verbeek and Erik-Jan Bos.

**Key Selling Points**

- Brand new work by leading international scholars
- An original contribution to an emerging field of research
- Illuminates major controversies in political theory

The first book dedicated to a systematic exploration of Kant's position on colonialism.

**Summary**

This is the first book dedicated to a systematic exploration of Kant's position on colonialism. Bringing together a team of leading scholars in both the history of political thought and normative theory, the chapters in the volume seek to place Kant's thoughts on colonialism in historical context, examine the tensions that the assessment of colonialism produces in Kant's work, and evaluate the relevance of these reflections for current debates on global justice and the relation of Western political thinking to other parts of the world.

**Contributor Bio**

**Katrin Flikschuh** is Professor of Political Theory at the London School of Economics. She works on Kant's political philosophy and its relation to contemporary liberal thinking, and has growing interests in modern African political philosophy. She is principal investigator of a three year International Networks Project awarded by the Leverhulme Trust that endeavours to bring African and Western political thinking into productive contact with each other (2014-2017). She is author of *Kant and Modern Political Philosophy* (CUP, 2000); *Freedom: Contemporary Liberal Perspectives* (Polity Press, 2007), and *Kant contra Cosmopolitanism: Assessing the Global Justice Debate* (CUP, forthcoming).

**Lea Ypi** is Associate Professor in Political Theory at the London School of Economics and Political Science. She is interested in theories of justice, representation in democratic theory and Enlightenment political thought. She is the author of *Global Justice and Avant-Garde Political Agency* (OUP, 2012) and co-editor (with Sarah Fine) of *Migration in Political Theory: The Ethics of Movement and Membership* (OUP, forthcoming).

**Table Of Contents**

Introduction: Kant on colonialism: apologist or critic?, Katrin Flikschuh and Lea Ypi
1. The Law of continuity: colonies, provinces and the justice of war within the limits of Kant's International Right, Anthony Pagden
2. Kant's second thoughts on colonialism, Pauline Kleingeld
3. Productive resistance in Kant's political thought: domination, counter-domination, and global unsocial sociability, Sankar Muthu
4. Commerce and colonialism in Kant's philosophy of history, Lea Ypi
5. Colonists, traders or settlers? Kant on fair international trade and legitimate settlement, Liesbet Vanhaute
6. Kant's juridical theory of colonialism, Arthur Ripstein
7. Restorative justice in international and cosmopolitan law, Peter Niesen
8. Provisional right and non-state peoples, Anna Stilz
9. Colonial mentality: Kant's hospitality right then and now, Martin Ajei and Katrin Flikschuh

Nietzsche on Ethics and Politics
Maudemarie Clark

Key Selling Points
- The first comprehensive collection of Maudemarie Clark's work, including three new essays
- Focuses on Nietzsche's views on ethics and politics
- Provides a distinctive voice in the moral-political area of Nietzsche studies

Summary
This volume brings together fourteen mostly previously published articles by the prominent Nietzsche scholar Maudemarie Clark. Clark's previous two books on Nietzsche focused on his views on truth, metaphysics, and knowledge, but she has published a great deal on Nietzsche's views on ethics and politics in article form. Putting those articles -- many of which appeared in obscure venues -- together in book form will allow readers to see more easily how her views fit together as a whole, exhibit important developments of her ideas, and highlight Clark's distinctive voice in Nietzsche studies. Clark provides an introduction tying her themes together and placing them in their broader context.

Contributor Bio
Maudemarie Clark is Professor of Philosophy at the University of California, Riverside. She is the author of Nietzsche on Truth and Philosophy (1990) and co-author of The Soul of Nietzsche's Beyond Good and Evil (2012).

The Genesis of Neo-Kantianism, 1796-1880
Frederick C. Beiser

Key Selling Points
- New work on a neglected area in German philosophy
- Written by a leading expert in the field
- Illuminates the historical and intellectual contexts of a major philosophical movement

Summary
Frederick C. Beiser tells the story of the emergence of neo-Kantianism from the late 1790s until the 1880s. He focuses on neo-Kantianism before official or familiar neo-Kantianism, i.e., before the formation of the various schools of neo-Kantianism in the 1880s and 1890s (which included the Marburg school, the Southwestern school, and the Gottingen school). Beiser argues that the source of neo-Kantianism lies in three crucial but neglected figures: Jakob Friedrich Fries, Johann Friedrich Herbart, and Friedrich Beneke, who together form what he calls 'the lost tradition'. They are the first neo-Kantians because they defended Kant's limits on knowledge against the excesses of speculative idealism, because they upheld Kant's dualisms against their many critics, and because they adhered to Kant's transcendental idealism. Much of The Genesis of Neo-Kantianism, 1796-1880 is devoted to an explanation for the rise of neo-Kantianism. Beiser contends that it became a greater force in the decades from 1840 to 1860 in response to three major developments in German culture: the collapse of speculative idealism; the materialism controversy; and the identity crisis of philosophy. As he goes on to argue, after the 1860s neo-Kantianism became a major philosophical force because of its response to two later cultural developments: the rise of pessimism and Darwinism.

Contributor Bio
Frederick C. Beiser, Syracuse University, New York

Frederick C. Beiser was born and raised in the US, and studied in the UK at Oriel and Wolfson Colleges, Oxford. He also studied in Germany and lived in Berlin for many years, receiving stipends from the Fritz Thyssen Stiftung and the Humboldt Stiftung. He has taught in universities across the US, and is currently Professor of Philosophy at Syracuse University, Syracuse, New York. Beiser is the author of Schiller as Philosopher (OUP, 2005), Diotima's Children (OUP, 2009), The German Historicist Tradition (OUP, 2011), and Late German Idealism (OUP, 2013).

The Normativity of Nature
Essays on Kant's Critique of Judgement
Hannah Ginsborg

Key Selling Points
• A distinctive new interpretation of a key text
• Illuminates the relevance of Kant's thought to current debates in the philosophy of mind and language
• Brings together hard-to-find essays and presents one previously unpublished paper

Hannah Ginsborg presents fourteen essays which establish Kant's Critique of Judgement as a central contribution to the understanding of human cognition.

Summary
Why read Kant's Critique of Judgement? For most readers, the importance of the work lies in its contributions to aesthetics and, to a lesser extent, the philosophy of biology. Hannah Ginsborg, by contrast, sees the Critique of Judgement as a central contribution to the understanding of human cognition generally. The fourteen essays collected here advance a common interpretive project: that of bringing out the philosophical significance of the notion of judgement which figures in the third Critique and showing its importance both to Kant's own theoretical philosophy and to contemporary views of human thought and cognition. For us to possess the capacity of judgement, on the interpretation defended here, is for our natural perceptual and imaginative responses to involve a claim to their own normativity with respect to the objects which cause them. It is in virtue of this capacity that we are able not merely to respond discriminatively to objects, as animals do, but to bring objects under concepts. The Critique of Judgement, on this reading, rejects the traditional dichotomy between the natural and the normative: our natural psychological responses to the spatio-temporal objects which affect our senses are both causally determined by those objects, and normatively appropriate to them. The essays in this book aim collectively to develop and illuminate this understanding of judgement in its own right, and to use it to address specific interpretive issues in Kant's aesthetics, theory of knowledge, and philosophy of biology; they are also concerned to bring out the relevance of this conception of judgement to contemporary debates regarding concept-acquisition, the content of perception, and skepticism about rules and meaning.

Contributor Bio
Hannah Ginsborg was born in London and grew up in Edinburgh. She was an undergraduate at Wadham College Oxford, receiving a B.A. in Philosophy and Modern Languages in 1980, and did graduate work in philosophy at Harvard University, receiving her PhD in 1989. Since 1988 she has been teaching at the University of California, Berkeley. Her dissertation was issued as a book by Garland Publishing in 1990, and she has published numerous articles on Kant's theory of knowledge, aesthetics, and philosophy of biology. More recent articles are concerned with issues in the philosophy of mind and the theory of meaning, in particular with questions about rule-following, the normativity of meaning, and the relation between perception and belief.

The Expansion of Autonomy
Hegel's Pluralistic Philosophy of Action
Christopher Yeomans

Key Selling Points
- The first adequate treatment of Hegel's use of social roles to provide a substantive alternative to Kantian conceptions of moral autonomy
- Shows a striking pluralism in Hegel's moral psychology and philosophy of action that has not previously been recognized
- Provides an understanding of the philosophical role of the estates within Hegel's moral philosophy

Summary
Georg Lukács wrote that "there is autonomy and 'autonomy.' The one is a moment of life itself, the elevation of its richness and contradictory unity; the other is a rigidification, a barren self-seclusion, a self-imposed banishment from the dynamic overall connection." Though Lukács' concern was with the conditions for the possibility of art, his distinction also serves as an apt description of the way that Hegel and Hegelians have contrasted their own interpretations of self-determination with that of Kant. But it has always been difficult to see how elevation is possible without seclusion, or how rigidification can be avoided without making the boundaries of the self so malleable that its autonomy looks like a mere cover for the power of external forces.

Yeomans explores Hegel's own attempts to grapple with this problem against the background of Kant's attempts, in his theory of virtue, to understand the way that morally autonomous agents can be robust individuals with qualitatively different projects, personal relations, and commitments that are nonetheless infused with a value that demands respect. In a reading that disentangles a number of different threads in Kant's approach, Yeomans shows how Hegel reweaves these threads around the central notions of talent and interest to produce a tapestry of self-determination. Yeomans argues that the result is a striking pluralism that identifies three qualitatively distinct forms of agency or accountability and sees each of these forms of agency as being embodied in different social groups in different ways. But there is nonetheless a dynamic unity to the forms because they can all be understood as practical attempts to solve the problem of autonomy, and each is thus worthy of respect even from the perspective of other solutions.

"Everyone recognizes the importance of Hegel's critique of Kantian morality as empty, but until now there has not been a fully worked out presentation of how Hegel's views in his discussion of Sittlichkeit actually provide the missing content. Yeomans has finally provided us with a reconstruction of Hegel's mature position that makes good on all the promissory notes that Hegel (and his commentators) gives in his famous descriptions of his alternative to Kantian ethics. Yeomans offers a compelling account of Hegel's view of individuality, societal differentiation and its roots in Kantian and Fichtean moral theory. The book will be a major contribution to the scholarship on Hegel's practical philosophy."-Dean Moyar, Associate Professor of Philosophy, Johns Hopkins University

"Yeomans' book is a subtle, detailed and original explication of some key ideas having to do with how Hegel's general philosophy of action (or theory of the nature of agency) relates to his social and political philosophy. It is attentive to Hegel's texts, and it ties its discussions into all the relevant contemporary themes in philosophy. It is very ambitious in its attempt to make Hegel's theory into a real competitor to other views that are currently in wide play in the philosophical world. It will very likely become one of the key texts in the secondary literature on Hegel."-Terry Pinkard, University Professor of Philosophy, Georgetown University

Contributor Bio
Christopher Yeomans is Associate Professor of Philosophy at Purdue University. He is the author of Freedom and Reflection: Hegel and the Logic of Agency (OUP, 2011).

**Saussure's Philosophy of Language as Phenomenology**

*Undoing the Doctrine of the Course in General Linguistics*

Beata Stawarska

---

**Key Selling Points**

- A new interpretation of Ferdinand de Saussure's general linguistics based on authentic source materials
- Stawarska's controversial thesis challenges the received view that Saussure was the founder of structuralism
- Contains analysis of untranslated materials documenting the editorial history of the Course in General Linguistics
- Offers a critique of the validity of the Course in General Linguistics, and its structuralist legacy

**Summary**

This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated with the posthumous *Course in General Linguistics* (1916) and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials. This project follows two new editorial paradigms: 1. a critical re-examination of the 1916 *Course* in light of the relevant sources and 2. a reclamation of the historically authentic materials from Saussure's *Nachlass*, some of them recently discovered. In Stawarska's book, this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings: the signifier and the signifyed; *la langue* and *la parole*; synchrony and diachrony. The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure's course in general linguistics in the *Course*, but also on its structuralist and post-structuralist legacy within the works of Levi-Strauss, Lacan, and Derrida. Its constructive contribution consists in reclaiming the writings from Saussure's *Nachlass* in the service of a linguistic phenomenology, which intersects individual expression in the present with historically sedimented social conventions. Stawarska develops such a conception of language by engaging Saussure's own reflections with relevant writings by Hegel, Husserl, Roman Jakobson, and Merleau-Ponty. Finally, she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing of the *Course* as official Saussurean doctrine.

**Contributor Bio**

**Beata Stawarska** is Associate Professor of Philosophy at the University of Oregon. She is an author of *Between You and I: Dialogical Phenomenology* (Ohio UP, 2009) and a number of essays in contemporary European Philosophy. Recent recipient of the Humboldt Fellowship for Advanced Researchers, Stawarska is an expert in phenomenology, structuralism and post-structuralism.

---

**Table Of Contents**

**Introduction**

**Part I. 'Saussurean doctrine' and its discontents**

Chapter 1. The signifier and the signifyed

Chapter 2. Phonocentrism: Derrida

Chapter 3. La langue and la parole, synchrony and diachrony

**Part II. General linguistics: science and/or philosophy of language**

Chapter 4. Involuntary assumption of substance, and points of view in linguistics

Chapter 5. Saussure's general linguistics as linguistic phenomenology

Chapter 6: Contributions to linguistic phenomenology: Hegel, Husserl, Merleau-Ponty

**Part III. The Inception and the Reception of the 'Saussurean doctrine': the Course**

Chapter 7. The Editorial inception of the Course: Bally and Sechehaye

Appendix 1. English translations of the Course
Appendix 2. Saussure's silence

Debating Brain Drain
May Governments Restrict Emigration?
Michael Blake, Gillian Brock

Key Selling Points
- Excellent resource for those hoping to understand the many normative issues raised by considering ethical questions associated with emigration
- One of the first monograph-length studies of the morality of emigration by two political philosophers
- Provides comprehensive and accessible treatment of the normative issues associated with various policy options meant to address the problems that arise out of critical shortages of skilled personnel
- Helps map areas of convergence and disagreement in a sophisticated debate, while also indicating some areas for fruitful further research

Summary
Many of the best and brightest citizens of developing countries choose to emigrate to wealthier societies, taking their skills and educations with them. What do these people owe to their societies of origin? May developing societies legitimately demand that their citizens use their skills to improve life for their fellow citizens? Are these societies ever permitted to prevent their own citizens from emigrating?

These questions are increasingly important, as the gap between rich and poor societies widens, and as the global migration of skilled professionals intensifies. This volume addresses the ethical rights and responsibilities of such professionals, and of the societies in which they live. Gillian Brock and Michael Blake agree that the phenomenon of the brain drain is troubling, but offer distinct arguments about what might be permissibly done in response to this phenomenon.

Contributor Bio
Gillian Brock is Professor of Philosophy at the University of Auckland in New Zealand. Her recent and current research focuses on global justice and related fields. Her most recent works with Oxford University Press include Global Justice: A Cosmopolitan Account (2009) and Cosmopolitanism versus Non-Cosmopolitanism (2013).

Michael Blake is Professor of Philosophy and Public Affairs at the University of Washington. He writes about international distributive justice and the ethics of immigration. He is the author of Justice and Foreign Policy (OUP, 2013).

Table Of Contents

Introduction

Part I
By Gillian Brock

1. Introduction to Part I
2. What Does Global Justice Require?
3. Prosperity in Developing Countries, the Effects Departing Individuals Have on Those Left Behind, and Some Policy Options
4. Whose Responsibility is it to Remedy Losses Caused by the Departure of Skilled Migrants?
5. Consideration of Central Anticipated Objections
6. Summary of Conclusions from Part I

Part II
By Michael Blake

7. The Right to Leave: Looking Back
8. The Right to Leave: Looking Forward

Philosophy of Social Science
A New Introduction
Nancy Cartwright, Eleanora Montuschi

Key Selling Points
• An essential guide for students
• Presents a choice of exciting topics
• A team of top authors introduce the latest thinking in the field
• Clear and accessible explanations
• Written for both philosophy students and students in the social sciences
• Reflects recent changes and developments within a reinvigorated discipline

A much-needed new introduction to a field that has been transformed in recent years by exciting new subjects, ideas, and methods.

Summary
This is a much-needed new introduction to a field that has been transformed in recent years by exciting new subjects, ideas, and methods. It is designed both for students with central interests in philosophy and those planning to concentrate on the social sciences, and it presupposes no particular background in either domain. From the wide range of topics at the forefront of debate in philosophy of social science, the editors have chosen those which are representative of the most important and interesting contemporary work. A team of distinguished experts explore key aspects of the field such as social ontology (what are the things that social science studies?), objectivity, formal methods, measurement, and causal inference. Also included are chapters focused on notable subjects of social science research, such as well-being and climate change.

Philosophy of Social Science provides a clear, accessible, and up-to-date guide to this fascinating field.

Contributor Bio

Nancy Cartwright is Professor of Philosophy at the Department of Philosophy, University of Durham and at the University of California, San Diego (UCSD). Her research interests include philosophy and history of science (especially physics and economics), causal inference, objectivity, and evidence, especially on evidence-based policy.

Eleonora Montuschi is an Associate Professor at the Department of Philosophy and Cultural Heritage at the University of Venice, and Senior Research Fellow at the London School of Economics and Political Science. She is a philosopher of science working on scientific objectivity, the theory and practice of evidence, and methodological issues of the social sciences.

Table Of Contents

Dignity, Rank, and Rights
Jeremy Waldron, Meir Dan-Cohen

Key Selling Points
- Discusses the relation between dignity conceived as the ground of rights and dignity conceived as the content of rights
- Presents Waldron's ideas in debate with three critics, as well as his response to each of them, for a full dialogue on the questions at hand

Summary
Writers on human dignity roughly divide between those who stress the social origins of this concept and its role in marking rank and hierarchy, and those who follow Kant in grounding dignity in an abstract and idealized philosophical conception of human beings. In these lectures, Jeremy Waldron contrives to combine attractive features of both strands. In the first lecture, Waldron presents a conception of dignity that preserves its ancient association with rank and station, thus allowing him to tap rich historical resources while avoiding what many perceive as the excessive abstraction and dubious metaphysics of the Kantian strand. At the same time he argues for a conception of human dignity that amounts to a generalization of high status across all human beings, and so attains the appealing universality of the Kantian position. The second lecture focuses particularly on the importance of dignity - understood in this way - as a status defining persons' relation to law: their presentation as persons capable of self-applying the law, capable of presenting and arguing a point of view, and capable of responding to law's demands without brute coercion. Together the two lectures illuminate the relation between dignity conceived as the ground of rights and dignity conceived as the content of rights; they also illuminate important ideas about dignity as noble bearing and dignity as the subject of a right against degrading treatment; and they help us understand the sense in which dignity is better conceived as a status than as a kind of value.

The American Pragmatists
Cheryl Misak

Key Selling Points
- A brand new account of America's great distinctive philosophical tradition
- Offers fascinating vignettes of American intellectual life
- Throws new light on the ideas of a number of great thinkers
- Draws together intellectual history and philosophy
- Informed by many years' research by a leading expert on pragmatism
- Shows that pragmatism is a living influence on contemporary philosophy
- The third volume in the new Oxford History of Philosophy series

Cheryl Misak presents a history of the great American philosophical tradition of pragmatism, from its inception in the 1870s to the present day.

Summary
Cheryl Misak presents a history of the great American philosophical tradition of pragmatism, from its inception in the Metaphysical Club of the 1870s to the present day. She identifies two dominant lines of thought in the tradition: the first begins with Charles S. Peirce and Chauncey Wright and continues through to Lewis, Quine, and Sellars; the other begins with William James and continues through to Dewey and Rorty. This ambitious new account identifies the connections between traditional American pragmatism and twentieth-century Anglo-American philosophy, and links pragmatism to major positions in the recent history of philosophy, such as logical empiricism. Misak argues that the most defensible version of pragmatism must be seen and recovered as an important part of the analytic tradition.

Contributor Bio
Cheryl Misak is Professor of Philosophy, as well as Vice-President and Provost at the University of Toronto. She received a BA from the University of Lethbridge, an MA from Columbia University, and a DPhil from the University of Oxford. She works on American pragmatism, the theory of truth, moral and political philosophy, and the philosophy of medicine. She has published and edited books with Oxford University Press, Routledge, and Cambridge University Press, and has published over forty scholarly articles. In 2008, her 'Experience, Narrative, and Ethical Deliberation' was declared one of the ten best papers in philosophy by The Philosopher's Annual. She is a Fellow of the Royal Society of Canada and has been a Humboldt Fellow at the Goethe University in Frankfurt, a Visiting Fellow of St. John's College Cambridge, and a Rhodes Scholar.

Engaging Buddhism
Why It Matters to Philosophy
Jay L. Garfield

Key Selling Points
• Engages philosophically with both Buddhism and contemporary western discourse
• Articulates the basic metaphysical framework common to Buddhist traditions
• Draws on a wide range of Buddhist literature, including primary sources
• Explores questions in metaphysics, the philosophy of mind, phenomenology, epistemology, the philosophy of language and ethics

Summary
This is a book for scholars of Western philosophy who wish to engage with Buddhist philosophy, or who simply want to extend their philosophical horizons. It is also a book for scholars of Buddhist studies who want to see how Buddhist theory articulates with contemporary philosophy. Engaging Buddhism: Why it Matters to Philosophy articulates the basic metaphysical framework common to Buddhist traditions. It then explores questions in metaphysics, the philosophy of mind, phenomenology, epistemology, the philosophy of language and ethics as they are raised and addressed in a variety of Asian Buddhist traditions. In each case the focus is on philosophical problems; in each case the connections between Buddhist and contemporary Western debates are addressed, as are the distinctive contributions that the Buddhist tradition can make to Western discussions. Engaging Buddhism is not an introduction to Buddhist philosophy, but an engagement with it, and an argument for the importance of that engagement. It does not pretend to comprehensiveness, but it does address a wide range of Buddhist traditions, emphasizing the heterogeneity and the richness of those traditions. The book concludes with methodological reflections on how to prosecute dialogue between Buddhist and Western traditions.

"Garfield has a unique talent for rendering abstruse philosophical concepts in ways that make them easy to grasp. This is an important book, one that can profitably be read by scholars of Western and non-Western philosophy, including specialists in Buddhist philosophy. This is in my estimation the most important work on Buddhist philosophy in recent memory. It covers a wide range of topics and provides perhaps the clearest analysis of some core Buddhist ideas to date. This is landmark work. I think it's the best cross-cultural analysis of the relevance of Buddhist thought for contemporary philosophy in the present literature."—C. John Powers, Professor, School of Culture, History & Language, Australian National University

Contributor Bio
Jay L. Garfield is Kwan Im Thong Hood Cho Professor of Humanities and Head of Studies in Philosophy at Yale-NUS College, Professor of Philosophy at the National University of Singapore, Recurrent Visiting Professor of Philosophy at Yale University, Doris Silbert Professor in the Humanities and Professor of Philosophy at Smith College, Professor of Philosophy at Melbourne University and Adjunct Professor of Philosophy at the Central University of Tibetan Studies. Professor Garfield teaches and pursues research in the philosophy of mind, foundations of cognitive science, logic, philosophy of language, Buddhist philosophy, cross-cultural hermeneutics, ethics and epistemology.

Competing Equalities (3rd Edition)
Law and the Backward Classes in India
Marc Galanter

Key Selling Points
- Long awaited third edition of a major work on the reservation debate
- New introduction places the work within today's context
- Full of valuable statistics and tables

Long awaited third edition of a major work on the reservation debate

Summary
This is the third edition of a painstakingly researched and remarkably comprehensive book on the Indian experiment with constitutionally sanctioned policies of preferential treatment/compensatory discrimination/affirmative action on behalf of the historically oppressed and excluded castes and classes of the country. The policies were meant originally to be transitional arrangements, the nation's ultimate goal being the establishment of a casteless and classless society. The way things turned out however, both caste and class have remained deeply entrenched as legal, administrative, political, and social realities. The book traces the pre-independence history of the developing concern for the 'depressed classes' in the first part of the twentieth century, the debates in the Constituent Assembly, and goes on to a critical analysis of the first thirty years of the constitutional regime of preferential treatment for identified beneficiaries - Scheduled Castes/Scheduled Tribes/other Backward Classes - in the fields of legislative representation, employment, education, and government service. The book's special emphasis is on the role of the higher judiciary and its interventions in the course of cases arising from the policy of reservation, as well as the constitutional context of fundamental rights. This edition includes a preface written by the author for the second (paperback) edition published in 1991, following the controversy over the proposal to implement the Mandal Commission Report. It also includes a new introduction summing up the current situation.

Contributor Bio

No Day in Court
Access to Justice and the Politics of Judicial Retrenchment
Sarah Staszak

Key Selling Points
• Provides a new theory of judicial retrenchment as backlash to the growth of the legal state
• Highlights the ways in which institutional and procedural rules have been used to constrict access to the courts
• Creates a new framework for understanding the modern phenomenon of the 'vanishing trial'
• Traces the historical trajectory of groups and organizations, government bodies and actors, and the ideological motivations of those seeking to reform access to justice in the U.S. over the course of the twentieth century

Examines how political and legal actors at all levels have scaled back access to the courts in recent times

Summary
We are now more than half a century removed from height of the rights revolution, a time when the federal government significantly increased legal protection for disadvantaged individuals and groups, leading in the process to a dramatic expansion in access to courts and judicial authority to oversee these protections. Yet while the majority of the landmark laws and legal precedents expanding access to justice remain intact, less than two percent of civil cases are decided by a trial today. What explains this phenomenon, and why it is so difficult to get one's day in court?

No Day in Court examines the sustained efforts of political and legal actors to scale back access to the courts in the decades since it was expanded, largely in the service of the rights revolution of the 1950s and 1960s. Since that time, for political, ideological, and practical reasons, a multifaceted group of actors have attempted to diminish the role that courts play in American politics. Although the conventional narrative of backlash focuses on an increasingly conservative Supreme Court, Congress, and activists aiming to constrain the developments of the Civil Rights era, there is another very important element to this story, in which access to the courts for rights claims has been constricted by efforts that target the "rules of the game:" the institutional and legal procedures that govern what constitutes a valid legal case, who can be sued, how a case is adjudicated, and what remedies are available through courts. These more hidden, procedural changes are pursued by far more than just conservatives, and they often go overlooked. No Day in Court explores the politics of these strategies and the effect that they have today for access to justice in the U.S.

Contributor Bio
Sarah Staszak is a Robert Wood Johnson Scholar in Health Policy Research at Harvard University and an Assistant Professor in Political Science at The City College of New York-CUNY.

Quotes
"No Day in Court explores one of the central, if largely unknown, legal developments in recent history: the increasing inability of individuals to go to court to vindicate their rights. Staszak shows how procedural and administrative rules have been purposefully rewritten to favor corporate and other defendants over the rights of prospective plaintiffs. An important and timely book." -Jeffrey Toobin, author of The Oath and The Nine

"One of the most important stories about America’s civil rights revolution has been the story of retrenchment—how rights guarantees have been systematically limited by procedural reforms that restrict judicial remedies. Sarah Staszak shows how both supporters and opponents of the rights revolution have been complicit in rationing and blocking access to the courts. If you want to understand what happened to the promise of civil rights in this country, read this book." -Jack M. Balkin, Yale Law School
"For the less advantaged, DeTocqueville's observation that in America every political issue becomes a judicial one may no longer be true. In a work of admirable breadth, Sarah Staszak shows that a congeries of organizations and movements have collaborated to reduce access to courts. After time well spent with Staszak's cogent argument, readers will never view alternative dispute resolution, administrative rulings, state sovereign immunity and attorney's fees quite the same way." -Daniel Carpenter, Harvard University

"A fascinating book that provides great insight into the politics of retrenchment. Staszak shows convincingly that scholars need to pay more careful attention to the hidden world of procedural rules that shape the capacities of judges to make policy. This is a highly original study that enriches understanding of how political processes shape the role of the courts." -George Lovell, University of Washington

"No Day in Court is a major statement, and promises to open up a new area of scholarship. It is a book loaded with penetrating insights, elegant writing, and historical depth, and most importantly, provides powerful theoretical tools for understanding judicial retrenchment - a phenomenon that is a key part of American history but more than ever characterizes our present political environment." -John D. Skrentny, University of California, San Diego

**No Day in Court**

*Access to Justice and the Politics of Judicial Retrenchment*

Sarah Staszak

**Key Selling Points**

- Provides a new theory of judicial retrenchment as backlash to the growth of the legal state
- Highlights the ways in which institutional and procedural rules have been used to constrict access to the courts
- Creates a new framework for understanding the modern phenomenon of the 'vanishing trial'
- Traces the historical trajectory of groups and organizations, government bodies and actors, and the ideological motivations of those seeking to reform access to justice in the U.S. over the course of the twentieth century

Examines how political and legal actors at all levels have scaled back access to the courts in recent times

**Summary**

We are now more than half a century removed from height of the rights revolution, a time when the federal government significantly increased legal protection for disadvantaged individuals and groups, leading in the process to a dramatic expansion in access to courts and judicial authority to oversee these protections. Yet while the majority of the landmark laws and legal precedents expanding access to justice remain intact, less than two percent of civil cases are decided by a trial today. What explains this phenomenon, and why it is so difficult to get one's day in court?

No Day in Court examines the sustained efforts of political and legal actors to scale back access to the courts in the decades since it was expanded, largely in the service of the rights revolution of the 1950s and 1960s. Since that time, for political, ideological, and practical reasons, a multifaceted group of actors have attempted to diminish the role that courts play in American politics. Although the conventional narrative of backlash focuses on an increasingly conservative Supreme Court, Congress, and activists aiming to constrain the developments of the Civil Rights era, there is another very important element to this story, in which access to the courts for rights claims has been constricted by efforts that target the "rules of the game:" the institutional and legal procedures that govern what constitutes a valid legal case, who can be sued, how a case is adjudicated, and what remedies are available through courts. These more hidden, procedural changes are pursued by far more than just conservatives, and they often go overlooked. No Day in Court explores the politics of these strategies and the effect that they have today for access to justice in the U.S.

**Contributor Bio**

Sarah Staszak is a Robert Wood Johnson Scholar in Health Policy Research at Harvard University and an Assistant Professor in Political Science at The City College of New York-CUNY.

**Quotes**

"No Day in Court explores one of the central, if largely unknown, legal developments in recent history: the increasing inability of individuals to go to court to vindicate their rights. Staszak shows how procedural and administrative rules have been purposefully rewritten to favor corporate and other defendants over the rights of prospective plaintiffs. An important and timely book." - Jeffrey Toobin, author of The Oath and The Nine

Groundbreakers
How Obama's 2.2 Million Volunteers Transformed Campaigning in America
Elizabeth McKenna, Hahrie Han, Jeremy Bird

Key Selling Points
• Describes in greater detail than ever before the structure, strategy, and practices used by the Obama campaign to engage and develop volunteer leaders
• Serves as a useful primer for academics and practitioners working in the field of campaigns
• Highlights the importance of human resources within electoral campaigns, as opposed to the usual analyses of campaign finances and media strategies
• Shows how the structure of an electoral field program that relies on community organizing tactics can cultivate democratic engagement among ordinary citizens
• Includes a Foreword by Jeremy Bird, who served as the National Field Director for Obama for America

An exploration of how Obama for America built its grassroots volunteer army

Much has been written about the historic nature of the Obama campaign. The multi-year, multi-billion dollar operation elected the nation's first black president, raised and spent more money than any other election effort in history, and built the most sophisticated voter targeting technology ever before used on a national campaign. What is missing from most accounts of the campaign is an understanding of how Obama for America recruited, motivated, developed, and managed its formidable army of 2.2 million volunteers. Unlike previous field campaigns that drew their power from staff, consultants, and paid canvassers, the Obama campaign's capacity came from unpaid local citizens who took responsibility for organizing their own neighborhoods months--and even years--in advance of election day. In so doing, *Groundbreakers* argues, the campaign engaged citizens in the work of practicing democracy. How did they organize so many volunteers to produce so much valuable work for the campaign? This book describes how.

Elizabeth McKenna and Hahrie Han argue that the legacy of Obama for America extends beyond big data and micro-targeting; it also reinvigorated and expanded traditional models of field campaigning. *Groundbreakers* makes the case that the Obama campaign altered traditional ground games by adopting the principles and practices of community organizing. Drawing on in-depth interviews with OFA field staff and volunteers, this book also argues that a key achievement of the OFA's field organizing was its transformative effect on those who were a part of it. Obama the candidate might have inspired volunteers to join the campaign, but it was the fulfilling relationships that volunteers had with other people--and their deep belief that their work mattered for the work of democracy--that kept them active.

*Groundbreakers* documents how the Obama campaign has inspired a new way of running field campaigns, with lessons for national and international political and civic movements.

Contributor Bio

Elizabeth McKenna is a Ph.D. student in sociology at the University of California, Berkeley.

Hahrie Han is Associate Professor of Political Science at Wellesley College.

Jeremy Bird served as the National Field Director for Obama for America and is a founding partner at political consulting firm 270 Strategies.

Quotes

"Amid all the hype about 'big data' and analytics in Obama's presidential campaigns, one key story hasn't been told in full: how the Obama team built a sprawling and vibrant..."
field organization almost entirely out of volunteer labor. Han and McKenna recount the successes and struggles of this effort, drawing on extensive and illuminating interviews with everyone from senior staff to many of those volunteers. Their account shows how a winning campaign depends as much on old-fashioned shoe leather as on statistical models and multi-million dollar advertising sprees. This is a book that both scholars and practitioners of campaigns should read. --John Sides, author of The Gamble: Choice and Chance in the 2012 Presidential Election

**Personality Politics?**
The Role of Leader Evaluations in Democratic Elections
Marina Costa Lobo, John Curtis

**Key Selling Points**
- Based on a comparative study across 35 countries
- Develops unique insights into the importance of leader effects in different contexts and the consequences of personalisation of politics in the quality of democracy
- Covers in depth the period from the 1980s through to the 21st century
- Presents evidence from an array of countries with diverse historical and institutional contexts, and employs innovative methodologies to determine the importance of leaders in democracies worldwide

**Summary**
*Personality Politics?* assesses the role that voters' perceptions and evaluations of leaders play in democratic elections. The book presents evidence from an array of countries with diverse historical and institutional contexts, and employs innovative methodologies to determine the importance of leaders in democracies worldwide.

Addressing such questions as 'Where do leaders effects come from?', 'In which institutional contexts are leader effects more important?' and, 'To which kinds of voters are leaders a more prominent factor for voting behaviour?', the authors seek to determine whether the roles leaders play enhances or damages the electoral process, and what impact this has on the quality of democracy in electoral democracies today.

Do All Persons Have Equal Moral Worth?

On 'Basic Equality' and Equal Respect and Concern

Uwe Steinhoff

Key Selling Points

- Makes a significant and original contribution to the political discussion regarding equal moral worth, dignity and equal respect and concern
- Features internationally renowned experts who provide lively and engaging discussion

The authors take a reflective and critical attitude and try to clarify concepts of "basic equality", "equal moral worth", "equal respect and concern", "dignity," etc.

Summary

In present-day political and moral philosophy, the idea that all persons are in some way moral equals is an almost universal premise, with its defenders often claiming that philosophical positions that reject the principle of equal respect and concern do not deserve to be taken seriously. This has led to relatively few attempts to clarify, or indeed justify, 'basic equality' and the principle of equal respect and concern.

Such clarification and justification, however, would be direly needed. After all, the ideas, for instance, that Adolf Hitler and Nelson Mandela have equal moral worth, or that a rape victim owes equal respect and concern to both her rapist and to her own caring brother, seem to be utterly implausible. Thus, if someone insists on the truth of such ideas, he or she owes his or her audience an explanation.

The authors in this volume, which breaks new ground by engaging egalitarians and anti-egalitarians in a genuine dialogue-attempt to shed light into the dark. They try to clarify the concepts of "basic equality", "equal moral worth", "equal respect and concern", "dignity," etc; and they try to (partially) justify or to refute the resulting clarified doctrines. The volume thus demonstrates that the claim that all persons have equal moral worth, are owed equal concern and respect, or have the same rights is anything but obvious. This finding has not only significant philosophical but also political implications.

Contributor Bio

Rationalism, Pluralism, and Freedom
Jacob T. Levy

Key Selling Points
• Provides an original account, unifying the history of political thought and contemporary disputes in political philosophy, grounding new questions in old concerns
• Connects normative political theory to social science and social theory about the dynamics of group life, the sources of social order, and the workings of state power
An original account of the history of liberal thought and explores the deep tensions that liberal political thought rests upon

Summary
Intermediate groups-- voluntary associations, churches, ethnocultural groups, universities, and more--can both protect threaten individual liberty. The same is true for centralized state action against such groups. This wide-ranging book argues that, both normatively and historically, liberal political thought rests on a deep tension between a rationalist suspicion of intermediate and local group power, and a pluralism favorable toward intermediate group life, and preserving the bulk of its suspicion for the centralizing state.

The book studies this tension using tools from the history of political thought, normative political philosophy, law, and social theory. In the process, it retells the history of liberal thought and practice in a way that moves from the birth of intermediacy in the High Middle Ages to the British Pluralists of the twentieth century. In particular it restores centrality to the tradition of ancient constitutionalism and to Montesquieu, arguing that social contract theory's contributions to the development of liberal thought have been mistaken for the whole tradition.

It discusses the real threats to freedom posed both by local group life and by state centralization, the ways in which those threats aggravate each other. Though the state and intermediate groups can check and balance each other in ways that protect freedom, they may also aggravate each other's worst tendencies. Likewise, the elements of liberal thought concerned with the threats from each cannot necessarily be combined into a single satisfactory theory of freedom. While the book frequently reconstructs and defends pluralism, it ultimately argues that the tension is irreconcilable and not susceptible of harmonization or synthesis; it must be lived with, not overcome.

Linguistic Justice for Europe and for the World
Philippe Van Parijs

Key Selling Points
- Major new work from one of the world’s leading political theorists
- First systematic treatment of the subject
The first systematic treatment of the of the normative aspects of language policy and how this relates to justice

Summary
In Europe and throughout the world, competence in English is spreading at a speed never achieved by any language in human history. This apparently irresistible growing dominance of English is frequently perceived and sometimes indignantly denounced as being grossly unjust. *Linguistic Justice for Europe and for the World* starts off arguing that the dissemination of competence in a common lingua franca is a process to be welcomed and accelerated, most fundamentally because it provides the struggle for greater justice in Europe and in the world with an essential weapon: a cheap medium of communication and of mobilization.

However, the resulting linguistic situation can plausibly be regarded as unjust in three distinct senses. Firstly, the adoption of one natural language as the lingua franca implies that its native speakers are getting a free ride by benefiting costlessly from the learning effort of others. Secondly, they gain greater opportunities as a result of competence in their native language becoming a more valuable asset. And thirdly the privilege systematically given to one language fails to show equal respect for the various languages with which different portions of the population concerned identify. *Linguistic Justice for Europe and for the World* spells out the corresponding interpretations of linguistic justice as cooperative justice, distributive justice and parity of esteem, respectively. And it discusses systematically a wide range of policies that might help achieve linguistic justice in these three senses, from a linguistic tax on Anglophone countries to the banning of dubbing or the linguistic territoriality principle.

Against this background, the book argues that linguistic diversity is not valuable in itself but it will nonetheless need to be protected as a by-product of the pursuit of linguistic diversity as parity of esteem.

Power Failure: The Political Odyssey of a Pakistani Woman
Syeda Abida Hussain

Intertwines the impacts that key political events of Pakistan have had on the author's personal life-and on the destiny of the nation

Summary
The book is a political biography of the author-in which she has intertwined the impacts that key political events of the country have had on her personal life-and on the destiny of the nation. It is also an anecdotal account of missed opportunities.

The narrative begins with a chapter on the author's privileged childhood, her entry into politics, and the hurdles and struggles that she faced along the way as a woman politician in the male dominated society of rural Punjab. She provides details of the deterioration and erosion of the country's institutions. A unique insight has been offered on the rise of extremism. Pakistan's close embroilment in Afghanistan has been covered, beginning from the late seventies right up to the first decade of the twenty-first century.

The book goes on to discuss the high developmental potentials of Pakistan, when it was carved out of India as a separate country at the time of Partition in 1947; the unremitting diminishing progressive curve since the country's inception; and the consequent rise of militant and extremist groups emerging out of religiosity rather than religion onto its political landscape. The author attempts to provide insights into the reasons: poverty and inequity of our societal construct, conspiracies spawned by individuals and interests, both at the national as well as international levels, who merely sought to serve what were often their perceived short-term aims and objectives. As an individual and as a politician, the author often found herself caught up, quite unwittingly, in the vortex of this issue and ensuing events, with her life often under threat, and her career in politics interrupted, even prematurely curtailed. Light has also been shed on the regressive elements in Pakistan.

Reliant on personal notes and diaries and other source material, Syeda Abida Hussain in this book, has recorded events that have resonated with her, and in which she had some part to play. The text has been enhanced by corresponding photographs, both, from her personal and public life.

Contributor Bio
Syeda Abida Hussain, Politician, Agriculturist, Diplomat

Syeda Abida Hussain is a politician, agriculturist, and diplomat. She belongs to Jhang, situated in the Punjab province of Pakistan. Abida Hussain has the distinction of being the first woman to chair the District Council of Jhang; and the first woman to be popularly elected as Member of the National Assembly of Pakistan. She served as Pakistan's Ambassador to the United States from 1991 to 1994. She has also served as Minister for Education, Science and Technology (1996), Minister for Food and Agriculture (1997), Minister for Population Welfare, and as Minister for Environment and Urban Affairs (1999). Abida Hussain is an active proponent of 'Education for All', gender equality, and sectarian harmony.

War and Society in Afghanistan
From the Mughals to the Americans, 1500-2013
Kaushik Roy

Key Selling Points
- Topical in focus; the US led forces are to be withdrawn from Afghanistan in 2014
- Comprehensive history of conventional and unconventional wars in Afghanistan which were fought over the last 5 centuries
A comprehensive view of the history of the region and provides a political and military narrative of conventional and unconventional war in Afghanistan during the last five centuries

Summary
This monograph analyses the rhythms of war and the geopolitical significance of Afghanistan with a focus on the interrelated concepts of weak/rentier state, great power rivalry, and counter-insurgency. It analyses why the Mughals, the British, the Soviets, and the Americans won the conventional wars in Afghanistan but were defeated in the unconventional ones. It takes a comprehensive view of the history of the region and provides a political and military narrative of conventional and unconventional war in Afghanistan during the last five centuries. It, therefore, covers wide ranging aspects such as empire building and military operations in Afghanistan in the pre-modern period, regular and irregular warfare in Afghanistan during the British era, the Russian intervention and the emergence of the fragile 'rentier state' after the world war, and the American and NATO activities and the nature of on-going war in light of the recent debates on the changing character of war in the twenty-first century.

With a special emphasis on ecology, terrain, and logistics, this book explores the trajectory of state building and contextualizes the Afghan 'problem' as part of the wider struggle among the great powers for controlling the 'heart' of Eurasia.

India's Military Modernization
Strategic Technologies and Weapons Systems
Rajesh Basrur, Bharath Gopalaswamy

Key Selling Points
- The first book of its kind assessing India's military capabilities in high technology areas
- Analyses a wide range of contemporary issues related to nuclear weaponization and space security: cruise missiles, nuclear weapons, anti-satellite weapons, missile defence, and information-based warfare
- Will be an interesting read for anyone wanting to understand India's growing importance in the global political scenario

Examines the nature and trajectory of India's evolving capabilities in areas of advanced technologies: cruise missiles, nuclear weapons, anti-satellite weapons, missile defence, and information-based warfare

Summary
India's Military Modernization: Strategic Technologies and Weapons Systems is the second part of a two-part project on Indian military modernization. It examines the nature and the trajectory of India's evolving capabilities in areas of advanced technologies: cruise missiles, nuclear weapons, anti-satellite weapons, missile defence, and information-based warfare.

The book finds both continuity and change in India's evolving strategic capabilities. The reactive nature of the Indian state tends to make the trajectory of India's strategic programmes incremental. Owing to the absence of clear direction from the highest level of government and to inertia, changes are likely to be characterized by slow improvements and limited changes in institutional capacities and capabilities for the policy-relevant future. In addition, the non-inclusion of the military in crafting national strategy and national security decision-making serves to limit the scope for a dramatic transformation in India's strategic capabilities. In sum, the modernization of India's strategic capabilities is likely to be uneven and incremental.

In Place of Inter-State Retaliation
The European Union’s Rejection of WTO-style Trade Sanctions and Trade Remedies
William Phelan

Key Selling Points
• Provides a fresh and innovative explanation of the European Union as a distinctive form of international organization
• Combines political science and legal approaches
A new explanation of the European Union's legal system

Summary
Unlike many other trade regimes, the European Union forbids the use of inter-state retaliation to enforce its obligations, and rules out the use of common 'escape' mechanisms such as anti-dumping between the EU member states. How does the EU do without these mechanisms that appear so vital to the political viability of other international trade regimes, including the World Trade Organization? How, therefore, is the European legal order, with the European Court of Justice at its centre, able to be so much more binding and intrusive than the legal obligations of many other trade regimes?

This book puts forward a new explanation of a key part of the European Union's legal system, emphasising its break with the inter-state retaliation mechanisms and how Europe's special form of legal integration is facilitated by intra-industry trade, parliamentary forms of national government, and European welfare states.

It argues first that the EU member states have allowed the enforcement of EU obligations by domestic courts in order to avoid the problems associated with enforcing trade obligations by constant threats of trade retaliation. It argues second that the EU member states have been able to accept such a binding form of dispute settlement and treaty obligation because the policy adjustments required by the European legal order were politically acceptable. High levels of intra-industry trade reduced the severity of the economic adjustments required by the expansion of the European market, and inclusive and authoritative democratic institutions in the member states allowed policymakers to prioritise a general interest in reliable trading relationships even when policy changes affected significant domestic lobbies. Furthermore, generous national social security arrangements protected national constituents against any adverse consequences arising from the expansion of European law and the intensification of the European market.

The European legal order should therefore be understood as a legalized dispute resolution institution well suited to an international trade and integration regime made up of highly interdependent parliamentary welfare states.

Rule of Law in War
International Law and United States Counterinsurgency in Iraq and Afghanistan
Travers McLeod

Key Selling Points
- Examines international law’s influence on the United States
- The first book with full access to successive drafts of the most influential military doctrine in decades, FM 3-24
- Provides detailed evidence of personal interviews with key figures

Summary
Rule of Law in War places international law at the centre of the transformation of United States counterinsurgency (COIN) that occurred during the Iraq and Afghanistan wars. It claims international law matters more than is often assumed and more than we have previously been able to claim, contradicting existing theoretical assumptions. In particular, the book contends international law matters in a case that may be regarded as particularly tough for international law, that is, the development of a key military doctrine, the execution of that doctrine on the battlefield, and the ultimate conduct of armed conflict. To do so, the book traces international law’s influence in the construction of modern U.S. COIN doctrine, specifically, Field Manual 3-24, Counterinsurgency, released by the U.S. Army and Marine Corps in December 2006. It then assesses how international law’s doctrinal interaction held up in Iraq and Afghanistan. The account of this doctrinal change is based on extensive access to the primary actors and materials, including FM 3-24’s drafting history, field documents, and interviews with military officers of various ranks who have served multiple deployments in Iraq and Afghanistan.

The British Nuclear Experience
The Roles of Beliefs, Culture and Identity
John Baylis, Kristan Stoddart

Key Selling Points
- Comprehensive coverage of the history British nuclear weapons policy
- Uses a unique approach to international political theory to analyse British Nuclear Theory
- Provides new insights into the process of British nuclear decision-making
- Draws upon in detail declassified UK archival records, declassified US sources and extensive interviews with a wide range of senior officials and politicians
Looks at the role of beliefs, culture and identity in the making of British nuclear policy from 1945 through to the present day

Summary
Based on a detailed analysis of archives and high level interviews this book looks at the role of beliefs, culture and identity in the making of British nuclear policy from 1945 through to the present day. This book also examines Britain's nuclear experience by moving away from traditional interpretations of why states develop and maintain nuclear weapons by adopting a more contemporary approach to political theory.

Traditional mainstream explanations tend to stress the importance of factors such as the 'maximization of power', the pursuit of 'national security interests' and the role of 'structure' in a largely anarchic international system. This book does not dismiss these approaches, but argues that British experience suggests that focusing on 'beliefs', 'culture' and 'identity', provides a more useful insight and distinctive interpretation into the process of British nuclear decision making than the more traditional approaches.

The Expansion of International Society
Hedley Bull, Adam Watson

Key Selling Points
- Detailed exploration of the origins and nature of the international society of today
- An international list of distinguished contributors
- A classic in the field
- A new foreword by Andrew Hurrell
This classic volume is a systematic investigation of the origins and nature of the international society of today

Summary
This book is a systematic investigation of the origins and nature of the international society of today. The work of a study group of distinguished scholars, it examines comprehensively the expansion of the international society of European states across the rest of the globe, and its subsequent transformation from a society fashioned in Europe and dominated by Europeans into today's global international society of nearly two hundred states, the great majority of which are not European.

The first section describes the predominance of the European system in a floodtide of expansion from the sixteenth century onwards, which united the whole world for the first time in a single economic, strategic, and political unit. The process whereby non-European states came to take their place as members of the same society, accepting its rules and institutions, is the subject of the second part; and the third section examines the repudiation of European, Russian, and American domination by states and peoples of the Third World and the consequent movement away from a system based on European hegemony. The last part is concerning with the new international order that has emerged from the ebb tide of European dominance, and focuses on a central question. Has the geographical expansion of international society led to a contradiction of the consensus about common interests, rules, and institutions on which an international society proper must rest? Or can we say that the old European system has been modified and developed in such a way that a new, genuinely universal, and non-hegemonial structure for international relations has taken root?

A new foreword by Andrew Hurrell examines the impact of this seminal work and sets its continued contribution in context.

At the End of Military Intervention
Historical, Theoretical and Applied Approaches to Transition, Handover and Withdrawal
Robert Johnson, Timothy Clack

Key Selling Points
- The first book to explore the specifics of what happens at the end of military intervention
- Written by a team of leading scholars and practitioners
- Wide range of case studies
The first book to explore the specifics of what happens at the end of military intervention

Summary
No modern intervention is intended to endure indefinitely; indeed some fashion of exit is always envisioned from the outset. This commitment to an exit is normally informed by an exit strategy. Whilst strategies of closure have been scrutinised recently, not least in light of charges of defective intentions and planning, the relations between the strategies, operations and tactics of exit have not been contextualised. Focus on the local, specific and bottom-up manifestations of transitions offers significant enhances to historical, theoretical and applied understandings.

This book is an introduction not just to the issues of transition, handover and withdrawal, but to exit as a package of theoretical concepts and how these have been understood, shaped and employed in historic and contemporary perspective. Drawing on a wide range of post-1945 examples derived from a variety of regions and periods, At the End of Military Intervention provides researchers and practitioners with a source book on what forms a crucial and often overlooked element of past and present interventions.

Between Samaritans and States
The Political Ethics of Humanitarian INGOs
Jennifer Rubenstein

Key Selling Points

• An interdisciplinary work which draws upon political theory, ethics, philosophy and original fieldwork
• Address pressing real-world issues

The first book-length, English-language account of the political ethics of large-scale, Western-based humanitarian INGOs, such as Oxfam, CARE, and Doctors Without Borders

Summary

This book provides the first book-length, English-language account of the political ethics of large-scale, Western-based humanitarian INGOs, such as Oxfam, CARE, and Doctors Without Borders. These INGOs are often either celebrated as 'do-gooding machines' or maligned as incompetents 'on the road to hell'. In contrast, this book suggests the picture is more complicated.

Drawing on political theory, philosophy, and ethics, along with original fieldwork, this book shows that while humanitarian INGOs are often perceived as non-governmental and apolitical, they are in fact sometimes somewhat governmental, highly political, and often 'second-best' actors. As a result, they face four central ethical predicaments: the problem of spattered hands, the quandary of the second-best, the cost-effectiveness conundrum, and the moral motivation trade-off.

This book considers what it would look like for INGOs to navigate these predicaments in ways that are as consistent as possible with democratic, egalitarian, humanitarian and justice-based norms. It argues that humanitarian INGOs must regularly make deep moral compromises. In choosing which compromises to make, they should focus primarily on their overall consequences, as opposed to their intentions or the intrinsic value of their activities. But they should interpret consequences expansively, and not limit themselves to those that are amenable to precise cost-benefit analysis. The book concludes by explaining the implications of its 'map' of humanitarian INGO political ethics for individual donors to INGOs, and for how we all should conceive of INGOs' role in addressing pressing global problems.

Experiencing European Integration
Individual Transnationalism and Public Orientations towards European Integration
Theresa Kuhn

Key Selling Points
• Provides the first empirical test of Deutsch's transactionalist theory for the entire European population
• Comprehensive conceptual discussion of individual transnationalism and its interrelation with macrolevel transnationalism
Develops a comprehensive theoretical model to understand how transnational interactions relate to orientations towards European integration

Summary
European integration has generated a wide array of economic, political, and social opportunities beyond the nation state. European citizens are free to obtain their academic degree in Germany, earn their money in London, invest it in Luxembourg, and retire to Spain. An early theorist of European integration, Karl Deutsch expected this development to promote a collective identity and public support for European integration: by interacting across borders, Europeans would become aware of their shared values and beliefs, and eventually acquire a common 'we feeling'.

Experiencing European Integration puts these expectations under scrutiny by developing a comprehensive theoretical model that helps us understand how transnational interactions relate to orientations towards European integration. An extensive analysis of survey data covering the 27 EU member states provides a thorough empirical test of transactionalist hypotheses. Findings show that individual transnationalism indeed strongly and positively influences EU support, but that only a young, wealthy, and highly educated minority take part in cross-border interactions. The book further shows that the effectiveness of transnational interactions in generating EU support is contingent on a number of factors such as their purpose and scope. Importantly, increased transnational interactions result in negative externalities among those who do not become transnationally active themselves. By discussing the implications of transnationalism for the theoretical debate and current policy, this volume will provide a unique analysis of a key dynamic of European integration.

The Power of Dependence
NATO-UN Cooperation in Crisis Management
Michael F. Harsch

Key Selling Points
- First in-depth comparative analysis of NATO and the UN's cooperation in three major cases of international crisis management: Bosnia, Kosovo and Afghanistan
- Provides an innovative approach to the study of international organizations
- Explores the dynamics of collaboration between NATO and the United Nations

Summary
Since the end of the Cold War, crises from the Balkans to Central Asia and Africa have forced international organizations to adapt, expand, and cooperate to end civil wars, manage humanitarian challenges, and contain terrorist threats. The Power of Dependence explores the dynamics of collaboration between two of these organizations: NATO and the United Nations. Comparing NATO and the UN's engagement in three major post-Cold War conflicts—Bosnia, Kosovo, and Afghanistan—the book finds that the level of the organizations' resource dependence chiefly determines the level of interorganizational cooperation.

The Power of Dependence puts forward an innovative resource-dependence approach (RDA) to explain the stark variation in cooperation among international organizations (IOs), combining insights from international relations theory and organizational science into a comprehensive theoretical framework.

Unlawful Combatants
A Genealogy of the Irregular Fighter
Sibylle Scheipers

Key Selling Points
• Provides an overview of irregular fighters throughout the history of modern war
• Provides an original critique of the contested issue of unlawful combatants

Unlawful Combatants brings the study of irregular warfare back into the centre of war studies.

Summary
Unlawful Combatants brings the study of irregular warfare back into the centre of war studies. The experience of recent and current wars in Afghanistan, Iraq, Libya, and Syria showed that the status and the treatment of irregular fighters is one of the most central and intricate practical problems of contemporary warfare. Yet, the current literature in strategic studies and international relations more broadly does not problematize the dichotomy between the regular and the irregular. Rather, it tends to take it for granted and even reproduces it by depicting irregular warfare as a deviation from the norm of conventional, inter-state warfare. In this context, irregular warfare is often referred to as the 'new wars' and is associated with the erosion of statehood and sovereignty more generally. This obscures the fact that irregulars such as rebels, guerrillas, insurgents and terrorist groups have a far more ambiguous relationship to the state than the dichotomy between the state and 'non-state' actors implies. They often originate from states, are supported by states and/or aspire to statehood themselves.

The ambiguous relationship between irregular fighters and the state is the focus of the book. It explores how the category of the irregular fighter evolved as the conceptual opposite of the regular armed forces, and how this emergence was tied to the evolution of the nation state and its conscripted mass armies at the end of the eighteenth century. It traces the development of the dichotomy of the irregular and the regular, which found its foremost expression in the modern law of armed conflict, into the twenty-first century and provides a critique of the concept of the 'unlawful combatant' as it emerged in the framework of the 'war on terror'.

This book is a project of the Oxford Leverhulme Programme on the Changing Character of War.

**Bodies of Violence**  
Theorizing Embodied Subjects in International Relations  
Lauren B. Wilcox

### Key Selling Points
- Applies the theories of Judith Butler and Michel Foucault on embodiment and biopower to the conception of violence in International Relations in unprecedented ways.
- The book is lucidly written and engaging, grounding the often lofty ideas in concrete, real-world examples from the war on terror and other conflicts abroad.

According to conventional international relations theory, states or groups make war and, in doing so, kill and injure people that other states are charged with protecting. While it sees the perpetrators of violence as rational actors, it views those who are either protected or killed by this violence as mere bodies: ahistorical humans who breathe, suffer and die but have no particular political agency. In its rationalist variants, IR theory only sees bodies as inert objects. Constructivist theory argues that subjects are formed through social relations, but leaves the bodies of subjects outside of politics, as "brute facts."

According to Wilcox, such limited thinking about bodies and violence is not just wrong, but also limits the capacity of IR to theorize the meaning of political violence. By contrast to rationalist and constructivist theory, feminist theory sees subjectivity and the body as inextricably linked. This book argues that IR needs to rethink its approach to bodies as having particular political meaning in their own right. For example, bodies both direct violent acts (violence in drone warfare, for example) and are constituted by practices that manage violence (for example, scrutiny of persons as bodies through biometric technologies and body scanners). The book also argues that violence is more than a strategic action of rational actors (as in rationalist theories) or a destructive violation of community laws and norms (as in liberal and constructivist theories).

Because IR theorizes bodies as outside of politics, it cannot see how violence can be understood as a creative force for shaping the limits of how we understand ourselves as political subjects, as well as forming the boundaries of our political communities.

By engaging with feminist theories of embodiment and violence, Bodies of Violence provides a more nuanced treatment of the nexus of bodies, subjects and violence than currently exists in the field of international relations.

Explaining Post-Conflict Reconstruction
Desha Girod

Key Selling Points
• Unlike most books of its kind, focuses on socioeconomic reconstruction instead of postconflict peace or democracy
• Offers a rigorous analysis, testing the argument using data on all civil wars that ended between 1970 and 2009
• Has counterintuitive but important policy implications

Summary
The international community has donated nearly one trillion dollars during the last four decades to reconstruct post-conflict countries and prevent the outbreak of more civil war. Yet reconstruction has eluded many of these countries, and 1.9 million people have been killed in reignited conflict. Where did the money go?

This book documents how some leaders do bring about remarkable reconstruction of their countries using foreign aid, but many other post-conflict leaders fail to do so. Offering a global argument that is the first of its kind, Desha Girod explains that post-conflict leaders are more likely to invest aid in reconstruction when they are desperate for income and thus depend on aid that comes with reconstruction strings attached. Leaders are desperate for income when they lack access to rents from natural resources or to aid from donors with strategic interests in the country. Using data on civil wars that ended between 1970 and 2009 and evidence both from countries that succeeded and from countries that failed at post-conflict reconstruction, Girod carefully examines the argument from different perspectives and finds support for it. The findings are important for theory and policy because they explain why only some leaders have the political will to meet donor goals in the wake of civil war. The findings also shed light on state-building processes and on the political economy of postconflict countries. Paradoxically, donors are most likely to achieve reconstruction goals in countries where they have the least at stake.

Beyond Party Members
Changing Approaches to Partisan Mobilization
Susan Scarrow

Key Selling Points
• Provides new concepts for studying political parties
• Provides original data & measures for studying partisan political participation
Offers a broad overview of an important and ongoing transformation in relations between political parties and their closest supporters

Summary
For more than a century party members have played a central role in many parliamentary democracies, helping political parties to mobilize voters, and visibly linking party leaders with their grassroots supporters. Yet in the twenty-first century, party membership is undergoing rapid changes. In many parties, memberships are becoming numerically smaller at the same time that individual members are becoming more politically powerful.

Beyond Party Members investigates two questions connected with these changes. First, when and why did party memberships start falling, and what does this reveal about who benefits in party-membership relationships? Second, why have numerical declines in overall party membership coincided with expanding political rights for individual party members? To shed light on both puzzles, the author examines the origins of membership-based organization in nineteen countries, and considers contemporary parties’ efforts to adapt this model to new circumstances. Her study shows why both supply-side and demand-side forces are leading parties to offer party members more, and more meaningful, opportunities to participate in party decisions. They also lead parties to offer new and lower-cost modes of affiliation. These changes are producing Multi-speed Membership Parties, ones that offer supporters multiple ways to connect with a party. Beyond Party Members examines the consequences of these ongoing transformations for political parties, and for the democracies in which they compete.

Comparative Politics is a series for students, teachers, and researchers of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.ecprnet.eu.

The Comparative Politics series is edited by Kenneth Carty, Professor of Political Science, University of British Columbia; Emilie van Haute, Professor of Political Science, Universite libre de Bruxelles; and Ferdinand Muller-Rommel, Director of the Center for the Study of Democracy, Leuphana University.

India
Democracy and Violence
Samir Kumar Das

Key Selling Points
• Presents a novel argument - democracy and violence are organically related.
• Written from an interdisciplinary perspective; the contributors come from a variety of social science disciplines such as political science, history, gender studies, law and legal philosophy, and social anthropology.
• Engages a topic of much contemporary relevance.

Summary
Violence is usually located outside the democratic domain, implying thereby that its recurrence marks less of and ironically at the same time - a direct threat to democracy. Democracies are called upon to "manage", "tackle" or "deal with" it not necessarily through democratic means. Today, democracy is sought to be "exported" across the continents by waging war on countries that, according to the exporting countries of the West, are yet to become democratic.

This book contests and demystifies the celebrationist understanding of democracy and argues that violence is embedded in democracy as much as democracy is embedded in violence. Their interconnected existence has only made democracy violent and violence one of the many ways of trying to make a democracy work. So, more of democracy does not necessarily mean less of violence and vice versa. Democratic institutions and violence are thus implicated in an endless process of dialoguing and confrontation-democracy eternally incomplete, yet never tired of seeking to come to terms with its own normative promises. The alternative to democracy can only be more perfect democracy.

Troubled Diversity
The Political Process in Northeast India
Sandhya Goswami

Key Selling Points
• Addresses many contemporary issues of Northeast India
• Presents an excellent work on minority studies
• The arguments are adequately supported by statistics as and where needed

Summary
Diversity as a social fact always existed in the world at large but it becomes a problem when it exists within the territory of a state or when the cultural or racial differences become the basis of group inequality or when the different groups perceive one another as threat to their identity. The nature of diversity in India's Northeast represents bewildering mosaics of different collective identities-religious, linguistic, ethnic-that overlap and cut across one another in innumerable ways. The intensification of identity politics centering around ethnicity is one of the distinguishing features of the recent political history of Northeast India. For creating and consolidating its respective identities every ethnic group makes an effort to construct its 'other'. As the number of identities increase the list of others also multiplies. The logic of the 'other' is always seen in relation to the community to which s/he belongs. 'The other is the one who has come to dominate and exploit. The ideology of 'the other' motivates and guides identity politics in Northeast India. The atmosphere of mistrust generated by fears of domination and vengeance over one group by another has been heightened in the wake of various ethnic conflicts in Northeast India in the past few years. Moreover, the cultural processes, values, and practices of ethnic groups are increasingly becoming political resources for elites in competition for political power or economic advantage. They become symbols and referents for the identification of members of the group which are called up in order to create a political identity more easily. The well-researched chapters in this volume provide valuable insights into factors that contribute to the turbulent conflict situation in the peripheral regions such as the Northeast and Kashmir.

Governing the Embedded State
The Organizational Dimension of Governance
Bengt Jacobsson, Jon Pierre, Göran Sundström

Key Selling Points
- Draws upon organization theory into governance theory
- In-depth case study of the Swedish government system
Integrates governance theory with organization theory and examines how states address social complexity and international embeddedness

Summary
*Governing the Embedded State* integrates governance theory with organization theory and examines how states address social complexity and international embeddedness. Drawing upon extensive empirical research on the Swedish government system, this volume describes a strategy of governance based in a metagovernance model of steering by designing institutional structures. This strategy is supplemented by micro-steering of administrative structures within the path dependencies put in place through metagovernance. Both of these strategies of steering rely on subtle methods of providing political guidance to the public service where norms of loyalty to the government characterize the relationship between politicians and civil servants.

By drawing upon this research, the volume will explain how recent developments such as globalization, Europeanization, the expansion of managerial ideas, and the fragmentation of states, have influenced the state’s capacity to govern.

The result is an account of contemporary governance which shows the societal constraints on government but also the significance of close interaction and cooperation between the political leadership and the senior civil servants in addressing those constraints.

How Policy Shapes Politics
Rights, Courts, Litigation, and the Struggle Over Injury Compensation
Jeb Barnes, Thomas F. Burke

Key Selling Points
- Synthesizes and critiques many scattered writings on the consequences of growing 'judicialization,' 'juridification,' 'legalization,' 'juristocracy' etc.
- Challenges much of the conventional wisdom about the political costs of using litigation, including many prominent claims made by political scientists, journalists and law professors about how litigation affects politics
- Introduces a 'comparative developmental' approach to analyzing claims about the effects of litigation on politics and show why this approach improves on the methods researchers in this field typically use
- Uses original data drawn from 40 years of congressional hearings on injury compensation policies and three in-depth histories long-running political struggles over injury compensation

Concludes that litigation divides interests between victims and villains and winners and losers, and so creates a comparatively fractious, chaotic politics

Summary
Judicialization, juridification, legalization—whatever terms they use, scholars, commentators and citizens are fascinated by what one book has called "The Global Rise of Judicial Power" and seek to understand its implications for politics and society. In How Policy Shapes Politics, Jeb Barnes and Thomas F. Burke find that the turn to courts, litigation, and legal rights can have powerful political consequences.

Barnes and Burke analyze the field of injury compensation in the United States, in which judicialized policies operate side-by-side with bureaucratized social insurance programs. They conclude that litigation, by dividing social interests into victims and villains, winners and losers, generates a fractious, chaotic politics in which even seeming allies-business and professional groups on one side, injured victims on the other—can become divided amongst themselves. By contrast, social insurance programs that compensate for injury bring social interests together, narrowing the scope of conflict and over time producing a more technocratic politics.

Policy does, in fact, create politics. But only by comparing the political trajectories of different types of policies -- some more court-centered, others less so -- can we understand the consequences of arguably one of the most significant developments in post-World War II government, the increasingly prominent role of courts, litigation, and legal rights in politics.

Contributor Bio
Jeb Barnes is Associate Professor of Political Science at the University of Southern California. A former litigator and research fellow with the Robert Wood Johnson Scholars in Health Policy Program, he is the author of Overruled? Legislative Overrides, Pluralism and Contemporary Court-Congress Relations and Dust-Up: Asbestos Litigation and the Failure of Commonsense Policy Reform; the co-author with Nicholas Weller of Finding Pathways: Mixed-Method Research for Studying Causal Pathways; and the co-editor with Mark Miller of Making Policy, Making Law: An Interbranch Perspective. Thomas F. Burke is Professor of Political Science at Wellesley College. He has been a visiting professor at Harvard and at the University of California-Berkeley, and a research fellow at the Brookings Institution and with the Robert Wood Johnson Scholars in Health Policy Program. He is the co-author with Lief Carter of Reason in Law and the author of Lawyers, Lawsuits and Legal Rights.

Quotes
"Brilliant! How Policy Shapes Politics is a landmark. It shows that how we compensate for injuries or illness is a fateful policy choice. One path leads to sharp political conflict with
big winners and losers, the other to stable, reasoned and reasonable distribution of costs and benefits. Richly based in evidence and elegantly composed, this study is a must-read for scholars of law, tort litigation, and how public policies -- including judicial decisions -- shape politics." --Charles R. Epp, Professor, School of Public Affairs and Administration at the University of Kansas

"I know of no book that does a better job explaining how 'adversarial legalism' shapes public policy. Using well-crafted case studies and carefully designed quantitative analysis, Barnes and Burke help us understand the different patterns of politics created by bureaucratic legalism and adversarial legalism. The clarity and depth of their case studies make this a great book for both undergraduate courses and graduate seminars."
--R. Shep Melnick, Thomas P. O'Neill Professor of American Politics, Boston College

Making the Poor Free?
India's Unique Identification Number
S. K. Das

Key Selling Points
• Extremely topical in nature; a must-read in the context of the various debates around the implementation of the Aadhaar/UID project in India and the Supreme Court's order to the government in this regard
• Brilliantly applies the philosopher Michel Foucault's theory of 'governmentality' in trying to address several questions around the project
• Fills in a large gap in any critical analyses of this unique and controversial scheme, particularly in trying to examine its effectiveness for the poor
• Provides adequate empirics to support the various arguments
How India's poor become free and enterprising individuals.

Summary
The proposed monograph evaluates the impact of Unique Identification (UID) number programme (also called the Aadhaar programme) initiated by the Government of India. The UID programme is aimed at making it easier for Indian citizens to avail the benefits of government-sponsored services and development schemes. The author examines how the UID can help the masses of India, especially the rural poor, by reducing corruption and promoting greater financial inclusivity. Positing the theoretical framework of 'governmentality' by the French philosopher Michel Foucault, the author critically analyses the current Indian scenario and maintains that while the Aadhaar programme's contribution in the implementation of several schemes, such as the public distribution system, The Mahatma Gandhi National Rural Employment Guarantee Scheme, or other initiatives in education or public health sectors could only be modest, it will indeed create a platform for 'financial inclusion' of the poor providing them easy access to the formal financial mechanism. In fifteen chapters covering the evolution of different schemes of the Indian government that have, over the years, sought to provide identification; enrolment to and functioning of Aadhar; the Unique Identification Authority of India; and the legal framework involved in the process, this volume is an in-depth analysis of this unique and controversial programme in India.

**Strong Constitutions**

Social-Cognitive Origins of the Separation of Powers

Maxwell A. Cameron

---

**Key Selling Points**

- The first ever social scientific theory of the separation of powers based on language and social cognition
- Controversial approach that departs from legalistic approaches to separation of powers and positivist accounts of political systems
- Highly relevant to contemporary political debates on the 'war on terror', use of emergency powers, democracy without checks and balances, etc.

A bold argument that constitutional states are not weaker because their powers are divided -- they are often stronger because they solve collective action problems rooted in speech and communication.

---

**Summary**

The separation of powers is an idea with ancient origins, but nowadays it is largely relegated to legal doctrine, public philosophy, or the history of ideas. Yet the concept is often evoked in debates on the 'war on terrorism', the use of emergency powers, or constitutional reform. Strong Constitutions boldly places the separation of powers on a social scientific footing, arguing that it emerged with the spread of literacy, became central to constitutional thought after the Gutenberg revolution, and faces unprecedented challenges in our current era of electronic communication. Constitutional states use texts to coordinate collective action, and they do so by creating governmental agencies with specific jurisdiction and competence over distinct types of power. Among them are the power to make decisions backed by legally sanctioned coercion; the deliberative power to make procedurally legitimate laws; and the judicial power to interpret and apply laws in particular circumstances. The division of government into three such branches enables state officials and citizens to use written texts—legal codes and documents, including constitutions—along with unwritten rules and conventions to coordinate their activities on larger scales and over longer time horizons.

Cameron argues that constitutional states are not weaker because their powers are separated. They are generally stronger because they solve collective action problems rooted in speech and communication. The book is a must read for anyone interested in the separation of powers, its origin, evolution, and consequences.

---

**Quotes**

"Beyond Cameron's well-structured theory of separation of powers and the significant role it plays in political theory, one is left with the impression that the book's emphasis on the interpretation and application of constitutional texts in a modern democracy rests not so much on clarifying the formal borderlines of each branch of government, but rather on the ability of major political forces to agree on what a constitution means and how it applies to their actions. Today in the Americas, however, the argument that strong government is divided government and the need for that to be based on shared language and meaning is a sharp and unfortunate contrast to the current politics in many countries, including the U.S." — *Americas Quarterly*

European Social Models, Employment and Inequality in the Era of Monetary Integration
From Crisis to Crisis
Jon Erik Dolvik, Andrew Martin

Key Selling Points
• Provides a unique overview of social model developments in key European countries over the past 25 years
• Gathers a selection of outstanding international scholars which offer a comprehensive view on the recent crisis and its background causes
• Features case studies of 11 countries and comparative analysis of policy coalitions and labor market outcomes

From the crisis after German re-unification and through the Great Recession - this book analyzes how the transformation of the European political economies has influenced the social models, employment, and inequality in Western Europe

Summary
Europeans use 'social models' to refer to the combination of welfare state, industrial relations, and educational institutions jointly structuring what we can think of as the supply-side of the labor market. The dominant view in controversy over the social models has been that in the name of equity they have impaired the labor market's efficiency, thereby causing unemployment. But doubt is cast on this supply-side-only diagnosis by powerful macroeconomic developments, from the Europe-wide recession following Germany's post-unification boom to the deepest economic crisis since the interwar Great Depression, which the Eurozone's truncated economic governance structure transformed into a sovereign debt crisis, threatening the Euro's and even EU's very survival. This book explores the interaction of Europe's diverse social models with the major developments that shaped their macroeconomic environment over the quarter century since the fall of the Berlin Wall. It concludes that this environment rather than the social models are primarily responsible for the immense social costs of the crisis.

Democratic Politics in a European Union Under Stress
Olaf Cramme, Sara B. Hobolt

Key Selling Points
- First comprehensive analysis of the Euro crisis and its impact on democratic politics in Europe
- Contributions from a number of world leading scholars

The first comprehensive political analysis of the Euro crisis and its impact on democratic politics in the EU

Summary
This book offers the first comprehensive political analysis of the Euro crisis that erupted in Greece in 2010 and subsequently threatened the very survival of the Euro area. It has left a profound mark on democratic politics all over Europe, changing public attitudes and voting preferences, institutional and societal norms, and deeply anchored political traditions.

The contributors to this volume reveal the extent to which policymakers are torn between the pressures emanating from financial markets and the demands put forward by their own constituents; how they struggle to reconcile national preferences with wider European interests; and how a polarized and politicized Union seeks to maintain some degree of cohesion. The emerging picture is that of a European Union under serious stress, transformed by new governance structures and a shifting balance of power. In response, the authors evaluate the prospects of a more legitimate and democratic Europe. They provide a rich and pluralist set of new analyses and proposals, aimed at understanding and navigating the myriad tensions which surround the EU in the aftermath of the crisis. If the European project is to regain the trust of its citizens, such considerations must take a central place in public debate.

**Fulfilling Social and Economic Rights**  
Sakiko Fukuda-Parr, Terra Lawson-Remer, Susan Randolph

### Key Selling Points
- Provides a first book-length work on measurement of social and economic rights including comprehensive review of alternative measurement approaches, evolving demand, and potential for strengthening human rights practice and theorizing
- Develops a progressive realization - rather than violations - approach to monitoring human rights realization
- Develops a measurement tool that captures performance not just indicators
- Introduces a new evidence based measure and data set of state performance in fulfilling social and economic rights, rigorously grounded in international human rights norms.
- Charts new territory in examining state performance in progressively realizing social and economic rights

### Summary
One of the most ambitious legacies of the 20th century was the universal commitment to ensure freedom from want as a human right. How far have we progressed; to what extent are countries across the world living up to this commitment?

This book charts new territory in examining the extent to which countries meet their obligations to progressively realize social and economic rights -- the rights to education, food, health, housing, work and social security. States have long escaped accountability for these commitments by claiming inadequate resources. The authors develop an innovative evidence based index, the Social & Economic Rights Fulfillment (SERF) Index and Achievement Possibilities Frontier methodology, making possible for the first time apples-to-apples comparisons of performance across very differently situated countries and over time. The book provides an overall global picture of progress, regress and disparities amongst and within countries and explores the factors influencing performance -- including whether treaty and legal commitments, gender equity, democracy/autocracy, and economic growth, explain good performance -- revealing surprising results. The data provide empirical evidence to resolve some long standing controversies over the principle of 'progressive realization'. The book concludes by observing how the SERF Index can be used in evidence based social science research, policy making and accountability procedures to advance social and economic rights.

By defying the boundaries of traditional research disciplines, this work fundamentally advances our knowledge about the status of and factors promoting social and economic rights fulfillment at the dawn of the 21st century.

Poverty and Shame
Global Experiences
Elaine Chase, Grace Bantebya-Kyomuhendo

Key Selling Points
• Challenges prevailing views about the nature and impact of poverty
• Provides unique and multiple insights into how shame in association with poverty is constructed and experienced.
• Provides a clear practice example of cross cultural, interdisciplinary and comparative research in seven different countries
• Points to the need for policies that promote dignity and explains why they are likely to be more effective than those that do not

Challenges thinking about the nature and causes of poverty in both the Global North and Global South

Summary
Poverty and Shame: Global Experiences explores Nobel laureate Amartya Sen's contention that shame lies at the absolutist core of poverty. It draws on a wealth of empirical evidence to demonstrate how paying greater attention to the psychological and social consequences of poverty provides new insights into how poverty is perpetuated. Based on research in seven very different global contexts, it reveals how, irrespective of whether people live above or below a designated poverty line, in cultures as diverse as rural India, Uganda and Pakistan, urban/suburban UK, China, Norway and South Korea, the ability to participate in society as a full and recognised citizen is largely contingent on having the material resources deemed normal for that society. When such means are not available, the common response is to feel inadequate and to save face by withdrawing to varying degrees from society. Such a response further limits opportunities to exit poverty and arguably results in perpetuating its cycle. Yet society in turn plays a fundamental role in what we term the poverty-shame nexus, by persistently evaluating others against dominant norms and expectations and prioritising certain explanations of poverty over others. Hence shame in relation to poverty is co-constructed, a dynamic interaction of internally felt inadequacies and externally inflicted judgements.

This book, together with the companion volume The Shame of Poverty by Robert Walker invites readers to question conventional understandings about poverty and its impact. In so doing, the volumes provide a foundation for a more satisfactory global conversation about the phenomenon of poverty than that which has hitherto been frustrated by disagreement about whether poverty is best conceptualised in absolute or relative terms.

Single Markets
Economic Integration in Europe and the United States
Michelle Egan

Key Selling Points
• The first single-authored volume offering a comparison of the creation of the EU and US single markets
• Covers two seminal periods of market building in the US and EU: 19th century America and post-war 20th century Europe
• Interdisciplinary approach with detailed case-studies
A trenchant and timely analysis of the creation of a single market in both the EU and the US

Summary
This ambitious volume provides a trenchant and timely analysis of the creation of a single market in both the EU and the US. Comparing the experience of the US during the nineteenth century and the single market of the EU in the twentieth century, Single Markets demonstrates how the political economy of single market formation has followed remarkably similar trajectories. Both cases show evidence of interplay between different levels of government in determining distributive outcomes; evolution of a legal framework for the market; and development of new regulatory strategies to deal with changing economic realities. The book illustrates the process of market consolidation through a detailed comparison of the so-called four freedoms: the removal of border controls; and the largely unrestricted transfer of goods, services, and capital across different jurisdictions. In both cases, establishing one market, one currency, and a more unified banking and financial system transformed largely autonomous or sovereign constituent units into a more unified economic entity.

Single Markets also sheds light on critically important questions for both comparativists and international relations scholars regarding the nature of territorial governance and the construction of state interests. The book’s interdisciplinary approach to focusing on crucial political and economic developments on both sides of the Atlantic will be of interest to scholars in political science, public policy, law, and history.

The Oxford Handbook of Urban Politics
Karen Mossberger, Susan E. Clarke, Peter John

Key Selling Points
• Unique collection of contemporary analyses of urban politics
• Presents material relevant to sociologists, demographers, and political scientists alike
• Features the work of top researchers in the field of urban studies
An authoritative volume on urban politics and urban studies

Summary
The Oxford Handbook of Urban Politics is an authoritative volume on an established subject in political science and the academy more generally: urban politics and urban studies. The editors are all recognized experts, and are well connected to the leading scholars in urban politics. The handbook covers the major themes that animate the subfield: the politics of space and place; power and governance; urban policy; urban social organization; citizenship and democratic governance; representation and institutions; approaches and methodology; and the future of urban politics. Given the caliber of the editors and proposed contributors, the volume sets the intellectual agenda for years to come.

Contributor Bio
Karen Mossberger is Professor and Head of Public Administration, University of Illinois at Chicago.

Susan Clarke is Professor of Political Science at the University of Colorado, Boulder.

Peter John is Professor of Political Science and Public Policy, School of Public Policy, University College London.

National Intelligence and Science
Beyond the Great Divide in Analysis and Policy
Wilhelm Agrell, Gregory F. Treverton

Key Selling Points
- Examines the shared challenges of both intelligence analysis and scientific research focused on societal risks in terms of assessing and describing uncertainty
- One of the first efforts to analyze the converging domains of intelligence and science
- Real-world implications for the range of security risks faced by the world in the new millennium
Moves beyond the divide to develop new forms for discovering, understanding, and reacting to the emerging challenges of a globalized yet fragmenting world

Summary
Intelligence is currently facing increasingly challenging cross-pressures from both a need for accurate and timely assessments of potential or imminent security threats and the unpredictability of many of these emerging threats. We are living in a social environment of growing security and intelligence challenges, yet the traditional, narrow intelligence process is becoming increasingly insufficient for coping with diffuse, complex, and rapidly-transforming threats. The essence of intelligence is no longer the collection, analysis, and dissemination of secret information, but has become instead the management of uncertainty in areas critical for overriding security goals—not only for nations, but also for the international community as a whole. For its part, scientific research on major societal risks like climate change is facing a similar cross-pressure from demand on the one hand and incomplete data and developing theoretical concepts on the other. For both of these knowledge-producing domains, the common denominator is the paramount challenges of framing and communicating uncertainty and of managing the pitfalls of politicization.

National Intelligence and Science is one of the first attempts to analyze these converging domains and the implications of their convergence, in terms of both more scientific approaches to intelligence problems and intelligence approaches to scientific problems. Science and intelligence constitute, as the book spells out, two remarkably similar and interlinked domains of knowledge production, yet ones that remain traditionally separated by a deep political, cultural, and epistemological divide.

Looking ahead, the two twentieth-century monoliths—the scientific and the intelligence estates—are becoming simply outdated in their traditional form. The risk society is closing the divide, though in a direction not foreseen by the proponents of turning intelligence analysis into a science, or the new production of scientific knowledge.

Contributor Bio
Wilhelm Agrell is Professor of Intelligence Analysis at Lund University, Sweden and Visiting Professor at the Swedish National Defence College, Stockholm. He has a background in Swedish intelligence and military service in the Middle East. As an academic scholar, he received a Ph.D. in history at Lund University in 1985 and has written over 25 books, primarily dealing with Cold War history and Swedish security. He has been active in establishing intelligence analysis as an academic field and became the first Scandinavian professor in the subject in 2006. In addition to his academic work, he has also written several novels, some of which were translated into Finnish and German.

Gregory F. Treverton is Director of the RAND Corporation's Center for Global Risk and Security and a Visiting Scholar at the Swedish National Defence College, Stockholm. In government, he has served the first Senate Select Committee on Intelligence, the National Security Council, and as Vice Chair of the National Intelligence Council. He has taught at Harvard University and Columbia University as well as the RAND Graduate School. He is the author or editor of three dozen books and major monographs, principally on intelligence, strategy, nuclear issues, Europe, and Latin America.

Follow the Money
How Foundation Dollars Change Public School Politics
Sarah Reckhow

Key Selling Points
• Provides analytical view on the "behind the scenes" influence of foundations on education policy
• Builds argument on an original data set of foundation grants to the 100 largest school districts in the United States
• Contrasts the success and failures of centralized and grassroots approaches to urban education reform

Sarah Reckhow shows where and how foundation investment in education is occurring and presents in-depth analysis of the effects of these investments within the two largest urban districts in the United States: New York City and Los Angeles

Summary
Some of the nation’s wealthiest philanthropic organizations, including the Bill and Melinda Gates Foundation, the Walton Family Foundation, and the Broad Foundation, have invested hundreds of millions of dollars in education reform. With vast wealth and a political agenda, these foundations have helped to reshape the reform landscape in urban education. In Follow the Money, Sarah Reckhow shows where and how foundation investment in education is occurring and provides a penetrating analysis of the effects of these investments in the two largest urban districts in the United States: New York City and Los Angeles.

In New York City, centralized political control and the use of private resources have enabled rapid implementation of reform proposals. Yet this potent combination of top-down authority and outside funding also poses serious questions about transparency, responsiveness, and democratic accountability in New York. Furthermore, the sustainability of reform policies is closely linked to the political fortunes of the current mayor and his chosen school leader. While the media has highlighted the efforts of forceful reformers and dominating leaders such as Joel Klein in New York City and Michelle Rhee in Washington, D.C., a slower, but possibly more transformative, set of reforms have been taking place in Los Angeles. These reforms were also funded and shaped by major foundations, but they work from the bottom up, through charter school operators managing networks of schools. This strategy has built grassroots political momentum and demand for reform in Los Angeles that is unmatched in New York City and other districts with mayoral control. Reckhow’s study of Los Angeles’s education system shows how democratically responsive urban school reform could occur-pairing foundation investment with broad grassroots involvement.

Bringing a sharp analytical eye and a wealth of evidence to one of the most politicized issues of our day, Follow the Money will reshape our thinking about educational reform in America.

Sarah Reckhow, Assistant Professor of Political Science, Michigan State University

Quotes
"Sarah Reckhow has written a timely and fascinating book that brings overdue attention to the impact of philanthropy on education policy. In this extraordinarily thoughtful account, she explains how major donors are influencing school reform. In a field alternately dominated by fawning accounts and ad hominem attacks, Reckhow has provided a signal service. This is a book I heartily recommend to scholars, educators, policymakers, and would-be reformers." —Frederick Hess, author of The Same Thing Over and Over: How School Reformers Get Stuck in Yesterday’s Ideas

"Cheerleaders celebrate the role of foundations in driving contemporary school reform,
while critics charge they exert influence without proportionate accountability and undermine local democracy. What distinguishes *Follow the Money* is that it is grounded in important theories within political science, empirically based, employs novel methodologies, and offers reasonable and modulated conclusions that, while generally aligning with critics, are neither shrill nor calcified. Any one of these would represent a contribution within the education policy field, and taken together they add up to quite a wallop." --Jeffrey R. Henig, Department of Education Policy & Social Analysis, Teachers College, Columbia University

"This fascinating, exhaustively researched, and important book traces the growing scope and impact of philanthropic money in education politics and policymaking, a topic that has been the subject of much speculation but little systematic research to date...Unlike many education scholars, she employs a multi-method research design that incorporates large-scale data analysis, detailed case studies, surveys, interviews, and social network analysis. This approach has enabled her to craft a nuanced and multifaceted analysis of foundation influence and impact and created a rich new trove of data that will be invaluable to other scholars." --Perspectives on Politics

The Arab Uprisings (2nd Edition)
What Everyone Needs to Know
James Gelvin

Key Selling Points
- Draws on the expertise of one of the leading scholars in the field
- Written in a lively and clear question and answer style
- Includes historical context as well as in-depth analysis of current events

A leading expert on the Middle East offers much-needed historical context and insightful analysis of the popular uprisings sweeping the Arab world

Summary
Beginning in December 2010 popular revolt swept through the Middle East, shocking the world and ushering in a period of unprecedented unrest. Protestors took to the streets to demand greater freedom, democracy, human rights, social justice, and regime change. What caused these uprisings? What is their significance? And what are their likely consequences?

In an engaging question-and-answer format, this updated edition of The Arab Uprisings: What Everyone Needs to Know® explores all aspects of the revolutionary protests that have rocked the Middle East. Historian James Gelvin begins with an overview, asking questions such as: What sparked the Arab uprisings? Where did the demands for democracy and human rights come from? How appropriate is the phrase "Arab Spring"?—before turning to specific countries around the region.

Shifting the emphasis from the initial upheaval itself to the spinning out of the revolutionary process, Gelvin looks at such topics as the role of youth, labor, and religious groups in Tunisia and Egypt and discusses why the military turned against rulers in both countries. Exploring the uprisings in Libya and Yemen, Gelvin explains why these two states are considered "weak," why that status is important for understanding the upheavals there, and why outside powers intervened in Libya but not in Yemen. This second edition looks more closely at the situation of individual countries affected by the uprisings. Gelvin compares two cases that defied expectations: Algeria, which experts assumed would experience a major upheaval after Egypt's, and Syria, which experts failed to foresee. He then looks at the monarchies of Morocco, Jordan, and the Gulf, exploring the commonalities and differences of protest movements in each. Reconsidering the possible historical significance of the uprisings Gelvin explores what this means for the United States and Iran. Has al-Qaeda been strengthened or weakened? What effects have the uprisings had on the Israel-Palestine conflict? What conclusions might we draw from the uprisings so far?

What Everyone Needs to Know® is a registered trademark of Oxford University Press.

Contributor Bio
James L. Gelvin is Professor of Modern Middle Eastern History at the University of California, Los Angeles. He is the author of The Modern Middle East: A History and The Israel-Palestine Conflict: One Hundred Years of War.

Quotes
"A remarkably readable, informative, slim volume...Of particular worth is James Gelvin's ability to show how the protests are interlinked, yet also independent of each other. Brief forays into the Palestinian/Israeli conflict and the current state of al-Qaeda are also illuminating...an excellent primer for the general reader." -- Publishers Weekly

"This impressive achievement brings together a vast amount of information in a lucid manner. Highly recommended." -- Library Journal

"A solid primer on the Arab Spring...[Gelvin's] background on the Arab world will certainly help non-experts better understand the region...A useful attempt to understand a still-
unfolding story." --Kirkus Reviews
"Highly recommended...Gelvin's claim to provide "what everyone needs to know" does not unduly exaggerate the usefulness of the book for students and other nonspecialists. Even specialists in contemporary Arab affairs will benefit in some ways, notably by using it as a model in their own teaching and general writings." --CHOICE
"James Gelvin has throughout his career explained to us the role of popular demonstrations and symbolic action in the modern Middle East. There could be few more expert guides for the public to the remarkable Arab uprisings of 2011. Gelvin avoids easy answers for the hard one, and never prefers simple theory to complex realities." --Juan Cole, Richard P. Mitchell Collegiate Professor of History, University of Michigan

A leading expert on the Middle East offers much-needed historical context and insightful analysis of the popular uprisings sweeping the Arab world

Summary
Beginning in December 2010 popular revolt swept through the Middle East, shocking the world and ushering in a period of unprecedented unrest. Protestors took to the streets to demand greater freedom, democracy, human rights, social justice, and regime change. What caused these uprisings? What is their significance? And what are their likely consequences?

In an engaging question-and-answer format, this updated edition of The Arab Uprisings: What Everyone Needs to Know® explores all aspects of the revolutionary protests that have rocked the Middle East. Historian James Gelvin begins with an overview, asking questions such as: What sparked the Arab uprisings? Where did the demands for democracy and human rights come from? How appropriate is the phrase "Arab Spring"?--before turning to specific countries around the region.

Shifting the emphasis from the initial upheaval itself to the spinning out of the revolutionary process, Gelvin looks at such topics as the role of youth, labor, and religious groups in Tunisia and Egypt and discusses why the military turned against rulers in both countries. Exploring the uprisings in Libya and Yemen, Gelvin explains why these two states are considered “weak,” why that status is important for understanding the upheavals there, and why outside powers intervened in Libya but not in Yemen. This second edition looks more closely at the situation of individual countries affected by the uprisings. Gelvin compares two cases that defied expectations: Algeria, which experts assumed would experience a major upheaval after Egypt’s, and Syria, which experts failed to foresee. He then looks at the monarchies of Morocco, Jordan, and the Gulf, exploring the commonalities and differences of protest movements in each. Reconsidering the possible historical significance of the uprisings Gelvin explores what this means for the United States and Iran. Has al-Qaeda been strengthened or weakened? What effects have the uprisings had on the Israel-Palestine conflict? What conclusions might we draw from the uprisings so far?

Contributor Bio

James L. Gelvin is Professor of Modern Middle Eastern History at the University of California, Los Angeles. He is the author of The Modern Middle East: A History and The Israel-Palestine Conflict: One Hundred Years of War.

Quotes

"A remarkably readable, informative, slim volume...Of particular worth is James Gelvin's ability to show how the protests are interlinked, yet also independent of each other. Brief forays into the Palestinian/Israeli conflict and the current state of al-Qaeda are also illuminating...an excellent primer for the general reader." --Publishers Weekly

"This impressive achievement brings together a vast amount of information in a lucid manner. Highly recommended." --Library Journal

"A solid primer on the Arab Spring...[Gelvin's] background on the Arab world will certainly help non-experts better understand the region...A useful attempt to understand a still-unfolding story." --Kirkus Reviews
"Highly recommended...Gelvin's claim to provide "what everyone needs to know" does not unduly exaggerate the usefulness of the book for students and other nonspecialists. Even specialists in contemporary Arab affairs will benefit in some ways, notably by using it as a model in their own teaching and general writings." --CHOICE
"James Gelvin has throughout his career explained to us the role of popular demonstrations and symbolic action in the modern Middle East. There could be few more expert guides for the public to the remarkable Arab uprisings of 2011. Gelvin avoids easy answers for the hard one, and never prefers simple theory to complex realities." --Juan Cole, Richard P. Mitchell Collegiate Professor of History, University of Michigan

1 A Revolutionary Wave?
What is the Arab world?
Is the Arab world homogeneous?
Why do Arabs identify with one another?
What was political life in the Arab world like on the eve of the uprisings?
Why have authoritarian governments been so common in the Arab world?
What was the state of the economy in the Arab world on the eve of the uprisings?
What benefits did Arab regimes originally promise their populations?
Why and how did Arab regimes renege on the promises they had made to their populations?
How did the demography of the Arab states make them vulnerable to uprisings?
How did a food crisis make Arab states vulnerable to uprisings?
Why did populations wanting change in the Arab world have to take to the streets?
Can we pinpoint the factors that caused the uprisings?
What was the spark that ignited the Arab uprisings?
Where did the demand for human and democratic rights come from?
How did the demand for human rights and democracy strike roots in the Arab world?
How pervasive was the demand for human and democratic rights in the Arab world before the uprisings of 2010-11?
How appropriate is the word wave to describe the spread of protests throughout the Arab world in 2010-11?
Where did the phrase "Arab Spring" come from, and how appropriate is it to describe events in the Arab world?

2 The Beginning: Tunisia and Egypt
What characteristics do Tunisia and Egypt hold in common?
How entrenched were the autocracies ruling Tunisia and Egypt?
How did the regimes in Tunisia and Egypt attempt to control their populations?
How widespread was corruption in Tunisia and Egypt?
How did the Tunisian uprising catch fire?
How exceptional was Bouazizi's suicide?
Was the uprising in Egypt like that of Tunisia?
How did the initial phase of the Egyptian uprising play itself out?
What was the role of social media in the Tunisian and Egyptian uprisings?
Why did the Tahrir Square protesters and others adopt the tactic of nonviolent resistance?
What was the role of labor in the two uprisings?
What was the role of Islamic groups in the two uprisings?
What was the Egyptian Muslim Brotherhood?
What are salafis?
Why did the armies in Tunisia and Egypt refuse to put down the initial uprisings?
Why did the paths taken by the Tunisian and Egyptian uprisings diverge?
How did decisions made by governing parties affect the course of uprisings there?
Why did the Egyptian military overthrow the Muslim Brotherhood government?
When is a coup not a coup?
Do events in Egypt demonstrate that Islamist parties are incapable of rule?

The Iron Cage of Liberalism
International Politics and Unarmed Revolutions in the Middle East and North Africa
Daniel Ritter

Key Selling Points
• An original conceptualization of revolutionary dynamics
• A comparative examination of unarmed revolutions, with an interdisciplinary focus and explanation
Explores why some nonviolent revolutionary movements lead to unarmed revolution, and others result in devastating failure

Summary
Over the last forty years the world has witnessed the emergence and proliferation of a new political phenomenon - unarmed revolution. On virtually every continent, citizens have ousted their authoritarian leaders by employing nonviolent tactics such as strikes, demonstrations, boycotts, and civil disobedience against them. At the same time however, similar movements elsewhere have been brutally crushed by autocrats determined to cling to power.

In this book, Daniel Ritter seeks to understand unarmed revolutions by posing two interrelated questions: Why do nonviolent revolutionary movements in some countries topples their autocratic leaderships while similar movements elsewhere are brutally crushed, and why has the world witnessed a proliferation of unarmed revolution in the last forty years? Through a comparative historical analysis of the Iranian, Tunisian, and Egyptian revolution, he shows that close and friendly international relations between democratic states in the West and authoritarian regimes elsewhere constitute a parsimonious and plausible explanation for nonviolent revolutionary success. Looking beyond the immediate causes of revolutionary outbreaks, Ritter instead focuses on the contexts that explain successful civil resistance against repressive states.

In an original conceptualization of revolutionary dynamics, he argues that Western-aligned autocrats eventually find themselves restrained by their strong links to the democratic world through a mechanism he refers to as 'the iron cage of liberalism'. Having committed rhetorically to the West's fundamental political discourse of democracy and human rights, the dictators in Tehran, Tunis, and Cairo found themselves paralyzed when nonviolent crowds challenged them with tactics and demands fully compatible with the political ideals the regimes claimed as their own.

The Oxford Handbook of Transnational Feminist Movements
Rawwida Baksh, Wendy Harcourt

Key Selling Points
• Provides critical reflection on the accomplishments of transnational feminist movements over the past half-century
• Includes contributions from scholars and scholar-activists from the Global South and North
• Publication marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'

Explores the historical, political, and economic context in which transnational feminist movements have emerged and spread and the contributions these movements have made to global knowledge, policy and social change from the 1970s to the present

Summary
The Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'.

The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others.

The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes.

The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

The Pakistan Paradox
Instability and Resilience
Christophe Jaffrelot

Key Selling Points
• A fresh political history of Pakistan that explains the resilience of the state and its people and how both persevere against the odds.
• Dissects the complicated political history of Pakistan from its emergence as a nation state
• Author argues that Pakistan is entering a period of stability, despite the many crises it faces

Summary
Pakistan was born as the creation of elite Urdu-speaking Muslims who sought to govern a state that would maintain their dominance. After rallying non-Urdu speaking leaders around him, Jinnah imposed a unitary definition of the new nation state that obliterated linguistic diversity. This centralisation - 'justified' by the Indian threat - fostered centrifugal forces that resulted in Bengali secessionism in 1971 and Baloch, as well as Mohajir, separatisms today.

Concentration of power in the hands of the establishment remained the norm, and while authoritarianism peaked under military rule, democracy failed to usher in reform, and the rule of law remained fragile at best under Zulfikar Bhutto and later Nawaz Sharif. While Jinnah and Ayub Khan regarded religion as a cultural marker, since their time the Islamists have gradually prevailed. They benefited from the support of General Zia, while others, including sectarian groups, cashed in on their struggle against the establishment to woo the disenfranchised.

Today, Pakistan faces existential challenges ranging from ethnic strife to Islamism, two sources of instability which hark back to elite domination. But the resilience of the country and its people, the resolve of the judiciary and hints of reform in the army may open a new and more stable chapter in its history.

The China-Pakistan Axis
Asia's New Geopolitics
Andrew Small

Key Selling Points
- The first book-length analysis of an often secretive but mutually beneficial military and strategic partnership.
- This crucial relationship is often overlooked on the world stage.

The first book-length analysis of an often secretive but mutually beneficial military and strategic partnership.

Summary
The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA.

Contributor Bio
Andrew Small has researched Chinese foreign and economic policy issues in Beijing, Brussels, London, and now Washington, D.C. He is a Transatlantic Fellow at the German Marshall Fund of the United States.

Quotes
"This unique and timely work provides fresh insights into one of the most important and most neglected new developments in world affairs -- China's turn to south and west Asia. As the US pivots toward (East) Asia, Andrew Small shows us how China is moving beyond traditional concepts of Asia." -- Barnett Rubin, Senior Fellow and Director at the Center on International Cooperation, New York University
"The China-Pakistan Axis explores one of the most resilient and paradoxical bilateral relations of the post colonial era -- a superb illustration of the manner in which international relations can be determined by power considerations. Pakistan and China have been 'all weather friends' for more than fifty years in spite of their ideological differences. Andrew Small shows that their rapprochement resulted mostly from a real politik assessment of their common enemy, India, but that non material variables are back in the picture today because of the Islamist connection in the case of the Uighurs, for example. The strength of Small's work lies in its analysis of the fascinating scope and trajectory of the Beijing-Islamabad relationship." -- Christophe Jaffrelot, Research Director at CNRS, Sciences Po and author of The Pakistan Paradox: Instability and Resilience

"Andrew Small's remarkable book paints a vivid picture of twenty-first century geopolitics by uncovering one of the most important and under-explored relationships. A gripping narrative of how China's rise meets nukes, terrorists and the Taliban" -- Mark Leonard, Director of the European Council on Foreign Relations and author of What Does China Think?

Table Of Contents
Prologue - In the shadow of the Red Mosque
Introduction
1. A friendship forged by war
2. Nuclear fusion
3. Re-hyphenating India
4. Counter-terrorism with Chinese characteristics
5. The trade across the roof of the world
6. Tea with the Taliban
7. Lord, make them leave - but not yet
Conclusion - The dragon meets the lion

Analysis of the Cognitive Interview in Questionnaire Design
Gordon Willis

Key Selling Points
• Indicates relative strengths and limitations of several approaches to the analysis of data obtained in cognitive interviews.
• Provides several real-life examples and illustrations related to timely issues such as survey measurement concerning health insurance, and racial-ethnic discrimination.
Dr. Willis describes alternative models of coding, analysis, and reporting, to enable researchers to convert cognitive-interview data into meaningful, well-supported, and actionable findings and summary reports.

Summary
Cognitive interviewing, based on the self-report methods of Ericsson and Simon, is a key form of qualitative research that has developed over the past thirty years. The primary objective of cognitive interviewing, also known as cognitive testing, is to understand the cognitive mechanisms underlying the survey-response process. An equally important aim is contributing to the development of best practices for writing survey questions that are well understood and that produce low levels of response error. In particular, an important applied objective is the evaluation of a particular set of questions, items, or other materials under development by questionnaire designers, to determine means for rewording, reordering, or reconceptualizing. Hence, as well as providing an empirical, psychologically oriented framework for the general study of questionnaire design, cognitive interviewing has been adopted as a 'production' mechanism for the improvement of a wide variety of survey questions, whether factual, behavioral, or attitudinal in nature.

As with other methods that rely on qualitative data, cognitive interviewing has increasingly been criticized for being lax in the critical area of the development of systematic methods for data reduction, analysis, and reporting of results. Practitioners tend to conduct cognitive interviewing in varying ways, and the data coding and compilation activities undertaken are often nonstandardized and poorly described. There is a considerable need for further development--and documentation--relating not only to a description of this variation but also to providing a set of recommendations for minimal standards, if not best practices. The proposed volume endeavors to address this clear omission.

Contributor Bio
Gordon Willis is a cognitive psychologist in the Applied Research Program of the National Cancer Institute's Division of Cancer Control and Population Sciences.

Madness Cracked
Mick Power

Key Selling Points
- Takes the reader on a fascinating tour of the history of psychiatry and clinical psychology, exploring some of the curious ways we have tried to help those with mental disorders
- Argues for a new theoretical framework for psychiatry, and provides a possible model for developing this theoretical basis
- Includes compelling case material and examples from psychiatry's colourful history

An introduction to the history of psychiatry and clinical psychology, looking at how people have attempted to classify the various problems and disorders they face

Summary
'The recent publication of a new edition of the American Diagnostic and Statistical manual (DSM-5) highlighted the two contrary viewpoints that exist within the field of mental health. There are those who value such classification systems, seeing each revision of the DSM as a fine-tuning exercise, and there are those who are strongly opposed, seeing such exercises as fundamentally flawed.

'Madness Cracked' provides a fascinating introduction to the history of psychiatry and clinical psychology, looking at how these areas have attempted to classify the various problems and disorders that their practitioners have faced in everyday use. Within the book, Power argues that - like in other areas of science - progress can only be made if the classification systems that are used have a sound theoretical basis. In addition, he outlines a model derived from work on cognition and emotion showing how, with appropriate modifications, it could provide a theoretical basis for classification and diagnosis.

Using extraordinary examples from the history of psychiatry and clinical psychology, along with fascinating case material, he shows how our current knowledge in psychology can be developed to provide the theoretical basis that the field needs. For anyone in the field of mental health, Madness Cracked is a thought-provoking and controversial new book.'

Oxford Guide to the Treatment of Mental Contamination
Stanley Rachman, Anna Coughtrey, Adam Radomsky, Rosamund Shafran, UCL Institute of Child Health, UCL Institute of Child Health

Key Selling Points
• Provides a comprehensive account of the topic of fear of contamination, filling a gap in the current literature
• As a fear of contamination is the most common manifestation of OCD, this is a condition that affects many people, and for which many people need help
• Written by clinicians with decades of experience treating this conditions, resulting in an authoritative and practical volume
• This book represents an entirely new conceptualisation of contamination fear helping clinicians to challenge clients.
• This book is oriented towards the client. It contains the necessary research information, but also a great deal of clinically useful material.
• Contains a therapist toolkit - including many forms and materials for the therapist.
• Provides a detailed account of the nature and causes of the various forms of a fear of contamination and their consequences, written by leading experts in the field.

Summary
A fear of contamination drives the most common manifestation of obsessive compulsive disorders (OCD), compulsive washing. OCD is a distressing anxiety disorder that affects 1-2 percent of the population and can be disabling. Intense and complex forms of the disorder benefit from advanced analyses of contamination and its treatment.

This book, part of a series on modern psychological treatments published by OUP, provides a detailed account of the nature and causes of the various forms of a fear of contamination and their consequences. Methods of treatment are described and fully illustrated by case histories. The inclusion of original analyses and explanations of a newly recognised form of the fear, mental contamination, is an important feature of the book and will enable therapists to expand their ability to assess and treat the abnormal fears of contamination.

Written by clinicians with extensive experience, this volume is valuable for all clinical psychologists and psychotherapists with an interest in OCD

Psychological Assessment and Therapy with Older People
Bob G. Knight, Nancy A. Pachana

Key Selling Points
• Offers an integrated theory-based rationale and guideline to approach clinical practice with older adults
• Provides a conceptual integration of assessment and intervention practices, both of which are critical in approaching work with older adults but are rarely approached clinically from within a common framework
• Illustrated with case vignettes throughout, with brief list of key readings at the end of each chapter
• A range of the most common clinical syndromes is discussed in the book, along with key directions for future practice (i.e. e-therapy)
• Written in an accessible manner, suitable for both established clinicians as well as graduate students in psychology and psychiatry

This book lays out an integrated framework for psychological assessment and therapy with older adults.

Summary
Due to improvements in health and healthcare, the elderly population is expanding rapidly within the developed world. However, more and more elderly people require some form of psychological support at some point in their later years. The types of problems faced by this population are quite distinct and often more complex than those faced by younger adults, and throw up many new challenges - in both assessment and treatment.

Though there are books available that focus individually on assessment or treatment, few have combined the two into a single framework. Within this book Knight and Pachana argue that psychological assessment needs to be more tightly integrated with therapy, especially with older adult clients. Using the Contextual Adult Lifespan Theory for Adapting Psychotherapy (CALTAP) as a framework for applying our knowledge about developmental, social contextual, and cohort/generational factors that influence age differences in response to psychological assessment and therapy, they present an integrated framework for psychological assessment and therapy with older adults.

This text is valuable for practitioners looking for a solid theoretical basis for the practice of assessment and therapy with older clients, students in graduate courses looking at later lifespan issues, and educators looking for material to enhance generalist psychotherapy courses with a lifespan perspective.

Contributor Bio

Bob G. Knight, Merle Bensinger Professor of Gerontology, Psychology and Medicine, Andrus Gerontology Center; Director, Tingstad Older Adult Counseling Center, University of Southern California,Nancy A. Pachana, Co-Director, Ageing Mind Initiative, School of Psychology, The University of Queensland

Bob G. Knight, Ph.D. is the Merle H. Bensinger Professor of Gerontology and Professor of Psychology at the Andrus Gerontology Center, University of Southern California. He is the Editor of the Journal of Gerontology: Psychological Sciences (2012–2015). He also serves as Director of the Tingstad Older Adult Counseling Center. He is the recipient of awards including Distinguished Clinical Mentorship Award, Society of Clinical Geropsychology (2005), Retirement Research Foundation M. Powell Lawton Distinguished Contribution Award in Applied Gerontology (2007, awarded by Division 20 of American Psychological Association), and the American Psychological Association’s Committee on Aging Award for the Advancement of Psychology and Aging, 2009.

He has published extensively in mental health and aging, including Psychotherapy with older adults (Sage, 3rd ed. 2004, available in French, Dutch, Japanese, and Chinese translations).

Nancy A. Pachana, PhD is Professor and Director of Clinical Psychology Training
Programs in the School of Psychology at The University of Queensland, and is co-director of the UQ Ageing Mind Initiative. A clinical geropsychologist and neuropsychologist with extensive experience in assessing and treating older adults, her main research interests include anxiety in later life, nursing home interventions and driving safety and dementia. Nancy is a recipient of the Australian Davos Connection (ADC) Future Summit Leadership Award, for leadership on ageing issues (2010). She has published extensively in the field of ageing and mental health and is the co-developer of the Geriatric Anxiety Inventory.

Table Of Contents

1. The CALTAP Model and Working with the Older Adult Client
2. CALTAP in Assessment Approaches and Strategies
3. Depression in Late Life
4. Anxiety in Later Life
5. Dementia
6. Psychological Issues Affecting Medical Conditions
7. Substance Misuse and Abuse
8. Sleep Disorders and Complaints in Later Life
9. Psychosis and Bipolar Disorder
10. Personality Disorders in Older Adults
11. Supervision and Consultation in Clinical Geropsychology

Incorporating Acceptance and Mindfulness into the Treatment of Psychosis
Current Trends and Future Directions
Brandon A. Gaudiano

Key Selling Points
- Reviews the current state of the research on mindfulness/acceptance therapies for psychosis
- Compares and contrasts the theoretical and clinical features of various complementary mindfulness/acceptance therapies for psychosis
- Discusses the application of novel technologies such as smart phones
- Provides an analysis and synthesis of mindfulness/acceptance therapies for psychosis with traditional cognitive-behavioral approaches

Summary
There have been exciting new developments in the treatment of schizophrenia and related psychoses in recent decades. Clinical guidelines increasingly recommend that patients be offered evidence-based psychosocial treatments in addition to medications, as such interventions can produce greater improvements and may prevent relapses better compared with medications alone. In parallel with these recent advancements, an evolution in the way cognitive-behavioral therapies are being conceptualized and implemented has occurred due to the incorporation of novel strategies that promote psychological processes such as acceptance and mindfulness. While there are a variety of acceptance/mindfulness approaches being developed to address psychosis, there is not currently a dominant approach.

In Incorporating Acceptance and Mindfulness into the Treatment of Psychosis, Brandon Gaudiano brings together the researchers and clinicians working at the cutting edge of acceptance/mindfulness therapies for psychosis to compare and contrast emerging approaches and discuss them within the context of the more traditional cognitive-behavioral interventions. The book includes a section that focuses on six distinct treatment models that incorporate acceptance and mindfulness strategies for psychosis and a section that provides a synthesis and analysis of acceptance/mindfulness approaches to psychosis. It concludes with recommendations for moving the research forward in a constructive and responsible way. This volume will be an important resource for researchers and clinicians interested in gaining a deeper understanding of mindfulness- and acceptance-based approaches and newer psychosocial treatments for severe mental illness.

Contributor Bio

Brandon A. Gaudiano, Ph.D., is a clinical psychologist in the Psychosocial Research Program at Butler Hospital and also is Assistant Professor (research) in the Department of Psychiatry & Human Behavior at the Warren Alpert Medical School of Brown University. Dr. Gaudiano has published over 65 peer-reviewed, scientific articles as well as 50 other publications on various topics including psychotherapy development and testing, evidence-based practices, psychotic and mood disorders, and mindfulness/acceptance. His research on Acceptance and Commitment Therapy and other novel psychosocial interventions for psychosis has been funded by the National Institute of Mental Health.

Table Of Contents

Foreword by Kim T. Mueser
About the Editor
Contributors

Section I: Introduction and Background
1. An Introduction to Mindfulness and Acceptance Therapies for Psychosis
Brandon A. Gaudiano

2. The Evolution of Cognitive Behavioral Therapy for Psychosis: The Path to Integrate Acceptance, Compassion and Mindfulness
Douglas Turkington, Nicola Wright, and James Courtley

Roger Vilardaga, Michael McDonell, Emily Leickly, and Richard Ries

Section II: Specific Treatment Models
4. Acceptance and Commitment Therapy for Psychosis: Applying Acceptance and Mindfulness in the Context of an Inpatient Hospitalization
Patricia Bach

5. Treating Depression in Psychosis: Self-Compassion as a Valued-Life Direction
Ross G. White

6. Acceptance-based CBT for Command Hallucinations: Rationale, Implementation, Outcomes, and Reflections from the TORCH Project
Fran Shawyer and John Farhall

7. Person-Based Cognitive Therapy for Distressing Psychosis: Integrating a Mindfulness-Based Approach with Cognitive Therapy
Mark Hayward, Lyn Ellet, and Clara Strauss

8. Mindfulness Meditation in Cognitive Behavioral Therapy for Psychosis
Katherine Newman Taylor and Nicola Abba

Section III: Synthesis and Analysis
9. A Model of Psychosis for the Development of Acceptance and Mindfulness-Based Therapies: Preoccupation with Psychotic Experiences as a Treatment Target
Neil Thomas

10. Disseminating and Implementing Acceptance and Mindfulness Based Approaches to Psychosis: Challenges and Opportunities
Hamish McLeod

11. Charting the Course Ahead: Future Clinical and Research Directions in Mindfulness and Acceptance Therapies for Psychosis
Brandon A. Gaudiano

The Shape of Thought
How Mental Adaptations Evolve
H. Clark Barrett

Key Selling Points
• Discusses "Evolutionary psychology 2.0" - a novel synthesis of the field that pushes evolutionary psychology beyond its early, controversial beginnings.
• Confronts the controversies over the scientific status of evolutionary psychology, proposing a resolution via a focus on the evolved design of developmental systems.
• Proposes that adaptive specialization and flexibility are not at odds, but synergistic.
• Bridges the nature/nurture divide.
• Provides the first in-depth integration of evolutionary theory, evolutionary developmental biology (evo-devo), epigenetics, culture-gene coevolution theory, and cognitive science.
• Proposes a novel framework for understanding cultural transmission and evolved psychological mechanisms as co-evolving and synergistic.
• Shows how a view of brain development as highly plastic and flexible can be reconciled with a "modular" view of the brain.

The Shape of Thought: How Mental Adaptations Evolve presents a road map for an evolutionary psychology of the twenty-first century.

Summary
The Shape of Thought: How Mental Adaptations Evolve presents a road map for an evolutionary psychology of the twenty-first century. It brings together theory from biology and cognitive science to show how the brain can be composed of specialized adaptations, and yet also an organ of plasticity. Although mental adaptations have typically been seen as monolithic, hard-wired components frozen in the evolutionary past, The Shape of Thought presents a new view of mental adaptations as diverse and variable, with distinct functions and evolutionary histories that shape how they develop, what information they use, and what they do with that information.

The book describes how advances in evolutionary developmental biology can be applied to the brain by focusing on the design of the developmental systems that build it. Crucially, developmental systems can be plastic, designed by the process of natural selection to build adaptive phenotypes using the rich information available in our social and physical environments. This approach bridges the long-standing divide between "nativist" approaches to development, based on innateness, and "empiricist" approaches, based on learning. It shows how a view of humans as a flexible, culturally-dependent species is compatible with a complexly specialized brain, and how the nature of our flexibility can be better understood by confronting the evolved design of the organ on which that flexibility depends.

Contributor Bio
H. Clark Barrett is an evolutionary anthropologist who studies the evolution of cognition. For the past fifteen years he has conducted field work in the Amazon region of Ecuador, and uses experimental cognitive tasks across cultures to test hypotheses about the evolution of the mind. He is now Professor of Anthropology at the University of California, Los Angeles.

Quotes
"Rich and thoughtful, this book lays out why, if we want to understand human psychology, neural plasticity, cultural differences and cognitive development, we need evolutionary theory, and an understanding of how humans evolved. In Barrett's hands, the pernicious dichotomy that divides "learning" from "innate" explanations crumbles, leaving only evolutionary explanations, which may involve different types of developmental processes. In setting the house back in order, Barrett synthesizes insights and findings from psychology, culture-gene coevolutionary theory, anthropology, developmental biology and philosophy. He delivers Evolutionary Psychology 2.0."--Joe Henrich, Canada Research Chair in Culture, Cognition and
"In this lucid book, Barrett explains how thinking about the evolution of the mind should shape our understanding of how the mind works. Bringing sophisticated knowledge of evolutionary biology and cognitive science together, he reconciles opposing views about the role of learning and culture in the workings of the human mind. This book will be the bible for a broader, more inclusive evolutionary psychology."--Rob Boyd, Origins Professor, Arizona State University

"Barrett has read your mind, and knows your questions. He will lead you gently but fiercely through the controversies that surround evolutionary psychology and cognitive science, showing you that one cannot exist without the other."--Leda Cosmides, Center for Evolutionary Psychology, University of California, Santa Barbara

"Clark Barrett takes the reader from the basics of evolutionary psychology to exciting stuff at the cutting-edge of today's research. He does so with splendid clarity, illuminating examples, and an engaging balance of wisdom and passion. An important book and an excellent read!"--Dan Sperber, Professor of Cognitive Science and of Philosophy at the Central European University, Budapest

The Oxford Handbook of Molecular Psychology

Turhan Canli

Key Selling Points

• Coins the term "molecular psychology" to describe cutting-edge methodology that investigates the neural bases of behavior.
• Compiles and applies research across clinical neuroscience, genetics, psychology and other fields to study behavior and its neural underpinnings.
• Molecular methods cover candidate genes, genome-wide association studies, copy number variations, gene expression studies, and epigenetics.
• Assembles an interdisciplinary team of leaders and specialists across an array of fields. This entry in the Oxford Library of Psychology compiles cutting-edge research organized around the concept "molecular psychology," which applies principles of molecular biology to the study of behavior and its neural underpinnings.

Summary

Determining the biological bases for behavior, and the extent to which we can observe and explain their neural underpinnings, requires a bold, broadly defined research methodology. The interdisciplinary entries in this handbook are organized around the principle of "molecular psychology," which unites cutting-edge research from such wide-ranging disciplines as clinical neuroscience and genetics, psychology, behavioral neuroscience, and neuroethology.

For the first time in a single volume, leaders in diverse research areas use molecular approaches to investigate social behavior, psychopathology, emotion, cognition and stress in healthy volunteers, patient populations, and an array of non-human species including rodents, insects, fish, and non-human primates. Chapters draw on molecular methods covering candidate genes, genome-wide association studies, copy number variations, gene expression studies, and epigenetics while addressing the ethical, legal, and social issues to emerge from this new and exciting research approach.

Contributor Bio

Turhan Canli is an Associate Professor of Psychology and Radiology at Stony Brook University, where he is the founder and director of the SCAN (Social, Cognitive, and Affective Neuroscience) Center. He is a past director of the Graduate Program in Genetics. Dr. Canli's research focuses on individual differences in emotion, personality, and social behavior, and integrates tools from psychology, neuroscience, and molecular biology.

Table Of Contents

Part I: Introduction and Fundamentals

Expectancy and emotion
Maria Miceli, Cristiano Castelfranchi

Key Selling Points
• Provides an analytical treatment of emotions in terms of their cognitive-motivational constituents helping to account for the richness and complexity of human emotional experiences
• The first book that specifically focuses on the relationship between anticipation and emotion, and analyzes the whole spectrum of anticipation-based emotions
• Emphasizes the relation and interaction between epistemic and motivational mechanisms and proceses, building an integrated model of cognitive, motivational, and emotional constructs
• The focus on families of related emotions helps identify distinctive features of emotions belonging to the same family so as to explain and predict the specific motivational and behavioural consequences of each emotion. It also helps to account for possible transformations from one emotion to another

This book explores anticipation-based emotions - the emotions associated with the interaction between 'what is' and 'what is not (yet)'.

Summary
The mind is a powerful anticipatory device. It frequently makes predictions about the future, telling us not only how the world might or will be, but also how it should be - or better - how we would like it to be. These expectancies shape our lives: they impact on our actual outcomes, often acting as self-fulfilling prophecies. They also constitute a reference point for establishing whether an outcome is a loss or a gain; that is, we evaluate our own outcomes not in absolute terms, but against our expectancies. And we feel ill-treated and betrayed when our expectancies are disappointed.

This book explores anticipation-based emotions, that is, the emotions associated with the dialectical interaction between 'what is' and 'what is not (yet)', be it a mere wished-for possibility or an expectation proper. It offers an analysis of both the emotions implying anticipations of future events - such as fear, anxiety, hope, and trust - and those elicited by the disconfirmation of a previous anticipation - surprise, disappointment, discouragement, sense of injustice, regret, and relief - in terms of their belief and goal components. In addition, it addresses anticipated emotions, that is, emotions we think we might experience in future circumstances, and explores how they influence our decisions. The reader will be taken on a journey of exploration and discovery into the multifarious facets and implications of an important family of emotions, aimed at understanding what they have in common, as well as the distinguishing features of each distinct emotion, and predicting their motivational and behavioral consequences.

For students and researchers interested in the affective sciences, including psychology, philosophy, and neuroscience, this is a highly original and thought provoking new work.

Contributor Bio

Maria Miceli, Senior Researcher, Institute of Cognitive Sciences and Technologies, National Research Council, Italy, Cristiano Castelfranchi, Associate Director of Research, Institute of Cognitive Sciences and Technologies, National Research Council, Italy

Maria Miceli, a social psychologist with a background in philosophy, is a senior researcher at the Institute of Cognitive Sciences and Technologies of the Italian National Research Council (ISTC-CNR) in Rome, where she is a member of the Goal-Oriented Agents Lab. Her research activity focuses on the cognitive aspects of social mechanisms and processes and their interplay with motivational and emotional components, and on modelling architectures of intelligent autonomous agents endowed with social capabilities. Topics of interest include: kinds and processes of evaluation; values; self-esteem and defense strategies; loneliness; dependence, help-giving and help-seeking; loss of motivation; helplessness and crying; guilt and guilt-inducement strategies; anticipation and related emotions; social comparison and related emotions;
Cristiano Castelfranchi is professor of economical psychology at the LUISS University in Rome (2007-present), and full professor of social psychology at the Uninettuno international telematic university (2008-present). He has been full professor of general psychology at the University of Siena (2001-2011), and director of the ISTC-CNR in Rome (2002-2011), where he is presently coordinator of the Goal-Oriented Agents Lab. A cognitive scientist with a background in linguistics and psychology, he is also active in the multi-agent systems and social simulation communities. He introduced the study of goal-directed action and normative behavior in distributed artificial intelligence, and at the same time championed the use of the autonomous agents paradigm and social simulation in cognitive psychology and social science.

The Oxford Handbook of Positive Psychology and Disability
Michael L. Wehmeyer

Key Selling Points
- Provides the first comprehensive treatment of positive psychology and disability available, and presents an "across the lifespan" approach to positive psychology and disability
- Introduces a new paradigm for how disability itself is understood, thus opening the door for a greater focus on the strengths and positive attributes of people with disabilities
- Provides a multidisciplinary perspective and includes contributions from authors with backgrounds in more traditional psychological disciplines (psychology, special education, and rehabilitation), as well as in disciplines not typically associated with psychology, such as disability studies, religion, and applied disciplines related to employment and education
- Part of THE OXFORD LIBRARY OF PSYCHOLOGY series

This handbook is the first comprehensive text on positive psychology and disability.

Summary
Roughly 54 million people with disabilities live in the U.S., and there are many more millions of people with disabilities around the world. Not surprisingly, differences among people with disabilities are often as notable as differences between people with and without disabilities. And, while the lack of homogeneity among people with disabilities makes creating a valid taxonomy under this term difficult if not impossible, there is commonality among people with disabilities that justifies an authoritative resource on positive psychology and disability; that is, they have experienced discrimination and marginalization as a function of their disability.

This volume assembles chapters by leading scholars in disability and positive psychology to provide a comprehensive synthesis of the state of the field. Chapters are organized into thematic sections, beginning with an introductory section on overarching themes in positive psychology and disability. The second section highlights the application of positive psychological constructs to disability. These constructs include quality of life, self-determination, adaptive behavior, optimism, hope, problem solving, forgiveness, gratitude, and spirituality. The following section addresses systemic issues in disability that impact on positive psychology, again turning to disciplines beyond psychology (special education, rehabilitation sciences, and family and disability policy) to address areas in which positive psychology can be applied. A fourth section examines positive psychology in populations with specific disabilities, including physical disabilities, cognitive and developmental disabilities, severe multiple disabilities, emotional and behavioral disabilities, and autism spectrum disorders.

Disability has always been associated with "differentness" and, consequently, people with disabilities have throughout time been treated as such. As the first handbook to consider disability from a strengths-based perspective, this volume provides a catalyst to accelerate the application of positive psychology to how disability is understood.

Contributor Bio
Michael L. Wehmeyer, Ph.D., is Professor in the Department of Special Education, University of Kansas; Director of the Kansas University Center on Developmental Disabilities; and Senior Scientist at the Beach Center on Disability, University of Kansas. His research and intervention efforts focus on promoting the self-determination of children, youth, and adults with and without disabilities.

Table Of Contents
Part One: Overarching Themes in Positive Psychology and Disability
1. Beyond Pathology: Positive Psychology and Disability
   Michael L. Wehmeyer

2. Understanding Disability: A Strengths-Based Approach
   Wil H. E. Buntinx

3. Positive Psychology and Disability: A Historical Analysis
   Karrie A. Shogren

Part Two: Application of Positive Psychological Constructs to Disability

4. The Impact of the Quality of Life Concept on the Field of Intellectual Disability
   Robert L. Schalock and Miguel Angel Verdugo Alonso

5. Optimism within the Context of Disability
   Kevin Rand and Amanda M. Shea

6. Social Well-Being and Friendship of People with Intellectual Disability
   Joanne Kersh, Laura Corona, and Gary Siperstein

7. Exercise, Leisure, and Well-Being for People with Disabilities
   Jennifer Rowland

8. Coping and Disability
   Lillian R. Reuman, Chelsea Mitamura, and Michele M. Tugard

9. Adaptive Behavior
   Marc J. Tassé

10. Self-Determination
    Michael L. Wehmeyer and Todd D. Little

11. Self-Determined Learning
    Dennis Mithaug

12. Understanding Hope in Individuals with Disabilities
    Cindy Pressgrove Buchanon and Shane Lopez

13. Family Perspectives on Child Intellectual Disability: Views from the Sunny Side of the Street
    Jan Blacher, Bruce Baker, and Lauren D. Berkovitz

    Christopher Murray and Bonnie Doren

15. Problem Solving and Decision Making
    Linda Hickson and Ishita Khemka

Bullying in Canada
Faye Mishna, Melissa Van Wert

Key Selling Points
- Consolidates years of research on bullying. From the earliest research by Dan Olweus in Norway to the most recent Health Behaviour in School-Age Children survey, Faye Mishna and Melissa van Wert survey the full spectrum of research, explaining methodological issues, definitional problems, and best-practice.
- Addresses bullying as a problem with real consequences for public health. We now understand that this behaviour affects our long-term health and mental well-being; governments are beginning to address bullying as a serious issue for public health.
- First-hand research, including real case-studies. Authors have conducted their own substantial research among children in Canadian school; they draw on a wealth of original, primary, and previously unpublished information to provide a clear snapshot of the current climate.
- Reveals complexity. Bullying often involves shifting power relations and subtle forms of aggression, not to mention onlookers who silent witness may amount to complicity - in other words, it involves a network of behaviour that may be difficult for adults to detect, correctly interpret, and address.
- Debunks myths about bullying. Some inherited wisdom turns out to misguided at best: children do not necessarily "grow out" of bullying, and "standing up" to their tormentors rarely results in a sustainable solution. Nor is bullying an isolated, individual problem.
- Explores different types of bullying. Research shows that bullying behavior can be helpfully classified into categories, including bias-based, gender, and bullying among friends and siblings. Classifications like psychological and relational bullying help adults recognize patterns and subtle distinctions.
- Provides a well-organized, multidimensional overview of bullying in this introductory text, the first book of its kind to look specifically at the Canadian context.

Summary
Bullying is an age-old problem that has traditionally been seen as "normal," as par-for-the-course of childhood and youth, at times even depicted as a rite-of-passage with "character building" benefits. More recently, however, we understand it as a public health issue with potentially serious long-term problems for health and well-being that include stress, self-harm, anxiety, and depression. This is true of perpetrators as well as victims, who often suffer negative long-term consequences. Of concern, Canada is currently ranked 21st and 26th out of 40 participating countries on the proportion of boys and girls involved in bullying; several UNICEF studies have found comparable results. As a signatory to the United Nations Convention on the Rights of the Child, Canada is failing in its duty to protect children and youth from abuse.

Faye Mishna and Melissa Van Wert provide a well-organized, multidimensional overview of bullying in this introductory text, the first book of its kind to look specifically at the Canadian context. Drawing on the most up-to-date research, including the Health Behavior in School-Age Children survey and recent parliamentary reviews, Mishna and Van Wert consider specific facts about Canada. These include societal norms and characteristics, marginalization of certain communities, immigration and diversity, socioeconomic indicators, and urban-rural demographics, all factors that can influence bullying dynamics. The authors also consider other potential contributors, such as physical appearance, learning abilities or developmental challenges, sexual orientation, and family dynamics. Mishna and Van Wert devote an entire chapter to the latest research on cyber bullying, a relatively new problem that has arisen in the wake of social media and information and communication technologies.
Addressing bullying behaviour is rarely a simple matter, but research shows that a holistic concept of the individual is the best starting point. A final chapter gives an excellent review of what works. Mishna and Van Wert support the concept of treating bullying as a relational problem among individuals, within a network of interacting contexts. They draw on an ecological theoretical framework, a roadmap that helps us think about young people as developing within multiple layers of socialization - the personal, the familial, the social, and even the cyber. Mishna and Van Wert provide an overview of strategies and initiatives, such as PREVNet and the Roots of Empathy, and also provide a set of seven guidelines that teachers, parents, and administrators will find essential.

A crucial part of promoting the healthy development of Canadian children and youth involves promoting positive early relationships and addressing bullying behaviour. Putting an end to aggression fundamentally improves human interaction and socialization, and can impact our long-term health and well-being. Our values as a nation compel us to confront incidents, improve education, and establish preventative measures, and our legal duties require us to protect our children.

Contributor Bio

Faye Mishna, Dean and Professor, Factor-Inwentash Faculty of Social Work, University of Toronto, Melissa Van Wert, PhD Student, Factor-Inwentash Faculty of Social Work, University of Toronto

Faye Mishna is Dean and Professor, at the Factor Inwentash Faculty of Social Work, University of Toronto and is cross-appointed to the Department of Psychiatry at the University of Toronto. She holds the Margaret and Wallace McCain Family Chair in Child and Family. Prior to joining the Faculty, she was Clinical Director of Integra, a children's mental health centre serving children and youth with learning disabilities. She is a Fellow of the International Academy for Research in Learning Disabilities. Professor Mishna's program of research is focused on: bullying; cyber abuse/cyber bullying and cyber counselling; and school-based interventions for students with learning disabilities. An integral component of her research entails collaboration with community agencies and organizations. Her scholarly publications have focused on bullying, social work education and clinical practice.

Melissa Van Wert is a PhD Student at University of Toronto and a Research Associate with the 2008 Canadian Incidence Study of Reported Child Abuse and Neglect. Melissa has research experience in a variety of areas, and has worked with children and adolescents across numerous settings. She also has experience in coordinating Journal Watch, an inter-university learning partnership between the CRCF at McGill University and the Faculty of Social Work at University of Toronto.

Explanation in Causal Inference
Methods for Mediation and Interaction
Tyler VanderWeele

Key Selling Points
- A comprehensive book on methods for mediation and interaction.
- The only book to approach this topic from the perspective of causal inference.
- Easy to read and accessible. Examples drawn from diverse fields.
- An essential reference for anyone conducting empirical research in the biomedical or social sciences.

A comprehensive examination of methods for mediation and interaction, VanderWeele's book is the first to approach this topic from the perspective of causal inference.

Summary
The book provides an accessible but comprehensive overview of methods for mediation and interaction. There has been considerable and rapid methodological development on mediation and moderation/interaction analysis within the causal-inference literature over the last ten years. Much of this material appears in a variety of specialized journals, and some of the papers are quite technical. There has also been considerable interest in these developments from empirical researchers in the social and biomedical sciences. However, much of the material is not currently in a format that is accessible to them. The book closes these gaps by providing an accessible, comprehensive, book-length coverage of mediation.

The book begins with a comprehensive introduction to mediation analysis, including chapters on concepts for mediation, regression-based methods, sensitivity analysis, time-to-event outcomes, methods for multiple mediators, methods for time-varying mediation and longitudinal data, and relations between mediation and other concepts involving intermediates such as surrogates, principal stratification, instrumental variables, and Mendelian randomization. The second part of the book concerns interaction or "moderation," including concepts for interaction, statistical interaction, confounding and interaction, mechanistic interaction, bias analysis for interaction, interaction in genetic studies, and power and sample-size calculation for interaction. The final part of the book provides comprehensive discussion about the relationships between mediation and interaction and unites these concepts within a single framework. This final part also provides an introduction to spillover effects or social interaction, concluding with a discussion of social-network analyses.

The book is written to be accessible to anyone with a basic knowledge of statistics. Comprehensive appendices provide more technical details for the interested reader. Applied empirical examples from a variety of fields are given throughout. Software implementation in SAS, Stata, SPSS, and R is provided. The book should be accessible to students and researchers who have completed a first-year graduate sequence in quantitative methods in one of the social- or biomedical-sciences disciplines. The book will only presuppose familiarity with linear and logistic regression, and could potentially be used as an advanced undergraduate book as well.

Contributor Bio
Tyler VanderWeele is a professor in the Harvard School of Public Health, Harvard University.

Table Of Contents

PART I: MEDIATION ANALYSIS
Chapter 1. Explanation and Mechanism

Chapter 2. Mediation: Introduction and Regression-Based Approaches

Chapter 3. Sensitivity Analysis for Mediation
Chapter 4. Mediation Analysis with Survival Data

Chapter 5. Multiple Mediators

Chapter 6. Mediation Analysis with Time-Varying Exposures and Mediators

Chapter 7. Selected Topics in Mediation Analysis

Chapter 8. Other Topics Related to Intermediates

PART II: INTERACTION ANALYSIS
Chapter 9. An Introduction to Interaction Analysis

Chapter 10. Mechanistic Interaction

Chapter 11. Bias Analysis for Interactions

Chapter 12. Interaction in Genetics: Independence and Boosting Power

Chapter 13. Power and Sample-Size Calculations for Interaction Analysis

PART III: SYNTHESIS AND SPILLOVER EFFECTS
Chapter 14. A Unification of Mediation and Interaction

Chapter 15. Social Interactions and Spillover Effects

Chapter 16. Mediation and Interaction: Future and Context

The Psychology of Citizenship and Civic Engagement
S. Mark Pancer

Key Selling Points
- Brings together research from psychology, political science, sociology, education, and public health
- Addresses the critical topic of lost sense of connection to community and how this endangers both individual and community health and well-being
- Provides guidance for the development of programs and policies based on solid research evidence

In The Psychology of Citizenship and Civic Engagement, S. Mark Pancer explores the development of civic engagement, the factors that influence its development, and the impacts of civic involvement on the individual, the community, and society.

Summary
Citizens' sense of responsibility to their community and to their nation is becoming a topic of growing concern. Recent research indicates that citizens of the United States and many other nations have become increasingly disconnected from their fellow community members, and when this connection is lost, individuals begin to suffer. They experience poorer health, achieve lower academic and employment success, and are at risk for the development of a host of social problems. On a broader level, states and countries whose citizens feel detached from their communities show higher levels of crime, a greater incidence of disease, and even higher mortality rates.

In The Psychology of Citizenship and Civic Engagement, S. Mark Pancer explores the development of civic engagement, the factors that influence its development, and the impacts of civic involvement on the individual, the community, and society. Pancer examines civic engagement over the lifespan and how the effects of early experiences and influences exerted by peers, families, and religious organizations shape adult involvement. By addressing civic engagement from a systemic as well as individual perspective, this book discusses the role that factors such as government policy, culture, and socioeconomic status play in fostering (or inhibiting) a person's civic connections. Pancer also works toward a solution to increase active citizenship by identifying gaps in research and theory and outlining ways in which scholarly work on civic engagement can inform policy and practice, with the aim to foster individuals sense of responsibility and community connection. By bringing together a large body of research from psychology, political science, sociology, education, and public health, Pancer provides readers with a comprehensive account of what science tells us about civic engagement.

Contributor Bio

Dr. S. Mark Pancer is professor emeritus in the Department of Psychology at Wilfrid Laurier University. He has published over 80 articles in a wide range of journals, has contributed chapters to several books, and is co-author of the book Partnerships for Prevention: The Story of the Highfield Community Enrichment Project. Professor Pancer was elected Fellow of the Canadian Psychological Association in 1993, in recognition of his contributions to the science and profession of psychology in Canada.

Quotes
"With this book Mark Pancer has assuredly added the civic and political dimensions to the emerging field of positive psychology. He masterfully weaves together research findings from diverse disciplines to show how a sense of civic engagement and a sound political identity develop. He then shows how these accomplishments lead to healthy individuality and more cohesive and well-functioning communities. A real intellectual treat!" --James Youniss, PhD, Professor Emeritus and Research Professor of Psychology, The Catholic University of America

"In this thorough and thoughtful book Mark Pancer explains not only THAT but also WHY civic engagement is beneficial for individuals, organizations, communities, and whole societies. A real contribution to the field." --Connie Flanagan, PhD, Professor of Civil
"The Psychology of Citizenship and Civic Engagement is an engaging, masterful account of the sources of civic life. Pancer provides the most thoughtful integration available anywhere of contemporary research on citizenship and civic engagement." --Daniel Hart, PhD, Distinguished Professor of Psychology and Director of the Institute for Effective Education, Rutgers University

Table Of Contents

The Oxford Handbook of Human Development and Culture: An Interdisciplinary Perspective
Lene Arnett Jensen

Key Selling Points
- Showcases the interdisciplinary "cultural-developmental" approach to scholarship that bridges universal and cultural perspectives on human development.
- Covers the entire life course from the prenatal period and birth to old age and death.
- Provides an in-depth, comprehensive, and high-quality synopsis of theory and research on human development, drawing together findings from cultures around the world.
- Authors are an international group of eminent experts from diverse disciplines.
- Part of the OXFORD LIBRARY OF PSYCHOLOGY

The Oxford Handbook of Human Development and Culture provides a comprehensive synopsis of theory and research on human development drawing together findings from cultures around the world.

Summary
The Oxford Handbook of Human Development and Culture provides a comprehensive synopsis of theory and research on human development, with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change, and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity, and religion, as well as developmental contexts such as family, friends, civic institutions, school, media, and work.

Written by an international group of eminent and cutting-edge experts, chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This "cultural-developmental approach" is a multifaceted, flexible, and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.

Contributor Bio
Lene Arnett Jensen, PhD, is Associate Professor of Psychology at Clark University. She is the originator of the "cultural-developmental" theoretical approach for scholarship on human development. Her research addresses moral, civic, and cultural identity development in the context of globalization. A native of Denmark, Dr. Jensen has resided in a number of countries, including Belgium, India, and France. She lives in Massachusetts, USA, with her husband and twin children.

Table Of Contents

Part I. Development and Culture in a Global World: Overarching Issues

1. Cultural-Developmental Scholarship for a Global World: An Introduction
Lene Arnett Jensen

2. Ethical Considerations in Research on Human Development and Culture
Joan G. Miller, Namrata Goyal, and Matthew Wice

Hubert J. M. Hermans

4. Migration Within and Between Countries: Implications for Families and Acculturation
Carola Suárez-Orozco

5. Indigenous Social Science at the Intersection with Human Development: Implications
for and Lessons from African Ecocultures
A. Bame Nsamenang

**Part II. Birth, Infancy and Toddlerhood**

6. Charting Infant Development: Milestones Along the Way
Charles Super and Sara Harkness

7. Comparative and Developmental Anthropology: Studying the Origins of Cultural Variability in Cognitive Function
Daniel B. M. Haun

8. The Emergence and Development of Language Across Cultures
Stanka Fitneva and Tomoko Matsui

9. Early Emotional Development in Cultural Perspective
Wolfgang Friedlmeier, Feyza Corapci, and Oana Benga

10. The Evolution of Attachment Theory and Cultures of Human Attachment in Infancy and Early Childhood
Gilda Morelli

11. Early Contexts of Learning: Family and Community Socialization during Infancy and Toddlerhood
Carolyn Pope Edwards, Lixin Ren, and Jill Brown

**Part III. Early and Middle Childhood**

12. Childhood Practices Across Cultures: Play and Household Work
Suzanne Gaskins

13. Cognition in Childhood Across Cultures
Mary Gauvain and Christina Nicolaides

14. Cultural Manifestation of Intelligence in Formal and Informal Learning Environments During Childhood
Sascha Hein, Jodi Reich, and Elena Grigorenko

15. Moral Reasoning: Developmental Emergence and Life Course Pathways Among Cultures
Lene Arnett Jensen

16. The Interaction Between Culture and the Development of Creativity
Catalina Mourgues, Baptiste Barbot, Mei Tan, and Elena Grigorenko

17. Parental Ethnotheories and the Development of Family Relationships in Early and Middle Childhood
Sara Harkness, Caroline Johnston Mavridis, Jia Ji Liu, and Charles Super

18. In and Out of the Classroom: The Intersection of Learning and Schooling across Cultural Communities
Maricela Correa-Chávez, Heather Mangione, and Kaitlin Black

19. Gender Across Cultures: Sex and Socialization in Childhood
Shagufa Kapadia and Jigishi Gala

**Part IV. Adolescence**

Alice Schlegel and Herbert Barry III

21. Adolescent Risks and Resilences Across Cultures
Marcela Raffaeelli and Maria Iturbide

22. Global Concerns in Adolescent Health with a Case Study of India
Suman Verma and Anne C. Petersen
23. Cultural Roots of Values, Morals, and Religious Orientations in Adolescent Development  
Gisela Trommsdorff

24. Identity, Politics, and the Cultural Psychology of Adolescence

The Oxford Dictionary of Pragmatics
Yan Huang

Key Selling Points
- The first dictionary of pragmatics
- Covers the latest developments in every subfield
- Offers straightforward explanations of terms, concepts, and theories
- Shows how these are used
- Authoritative, comprehensive, up-to-date, and fully referenced
- Written by one of the world's leading experts

A full and authoritative guide to the meanings of the terms, concepts, and theories employed in pragmatics, the study of language in use.

Summary
This dictionary provides a full and authoritative guide to the meanings of the terms, concepts, and theories employed in pragmatics, the study of language in use.

Pragmatics is a central subject in linguistics and philosophy and an increasingly important topic in fields such as cognitive science, informatics, artificial intelligence, neuroscience, and pathology. Its rapid development has produced new theories, methods, approaches, and schools of thought. These in turn have resulted in a vast vocabulary of new terms and in modified meanings for existing terms. Such terms help advance research and facilitate discussion, but they can also cause confusion and act as barriers to understanding and communication. Yan Huang defines and explains them all, from the most traditional to the most recent. Covering every branch of research and all theoretical approaches and with the needs of students and researchers firmly in mind he writes each entry in the simplest possible terms for the subject in question, gives references to relevant seminal and recent work, provides numerous cross-references to related entries, and shows how each term and concept is applied and used in different contexts.

Written by one of the leading experts in the field, Professor Huang's dictionary, the first of its kind ever published, will be a much valued resource for students and researchers in every aspect of the field.

Contributor Bio
Yan Huang is Professor of Linguistics at the University of Auckland. He has previously taught linguistics at the universities of Cambridge, Oxford, and Reading, where he was Professor of Theoretical Linguistics. He has a PhD in Linguistics from the University of Cambridge and a DPhil from the University of Oxford. His books include The Syntax and Pragmatics of Anaphora (CUP 1994, re-issued in 2007), Anaphora: A Cross-Linguistic Study (OUP 2000) and Pragmatics (OUP 2007). He is the editor of The Oxford Handbook of Pragmatics planned for publication in 2014.

**Key Selling Points**

- This century's premier tool for identifying, understanding, and conserving North America's floristic heritage
- The Flora series is the first comprehensive taxonomic guide to the extraordinary diversity of plant life covering our continent north of Mexico
- Includes identification keys, descriptions, ecological characteristics, and illustrations
- Distribution maps accompanying each species show at a glance the generalized range in North America
- A brief explanation of each family is followed by identification keys, genus descriptions, keys to species and species descriptions
- Each volume contains an index to the contents of the volume and bibliography for further reference

Concise, easy to use, and beautifully bound and illustrated, Flora of North America is an indispensable working resource.

**Summary**

To be published in 30 volumes, *Flora of North America* represents the first and only comprehensive taxonomic guide to the extraordinary diversity of plant life blanketing our continent north of Mexico. The collaborative effort of more than 30 major U.S. and Canadian botanical institutions, this ground-breaking scholarly series revises and synthesizes literally thousands of floristic monographs and regional floras published over the last three centuries.

*Flora of North America North of Mexico Volume 9: Magnoliophyta: Picramniaceae to Rosaceae* includes treatments prepared by 54 authors covering 691 species in 74 genera classified in four families, with the economically important Rosaceae being by far the largest in the volume with 680 species in 68 genera. Descriptions for all of the families, genera, and species are provided plus occurrence maps for species are included and 28% of the species are illustrated. Keys are included to aid in the identification of genera in families and species within the genera. Volume 9 is the eighteenth volume to be published in the planned 30-volume *Flora of North America North of Mexico* series.

Concise, easy to use, and beautifully bound and illustrated, *Flora of North America* is an indispensable working resource for botanists, conservationists, ecologists, agronomists, foresters, range and land managers, horticulturists -- anyone with a serious interest in the distribution, habitat, morphology, and survival of the wide-ranging plant life around us.

The Oxford Encyclopedia of the Bible and Law
Two-Volume Set
Brent Strawn

Key Selling Points
- 130 A-Z entries, written by more than 100 international authors, make this the authoritative resource on the subject.
- Cross-referencing to other entries within the Oxford Encyclopedia of the Bible and Law.
- Fully indexed in the back matter.
The Oxford Encyclopedia of the Bible and Law offers the most up-to-date and extensive treatment of biblical law attempted in a comparable genre.

Summary
The Oxford Encyclopedia of the Bible and Law (OEBL) provides the most up-to-date and extensive treatment of the Bible and law yet attempted, both updating and expanding the scope of previous scholarship in the field. In comprehensive overviews, scholars at the forefront of biblical studies and law address three foci: biblical law itself--its nature, collections, and genres; the ancient contexts of biblical law, throughout the ancient Mediterranean (ancient Near Eastern, Greco-Roman, and Early Jewish); and the afterlife and influence of biblical law in antiquity and in modern jurisprudence around the world. Essays include treatments of the Book of the Covenant, the Ten Commandments, the Sermon on the Mount, Greek Law, and the Laws of Hammurapi, but also testimony and witness, property, ritual, rhetoric, gender, and sexual legislation.

The two-volume Encyclopedia contains 130 entries ranging in length from 3,000 to 7,000 words. With bibliographic references and suggestions for further reading, each entry provides a thorough overview of the topic and serves as an entrance point to further original research for both seasoned scholars and beginning students. Given its full-orbed exploration of biblical law and its detailed summary of current scholarship, the OEBL is guaranteed to secure a privileged place in the history of biblical and legal scholarship.

Contributor Bio
Brent A. Strawn is Professor of Old Testament at the Candler School of Theology, Emory University, where he is also associated professor in the Department of Middle Eastern and South Asian Studies and a Senior Fellow in the Center for the Study of Law and Religion. He is the author of What Is Stronger than a Lion? Leonine Image and Metaphor in the Hebrew Bible and the Ancient Near East (2005) and over 150 articles, essays, and reviews. He is the editor or co-editor of thirteen other volumes, including The Bible and the Pursuit of Happiness: What the Old and New Testaments Teach Us about the Good Life (Oxford University Press). He co-edits Cambridge University Press' Old Testament Theology series and sits on the editorial board of Oxford Biblical Studies Online, as well as the Common English Bible project, the Catholic Biblical Quarterly, the Journal of Biblical Literature, and Explorations in the Ancient Near Eastern Culture (Eisenbrauns). He is presently at work on two volumes germane to the study of biblical law: a commentary on Deuteronomy for the New Cambridge Bible Commentary and a monograph on unintentional sin for the Society of Biblical Literature.

Thomas Mann

**Key Selling Points**
- Provides a systematic overview of the best sources, both electronic and print, that go far beyond the coverage of Google and Wikipedia
- Demonstrates why brick-and-mortar research libraries are more important than ever
- Teaches, with multiple concrete examples, how to find the best search terms to use in searching databases

An essential guide to the range of amazing resources available in research libraries that cannot be found on the Internet.

**Summary**
The information world has undergone drastic changes since the publication of the 3rd edition of *The Oxford Guide to Library Research* in 2005, and Thomas Mann, a veteran reference librarian at the Library of Congress, has extensively revised his text to reflect those changes. This book will answer two basic questions: First, what is the extent of the significant research resources you will you miss if you confine your research entirely, or even primarily, to sources available on the open Internet? Second, if you are trying to get a reasonably good overview of the literature on a particular topic, rather than just "something quickly" on it, what are the several alternative methods of subject searching--which are not available on the Web--that are usually much more efficient for that purpose than typing keywords into a blank search box, with the results displayed by relevance-ranking computer algorithms?

This book shows researchers how to do comprehensive research on any topic. It explains the variety of search mechanisms available, so that the researcher can have the reasonable confidence that s/he has not overlooked something important. This includes not just lists of resources, but discussions of the ways to search within them: how to find the best search terms, how to combine the terms, and how to make the databases (and other sources) show relevant material even when you don't know how to specify the best search terms in advance. The book's overall structuring by nine methods of searching that are applicable in any subject area, rather than by subjects or by types of literature, is unique among guides to research. Also unique is the range and variety of concrete examples of what to do—and of what not to do.

The book is not "about" the Internet: it is about the best alternatives to the Internet--the sources that are not on the open Web to begin with, that can be found only through research libraries and that are more than ever necessary for any kind of substantive scholarly research. More than any other research guide available, this book directly addresses and provides solutions to the serious problems outlined in recent studies documenting the profound lack of research skills possessed by today's "digital natives."

**Contributor Bio**

**Thomas Mann** has been a general reference librarian in the Main Reading Room of the Library of Congress for more than thirty years.

Atheism: What Everyone Needs to Know
Michael Ruse

Key Selling Points
- The first fully comprehensive treatment of the atheism issue, considering the topic historically, philosophically, theologically, sociologically and psychologically.
- Stresses that atheism is a moral issue and not just a matter of the facts
- Features a discussion of the meaning of life and whether or not one can be a happy and satisfied atheist
- Written in an easily accessible style
A balanced look at the history, theology, and psychology behind not believing.

Summary
Over the last decade, "New Atheists" such as Sam Harris, Richard Dawkins, and Christopher Hitchens have pushed the issue of atheism to the forefront of public discussion. Yet very few of the ensuing debates and discussions have managed to provide a full and objective treatment of the subject.

Atheism: What Everyone Needs to Know provides a balanced look at the topic, considering atheism historically, philosophically, theologically, sociologically and psychologically. Written in an easily accessible style, the book uses a question and answer format to examine the history of atheism, arguments for and against atheism, the relationship between religion and science, and the issue of the meaning of life-and whether or not one can be a happy and satisfied atheist. Above all, the author stresses that the atheism controversy is not just a matter of the facts, but a matter of burning moral concern, both about the stand one should take on the issues and the consequences of one's commitment.

Contributor Bio
Michael Ruse was born in 1940 in England. Raised in a Quaker family, he went to Bootham School in York and then to the University of Bristol, where he majored in mathematics and philosophy. In 1962 he emigrated to Canada and did graduate work at McMaster University in Ontario. He returned to Bristol to do his doctoral degree in philosophy. He taught at the University of Guelph from 1965 to 2000, and then to avoid compulsory retirement moved south to Florida State University. He is the author or editor of over fifty books, the founding editor of Biology and Philosophy, the recipient of four honorary degrees, a Guggenheim Fellow, a Gifford Lecturer, and a Fellow of the Royal Society of Canada. His academic interests are in the history and philosophy of the biological sciences and he is an expert on the work and influence of Charles Darwin. In recent years, his attention has been turned increasingly towards the relationships between science and religion. He is not a believer, but thinks that the two can exist together harmoniously.

Quotes
"Fully aware of how tedious tracts on either theology or atheism can be, Michael Ruse sets out not to be boring. He succeeds! As a nonbeliever who hesitate[s] to call himself an atheist, he also strives in this book to be balanced and fair to his opponents. I'll let other readers decide whether he succeeds or not, but I can say that even where I disagree with him, I find his book much more informed and compelling than the recent, much less educated New Atheist putdowns of people of faith. Before reading Dennett, Dawkins, Harris or Hitchens, read Michael Ruse."-- John F. Haught, Professor Emeritus of Theology, Georgetown University
"Atheism: What Everyone Needs to Know is an excellent scholarly yet very readable account of an important subject, which reveals its complexity and contradictions along with those of the human mind itself."-- Edward O. Wilson, University Research Professor Emeritus, Harvard University

Ethics in Ancient Israel
John Barton

Key Selling Points
• Offers the first history of ethics in ancient Israel in English in modern times
• Provides a missing chapter in the history of ethics, which is traditionally thought of as starting with the Greeks
• Includes non-canonical material from Apocrypha, Pseudepigrapha, Dead Sea Scrolls

A study of ethical thinking in ancient Israel from around the eighth to the second century BC

Summary
Ethics in Ancient Israel is a study of ethical thinking in ancient Israel from around the eighth to the second century BC. The evidence for this consists primarily of the Old Testament/Hebrew Bible and Apocrypha, but also other ancient Jewish writings such as the Dead Sea Scrolls and various anonymous and pseudonymous texts from shortly before the New Testament period. Professor John Barton argues that there were several models for thinking about ethics, including a 'divine command' theory, something approximating to natural law, a virtue ethic, and a belief in human custom and convention. Moreover, he examines ideas of reward and punishment, purity and impurity, the status of moral agents and patients, imitation of God, and the image of God in humanity.

Barton maintains that ethical thinking can be found not only in laws but also in the wisdom literature, in the Psalms, and in narrative texts. There is much interaction with recent scholarship in both English and German. The book features discussion of comparative material from other ancient Near Eastern cultures and a chapter on short summaries of moral teaching, such as the Ten Commandments. This innovative work should be of interest to those concerned with the interpretation of the Old Testament but also to students of ethics.

The Bible and the Believer
How to Read the Bible Critically and Religiously
Marc Zvi Brettler, Peter Enns, Daniel J. Harrington...

Key Selling Points
- Written by three well-known biblical scholars.
- Shows how critical and religious approaches from different traditions can help better one’s own understanding of the Hebrew Bible/Tanakh/Old Testament.
Three leading biblical scholars from the Jewish, Catholic, and Protestant faiths show how a critical approach to the Bible can complement religious readings

Summary
Can the Bible be approached both as sacred scripture and as a historical and literary text? For many people, it must be one or the other. How can we read the Bible both ways?

The Bible and the Believer brings together three distinguished biblical scholars--one Jewish, one Catholic, and one Protestant--to illustrate how to read the Hebrew Bible/ Old Testament critically and religiously. Marc Zvi Brettler, Peter Enns, and Daniel J. Harrington tackle a dilemma that not only haunts biblical scholarship today, but also disturbs students and others exposed to biblical criticism for the first time, either in university courses or through their own reading. Failure to resolve these conflicting interpretive strategies often results in rejection of either the critical approach or the religious approach--or both. But the authors demonstrate how biblical criticism--the process of establishing the original contextual meaning of biblical texts with the tools of literary and historical analysis--need not undermine religious interpretations of the Bible, but can in fact enhance them. They show how awareness of new archeological evidence, cultural context, literary form, and other tools of historical criticism can provide the necessary preparation for a sound religious reading. And they argue that the challenges such study raises for religious belief should be brought into conversation with religious tradition rather than deemed grounds for dismissing either that tradition or biblical criticism.

Guiding readers through the history of biblical exegesis within the Jewish, Catholic, and Protestant faith traditions, The Bible and the Believer bridges an age-old gap between critical and religious approaches to the Old Testament.

Contributor Bio

Marc Zvi Brettler is the Dora Golding Professor of Biblical Studies at Brandeis University. He is the author of How to Read the Jewish Bible and co-editor of The Jewish Study Bible and The Jewish Annotated New Testament.

Peter Enns teaches Biblical Studies at Eastern University. He is the author of The Evolution of Adam and Inspiration and Incarnation.

Daniel J. Harrington, S.J. is a Professor of New Testament at Boston College. He is the author of Meeting St. Mark Today and How Do Catholics Read the Bible?

Quotes
"The three scholarly authors of The Bible and the Believer- one for each of the Jewish, Catholic, and Protestant traditions -challenge readers religiously and intellectually." -- The Catholic Weekly

"Arguing that historical analysis informs rather than compromises the Bible’s religious significance, Brettler, Harrington, and Enns show how the Scriptures of Israel continue to speak, in both complementary and distinct ways, to Jews, Protestants, and Roman Catholics. This volume is a superb resource for the classroom, for ecumenical and interreligious conversations, and for anyone seeking lucid engagement with the text."-- Amy-Jill Levine, co-author of The Meaning of the Bible: What the Jewish Scriptures and the Christian Old Testament Can Teach Us
"Some believe that reading the Bible from an academic point of view precludes reading it from a believer’s point of view. But in this absolutely fascinating new book, three world-class scholars—Jewish, Catholic, and Protestant—turn their faithful hearts and scholarly minds to the Hebrew Bible, and invite the reader into a spirited conversation about among the three authors and the three religious perspectives. Along the way, readers are drawn deeper into the Bible, and are reminded that God speaks to us through both our heart and our head."--Rev. James Martin, S.J., author of The Jesuit Guide to (Almost) Everything

"Fundamentalism and skepticism—these polar extremes incite and invite from the left and the right, and many follow their call. Thank God for a book like The Bible and the Believer, which proposes a higher and better way forward—not making an idol or fetish of the biblical text on the one hand, and not disregarding or minimizing it on the other, but reverently and critically reading the text with hearts and minds fully engaged. Offering respectful dialogue and thoughtful reflection, The Bible and the Believer is a needed resource for all people of biblical faith."--Brian D. McLaren, author of Why Did Jesus, Moses, the Buddha and Mohammed Cross the Road?

"Each essay provides a wonderful entry into the richness of each tradition's perspectives on reading the Bible critically."--CHOICE

The Ethiopic Text of the Book of Ezekiel
A Critical Edition
Michael A. Knibb

Key Selling Points
• Provides a critical edition of the oldest accessible text of the Ethiopic version of Ezekiel.
• Based on a collation of fifteen manuscripts and sheds light on the history of the Ethiopic version.
• Assists in understanding the relationship to the underlying Greek version.
• Displays on facing pages two different versions of Ezekiel 40-48 in which the text has been revised against the Hebrew.

The first critical edition from one of the books of the Ethiopic Old Testament

Summary
Ezekiel is one of the few books of the Ethiopic Old Testament of which no critical edition has hitherto existed, and the aim of this work is to fill that gap. It provides a critical edition of the oldest accessible text of the Geez version and is based on a collation of fifteen manuscripts. The Ethiopic version is a daughter version of the Septuagint, and the work sheds light on the character of the original translation and on its subsequent history. The latter included the revision of the translation in the early mediaeval period, which was in part influenced by a Syriac-based Arabic version, and a further revision of the translation based on the Masoretic text.

Contributor Bio
Michael Knibb is Samuel Davidson Professor Emeritus of Old Testament Studies at King's College London. He studied in London, New York, and Oxford and was awarded a PhD degree of the University of London at the School of Oriental and African Studies in 1974. His previous publications in the Ethiopic field include The Ethiopic Book of Enoch: A New Edition in the Light of the Aramaic Dead Sea Fragments (OUP, 1978) and the published version of his Schweich Lectures, Translating the Bible: The Ethiopic Version of the Old Testament (OUP, 1999).

The Essenes, the Scrolls, and the Dead Sea
Joan E. Taylor

Key Selling Points
- Presents a solution to the mystery of the Dead Sea Scrolls
- Clearly sets out the history and archaeology of Qumran
- Offers a new understanding of the Essenes (and New Testament "Herodians") in ancient Judaism, from the surviving literary sources
- Explores the rich history of ancient medicine and pharmacology, and the uses of the Dead Sea in antiquity
- Carefully illustrated with maps, illustrations, and color photographs

This groundbreaking book presents a solution to the mystery of the Dead Sea Scrolls

Summary
Ever since the discovery of the Dead Sea Scrolls in caves near the site of Qumran in 1947, this mysterious cache of manuscripts has been associated with the Essenes, a "sect" configured as marginal and isolated. Scholarly consensus has held that an Essene library was hidden ahead of the Roman advance in 68 CE, when Qumran was partly destroyed. With much doubt now expressed about aspects of this view, The Essenes, the Scrolls and the Dead Sea systematically reviews the surviving historical sources, and supports an understanding of the Essenes as an influential legal society, at the centre of Judean religious life, held in much esteem by many and protected by the Herodian dynasty, thus appearing as "Herodians" in the Gospels.

Opposed to the Hasmoneans, the Essenes combined sophisticated legal expertise and autonomy with an austere regimen of practical work, including a specialisation in medicine and pharmacology. Their presence along the north-western Dead Sea is strongly indicated by two independent sources, Dio Chrysostom and Pliny the Elder, and coheres with the archaeology. The Dead Sea Scrolls represent not an isolated library, quickly hidden, but burials of manuscripts from numerous Essene collections, placed in jars in caves for long-term preservation. The historical context of the Dead Sea area itself, and its extraordinary natural resources, as well as the archaeology of Qumran, confirm the Essenes' patronage by Herod, and indicate that they harnessed the medicinal material the Dead Sea zone provides to this day.

Contributor Bio

Joan E. Taylor is a historian of early Christianity and Second Temple Judaism. She is also known for her work in other areas of history, literature, archaeology, and biblical studies. A New Zealander, she currently lives in England, and works in the department of Theology and Religious Studies, King's College London.

Quotes
"Taylor brings to bear formidable erudition, and works out her argument with impressive thoroughness." -- Robert Alter, The London Review of Books
"This controversial book is essential reading for all scholars interested in Qumran and the scrolls. It is especially strong in its use of literary and archaeology sources to suggest that Qumran's history extended well beyond the First Jewish Revolt." -- Kenneth Atkinson, University of Northern Iowa, Dead Sea Discoveries
"We owe Joan Taylor a great debt of thanks for bringing to life, with such detail and care (and with her own evocative photographs), a community, its setting, and the parts that it played, which have been for so long misunderstood." -- Rev. Robin Griffith-Jones, Church Times
"This is an excellent book, beautifully and lightly written, and clearly organized. It is packed with a wealth of fresh perspectives on many issues and it is full of helpful information, not least concerning the history of scholarship on all aspects of Esseneism." -- George Brooke, Rylands Professor of Biblical Criticism and Exegesis, University of Manchester
"This is an erudite book, full of rare information and bold suggestions." -- John J. Collins, Journal of Jewish Studies

Dogen and Soto Zen
Steven Heine

Key Selling Points
- Offers new research on the views of Dogen on meditation, philosophy, poetry, and the role of women in Zen practice
- Provides new insight into later developments of Soto Zen regarding the precepts, Buddhist robes, rituals for Dogen memorials, and the construction of Eiheiji temple
Explores diverse aspects of the life and teachings of Zen master Dogen

Summary
Dogen and Soto Zen builds upon and further refines a continuing wave of enthusiastic popular interest and scholarly developments in Western appropriations of Zen. In the last few decades, research in English and European languages on Dogen and Soto Zen has grown, aided by an increasing awareness on both sides of the Pacific of the important influence of the religious movement and its founder. The school has flourished throughout the medieval and early modern periods of Japanese history, and it is still spreading and reshaping itself in the current age of globalization.

This volume continues the work of Steven Heine's recently published collection, Dogen: Textual and Historical Studies, featuring some of the same outstanding authors as well as some new experts who explore diverse aspects of the life and teachings of Zen master Dogen (1200–1253), the founder of the Soto Zen sect (or Sotoshu) in early Kamakura-era Japan. The contributors examine the ritual and institutional history of the Soto school, including the role of the Eiheiji monastery established by Dogen as well as rites and precepts performed there and at other temples.

Contributor Bio

Steven Heine is Professor of Religious Studies and History and Director of the Institute for Asian Studies at Florida International University.

Quotes

"This excellent volume sheds new and corrective light on Dogen and the Soto Zen tradition. Exploring a rich array of topics--Dogen's views of meditation, women, poetry, and death; his standing as a philosopher; distinctive Soto approaches to texts, precepts, liturgical practices, robes, and monastic architecture--the contributors bridge the divide between textual analyses of Dogen's thought and scholarship on institutional facets of Soto Zen. A must read for anyone with a serious interest in Zen."
--Christopher Ives, author of Imperial-Way Zen

Madhyamaka and Yogacara
Allies or Rivals?
Jay Garfield, Jan Westerhoff

Key Selling Points
• Provides new essays by the most distinguished scholars in the world addressing these traditions
• Suggests a more nuanced view of the seemingly well-known argument that these two schools are inconsistent
Addresses the degree to which the philosophical approaches of Madhyamaka and Yogacara are consistent or complementary

Summary
Madhyamaka and Yogacara are the two principal schools of Mahayana Buddhist philosophy. While Madhyamaka asserts the ultimate emptiness and conventional reality of all phenomena, Yogacara is usually considered to be idealistic. This collection of essays addresses the degree to which these philosophical approaches are consistent or complementary.

Indian and Tibetan doxographies often take these two schools to be philosophical rivals. They are grounded in distinct bodies of sutra literature and adopt what appear to be very different positions regarding the analysis of emptiness and the status of mind. Madhyamaka-Yogacara polemics abound in Indian Buddhist literature, and Tibetan doxographies regard them as distinct systems. Nonetheless, scholars have tried to synthesize the two positions for centuries. This volume offers new essays by prominent experts on both these traditions, who address the question of the degree to which these philosophical approaches should be seen as rivals or as allies. In answering the question of whether Madhyamaka and Yogacara can be considered compatible, contributors engage with a broad range of canonical literature, and relate the texts to contemporary philosophical problems.

**Buddhism in Mongolian History, Culture, and Society**
Vesna A. Wallace

**Key Selling Points**
- Offers research based on previously unexamined sources that challenge the stereotyped image of Mongolian Buddhism as a mere replica of Tibetan Buddhism
- Examines the religious, historical, political, and cultural identities of Buddhism among various Mongolian ethnic groups
- Contains previously unpublished articles on Mongolian Buddhism
- Addresses artistic and literary expressions of Mongolian Buddhism practices and beliefs
- Explores the unique historical and cultural elements of Mongolian Buddhism while challenging its stereotyped image as a mere replica of Tibetan Buddhism

**Summary**
*Buddhism in Mongolian History, Culture, and Society* explores the unique elements of Mongolian Buddhism while challenging its stereotyped image as a mere replica of Tibetan Buddhism. Vesna A. Wallace brings together an interdisciplinary group of leading scholars to explore the interaction between the Mongolian indigenous culture and Buddhism, the features that Buddhism acquired through its adaptation to the Mongolian cultural sphere, and the ways Mongols have constructed their Buddhist identity. The contributors explore the ways that Buddhism retained unique Mongolian features through Qing and Mongol support, and bring to light the ways in which Mongolian Buddhists saw Buddhism as inseparable from "Mongolness." They show that by being greatly supported by Mongol and Qing empires, suppressed by the communist governments, and experiencing revitalization facilitated by democratization and the challenges posed by modernity, Buddhism underwent a series of transformations while retaining unique Mongolian features.

The book covers historical events, social and political conditions, and influential personages in Mongolian Buddhism from the sixteenth century to the present, and addresses the artistic and literary expressions of Mongolian Buddhism and various Mongolian Buddhist practices and beliefs.

**Contributor Bio**

**Vesna A. Wallace** is a Professor of Religious Studies in the Department of Religious Studies at the University of California, Santa Barbara. Her areas of specialization include Indian and Mongolian Buddhist traditions. She has published extensively on Indian and Mongolian Buddhism, including four books and numerous articles.

**Quotes**

"With the revival of Mongol Buddhism following the fall of the Soviet Union, conditions for the study of Mongol Buddhist traditions improved dramatically. Buddhism in Mongolian History, Culture, and Society well represents the new scholarship that this has enabled. The fifteen carefully prepared essays published here shed welcome new light on many aspects of Mongolian Buddhism that have been previously neglected." -- Matthew Kapstein, Director of Tibetan Studies, École Pratique des Hautes Études, Paris

The Second Vatican Council on Other Religions
Gerald O'Collins, SJ

Key Selling Points
• Clarifies the full scope of Vatican II's teaching on other religions
• Provides a scholarly and accessible guide to the contribution made by five documents of the Council to interfaith thinking and relations
• Rebuts attempts to play down the momentous change in Roman Catholic teaching about those of other faiths

Eplores the full scope of the positive teaching by the Second Vatican Council on other living faiths

Summary
Many observers greeted the Second Vatican Council (1962-65) as the most important religious event in the twentieth century. Its implementation and impact are still being felt in the Catholic Church, the wider Christian world, and beyond. One sea change that Vatican II brought concerned Roman Catholic attitudes towards Judaism, Islam, and other religions. Gerald O'Collins breaks fresh ground by examining in detail five documents from the Council which embodied a new mindset about other religious faiths and mandated changes that quickly led to international and national dialogues between the Catholic Church and the followers of non-Christian religions. The book also includes chapters on the insights that prepared the way for the rethinkng expressed by Vatican II, and on the follow-up to the Council's teaching found in the work of Pope John Paul II and Jacques Dupuis. O'Collins ably illustrates how the Council made a startling advance in official Catholic teaching about followers of other living faiths. Carefully researched, the book is written in the clear, accessible style that readers of previous works by O'Collins will recognize.

Contributor Bio
Gerald O'Collins, SJ took his PhD at the University of Cambridge and taught at the Gregorian University (Rome) from 1973 to 2006, where he was also Dean of the Faculty of Theology (1985-91). He has written or co-written sixty published books (including Rethinking Fundamental Theology, Jesus Our Priest, and Salvation for All), authored hundreds of articles in professional and popular journals, and lectured at many universities and colleges in the UK, Ireland, USA, India, New Zealand, his native Australia, and elsewhere. As well as receiving numerous doctorates and other honorary awards, in 2006 he was created a Companion of the General Division of the Order of Australia (AC), the highest civil honour granted through the Australian government.

Roger Sherman and the Creation of the American Republic
Mark David Hall

Key Selling Points
• The first book to focus on Sherman's political theory
• Argues that the founders believed Christianity should play an important role in the new republic

Explores Sherman's political theory and shows how it informed his many contributions to America's founding

Summary
One of leading figures of his day, Roger Sherman was a member of the five-man committee that drafted the Declaration of Independence and an influential delegate at the Constitutional Convention. As a Representative and Senator in the new republic, he had a hand in determining the proper scope of the national government's power as well as drafting the Bill of Rights. In Roger Sherman and the Creation of the American Republic, Mark David Hall explores Sherman's political theory and shows how it informed his many contributions to America's founding.

A close examination of Sherman's religious beliefs provides insight into how those beliefs informed his political actions. Hall shows that Sherman, like many founders, was influenced by Calvinist political thought, a tradition that played a role in the founding generation's opposition to Great Britain, and led them to develop political institutions designed to prevent corruption, promote virtue, and protect rights. Contrary to oft-repeated assertions that the founders advocated a strictly secular policy, Hall argues persuasively that most founders believed Christianity should play an important role in the new American republic.

Contributor Bio
Mark David Hall is Herbert Hoover Distinguished Professor of Politics at George Fox University.

Quotes
"Dr. Mark Hall offers a compelling Calvinist narrative to the formation of the American order in his recent political biography, Roger Sherman and the Creation of the American Republic... Hall's political biography of Roger Sherman is an excellent and heartily welcomed addition to this woefully neglected field of research." --Alan R. Crippen II, John Jay Institute

"As is, we have a book on Roger Sherman that religious and revolutionary historians should find useful." --Journal of Church and State

"A great book about a great but little known American. Professor Hall gracefully explains how one of the Founding Era's best politicians fully integrated his religious faith into a life of pragmatic and effective public service. Why can't more histories be this enjoyable to read?" --William R. Casto, Paul Whitfield Horn University Professor of Law, Texas Tech University

"Hardly the 'simple cobbler from Connecticut' portrayed on Broadway in 1776, Roger Sherman emerges from Professor Hall's excellent volume as deeply immersed in both Reformed theology and the practical politics of nation-building. Sherman's contributions to the American founding have been overlooked for too long, and Professor Hall has done a great service to remind us not only of the importance of Sherman himself but also of the Protestant Reformed tradition that he represented." --Donald L. Drakeman, author of Church, State, and Original Intent

"While most debates about the constitutional intent of our Founding Fathers focus on Madison, Franklin, Washington, and Jefferson, Mark David Hall expands our intellectual horizons with this detailed examination of the life and thought of Roger Sherman, the most important of the 'forgotten founders.' But Hall's research is more than just a
biography of one man; he uses the person of Roger Sherman to reveal the deep-seated
culture of Calvinism that influenced the original structure of our nation's government.
This book is a must-read for anyone engaged in legal debates about the nature of the
U.S. Constitution."--Anthony Gill, author of The Political Origins of Religious Liberty
"The best life of Connecticut's foremost Founding Father ever written." --The American
Conservative
"In this thoughtful, compelling book, Mark David Hall not only demonstrates that Roger
Sherman was one of the most influential Founding Fathers, but he also convincingly
locates Sherman's politics in the Reformed Christian tradition. Sherman deserves
recognition as an indispensable leader of the new American nation, and every student
and scholar of the Revolutionary period would profit greatly from reading Hall's treatment
of this distinguished Connecticut Patriot."--Thomas S. Kidd, author of Patrick Henry:
First Among Patriots
"Elegantly written, carefully researched, and downright persuasive...Hall so brilliantly and
strenuously challenges the consensus view that we should look forward to this book
being banned from public schools across the country...it is a book worth reading."--
Library of Law and Liberty
"This slim volume should find its way onto many syllabi. Clearly and engagingly written,
itis perfect for undergraduates, who also respond enthusiastically to the 'forgotten
founder' trope. This fine study is recommended not only for students but also for
scholars who believe they can understand the founding as a purely secular event." --
The Journal of American History

The Practical Christology of Philoxenos of Mabbug
David A. Michelson

Key Selling Points
- The first work in English solely focused on the theology of Philoxenos of Mabbug, whose works are the largest surviving single corpus in all of Syriac literature
- Offers a new approach to the theological disputes over Christology with particular attention to miaphysite/monophysite perspective, an aspect of the controversy that has often proved opaque in previous scholarship
- Connects early Christian doctrinal controversies to contexts of religious practice, such as asceticism and liturgy

Examine doctrinal conflicts concerning the dual nature of Christ in the period after the Council of Chalcedon by considering the life and works of Philoxenos of Mabbug.

Summary
Philoxenos of Mabbug (c. 440-523) was a prolific late-antique theologian and polemicist who produced the largest literary corpus to have survived in Syriac. He earned a reputation as the leading Syriac opponent of the Council of Chalcedon (451) and its two-nature Christology. In *The Practical Christology of Philoxenos of Mabbug*, David A. Michelson offers a new interpretation of Philoxenos' one-nature Christology by interpreting the post-Chalcedonian doctrinal disputes through a holistic analysis of Philoxenos' life and works. Michelson's exploration of the entire Philoxenian corpus reveals a miaphysite perspective on the Christological controversies in which the intellectual clash was not primarily over defining doctrine. As a metropolitan bishop, sponsor of a revised New Testament, and monastic theologian, Philoxenos was principally concerned with matters of Christian praxis and the ascetic pursuit of divine knowledge. This book shows how he opposed Chalcedonian Christology because he was convinced its 'intellectual' theological method was inimical to the mystical pursuit of divine knowledge through liturgical and ascetic practice. Philoxenos' polemical engagement drew upon a theological epistemology that he had adapted from late-Nicene theologians including Ephrem, the Cappadocians, and Evagrius. Philoxenos argued that divine knowledge was not to be achieved through human understanding or doctrinal inquiry. Instead, true divine knowledge was attained through practice, specifically contemplation, reading of scripture, participation in the liturgical mysteries, and ascetic discipline. Michelson considers each of these practices in turn to show how Philoxenos contextualized opposition to Chalcedon as part of a larger vision of ascetic and spiritual struggle. In short, for Philoxenos the doctrinally recondite conflict over Christology was foremost a practical matter.

Contributor Bio

David Michelson is Assistant Professor of the History of Christianity at Vanderbilt University. Michelson's research explores historical sources in Syriac (a dialect of Aramaic) with an interest in how they offer new perspectives on the history of Christianity. Michelson is the general editor of Syriaca.org.

**Nonnus of Panopolis**

**Paraphrasis of the Gospel of John XI**

Konstantinos Spanoudakis

**Key Selling Points**

- Provides a fresh Greek text and facing English translation, with Introduction and a thorough line-by-line commentary on chapter XI (The Resurrection of Lazarus)
- Takes into account recent evolutions in the study of late antique literature
- Offers in depth of analysis of literary, theological, and philosophical aspects of the Paraphrasis
- Examines the employment of classical heritage in rewriting John's Gospel

**Summary**

This ground-breaking work is a critical edition of chapter XI (The Resurrection of Lazarus) of Nonnus of Panopolis' *Paraphrasis of the Gospel of St John*, written in the mid-fifth century in elegant hexameters. Made available for the first time in Anglophone literature, the volume consists of an introduction discussing cultural (theological and philosophical affiliations, dialogue with contemporary art), literary (character-sketching, narrative, interaction with the *Dionysiaca*), and technical (paraphrastic technique, transmission, metre) aspects and places the work in its immediate and broader context. The Introduction includes an edition of chapter XI from the so-called Athous paraphrase of Nonnus' *Paraphrasis*.

An exhaustive line-by-line commentary covers a wide range of issues arising from Nonnus' spiritualizing rendition. Konstantinos Spanoudakis identifies literary models and intertextual links with earlier traditions: epic (mainly Homer, Apollonius Rhodius, Oppian), mystic (Orphic literature, Chaldean Oracles), and philosophical (Neoplatonists, Gnostics). Dr Spanoudakis illustrates Nonnus' interaction with early Christian poetry and literature, his debt to Cyril of Alexandria's *Commentary on the Gospel of John*, his familiarity with Syriac exegesis (John Chrysostom and Theodore of Mopsuestia), and the homiletic and apocryphal tradition on Lazarus. The book features a short Appendix discussing a curse against the Jews embedded as an interpolated verse in ms V.

**Contributor Bio**

**Konstantinos Spanoudakis** is Assistant Professor of Classics at the Department of Philology, University of Crete. He published an edition of the poetical and grammatical fragments of the Hellenistic poet Philitas of Cos (Brill, 2002) and co-edited with F. Manakidou *Alexandrine Muse: Tradition and Innovation in Hellenistic Poetry* (Athens, 2008). He is also the editor of *Nonnus of Panopolis in Context: Poetry and Cultural Milieu in Late Antiquity* (DeGruyter, 2014).

Law and Legality in the Greek East
The Byzantine Canonical Tradition, 381-883
David Wagschal

Key Selling Points
- Explores the cultural history of Byzantine church law
- Illuminates the fundamental perceptions, categories, values, expectations, assumptions, and structures that constituted the intellectual and cultural framework of Byzantine canon law
- Provides a coherent picture of the Byzantine canonical imagination

Summary
Byzantine church law remains terra incognita to most scholars in the western academy. In this work, David Wagschal provides a fresh examination of this neglected but fascinating world. Confronting the traditional narratives of decline and primitivism that have long discouraged study of the subject, Wagschal argues that a close reading of the central monuments of Byzantine canon law c. 381-883 reveals a much more sophisticated and coherent legal culture than is generally assumed. Engaging in innovative examinations of the physical shape and growth of the canonical corpus, the content of the canonical prologues, the discursive strategies of the canons, and the nature of the earliest forays into systematization, Wagschal invites his readers to reassess their own legal-cultural assumptions as he advances an innovative methodology for understanding this ancient law. Law and Legality in the Greek East explores topics such as compilation, jurisprudence, professionalization, definitions of law, the language of the canons, and the relationship between the civil and ecclesiastical laws. It challenges conventional assumptions about Byzantine law while suggesting many new avenues of research in both late antique and early medieval law, secular and ecclesiastical.

Contributor Bio
David Wagschal studied medieval history and Byzantine theology at the University of Toronto and St. Vladimir’s Orthodox Seminary before embarking upon his doctoral studies at the University of Durham, England in 2005-2010. A former Assistant Professor of Church History and Canon Law at St. Vladimir’s Seminary in New York, he has also taught at the Toronto School of Theology, University of Toronto.

Calvin's Company of Pastors
Pastoral Care and the Emerging Reformed Church, 1536-1609
Scott M. Manetsch

Key Selling Points
- Makes extensive use of the unpublished (and rarely consulted) registers of Geneva's Consistory.
- A vivid and engaging portrait of pastoral life in sixteenth and seventeenth century Geneva.
Examines the pastoral theology and practical ministry activities of Geneva's reformed ministers from the time of Calvin's arrival in Geneva until the beginning of the seventeenth century.

Summary
In Calvin's Company of Pastors, Scott Manetsch examines the pastoral theology and practical ministry activities of Geneva's reformed ministers from the time of Calvin's arrival in Geneva until the beginning of the seventeenth century. During these seven decades, more than 130 men were enrolled in Geneva's Venerable Company of Pastors (as it was called), including notable reformed leaders such as Pierre Viret, Theodore Beza, Simon Goulart, Lambert Daneau, and Jean Diodati. Aside from these better-known epigones, Geneva's pastors from this period remain hidden from view, cloaked in Calvin's long shadow, even though they played a strategic role in preserving and reshaping Calvin's pastoral legacy.

Making extensive use of archival materials, published sermons, catechisms, prayer books, personal correspondence, and theological writings, Manetsch offers an engaging and vivid portrait of pastoral life in sixteenth- and early seventeenth-century Geneva, exploring the manner in which Geneva's ministers conceived of their pastoral office and performed their daily responsibilities of preaching, public worship, moral discipline, catechesis, administering the sacraments, and pastoral care. Manetsch demonstrates that Calvin and his colleagues were much more than ivory tower theologians or "quasi-agents of the state," concerned primarily with dispensing theological information to their congregations or enforcing magisterial authority. Rather, they saw themselves as spiritual shepherds of Christ's Church, and this self-understanding shaped to a significant degree their daily work as pastors and preachers.

Contributor Bio
Scott M. Manetsch is Professor of Church History and the History of Christian Thought at Trinity Evangelical Divinity School.

Quotes
"Manetsch's impressive utilization of such a wide range of sources allows the reader access to a complex and more complete picture of the interplay between theological ideas and pastoral practices in Reformation-era Geneva."
--Church History

"Considering the depth of research, breadth of topics and engaging style of writing, it would be hard to improve upon Manetsch's book. It is an impressive example of scholarship that should be emulated by future historians."
--The Master's Seminary Journal

"Full of fresh scholarship (including analysis of records never examined closely), Calvin's Company of Pastors is a fascinating read."
--The Gospel Coalition

"This is a quite superb book. It is not only outstanding as a well-written piece of original historical research. It is also most informative concerning the reasons why Reformed and Presbyterian churches came to think about the ministry in the ways they do. Buy it."
--Reformation21

"In this rich and illuminating book, Scott Manetsch introduces readers to the fascinating cast of characters who served as Geneva's ministers from 1536-1609. By carefully combining social history with historical theology, Manetsch probes the connection..."
between pastoral theology and concrete practice among these ministers, presenting a marvelous portrait of Genevan pastoral life in Calvin's day and afterward. Lucidly written, this book is a treasure for exploring pastoral identity in the Reformation context."

"Calvin's Company of Pastors is an engaging and exhilarating synthesis of the prodigious research conducted in the Genevan archives for the past fifty years. Manetsch artfully describes everyday church life in the wake of the Reformation but does so through the eyes of three generations of pastors. We thereby learn through details both amusing and poignant just what it was like to accept a call to the pastorate, even as we discover ways in which Calvin did and did not shape the later course of the Genevan church. The book is a compelling introduction to Calvin and his memorable successors as well as a significant contribution to the history of pastoral theology."--John L. Thompson, author of Reading the Bible with the Dead: What You Can Learn from the History of Exegesis that You Can't Learn from Exegesis Alone

"Scott Manetsch joins an innovative group in broadening our perspective on the Swiss Reformation, looking beyond Calvin to see how the Reformer's spiritual heirs and followers sustained and modified his legacy in Geneva and surrounding villages. All who are interested in Calvin and Reformed studies will want to absorb the riveting information gathered here concerning the Genevan ministers' class background, education, economic status, marital choices, weekly work assignments, living conditions, hardships, disciplinary fervor, and vulnerability."--Susan Karant-Nunn, Regents' Professor of History and Director of the Division for Late Medieval and Reformation Studies, University of Arizona

Hartford Puritanism
Thomas Hooker, Samuel Stone, and Their Terrifying God
Baird Tipson

Key Selling Points
• First thorough study of Thomas Hooker in almost forty years, reflecting four decades of new scholarship
• First study to draw heavily on Samuel Stone's Whole Body of Divinity, an indispensable resource for the study of early New England religion
• Posits Hooker not as a passive observer of religious experience in his hearers but an active creator
• Explores the relationship of New England Puritanism to later American evangelicalism

Argues for a new paradigm of New England Puritanism, one where Hartford's founding ministers, Thomas Hooker and Samuel Stone, both fully embraced and even harshened Calvin's double predestination.

Summary
Statues of Thomas Hooker and Samuel Stone grace downtown Hartford, Connecticut, but few residents are aware of the distinctive version of Puritanism that these founding ministers of Hartford's First Church carried into the Connecticut wilderness (or indeed that the city takes its name from Stone's English birthplace). Shaped by interpretations of the writings of Saint Augustine largely developed during the ministers' years at Emmanuel College, Cambridge, Hartford's church order diverged in significant ways from its counterpart in the churches of the Massachusetts Bay Colony. Hartford Puritanism argues for a new paradigm of New England Puritanism. Hartford's founding ministers, Baird Tipson shows, both fully embraced - and even harshened - Calvin's double predestination. Tipson explores the contributions of the lesser-known William Perkins, Alexander Richardson, and John Rogers to Thomas Hooker's thought and practice: the art and content of his preaching, as well as his determination to define and impose a distinctive notion of conversion on his hearers. The book draws heavily on Samuel Stone's The Whole Body of Divinity, a comprehensive exposition of his thought and the first systematic theology written in the American colonies. Virtually unknown today, The Whole Body of Divinity not only provides the indispensable intellectual context for the religious development of early Connecticut but also offers a more comprehensive description of the Puritanism of early New England than any other document.

Contributor Bio

Quotes
"A brilliant reinterpretation of Thomas Hooker and puritanism along the Connecticut River. Tipson deftly explores the English roots of the subject and demonstrates the diversity of New England's seventeenth-century religious life. This will be required reading for all interested in American religion and colonial New England."
--Francis J. Bremer, Professor Emeritus, Department of History, Millersville University of Pennsylvania

"Baird Tipson has written a searching and thoughtful description of an early American theologian, notable because Tipson has an exceptional command of the history of theology, both Catholic and Reformed, and uses this knowledge to illuminate what was different or special about Hooker's version of the practical divinity. A must read for any serious student of the practical divinity as it flourished on both sides of the Atlantic in
the seventeenth century."
--David D. Hall, Harvard Divinity School

"Baird Tipson has thoroughly mastered the writings and deeds--the life and times--of Thomas Hooker, founder of Connecticut and a leading American Puritan. The result is a splendid biography drawn from close attention to English, Dutch, and American sources, a brilliant (if also harrowing) account of Hooker's sharply predestinarian theology, and a much-needed corrective to misguided attempts at showing the modernity of this crucial figure. It is a strikingly effective book."
--Mark A. Noll, author of America's God: From Jonathan Edwards to Abraham Lincoln

Sympathetic Puritans  
Calvinist Fellow Feeling in Early New England  
Abram Van Engen

Key Selling Points
- The first history of sympathy in seventeenth century America
- Challenges the literary history of sentimentalism
- Reveals a Calvinist theology of sympathy and explores its implications for both Puritan and American culture
- Places sympathy at the heart of Puritanism and challenges the literary history of sentimentalism

Summary
Revising dominant accounts of Puritanism and challenging the literary history of sentimentalism, *Sympathetic Puritans* argues that a Calvinist theology of sympathy shaped the politics, religion, rhetoric, and literature of early New England. Scholars have often understood and presented sentimentalism as a direct challenge to stern and stoic Puritan forebears; the standard history traces a cult of sensibility back to moral sense philosophy and the Scottish Enlightenment, not Puritan New England. Abram C. Van Engen has unearthed pervasive evidence of sympathy in a large archive of Puritan sermons, treatises, tracts, poems, journals, histories, and captivity narratives. He demonstrates how two types of sympathy -- the active *command* to fellow-feel (a duty), as well as the passive sign that could indicate salvation (a discovery) -- permeated Puritan society and came to define the very boundaries of English culture, affecting conceptions of community, relations with Native Americans, and the development of American literature.

Van Engen re-examines the Antinomian Controversy, conversion narratives, transatlantic relations, Puritan missions, Mary Rowlandson's captivity narrative -- and Puritan culture more generally -- through the lens of sympathy. Demonstrating and explicating a Calvinist theology of sympathy in seventeenth-century New England, the book reveals the religious history of a concept that has previously been associated with more secular roots.

**Contributor Bio**

Abram C. Van Engen is an Assistant Professor of English at Washington University in St. Louis, where he researches and teaches early American literature, history, and culture. Van Engen received his Ph.D. in English from Northwestern University in 2010, earning the Hagstrum Prize for best dissertation in English.

**Quotes**

"Focusing on the importance of the affection that bound Puritans together, Abram Van Engen illuminates an important and yet neglected aspect of the society that speaks primarily not to formal ideas but to how Puritanism was lived in the families, churches, and towns of colonial New England."
--Francis J. Bremer, author of *Building a New Jerusalem: John Davenport, a Puritan in Three Worlds*

"Van Engen focuses on "fellow feeling" as both a defining feature of seventeenth-century Puritanism and a precursor to forms of sympathy better known in later literature. In so doing, he offers a challenging interpretation of the motivations of New England colonists. *Sympathetic Puritans* does not ask us to empathize with the likes of John Winthrop or Mary Rowlandson, but it does demand that we consider them and our enduring connections to them in a new light."
--Kristina Bross, Associate Professor of English and American Studies, Purdue University

"An immensely rewarding book that alters our understanding of a canonical text and fills out the intellectual history of early New England."
--David D. Hall, Harvard Divinity School

Under the Big Top
Big Tent Revivalism and American Culture, 1885-1925
Josh McMullen

Key Selling Points
• Challenges modernist-fundamentalist dualism, the predominant interpretative approach to Protestant religion in America at the turn of twentieth century
• Illuminates the rise of evangelical use of the media
Examines the immensely popular turn-of-the-twentieth-century big tent revivals

Summary
Under the Big Top examines the immensely popular big tent revivals of turn-of-the-twentieth-century America and develops a new framework for understanding Protestantism in this transformative period of the nation's history. Contemporary critics of the revivalists often depicted them as anxious and outdated religious opponents of a modern, urban nation. Early historical accounts likewise portrayed tent revivalists as Victorian hold-outs, bent on re-establishing nineteenth-century values and religion in a new America. In this revisionist work, Josh McMullen argues that, contrary to these stereotypes, big tent revivalists actually participated in the shift away from Victorianism and helped in the construction of a new consumer culture in the United States.

How did the United States become the most consumer-driven and yet one of the most religious societies in the western world? McMullen shows that revivalists and their audiences reconciled the Protestant ethic of salvation with the emerging consumer ethos by cautiously unlinking Christianity from Victorianism and joining it to the new, emerging consumer culture. Under the Big Top helps to explain the continued appeal of both the therapeutic and the salvific worldview to many Americans as well as the ambivalence that accompanies this combination.

Contributor Bio
Josh McMullen received his Ph.D. in History from the University of Missouri-Columbia. He completed a Masters in Theology and Church History at Gordon-Conwell Theological Seminary. He currently serves as Assistant Professor of History at Regent University.

Quotes
"In the late nineteenth and early twentieth centuries, Americans loved circuses and freak shows. They also loved big tent revivals. In this fascinating and well-researched book, McMullen carefully demonstrated how the United States' largest revivals and most popular evangelists, working out of tents, tabernacles, and sports arenas, shaped and reflected an age of dramatic change. Religion became not just something to experience but to consume alongside the greatest spectacles of the era."
--Matthew Avery Sutton, author of American Apocalypse: A History of Modern Evangelicalism

"McMullen's work offers a carefully textured, gracefully written study of a small but influential group of 'big tent' evangelists at the turn of the twentieth century. Drawing on impressive research, he argues that these figures both wittingly and unwittingly blended old-fashioned revivalist theology with new-fashioned therapeutic consumer culture. The results proved as ironic as they were effective. McMullen significantly enriches our understanding of religion in that formative era."
--Grant Wacker, Gilbert T. Rowe Professor of Christian History, Duke Divinity School

"In Under the Big Top, Josh McMullen explodes traditional stereotypes that label evangelicalism a backward and retrograde cultural force. Instead, he shows how Victorian evangelicals mobilized advertising, celebrity culture, and the desire for healing - all too familiar tropes of the modern age - on behalf of their message. And in so doing, he argues, they helped usher in the America we know today."
--Matthew Bowman, author of The Urban Pulpit: New York City and the Fate of Liberal Evangelicalism

Irenaeus of Lyons
Identifying Christianity
John Behr

Key Selling Points
• Provides a comprehensive and positive treatment of the establishment of orthodoxy in the early Church
• Examines the earliest methods of scriptural interpretation in the Christian tradition, how theological reflection develops out of this, and how scriptural interpretation and theological exposition fit together.
• Seeks to present a complete picture of early Christian theology presented on its own terms (rather than later theological doctrine)

A full, contextual study of Irenaeus of Lyons, the first great theologian of the Christian tradition

Summary
This book provides a full, contextual study of St Irenaeus of Lyons, the first great theologian of the Christian tradition. John Behr sets Irenaeus both within his own context of the second century, a fundamental period for the formation of Christian identity, elaborating the distinction between orthodoxy and heresy and expounding a comprehensive theological vision, and also within our own contemporary context, in which these issues are very much alive again. Against the commonly-held position that 'orthodoxy' was established by excluding others, the 'heretics', Behr argues that it was the self-chosen separation of the heretics that provided the occasion for those who remained together to clarify the lineaments of their faith in a church that was catholic by virtue of embracing different voices in a symphony of many voices and whose chief architect was Irenaeus, who, as befits his name, urged peace and toleration.

The first chapter explores Irenaeus' background in Asia Minor, as a disciple of Polycarp of Smyrna, his activity in Gaul, and his involvement with the Christian communities in Rome. The theological and institutional significance of his interventions is made clear by tracing the coalescence of the initially fractionated communities in Rome into a united body over the first two centuries.

The second chapter provides a full examination of Irenaeus' surviving writings, concentrating especially on the literary and rhetorical structure of his five books Against the Heresies, his 'refutation and overthrowal' of his opponents in the first two books, and his establishing a framework for articulating orthodoxy.

The final chapter explores the theological vision of Irenaeus itself, on its own terms rather than the categories of later dogmatic theology, grounded in an apostolic reading of Scripture and presenting a vibrant and vigorous account of the diachronic and synchronic economy or plan of God, seen through the work of Christ which reveals how the Hands of God have been at work from the beginning, fashioning the creature, made from mud and animated with a breath of life, into his own image and likeness, vivified by the Holy Spirit, to become a 'living human being, the glory of God'.

Contributor Bio
Fr. John Behr is the Dean of St Vladimir's Seminary and Professor of Patristics, teaching courses in patristics, dogmatics and scriptural exegesis at the seminary, and also at Fordham University, where he is the Distinguished Lecturer in Patristics. Before becoming Dean in 2007, he served as the editor of St Vladimir's Theological Quarterly, and he still edits the Popular Patristics Series for SVS Press. His early work was on issues of asceticism and anthropology, focusing on St. Irenaeus of Lyons and Clement of Alexandria. After spending almost a decade in the second century, Fr John began the publication of a series on the Formation of Christian Theology, and has now reached the fifth and sixth centuries. He has recently completed an edition and translation of, and introduction to, the remaining texts of Diodore of Tarsus and Theodore of Mopsuestia. He has also published a synthetic presentation of the theology of the early centuries, focused on the mystery of Christ.

Beholden
Religion, Global Health, and Human Rights
Susan R. Holman

Key Selling Points
• Offers a new and original lens for the role of religion in global health
• Complements global health education efforts and touches on relevant cross-disciplinary issues that are missing in most teaching materials for introductory courses on global health
• Discusses the anthropology of gift exchange in the context of religious aid and social welfare

Summary
Global health efforts today are usually shaped by two very different ideological approaches: a human rights-based approach to health and equity—often associated with public health, medicine, or economic development activities; or a religious or humanitarian "aid" approach motivated by personal beliefs about charity, philanthropy, missional dynamics, and humanitarian "mercy." The underlying differences between these two approaches can create tensions and even outright hostility that undermines the best intentions of those involved.

In Beholden: Religion, Global Health, and Human Rights, Susan R. Holman—a scholar in both religion and the history of medicine—challenges this traditional polarization by telling stories designed to help shape a new perspective on global health, one that involves a multidisciplinary integration of religion and culture with human rights and social justice. The book's six chapters range broadly, describing pilgrimage texts in the Christian, Hindu, Buddhist, and Islamic traditions; the effect of ministry and public policy on nineteenth-century health care for the poor; the story of the Universal Declaration of Human Rights as it shaped economic, social, and cultural rights; a "religious health assets" approach based in Southern Africa; and the complex dynamics of gift exchange in the modern faith-based focus on charity, community, and the common good. Holman's study serves as an insightful guide for students and practitioners interested in improving and broadening the scope of global health initiatives, with an eye towards having the greatest impact possible.

Contributor Bio
Susan R. Holman is Senior Writer at the Harvard Global Health Institute. Formerly writer and editor at Harvard School of Public Health, she has also worked in clinical nutrition and holds a PhD in religious studies from Brown. She is the author of The Hungry Are Dying: Beggars and Bishops in Roman Cappadocia and God Knows There's Need: Christian Responses to Poverty.

Quotes
"Beholden is a rich tapestry of stories deftly woven into a textured examination of religious faith and global health work. The meanings we give to charity, justice, human rights, obligations, and respect—and their material effects—come alive in threads plaited across time and place. Beholden invites us to deepen the moral integrity of global health relations; it should be read by all who care to do so." --Charlene A. Galarneau, Assistant Professor, Women's and Gender Studies Department, Wellesley College

"Susan Holman gives us what we need so urgently—a recovery of the relationship between public health and public faith, between the local and the global. Beholden is a work for our time, filled with rich and experiential insights for the flourishing and healing of our world." --Mark R. Gornik, Director, City Seminary of New York

"Susan Holman weaves theology, history, ethics, and her own fascinating pilgrimage as a public health specialist and scholar of religion to produce a book that is a swirling,
sumptuous tapestry. Not only a feast of vivid prose, *Beholden* is an unmatched account of why the often separate worlds of religion, health, and human rights need each other—urgently—at a time of desperate crises and grave inequities in global public health." -- Timothy Samuel Shah, Associate Director of the Religious Freedom Project, Berkley Center for Religion, Peace & World Affairs, Georgetown University

**Table Of Contents**

1. Introduction: Toward a vision of the ought
2. Religious pilgrimage: From 'glocality' to global health
3. Private lens, public health: A reluctant physician in 19th century America
4. From Matthew 25 to Article 25: Why economic, social, and cultural (ESC) rights matter
5. Between Cape Town and Memphis: Religious health assets
6. Don't teach me to fish: What's wrong with gift-charity?

Provincial Hinduism
Religion and Community in Gwalior City
Daniel Gold

Key Selling Points
- First book to look at religious life in an ordinary, middle-sized Indian city
- Describes the religious life of ordinary, middle-class Indians without trying to make a political statement
- Includes a broad survey of temples in the city
- The first book to analyze religious life in an ordinary, midsized Indian city

Summary
Provincial Hinduism explores intersecting religious worlds in an ordinary Indian city that remains close to its traditional roots, while bearing witness to the impact of globalization. Daniel Gold looks at modern religious life in the central Indian city of Gwalior, drawing attention to the often complex religious sensibilities behind ordinary Hindu practice. Gold describes temples of different types, their legendary histories, and the people who patronize them. He also explores the attraction of Sufi shrines for many Gwalior Hindus. Delicate issues of socioreligious identity are highlighted through an examination of neighbors living together in a locality mixed in religion, caste, and class. Pursuing issues of community and identity, Gold turns to Gwalior's Maharashtrians and Sindhis, groups with roots in other parts of the subcontinent that have settled in the city for generations. These groups function as internal diasporas, organizing in different ways and making distinctive contributions to local religious life. The book concludes with a focus on new religious institutions invoking nineteenth-century innovators: three religious service organizations inspired by the great Swami Vivekenanda, and two contemporary guru-centered groups tracing lineages to Radhasoami Maharaj of Agra.

Gold offers the first book-length study to analyze religious life in an ordinary, midsized Indian city, and in so doing has created an invaluable resource for scholars of contemporary Indian religion, culture, and society.

Contributor Bio
Daniel Gold grew up in Los Angeles and graduated from UC Berkeley in 1968. After several years in India, mostly as a Peace Corps Volunteer, he did graduate work at the University of Chicago and has taught at Vassar, Oberlin, Stanford, and Cornell, where he is now Professor of South Asian Religions. He is married to the anthropologist Ann Grodzins Gold.

Quotes
"Lucid and accessible, this important book on religion in Gwalior makes a major contribution to the study of urban religion. Daniel Gold’s long history of academic and personal engagement with religious people, shrines, and organizations in this city, with its historically important migrations and diverse religious identities, is, quite simply, stellar. Gold’s lively style and careful definition of terms renders this work inviting to undergraduates as well as graduate and postgraduate scholars. It is sure to be helpful to and heralded by scholars of religion, anthropology, sociology, and history."
--Lindsey Harlan, Professor of Religious Studies, Connecticut College

Indian Asceticism
Power, Violence, and Play
Carl Olson

Key Selling Points
- Examines the various forms of play motifs associated with the Indian ascetic
- Focuses on discourses and narratives about the ascetic and what they reveal about the quest for liberation/salvation

Using religio-philosophical discourses and narratives from epic, puranic, and hagiographical literature, Indian Asceticism focuses on the powers exhibited by ascetics of India from ancient to modern time.

Summary
Throughout the history of Indian religions, the ascetic figure is most closely identified with power. A by-product of the ascetic path, power is displayed in the ability to fly, walk on water or through dense objects, read minds, discern the former lives of others, see into the future, harm others, or simply levitate one's body. These tales give rise to questions about how power and violence are related to the phenomenon of play.

Indian Asceticism focuses on the powers exhibited by ascetics of India from ancient to modern time. Carl Olson discusses the erotic, the demonic, the comic, and the miraculous forms of play and their connections to power and violence. He focuses on Hinduism, but evidence is also presented from Buddhism and Jainism, suggesting that the subject matter of this book pervades India's major indigenous religious traditions.

The book includes a look at the extent to which findings in cognitive science can add to our understanding of these various powers; Olson argues that violence is built into the practice of the ascetic. Indian Asceticism culminates with an attempt to rethink the nature of power in a way that does justice to the literary evidence from Hindu, Buddhist, and Jain sources.

Contributor Bio
Carl Olson is a professor in the Department of Philosophy and Religious Studies at Allegheny College. Besides numerous essays in journals, books, and encyclopedias, he has published seventeen books on subjects such as Hinduism, Buddhism, comparative philosophy, and method and theory in the study of religion. His most recent books include Celibacy in Religious Traditions and The Allure of Decadent Thinking: Religious Studies and the Challenge of Postmodernism both published by Oxford University Press.

Quotes
"In this interesting book Professor Olson discusses how asceticism is at the heart of Indian religions, offering forms of practice for the attainment of supernatural powers and spiritual liberation. Not only is this a fascinating account of asceticism in Buddhism, Jainism and Hinduism, it relates these practices to contemporary debate in the human sciences such as about the role of cognition in cultural practice. This clearly written book will be invaluable to students of Indian religions and asceticism."
--Gavin Flood, Professor of Hindu Studies and Comparative Religion, Oxford University

The Rise of Liberal Religion
Book Culture and American Spirituality in the Twentieth Century
Matthew S. Hedstrom

Key Selling Points
• One of the first scholarly analyses of the major religious reading initiatives of the early and mid-twentieth century, and the modernization of religious publishing in this period.
• Advances the study of liberal religion beyond church history into the wider culture. In this way provides a foundation for understanding the "spiritual but not religious" phenomenon of recent decades.
• Describes the emergence of post-World War II religious cosmopolitanism.
• Provides a thoughtful model for analyzing the relationships of religion, media, and consumerism.
One of the first scholarly analyses of the major religious reading initiatives of the early and mid-twentieth century, and the modernization of religious publishing in this period.

Summary
Winner of the Frank S. and Elizabeth D. Brewer Best First Book Prize of the American Society of Church History

Named a Society for U. S. Intellectual History Notable Title in American Intellectual History

The story of liberal religion in the twentieth century, Matthew S. Hedstrom contends, is a story of cultural ascendency. This may come as a surprise-most scholarship in American religious history, after all, equates the numerical decline of the Protestant mainline with the failure of religious liberalism. Yet a look beyond the pews, into the wider culture, reveals a more complex and fascinating story, one Hedstrom tells in The Rise of Liberal Religion.

Hedstrom attends especially to the critically important yet little-studied arena of religious book culture—particularly the religious middlebrow of mid-century—as the site where religious liberalism was most effectively popularized. By looking at book weeks, book clubs, public libraries, new publishing enterprises, key authors and bestsellers, wartime reading programs, and fan mail, among other sources, Hedstrom is able to provide a rich, on-the-ground account of the men, women, and organizations that drove religious liberalism's cultural rise in the 1920s, 1930s, and 1940s. Critically, by the post-WWII period the religious middlebrow had expanded beyond its Protestant roots, using mystical and psychological spirituality as a platform for interreligious exchange. This compelling history of religion and book culture not only shows how reading and book buying were critical twentieth-century religious practices, but also provides a model for thinking about the relationship of religion to consumer culture more broadly. In this way, The Rise of Liberal Religion offers both innovative cultural history and new ways of seeing the imprint of liberal religion in our own times.

Contributor Bio

Matthew S. Hedstrom is Assistant Professor of American Studies and Religious Studies at the University of Virginia.

Quotes

"This is a useful contribution to the study of American religion in the twentieth century." -- Theology
"Hedstrom makes historians view liberal religion beyond institutional criteria of church or denominational growth and decline . a thoroughly researched and engaging monograph." -- Church History
I came away from Hedstrom s book with a rich understanding of the culture of midcentury liberal religion..... Hedstrom has set an exciting agenda for future scholars." - - The Journal of Religion
"Outstanding... extraordinarily interesting." - - Journal of the American Academy of
Religion
"Thoughtful and erudite." --Christian Century
"This description of the marriage of liberal religion and publishing in the US in the 20th century fuses a deep familiarity with historical archives, sensitivity to the movement of American religious practices, and insightful interpretations of texts and images...Recommended." --CHOICE
"Belongs on the to-read list." --Richmond Times-Dispatch
"Hedstrom's terrific study suggests that there is much more to the story of religious liberalism in twentieth and twenty-first-century America than the numerical decline of mainline Protestant churches." --American Historical Review

"An original and eye-opening study, planting liberal religion in the wider history of liberalism, including its middlebrow culture of print. Hedstrom shows how liberal religion keeps renewing itself by siding up to secular culture, and by welcoming wave after wave of refugees from orthodoxy on the one hand and agnosticism on the other, all of them drawn to the premise of liberal spirituality that science and religion make excellent bedfellows."--Richard Fox, Professor of History, University of Southern California
"Smart, innovative, and fascinating... Hedstrom tells a compelling story. He masterfully blends important theoretical insights with an engaging narrative... This is an excellent, well-written, and transformative study that scholars will be wrestling with for years to come." --Register of the Kentucky Historical Society

"Hedstrom's work is highly recommended to students of American religions, those interested in the history of the book, twentieth-century historians, and scholars of spirituality." --Textual Cultures

"Hedstrom shows that the prevailing values of liberal Protestantism were widely disseminated through mass-market, 'middlebrow' books during the middle decades of the twentieth century, influencing ostensibly secular domains of popular culture in ways that no previous scholar has established. This is a strikingly original, crisply argued contribution to cultural and religious history."--David A. Hollinger, Preston Hotchkis Professor of History, University of California, Berkeley

"Hedstrom dexterously knots together several cultural threads: liberal Protestantism, middlebrow reading habits, corporate publishing, popular psychology, and seeker spirituality. The expectation that the right religious books—mystical, adventurous, psychologically attuned, and affordable—would arrest modernity’s dissolutions was perhaps another instance of liberal Protestantism’s unrequited optimism, but Hedstrom makes a compelling case for just how potent this publishing mission was from the 1920s through the 1940s and beyond."--Leigh Eric Schmidt, Edward Malinckrodt University Professor, Washington University in St. Louis

"In this engrossing study, Matthew Hedstrom provides nothing less than a series of revelations -- about the construction of liberal religion, the circulation of books, and indeed the making of modern spiritual selves. Hedstrom's work will reshape historians' understanding of religion in 20th-century America. For those who wish to push the historical analysis, this book will also invite new questions about liberal religion in 2013 and beyond."--Lauren F. Winner, Assistant Professor of Christian Spirituality, Duke Divinity School

"Hedstrom brilliantly describes some of the unforeseen results of this new complicity between religion and consumer culture." --The Journal of Unitarian Universalist History

"In the modern age of mass-culture and commoditization, liberal religious intellectuals reasoned that the consumption of good books could make a far-reaching contribution to the spiritual formation of American readers. Matthew Hedstrom delivers a deeply thoughtful and thoroughly researched study that urges us to recognize how liberal religion used mass-culture rather than just sneered at it, and to think hard about reading and spirituality today. The legacy of liberal religion is larger than we might have thought."--David Morgan, Professor of Religion, Duke University

Akhenaten and the Origins of Monotheism
James K. Hoffmeier

Key Selling Points
- Presents original research on the controversial figure Pharaoh Akhenaten
- Argues that Akhenaten was the first monotheist in history
- Rejects the theory of any direct connection between Moses and Akhenaten's religion
- Argues that the origins of monotheism predates Moses and Hebrew monotheism

Summary
Pharaoh Akhenaten, who reigned for seventeen years in the fourteenth century B.C.E, is one of the most intriguing rulers of ancient Egypt. His odd appearance and his preoccupation with worshiping the sun disc Aten have stimulated academic discussion and controversy for more than a century. Despite the numerous books and articles about this enigmatic figure, many questions about Akhenaten and the Atenism religion remain unanswered.

In Akhenaten and the Origins of Monotheism, James K. Hoffmeier argues that Akhenaten was not, as is often said, a radical advocating a new religion, but rather a primitivist: that is, one who reaches back to a golden age and emulates it. Akhenaten's inspiration was the Old Kingdom (2650-2400 B.C.E.), when the sun-god Re/Atum ruled as the unrivaled head of the Egyptian pantheon. Hoffmeier finds that Akhenaten was a genuine convert to the worship of Aten, the sole creator God, based on the Pharaoh's own testimony of a theophany, a divine encounter that launched his monotheistic religious odyssey. The book also explores the Atenist religion's possible relationship to Israel's religion, offering a close comparison of the hymn to the Aten to Psalm 104, which has been identified by scholars as influenced by the Egyptian hymn.

Through a careful reading of key texts, artworks, and archaeological studies, Hoffmeier provides compelling new insights into a religion that predated Moses and Hebrew monotheism, the impact of Atenism on Egyptian religion and politics, and the aftermath of Akhenaten's reign.

Contributor Bio
James K. Hoffmeier was born and raised in Egypt where his passion for the archaeology of Egypt began. During graduate school, he worked with the Akhenaten Temple Project and participated in excavations (1975-1978). From 1999-2008 he directed excavations in North Sinai and in 2005 he discovered unexpected evidence of Akhenaten's religious revolution. Since 1976, Hoffmeier has taught courses on Egyptian history, archaeology, and religion, as well as in the field of Old Testament, and has engaged in research and writing on areas where Egyptology and the Hebrew Bible intersect.

Quotes
"In the history of ideas one early figure stands out as an initiator of change, Akhenaten, king of Egypt. His attempt to simplify understanding of divine power represents a bold exercise in critical thinking. Hoffmeier's book lays out clearly and authoritatively the historical context and the nature of the prevailing concepts against which Akhenaten reacted." --Barry Kemp, Director, the Amarna Project

"Hoffmeier offers a stimulating and judicious re-evaluation of the many controversial historical issues related to the Amarna Period. Particularly thought-provoking is a new interpretation of the origins of Akhenaten's religious ideas based on a phenomenology of religion approach. Akhenaten's experience is identified as a theophany and is examined against other encounters with the divine found in ancient Near Eastern sources. Exploring the questions of whether Atenism was monotheistic and whether it could have influenced Hebrew monotheism, the book will also be of great interest to Biblical
"James Hoffmeier draws upon the latest scholarly research to inform this new study of Atenism. Well-versed in the religious traditions of Egypt, Israel, and the Near East, Hoffmeier utilizes phenomenological, linguistic, and archaeological approaches to argue that Akhenaten’s ‘heretical’ religion was a potent combination of revelation and revivalism. His own excavations of Atenist remains at the border fortress of Tell el-Borg also bring fresh evidence to bear on ever-intriguing issues." --Ellen Morris, Department of Classics and Ancient Studies, Barnard College

"Hoffmeier does an excellent job placing Akhenaten and his religion in the broader context of the history and religions of the entire ancient Near East. Drawing upon texts, archaeological data (including new evidence from his excavations in the Sinai), architecture, and art, he provides innovative insight on a subject that has been extensively studied by so many others." --Emily Teeter, Oriental Institute, University of Chicago

Religion and the Marketplace in the United States
Jan Stievermann, Philip Goff, Detlef Junker, Antho...

Key Selling Points
- Provides powerful insights and open unseen aspects of markets and religions
- Offers contributions from leading scholars and rising experts from both the United States and Europe
- Focuses on the diverse interactions between religious and commercial practices in U.S. history

Summary
Alexis de Tocqueville once described the national character of Americans as one question insistently asked: "How much money will it bring in?'" G.K. Chesterton, a century later, described America as a "nation with a soul of a church." At first glance, the two observations might appear to be diametrically opposed, but this volume shows the ways in which American religion and American business overlap and interact with one another, defining the US in terms of religion, and religion in terms of economics.

Bringing together original contributions by leading experts and rising scholars from both America and Europe, the volume pushes this field of study forward by examining the ways religions and markets in relationship can provide powerful insights and open unseen aspects into both. In essays ranging from colonial American mercantilism to modern megachurches, from literary markets to popular festivals, the authors explore how religious behavior is shaped by commerce, and how commercial practices are informed by religion. By focusing on what historians often use off-handedly as a metaphor or analogy, the volume offers new insights into three varieties of relationships: religion and the marketplace, religion in the marketplace, and religion as the marketplace. Using these categories, the contributors test the assumptions scholars have come to hold, and offer deeper insights into religion and the marketplace in America.

Contributor Bio
Jan Stievermann is Professor of the History of Christianity in the U.S. at Heidelberg University.

Philip Goff is Director of the Center for the Study of Religion and American Culture and Professor of Religious Studies and American Studies, Indiana University Indianapolis.

Detlef Junker is Professor of History Emeritus at Heidelberg University, and Founding Director of the Heidelberg Center for American Studies.

Anthony Santoro is Lecturer in American religious history at the Heidelberg Center for American Studies.

Daniel Silliman is Lecturer in American religious history at the Heidelberg Center for American Studies.

Quotes
"Religion and the Marketplace in the United States offers a sophisticated and timely overview of the historical alliances between religious ideas and practices, on the one hand, and the variety of economic activities animating American life, on the other. Never losing sight of the contemporary relevance of this subject, a star lineup of scholars weighs in on the complexities, nuances, and historical contingencies of buying, selling, praying, and preaching. This volume furthers a much-needed scholarly discussion at a critical moment." --Laurie Maffly-Kipp, Distinguished Professor in the Humanities, Washington University in St. Louis

Muslims in the Western Imagination
Sophia Rose Arjana

Key Selling Points
- Provides a history of imaginary Muslim monsters, an understudied topic
- Explains how these creatures aid in the dehumanization of the Muslim Other
- Examines the dehumanizing ways in which Muslim men have been constructed and represented as monsters.

Summary
Throughout history, Muslim men have been depicted as monsters. The portrayal of humans as monsters helps a society delineate who belongs and who, or what, is excluded. Even when symbolic, as in post-9/11 zombie films, Muslim monsters still function to define Muslims as non-human entities. These are not depictions of Muslim men as malevolent human characters, but rather as creatures that occupy the imagination -- non-humans that exhibit their wickedness outwardly on the skin. They populate medieval tales, Renaissance paintings, Shakespearean dramas, Gothic horror novels, and Hollywood films. Through an exhaustive survey of medieval, early modern, and contemporary literature, art, and cinema, Muslims in the Western Imagination examines the dehumanizing ways in which Muslim men have been constructed and represented as monsters, and the impact such representations have on perceptions of Muslims today.

The study is the first to present a genealogy of these creatures, from the demons and giants of the Middle Ages to the hunchbacks with filed teeth that are featured in the 2007 film 300, arguing that constructions of Muslim monsters constitute a recurring theme, first formulated in medieval Christian thought. Sophia Rose Arjana shows how Muslim monsters are often related to Jewish monsters, and more broadly to Christian anti-Semitism and anxieties surrounding African and other foreign bodies, which involves both religious bigotry and fears surrounding bodily difference. Arjana argues persuasively that these dehumanizing constructions are deeply embedded in Western consciousness, existing today as internalized beliefs and practices that contribute to the culture of violence--both rhetorical and physical--against Muslims.

Contributor Bio
Sophia Rose Arjana holds an M.A. from Columbia University, an M.T.S. from Emory University, and a Ph.D. from the University of Denver and Illiff School of Theology. Her main areas of research are imaginary Muslim monsters, Muslim representations in popular culture, non-hajj pilgrimage traditions in Islamic societies, liturgy in North American Muslim communities, and Jewish and Islamic liberative theology. She has published articles on Islamic shrine architecture and the role of racial constructions in Orientalist discourse and has forthcoming book chapters on female and queer imams in the United States, liberation theology, and the Iranian sociologist Ali Shari'ati.

Quotes
"Islamophobia is a broad pathology of our times. Pegged to September 11, 2001, it has continued to flourish in the shadow of subsequent wars waged by the US and its allies, throughout the Middle East. While Abu Ghraib became one of the showcases of American horror, Homeland set the mark for thinking about, or imagining, Muslim enemies. Both are highlighted in this, the first genealogy, which is also a semiotics, of Islamophobia. A well-researched, carefully staged book, it illumines how brutal images of monster Muslims have become commonplace, almost reflexive in the long afterlife of the War on Terror."
--Bruce Lawrence, Professor of Islamic Studies Emeritus, Duke University

"Rigorously historical, and partaking of the best of discursive analysis, this is a remarkable study of the distorted mirror in which the Western imagination has conceived of Muslims. As Arjana demonstrates, this tells me almost nothing about Muslims, and a great deal about the Western imagination. Arjana makes a persuasive case that in order
to understand the dehumanizing practices in Guantanamo Bay, Abu Ghraib, Bagram, and elsewhere, we need to cast a much longer critical look at the history of the Western imaginaires about Muslims as Monsters. Essential reading for Islamic studies, American studies, and European history."
--Omid Safi, Director of Duke Islamic Studies Center, Duke University

"In *The Satanic Verses*, Salman Rushdie wrote this about the power of representation: "They describe us . . . that's all. They have the power of description, and we succumb to the pictures they construct." In her exhaustive and often disturbing work, Sophia Arjana catalogues the many ways in which Muslims have been described as monsters. It is a compelling book."
--Amir Hussain, Editor, *Journal of the American Academy of Religion*

**Tafsir and Islamic Intellectual History**

*Exploring the Boundaries of a Genre*

Andreas Görke, Johanna Pink

---

**Key Selling Points**

- Offers the only up-to-date survey of scholarship on tafsir as a genre and its place within the broader framework of Muslim scholarship.
- The first attempt at analyzing the fields in which Muslim exegetical activity takes place, its relation to other fields of learning, and the conditions that influence the results of exegesis.
- Includes chapters by many leading experts in the field of tafsir study.

*The first comprehensive attempt at describing the genre of Qur'anic exegesis in its broader intellectual context.*

---

**Summary**

How and when did Qur'anic exegesis (*tafsir*) emerge as a literary genre of its own? To what extent was it influenced by other disciplines, such as law, theology, or philosophy? How did different political or theological agendas shape works of *tafsir*, and in what ways did the genre develop over time and in different regions? These are some of the major questions which this book seeks to address.

This book constitutes the first comprehensive attempt at describing the genre of Qur'anic exegesis in its broader intellectual context. Its aim is to provide a framework for understanding the boundaries of *tafsir* and its interaction with other disciplines of learning, as well as the subgenres and internal divisions within the genre. It discusses the emergence of the genre in the beginnings of Islamic history and the changes and potential ruptures it has experienced in later times, the role of hadith, law, language, philosophy, theology, and political ideology for the interpretive process, the regional dimension, the influx of modernist ideas and the process of writing *tafsir* in languages other than Arabic.

Among the fifteen authors who have contributed to the volume are leading scholars in the field as well as young researchers, which makes for a unique and fresh perspective on a field that has long been reduced to its instrumental value for understanding the Qur'an. Covering the time from the formation of Qur'anic exegesis until the present, it is a valuable resource for advanced students and scholars in the field.

Scripture, Poetry, and the Making of a Community
Angelika Neuwirth

Key Selling Points
- Offers a new methodological approach to the study of the Qur'an
- Relocates the Qur'an within Late Antiquity
- Contextualises the Qur'an's heritage with both Biblical and Arab poetic heritage

Summary
We are used to understanding the Qur'an as the "Islamic text" par excellence, an assumption which, when viewed historically, is not evident at all. More than twenty years before it rose to the rank of Islamic Scripture, the Qur'an was an oral proclamation addressed by the Prophet Muhammad to pre-Islamic listeners, for the Muslim community had not yet been formed. We might best describe these listeners as individuals educated in late antique culture, be they Arab pagans familiar with the monotheistic religions of Judaism and Christianity or syncretists of these religions, or learned Jews and Christians whose presence is reflected in the Medinan suras. The interactive communication process between Muhammad and these groups brought about an epistemic turn in Arab Late Antiquity: with the Qur'anic discovery of writing as the ultimate authority, the nascent community attained a new "textual coherence" where Scripture, with its valorisation of history and memory, was recognised as a guiding concept. It is within this new biblically imprinted world view that central principles and values of the pagan Arab milieu were debated. This process resulted in a twin achievement: the genesis of a new scripture and the emergence of a community. Two great traditions, then, the Biblical, transmitted by both Jews and Christians, and the local Arabic, represented in Ancient Arabic poetry, appear to have established the field of tension from which the Qur'an evolved; it is both Scripture and Poetry which have produced and shaped the new Muslim community.

Contributor Bio
Angelika Neuwirth was educated in Classics and Oriental Studies at German and international universities (Italy, Iran and Israel). She has taught at the Universities of Munich, Amman, Bamberg, and Cairo, and has held the Chair of Arabic Studies at the Freie Universitat Berlin since 1991. From 1994 to 1999 she served as the director of the Orient-Institut der Deutschen Morgenlandischen Gesellschaft in Beirut and Istanbul. Her major fields of research are classical and modern Arabic literature and Arab Late Antiquity studies. In several recent publications, Professor Neuwirth has tried to vindicate the Qur'an as a Late Antique text, which--though deeply rooted in Arab culture--has contributed creatively to a number of major theological discourses. Professor Neuwirth has been acknowledged for her novel approach to interreligious studies by being bestowed several honorary doctorates, academy memberships and professional awards.

The Meaning of the Word
Lexicology and Qur’anic Exegesis
S. R. Burge

Key Selling Points
• The first in-depth discussion focusing on the relationship between the interpretation of the Qur’an and the meanings of words, from the beginnings of Qur’anic exegesis to the contemporary period.
• Analyzes individual tafsir scholars' approaches to lexicology, as well as offering comparative thematic studies of law, women in Islam, and theology.
• Contextualizes debates about the translation of the Qur’an in contemporary Islam. Examines the different ways in which Muslim exegetes have handled words in the Qur’an.

Summary
The basic intention of Qur’anic exegesis (tafsir) is to understand what the text of the Qur’an means. Before attempting to understand anything of the Qur’anic worldview, its theology and ethical values, there is a need for exegetes to engage with the individual words found in the Qur’an itself. Yet, exegetes and translators, whether medieval or modern, have different theological perspectives, which influence how they do this. Many modern scholars have recognized that lexicology plays an important part in exegesis, but there are few studies of how exegetes use it to develop their interpretations of the Qur’an or that address lexicology in Qur’anic exegesis in any depth. This volume of essays addresses this gap in the scholarship.

The Meaning of the Word provides an overview of the development of lexicological analysis in the tafsir tradition, and examines how exegetes interpreted words in the Qur’an. The contributions reflect on lexicology in Qur’anic exegesis through studies of a wide range of subjects, from linguistics to literary criticism, and law and gender to mysticism; examinations of the issue of lexicology in the Arab, Persian, Turkish, and European worlds; and studies of the earliest discussions of Qur’anic lexica to those made in twentieth-century Turkey and recent English translations of the Qur’an.

Methodism in the American Forest
Russell E. Richey

Key Selling Points
• Recognizes a threefold pattern in the Methodist movement's engagement with the ever-moving American frontier as wilderness, shady grove, and garden
• Shows that the camp meetings that Methodism made their own in the early nineteenth century metastasized into five different forms as the church settled into towns and cities
• Explores the possibilities in Methodist camp meeting and forest ministries for a fuller articulation of doctrine, specifically of a doctrine of God
• Explores the ways in which Methodist preachers interacted with and utilized the American woodland, and the role camp meetings played in the denomination's spread across the country

Summary
During the nineteenth century, camp meetings became a signature program of American Methodists and an extraordinary engine for their remarkable evangelistic outreach. Methodism in the American Forest explores the ways in which Methodist preachers interacted with and utilized the American woodland, and the role camp meetings played in the denomination's spread across the country.

Half a century before they made themselves such a home in the woods, the people and preachers learned the hard way that only a fool would adhere to John Wesley's mandate for preaching in fields of the New World. Under the blazing American sun, Methodist preachers found a better outdoor sanctuary for larger gatherings: under the shade of great oaks, a natural cathedral, where they held forth with fervid sermons. The American forests, argues Russell E. Richey, served the preachers in another important way. The remote, garden-like solitude provided them with a place to seek counsel from the Holy Spirit, serving as a kind of Gethsemane. As seen by the American Methodists, the forest was also a desolate wilderness, and a means for them to connect with Israel's wilderness years after the Exodus and Jesus's forty days in the desert after his baptism by John.

Undaunted, the preachers slashed their way through, following America's expanding settlement, and gradually sacralizing American woodlands as cathedral, confessional, and spiritual challenge—as shady grove, as garden, and as wilderness. The threefold forest experience became a Methodist standard. The meeting of Methodism's basic governing body, the quarterly conference, brought together leadership of all levels. The event stretched to two days in length and soon great crowds were drawn by the preaching and eventually the sacraments that were on offer. Camp meetings, if not a Methodist invention, became the movement's signature, a development that Richey tracks throughout the years that Methodism matured, becoming a central denomination in America's religious landscape.

Contributor Bio
Russell E. Richey, author or editor of twenty books and an array of articles on American Methodism, held professorial and administrative posts successively at Drew, Duke, and Emory universities. He is Dean Emeritus of Candler School of Theology and William R. Cannon Distinguished Professor of Church History Emeritus. He now serves as Visiting Professor at Duke Divinity School.

The Spirit Moves West
Korean Missionaries in America
Rebecca Y. Kim

Key Selling Points
- Provides a case study of how missionaries from outside of the West evangelize Americans
- Shows how immigrants construct diverse congregations across race and ethnicity
- Draws on four years of in-depth interviews, participant observations, and surveys of South Korea's largest non-denominational missionary-sending agency and its work in the U.S.
- Examines the phenomena of Korean missionaries in America

Summary
With the extraordinary growth of Christianity in the global south has come the rise of "reverse missions," in which countries in Asia, Africa, and Latin America send missionaries to re-evangelize the West. In The Spirit Moves West, Rebecca Kim uses South Korea as a case study of how non-Western missionaries target Americans, particularly white Americans. She draws on four years of interviews, participant observation, and surveys of South Korea's largest non-denominational missionary-sending agency, University Bible Fellowship, in order to provide an inside look at this growing phenomenon. Known as the "Asian Protestant Superpower," South Korea is second only to the United States in the number of missionaries it sends abroad: approximately 22,000 in over 160 countries. Conducting her research both in the US and in South Korea, Kim studies the motivations and methods of these Korean evangelicals who have, since the 1970s, sought to "bring the gospel back" to America.

By offering the first empirically-grounded examination of this much-discussed phenomenon, Kim explores what non-Western missions will mean to the future of Christianity in America and around the world.

Contributor Bio
Rebecca Y. Kim is the Frank R. Seaver Associate Professor of Sociology and the Director of the Ethnic Studies program at Pepperdine University.

Quotes
"A powerful tale of a growing movement-missionaries to the United States. Wonderfully researched and written, The Spirit Moves West is engaging, important, and a page-turner. For most readers, what is contained in these pages is stunning."

Aquinas's Way to God
The Proof in De Ente et Essentia
Gaven Kerr

Key Selling Points
• First full length study of this proof in the thought of Aquinas
• Ties in this proof of God with other aspects of Aquinas's metaphysics that have surfaced in recent Thomistic studies, e.g. essence/existence composition, participation, creation
• Defends the controversial thesis that God can be known to exist in a philosophically satisfactory fashion
• Proposes what by today's standards is a new theory for thinking of the relationship between creatures and creator

Offers a contemporary interpretation and defense of a much neglected proof for the existence of God offered by St Thomas Aquinas in De Ente et Essentia

Summary
Gaven Kerr provides the first book-length study of St. Thomas Aquinas's much neglected proof for the existence of God in De Ente et Essentia. Chapter 4. He offers a contemporary presentation, interpretation, and defense of this proof, beginning with an account of the metaphysical principles used by Aquinas and then describing how they are employed within the proof to establish the existence of God. Along the way, Kerr engages contemporary authors who have addressed Aquinas's or similar reasoning.

The proof developed in the De Ente is, on Kerr's reading, independent of many of the other proofs in Aquinas's corpus and resistant to the traditional classificatory schemes of proofs of God. By applying a historical and hermeneutical awareness of the philosophical issues presented by Aquinas's thought and evaluating such philosophical issues with analytical precision, Kerr is able to move through the proof and evaluate what Aquinas is saying, and whether what he is saying is true.

By means of an analysis of one of Aquinas's earliest proofs, Kerr highlights a foundational argument that is present throughout the much more commonly studied Thomistic writings, and brings it to bear within the context of analytical philosophy, showing its relevance to the contemporary reader.

Contributor Bio
Gaven Kerr is a husband and father of two, and a lay member of the Order of Preachers (the Dominicans). His work has always been on philosophy generally, notably metaphysics and epistemology, and he specializes in the thought of St. Thomas Aquinas and the general medieval background to his thought. The main goal of his work is to establish the contemporary significance of Aquinas.

Quotes
"Aquinas's De Ente et Essentia was an early work of Aquinas. But it contains a line of thought that characterizes Aquinas's thinking as a whole. Gaven Kerr has mastered this line of thought and presents it in an extremely clear and judicious way. His book is one that anyone interested in Aquinas or in arguments for the belief that God exists should certainly read."
--Brian Davies, author of Thomas Aquinas's Summa Theologiae: A Guide and Commentary

"In this superb study of an early lapidary 'proof' where Thomas Aquinas argues that only what is being can bestow it on others, Gaven Kerr employs a delightfully uncomplicated style to show the central role this spare assertion plays in Aquinas’ metaphysics of creation. Elucidating his unique treatment of esse and essentia allows Kerr to contrast Aquinas with contemporary and classical alternatives as he faces formidable critics by offering free creation as the key to a tour de force as theological as it is metaphysical."
--David Burrell, C.S.C., Hesburgh Professor emeritus, University of Notre Dame
"This is a really interesting book, thought provoking and refreshing in its strict philosophical approach to Aquinas's ontology in *De Ente et Essentia* and for the defense of his ideas about being and God to a contemporary public of professionals schooled in analytical philosophy."

-- R.A. te Velde, Assistant Professor, Department of Systematic Theology and Philosophy, Tilburg School of Catholic Theology

The Oxford Handbook of Kierkegaard
John Lippitt, George Pattison

Key Selling Points
• Publishing in the bicentenary year of Kierkegaard's birth, this handbook showcases leading contemporary scholarship on Kierkegaard's context, key ideas, and legacy.
• Brings together a truly international team of contributors, enabling fruitful dialogue between American, British, German and Danish scholarship.
• Draws extensively on the unique scholarly resources Kierkegaard Research Centre in Copenhagen.
• Makes reference to the latest scholarly edition of Kierkegaard's works throughout.

Brings together an outstanding selection of contemporary specialists and uniquely combines work on the background and context of Kierkegaard's writings, exposition of his key ideas, and a survey of his influence and heritage.

Summary
The Oxford Handbook of Kierkegaard brings together some of the most distinguished contemporary contributors to Kierkegaard research together with some of the more gifted younger commentators on Kierkegaard's work. There is significant input from scholars based in Copenhagen's Soren Kierkegaard Research Centre, as well as from philosophers and theologians from Britain, Germany, and the United States. Part 1 presents some of the philological, historical and contextual work that has been produced in recent years, establishing a firm basis for the more interpretative essays found in following parts. This includes looking at the history of his published and unpublished works, his cultural and social context, and his relation to Romanticism, German Idealism, the Church, the Bible, and theological traditions. Part 2 moves from context and background to the exposition of some of the key ideas and issues in Kierkegaard's writings. Attention is paid to his style, his treatment of ethics, culture, society, the self, time, theology, love, irony, and death. Part 3 looks at the impact of Kierkegaard's thought and at how it continues to influence philosophy, theology, and literature. After an examination of issues around translating Kierkegaard, this section includes comparisons with Nietzsche, Heidegger, and Wittgenstein, as well as examining his role in modern theology, moral theology, phenomenology, postmodernism, and literature.

Contributor Bio
John J. Lippitt is Professor of Ethics and Philosophy of Religion, University of Hertfordshire.

George G. Pattison is Lady Margaret Professor of Divinity, University of Oxford.

Quotes
"Contributors include a number of well-established Kierkegaard scholars, and all chapters conclude with references and suggested readings. Many chapters will be helpful to students and researchers engaged with the writings of Kierkegaard. Summing Up: Highly recommended." --CHOICE

"[The contributors] are all readers of Kierkegaard, passionately engaging with Kierkegaard in their own distinctive ways and with their own distinctive passions and interests. Each looks to read Kierkegaard's works in a way that not only opens the door to the meanings and lessons of these works, but, more importantly, opens the door to the world and life in powerful and enriching ways."--Thomas P. Miles, Notre Dame Philosophical Reviews

Eternal God / Saving Time
George Pattison

Key Selling Points
- Presents important modern discussions of divine eternity.
- Combines approaches from analytic philosophy and phenomenology.
- Shows new aspects to the thought of Nietzsche, Kierkegaard, Rosenzweig, and Heidegger and revisits the contributions of Hegel, British Idealism, Tillich, and Berdyaev.
Attempts to discover what the central religious idea of eternity or of God as "the Eternal" might mean today.

Summary
Starting from the assumption that "time is the horizon of the meaning of Being" (Heidegger), Eternal God / Saving Time attempts to discover what the central religious idea of eternity or of God as "the Eternal" might mean today. Negotiating ideas of divine timelessness and sempiternity (everlastingness) as well as the attempts of some philosophers to develop the idea of a temporal God, Professor George Pattison surveys a range of positions from analytic philosophy and from the continental tradition from Spinoza through Hegel to the present. Intellectual and cultural forces have tended to separate time and eternity, and both philosophical and theological examples of this tendency are examined. Nevertheless, starting from the experience of life in time, some modern thinkers have developed a new approach to the Eternal as what grounds or gives time. This leads through ideas of novelty, utopia, hope, promise, and call to the projection of a creative and transformative memory—remembering the future—that affirms human solidarity and mutual responsibility. Even if this cannot be made good in terms of knowledge, it offers a basis for hope, prayer, and commitment and these options are explored through a range of Christian, Jewish, Greek, and secular thinkers. This development re-envisages the idea of redemption, away from the Augustinian view that time is what we need to be rescued from and towards the idea that time itself might save us from all that is destructive and tyrannical in time's rule over human life.

Contributor Bio
George Pattison is 1640 Professor at the University of Glasgow and has published extensively in theology and the philosophy of religion, especially on Kierkegaard, Heidegger, and the existentialism, as well as on literature and the arts. A former parish priest, he has held posts at King’s College, Cambridge, and at the universities of Aarhus (Denmark) and Oxford. He is a visiting professor at the University of Copenhagen and has been a Montgomery Fellow at Dartmouth College (2013). His publications include The Philosophy of Kierkegaard (2005), Thinking about God in an Age of Technology (2005), God and Being (2011), and Heidegger on Death (2013).

Orthodox Readings of Aquinas
Marcus Plested

Key Selling Points
- The first book to examine the place of Aquinas in the Orthodox Christian world
- Provides new insights for contemporary understanding of Aquinas and Gregory Palamas
- Offers a fresh set of perspectives on the history of Orthodox theology
- Has tangible ecumenical implications for the relationship between the Orthodox and Roman Catholic Churches

Summary
This book is the first exploration of the remarkable odyssey of Thomas Aquinas in the Orthodox Christian world, from the Byzantine to the modern era. Aquinas was received with astonishing enthusiasm across the Byzantine theological spectrum. By contrast, modern Orthodox readings of Aquinas have been resoundingly negative, routinely presenting Aquinas as the archetype of a specifically Western form of theology against which the Orthodox East must set its face. Basing itself primarily on a close study of the Byzantine reception of Thomas, this study rejects such hackneyed dichotomies, arguing instead for a properly catholic or universal construal of Orthodoxy— one in which Thomas might once again find a place. In its probing of the East-West dichotomy, this book questions the widespread juxtaposition of Gregory Palamas and Thomas Aquinas as archetypes of opposing Greek and Latin theological traditions. The long period between the Fall of Constantinople and the Russian Revolution, conventionally written off as an era of sterility and malformation for Orthodox theology, is also viewed with a fresh perspective. Study of the reception of Thomas in this period reveals a theological sophistication and a generosity of vision that is rarely accounted for. In short, this is a book which radically re-thinks the history of Orthodox theology through the prism of the fascinating and largely untold story of Orthodox engagement with Aquinas.

Contributor Bio

Marcus Plested has taught, lectured, and published widely in the field of Orthodox Christian studies. His first book was *The Macarian Legacy: The Place of Macarius-Symeon in the Eastern Christian Tradition* (OUP 2004).

Quotes

[The book] has tremendous implications for ecumenical relations between ourselves and the Eastern Orthodox...Well written and even-handed. --*The Catholic Response*

"The story the author tells is fascinating and holds many surprises for theologians of both Eastern and Western traditions." --*First Things*

"His book is both a revealing historical study of Orthodox attitudes to Aquinas and the West, and a significant contribution to ecumenical dialogue between Orthodox East and Latin West, which, despite Kipling, have met in the past and could do so again to their mutual profit." --*Theology*

"An important theological contribution, a clarion call for the Orthodox Church to be herself rather than to be defined as merely the opposite of all things Western." --*Theological Studies*

"Brilliant." --*New Blackfriars*

"A significant and much needed study." --*The Journal of Theological Studies*

"[A] very fine book." --*Times Literary Supplement*
"Marcus Plested has written a very important book... [A] finely researched and winsomely written survey... Orthodox Readings of Aquinas is a critically important book for Orthodox and Catholics alike." --Nova et VETERA

"...[T]his work is the first of its kind: a historical and theological introduction to the relation between Thomism and many of the major theologians in eastern Orthodoxy since the fourteenth century... Marcus Plested's pioneering book could open many doors for new research on the Byzantine theological tradition. The young English scholar has identified a nearly forgotten gold mine of doctrine, from which he has already brought forth much treasure." --Modern Theology

"...[A]n extraordinarily rich articulation and defense of Orthodox scholasticism... Plested's profoundly erudite study charts an exciting and compelling course." --Matthew Levering, Professor of Theology, University of Dayton

"M. Plested's Orthodox Readings on Aquinas [...] deserves to take the succession of Lossky's book [Mystical Theology of the Eastern Church] as setting a new paradigm regarding the identity and inner coherence of the Orthodox tradition." --Antoine Levy in Nicolaus: Revisita di Teologia ecumenico-patristica

Debates over the Resurrection of the Dead
Constructing Early Christian Identity
Outi Lehtipuu

Key Selling Points
- Focuses on relevant Nag Hammadi texts, not often studied from the perspective of resurrection beliefs.
- Highlights the hermeneutical potential of New Testament texts.
A study of discourses on the resurrection of the dead, examining how early Christian writers developed key texts from the New Testament on the theme

Summary
In Debates over the Resurrection of the Dead, Outi Lehtipuu highlights the striking observation that in many early texts the way that belief in resurrection is formulated is used as a sign of inclusion and exclusion, not only in relation to non-Christians but vis-a-vis other Christians. Those who teach otherwise have deviated from the truth, are not true Christians, and do the works of the devil. Using insights from the sociological study of deviance, Dr Lehtipuu demonstrates that labelling was used as a tool for marking boundaries between those who belonged and those who did not. This was extremely important in the fluid conditions where the small Christian minority groups found themselves. In a situation where there were no universally accepted structures that defined what constituted the true Christian belief, several competing interpretations and their representatives struggled for recognition of their views based on what they believed to be the apostolic tradition.

The most hotly-debated aspect of resurrection was whether it would entail the body of flesh and blood or not. When resurrection would take place was closely related to this. Controversies died since the scriptural legacy was ambiguous enough to allow different hermeneutical solutions. The battle over resurrection was closely related to the question of how scriptures were to be understood as well as to what constituted the human self that would survive death. To demonstrate this a wide variety of texts are studied, from theological treatises (including relevant Nag Hammadi texts) to apocryphal acts and martyrologies. Acknowledging the complexity and diversity of the early Christian movement, this volume views early Christian discourse as part of the broader ancient discursive world where similar debates were going on among both Jews and the majority population.

Contributor Bio
Outi Lehtipuu earned her Ph.D. in Theology at the University of Helsinki in 2004. She works as an Academy Research Fellow at the Department of Biblical Studies of the University of Helsinki. Dr Lehtipuu has published widely on the New Testament, Early Christianity, and gender studies.

Pentecostals, Proselytization, and Anti-Christian Violence in Contemporary India
Chad M. Bauman

Key Selling Points
- Uses database of incidents of violence against India's Christians developed and used exclusively by the author
- Based on extensive interviews and ethnographic work
Uses a detailed analysis of Indian Christian history, contemporary Indian politics, Indian social and cultural characteristics, and Pentecostal belief and practice to account for the contemporary violence against Pentecostals in India

Summary
Every year, there are several hundred attacks on India's Christians. These attacks are carried out by violent anti-minority activists, many of them provoked by what they perceive to be a Christian propensity for aggressive proselytization, or by rumored or real conversions to the faith. Pentecostals are disproportionately targeted.

Drawing on extensive interviews, ethnographic work, and a vast scholarly literature on interreligious violence, Hindu nationalism, and Christianity in India, Chad Bauman examines this phenomenon. While some of the factors in the targeting of Pentecostals are obvious and expected—their relatively greater evangelical assertiveness, for instance—other significant factors are less acknowledged and more surprising: marginalization of Pentecostals by "mainstream" Christians, the social location of Pentecostal Christians, and transnational flows of missionary personnel, theories, and funds. A detailed analysis of Indian Christian history, contemporary Indian politics, Indian social and cultural characteristics, and Pentecostal belief and practice, this volume sheds important light on a troubling fact of contemporary Indian life.

Chad Bauman is Associate Professor of Religion at Butler University and is the author of Christian Identity and Dalit Religion in Hindu India, 1868-1947.

Quotes
"Within India's multi-faith and multi-cultural society, any conversion or change of faith is fraught with danger. This is especially so where any agency claims to represent a permanent and immutable 'majority' of all institutions, as is done by the forces of Hindutva. Chad Bauman is to be commended for having interrogated the intricacies of this extremely difficult subject. He adroitly challenges understandings of anti-Christian violence."
--Robert Eric Frykenberg, Professor of History and South Asian Studies, University of Wisconsin-Madison

The Varieties of Religious Repression
Why Governments Restrict Religion
Ani Sarkissian

Key Selling Points
- Examines the global phenomenon of increasing non-violent restrictions on religion
- Analyzes 101 countries from around the world, and sixteen case studies of countries from Asia, Africa, Europe, the Middle East, and South America over a twenty-year period
- Offers a new way of understanding the similarities and differences of authoritarian regimes

Examines the global phenomenon of increasing non-violent restrictions on religion

Summary
Religious repression—the non-violent suppression of civil and political rights—is a growing and global phenomenon. Though most often practiced in authoritarian countries, levels of religious repression nevertheless vary across a range of non-democratic regimes, including illiberal democracies and competitive authoritarian states.

In The Varieties of Religious Repression, Ani Sarkissian argues that seemingly benign regulations and restrictions on religion are tools that non-democratic leaders use to repress independent civic activity, effectively maintaining their hold on power. Sarkissian examines the interaction of political competition and the structure of religious divisions in society, presenting a theory of why religious repression varies across non-democratic regimes. She also offers a new way of understanding the commonalities and differences of non-democratic regimes by focusing on the targets of religious repression.

Drawing on quantitative data from more than one hundred authoritarian states, as well as case studies of sixteen countries from around the world, Sarkissian explores the varieties of repression that states impose on religious expression, association, and political activities, describing the obstacles these actions present for democratization, pluralism, and the development of an independent civil society.

Contributor Bio
Ani Sarkissian is an Assistant Professor in the Department of Political Science at Michigan State University. In 2006, she received her PhD in comparative politics from the University of California, Los Angeles. Her research addresses the effects of religious regulations, organizations, attitudes, and practices on political development.

Quotes
"Ani Sarkissian steers the scholarly discussion of religion and global politics toward what has been terra nullius -- authoritarian regimes. She charts out this terrain masterfully by identifying the wide variety of forms that religious repression can take and by supporting some bold empirical claims about when such repression will be most severe and how wide it is likely to extend. What she leaves us with is a map that, unlike most, depicts both broad contours and a wealth of interesting detail -- in short, the go-to guide for exploring religion under repression."
--Daniel Philpott, Professor of Political Science and Peace Studies, University of Notre Dame

"The study of religion and politics has typically focused on interactions between church and state in a variety of democratic nations. Ani Sarkissian moves our understanding to a whole new dimension in her wide-ranging, but remarkably nuanced, study of religious repression in autocratic regimes. This book represents a theoretical and empirical tour de force that will not only be of interest to those studying religion, but scholars who are interested in the political dynamics of authoritarian regimes."
--Anthony Gill, author of The Political Origins of Religious Liberty

"Ani Sarkissian draws on data from 101 countries to brilliantly tackle a vital question:
How do politicians in non-democratic states use religious repression as an instrument of their rule -- and why? This book makes an important contribution to our understanding of the relationship between religious pluralism, democracy, and freedom of religious practice and expression."

--Donald E. Miller, Executive Director, Center for Religion and Civic Culture, University of Southern California

The Oxford Handbook of Religion, Conflict, and Peacebuilding
Atalia Omer, R. Scott Appleby, David Little

Key Selling Points
- Combines theoretical concerns with the practical implications of peacebuilding policies
- Offers a comprehensive introduction to the field of religion, conflict, and peacebuilding as well as cutting edge suggestions as to future research trajectories

Summary
This volume provides a comprehensive and interdisciplinary account of the scholarship on religion, conflict, and peacebuilding. Looking far beyond the traditional parameters of the field, the contributors engage deeply with the legacies of colonialism, missionary activism, secularism, orientalism, and liberalism as they relate to the discussion of religion, violence, and nonviolent transformation and resistance.

Featuring numerous case studies from various contexts and traditions, the volume is organized thematically into five different parts. It begins with an up-to-date mapping of scholarship on religion and violence, and religion and peace. The second part explores the challenges related to developing secularist theories on peace and nationalism, broadening the discussion of violence to include an analysis of cultural and structural forms. In the third section, the chapters explore controversial topics such as religion and development, religious militancy, and the freedom of religion as a keystone of peacebuilding. The fourth part locates notions of peacebuilding in spiritual practice by focusing on constructive resources within various traditions, the transformative role of rituals, youth and interfaith activism in American university campuses, religion and solidarity activism, scriptural reasoning as a peacebuilding practice, and an extended reflection on the history and legacy of missionary peacebuilding. The volume concludes by looking to the future of peacebuilding scholarship and the possibilities for new growth and progress.

Bringing together a diverse array of scholars, this innovative handbook grapples with the tension between theory and practice, cultural theory, and the legacy of the liberal peace paradigm, offering provocative, elastic, and context-specific insights for strategic peacebuilding processes.

Seeing the World and Knowing God
Hebrew Wisdom and Christian Doctrine in a Late-Modern Context
Paul S. Fiddes

Key Selling Points
• Stages a dialogue between ancient wisdom literature and the late-modern world.
• Explores the 'turn to theology' and the 'turn to spirituality' within contemporary postmodern philosophy in a new way.
• Develops a Christian doctrine of the Trinity in a form that is relevant to modern thinking and to an understanding of the world gained through both science and semiotics.
• Develops a Christian doctrine of God in which God is always committed to, and affected by, a physical universe.

Stages a dialogue between ancient wisdom literature and the late-modern world

Summary
This book aims to create a Christian theology of wisdom for the present day, in discussion with two sets of conversation-partners. The first are writers of the "wisdom literature" in ancient Israel and the Jewish community in Alexandria. Here, special attention is given to the biblical books of Proverbs, Job and Ecclesiastes. The second conversation-partners are philosophers and thinkers of the late-modern age, among them Jacques Derrida, Emmanuel Levinas, Julia Kristeva, Paul Ricoeur and Hannah Arendt. In the late-modern period there has been a reaction against an inherited conception of the conscious and rational self as mastering and even subjugating the world around, and there has been an attempt to overcome the consequent split between the subject and objects of observation.

Paul S. Fiddes enters into dialogue with these late-modern concerns about the relation between the self and the world, proposing that the wisdom which is indicated by the ancient Hebraic concept of ?okmah integrates a "practical wisdom" of handling daily experience with the kind of wisdom which is "attunement" to the world and ultimately to God as creator and sustainer of all. Fiddes brings detailed exegesis of texts from the ancient wisdom literature into interaction with an account of the subject in late-modern thought, in order to form a theology in which seeing the world is knowing a God whose transcendent reality is always immanent in the signs and bodies of the world. He thus argues that participation in a triune, relational God shapes a wisdom that addresses problems of a dominating self, and opens the human person to others.

Contributor Bio

Paul S. Fiddes is Professor of Systematic Theology at University of Oxford and Director of Research at Regent's Park College, Oxford.

Thomas Aquinas
Faith, Reason, and Following Christ
Frederick Christian Bauerschmidt

Key Selling Points
• Written in an accessible style suitable for those approaching Aquinas for the first time, yet with plenty of material for advanced students of Aquinas.
• Places Aquinas in his medieval academic and religious context.
• Emphasizes Aquinas's theological contribution.
• Offers a brief history of subsequent interpreters of Aquinas's writings.
• Explores the continuing relevance of Aquinas thought.

An introduction to the thought of Thomas Aquinas

Summary
Thomas Aquinas is widely recognized as one of history's most significant Christian theologians and one of the most powerful philosophical minds of the western tradition. But what has often not been sufficiently attended to is the fact that he carried out his theological and philosophical labours as a part of his vocation as a Dominican friar, dedicated to a life of preaching and the care of souls. Fererick Christian Bauerschmidt places Aquinas's thought within the context of that vocation, and argues that his views on issues of God, creation, Christology, soteriology, and the Christian life are both shaped by and in service to the distinctive goals of the Dominicans. What Aquinas says concerning both matters of faith and matters of reason, as well as his understanding of the relationship between the two, are illuminated by the particular Dominican call to serve God through handing on to others through preaching and teaching the fruits of one's own theological reflection.

Contributor Bio
Frederick Christian Bauerschmidt is Professor of Theology at Loyola University Maryland and a Deacon of the Archdiocese of Baltimore. He has previously published on Thomas Aquinas, Christian mysticism, and contemporary Roman Catholic theology.

Quotes
"Bauerschmidt offers what may be the finest substantial introduction to Thomas' theology since the original French edition of Jean-Pierre Torrell's groundbreaking Saint Thomas d'Aquin: maître spirituel, first published in the mid-1990s." --Bernhard Blankenhorn, Modern Theology

The Oxford Handbook of Natural Theology
Russell Re Manning, John Hedley Brooke, Fraser Watts...

Key Selling Points

- Innovative handbook mapping the current and ongoing revival of interest in this cross disciplinary area of study
- Clear volume structure with thirty-eight original essays ordered into five thematic sections, engaging historical, theological, philosophical, scientific, and cultural/aesthetic perspectives on natural theology
- Refuses easy definitions of the scope of natural theology, and encompasses the breadth of debate over the issues involved

The first collection to consider the full breadth of natural theology from both historical and contemporary perspectives and to bring together leading scholars to offer accessible high-level accounts of the major themes.

Summary

The Oxford Handbook of Natural Theology is the first collection to consider the full breadth of natural theology from both historical and contemporary perspectives and to bring together leading scholars to offer accessible high-level accounts of the major themes. The volume embodies and develops the recent revival of interest in natural theology as a topic of serious critical engagement. Frequently misunderstood or polemicized, natural theology is an under-studied yet persistent and pervasive presence throughout the history of thought about ultimate reality - from the classical Greek theology of the philosophers to twenty-first century debates in science and religion.

Of interest to students and scholars from a wide range of disciplines, this authoritative handbook draws on the very best of contemporary scholarship to present a critical overview of the subject area. Thirty eight new essays trace the transformations of natural theology in different historical and religious contexts, the place of natural theology in different philosophical traditions and diverse scientific disciplines, and the various cultural and aesthetic approaches to natural theology to reveal a rich seam of multi-faceted theological reflection rooted in human nature and the environments within which we find ourselves.

Contributor Bio

Russell Re Manning is Lord Gifford Fellow in the School of Divinity, History and Philosophy at University of Aberdeen.

John Hedley Brooke is Emeritus Fellow at Harris Manchester College, Oxford.

Fraser Watts is Reader in Theology and Science, University of Cambridge.

Quotes

"[A] valuable addition to the 'Oxford Handbooks in Religion and Theology' series... recommended." --CHOICE

"[A] fine collection... the editor of this varied and interesting collection is to be commended for his careful tightrope walk through the plethora of rival works. The Oxford Handbook of Natural Theology wisely eschews trespassing on the terrain of its predecessors in favour of original and distinctive meta-disciplinary perspectives on natural theology itself... this book combines diversity of approach with brevity and flashes of genuine depth." --The Expository Times

Messages from the Gods
A Guide to the Useful Plants of Belize
Michael J. Balick, Rosita Arvigo

Key Selling Points
• The comprehensive guide to the ethnobotany and healing plants of Belize.
• Contains over 500 species accounts, as well as interviews and collaborations with native herbal healers, and discussion of the natural and botanic history of the region.
• Over 600 color images.
• The culmination of over 25 years of research sponsored by the New York Botanical Garden.
An unrivaled and comprehensive guide to the healing and other useful plants of Belize

Summary
Despite its small size, Belize is one of the most ecologically diverse nations in Central America. Over 3,400 species of plants can be found here, within six different ecological life zones. Because of this, Belize is paradise for ecotourists, hosting over 300,000 visitors annually, who enjoy the natural habitat and friendly people of this nation. Many of the plants of Belize have a long history of being "useful," with properties that have served traditional herbal healers of the region as well as modern medicinal applications.

With Messages from the Gods: A Guide to the Useful Plants of Belize, Drs. Michael Balick and Rosita Arvigo give us the definitive resource on the many species of plants in Belize and their folklore, as well as the natural history of the region and a detailed discussion of "bush" uses of plants, including for traditional healing. Both Balick and Arvigo bring important perspectives to the project, Balick as ethnobotanical scientist from The New York Botanical Garden, and Arvigo as a former apprentice to a Belizean healer and an experienced physician. The book has been decades in the making, a culmination of a biodiversity research project that The New York Botanical Garden has had in motion since 1987. Drs. Balick, Arvigo and their colleagues have collected and identified thousands of plants from the region, and have worked extensively with hundreds of Belizean people, many of them herbal healers and bushmasters, to record uses for many of the species. This collaboration with local plant experts has produced a fascinating discussion of the intersection of herbal medicine and religion in the area, and these interviews are used to compliment and contextualize the numerous species accounts presented. The book is both a cultural study and a specialized field guide; information is provided on plants used as food, medicine, fiber, in spiritual practices and for many other purposes.

Richly illustrated with over 600 images and photographs, Messages from the Gods: A Guide to The Useful Plants of Belize will serve as the primary reference and guide to the ethnobotany of Belize for many years to come.

Contributor Bio

Dr. Michael J. Balick is the Vice President for Botanical Science, Director, and Phylecology Curator at the Institute of Economic Botany, at The New York Botanical Garden.

Dr. Rosita Arvigo is a naprapathic physician with a clinical practice in Belize.

Messages from the Gods
A Guide to the Useful Plants of Belize
Michael J. Balick, Rosita Arvigo

Key Selling Points
- The comprehensive guide to the ethnobotany and healing plants of Belize.
- Contains over 500 species accounts, as well as interviews and collaborations with native herbal healers, and discussion of the natural and botanic history of the region.
- Over 600 color images.
- The culmination of over 25 years of research sponsored by the New York Botanical Garden.

Summary
Despite its small size, Belize is one of the most ecologically diverse nations in Central America. Over 3,400 species of plants can be found here, within six different ecological life zones. Because of this, Belize is paradise for ecotourists, hosting over 300,000 visitors annually, who enjoy the natural habitat and friendly people of this nation. Many of the plants of Belize have a long history of being "useful," with properties that have served traditional herbal healers of the region as well as modern medicinal applications.

With Messages from the Gods: A Guide to the Useful Plants of Belize, Drs. Michael Balick and Rosita Arvigo give us the definitive resource on the many species of plants in Belize and their folklore, as well as the natural history of the region and a detailed discussion of "bush" uses of plants, including for traditional healing. Both Balick and Arvigo bring important perspectives to the project, Balick as ethnobotanical scientist from The New York Botanical Garden, and Arvigo as a former apprentice to a Belizean healer and an experienced physician. The book has been decades in the making, a culmination of a biodiversity research project that The New York Botanical Garden has had in motion since 1987. Drs. Balick, Arvigo and their colleagues have collected and identified thousands of plants from the region, and have worked extensively with hundreds of Belizean people, many of them herbal healers and bushmasters, to record uses for many of the species. This collaboration with local plant experts has produced a fascinating discussion of the intersection of herbal medicine and religion in the area, and these interviews are used to compliment and contextualize the numerous species accounts presented. The book is both a cultural study and a specialized field guide; information is provided on plants used as food, medicine, fiber, in spiritual practices and for many other purposes.

Richly illustrated with over 600 images and photographs, Messages from the Gods: A Guide to The Useful Plants of Belize will serve as the primary reference and guide to the ethnobotany of Belize for many years to come.

Contributor Bio

Dr. Michael J. Balick is the Vice President for Botanical Science, Director, and Philecology Curator at the Institute of Economic Botany, at The New York Botanical Garden.

Dr. Rosita Arvigo is a naprapathic physician with a clinical practice in Belize.

An Introduction to Drug Synthesis
Graham Patrick

Key Selling Points
- An introduction to the central role of organic synthesis in the development of therapeutically useful drugs
- Written by an author whose name has become synonymous with clear and engaging explanations
- The extensive use of examples and case studies reinforces the relevance of the subject matter to the synthesis of drugs and highlights the different synthetic strategies available
- An Online Resource Centre provides additional teaching and learning resources to augment the printed text
- Explores the central role played by organic synthesis in the process of drug design and development

Summary
Introduction to Drug Synthesis explores the central role played by organic synthesis in the process of drug design and development.

Written by an experienced and talented author to complement his existing Introduction to Medicinal Chemistry, the book illustrates how organic synthesis makes important contributions throughout the drug design and discovery process - from the generation of novel drug structures to the improved efficiency of large scale synthesis.

Avoiding excessively detailed descriptions of the underlying synthetic pathways, the book focuses on how synthesis can be used in a strategic way - how and why different synthetic approaches are adopted, and the pros and cons of each.

With examples used extensively to illustrate the concepts presented, Introduction to Drug Synthesis is the ideal resource for any pharmaceutical or medicinal chemistry student who needs a thorough understanding of how the concepts of organic synthesis are applied to the development of therapeutic drugs.

Online Resource Centre
Introduction to Drug Synthesis is supported by an Online Resource Centre featuring:

For registered adopters:
- Figures from the book in electronic format;

For students:
- A suite of multiple-choice questions to support the learning process;
- Additional case studies
- More detailed descriptions of key synthetic reactions, as a source of further reference.

Contributor Bio
Graham Patrick, University of the West of Scotland

Graham Patrick is a lecturer in Organic Chemistry and Medicinal Chemistry at the University of the West of Scotland, Glasgow. He is the author of four other undergraduate textbooks covering medicinal chemistry and organic chemistry, including Introduction to Medicinal Chemistry, which is now in its fifth edition.

Table Of Contents
PART A: General synthetic principles
1. The role of synthesis in drug discovery
2. Drug synthesis
3. Retrosynthesis
4. Cyclic systems in drug synthesis
5. The synthesis of chiral drugs
6. Combinatorial and parallel synthesis
PART B: Role of synthesis in the drug design and development process
7. Synthesis of Lead Compounds
8. Analogue Synthesis in Drug Design
9. Synthesis of natural products and their analogues
10. Chemical and process development
11. Synthesis of isotopically labelled compounds
PART C: Synthesis of Selected Antibacterial Agents
12. Tetracyclines
13. Erythromycin and macrolide antibacterial agents
14. Quinolones and fluoroquinolones

Theoretical Physics to Face the Challenge of LHC
Lecture Notes of the Les Houches Summer School: Volume 97, August 2011
Laurent Baulieu, Karim Benakli, Michael R. Douglas...

Key Selling Points
- Edited pedagogical lecture notes by renowned scientists
- Describes areas in high energy physics with profound new experimental results from LHC at CERN
- Describes recent developments in the theory of elementary particles
- Contributions from both theorists and experimentalists

Gathers the lecture notes of the Les Houches Summer School that was held in August 2011 for an audience of advanced graduate students and post-doctoral fellows in particle physics, theoretical physics, and cosmology, areas where new experimental results were on the verge of being discovered at CERN.

Summary
The book gathers the lecture notes of the Les Houches Summer School that was held in August 2011 for an audience of advanced graduate students and post-doctoral fellows in particle physics, theoretical physics, and cosmology, areas where new experimental results were on the verge of being discovered at CERN.

Every Les Houches School has its own distinct character. This one was held during a summer of great anticipation that at any moment contact might be made with the most recent theories of the nature of the fundamental forces and the structure of space-time. In fact, during the session, the long anticipated discovery of the Higgs particle was announced. The book vividly describes the fruitful and healthy "schizophrenia" that is the rule among the community of theoreticians who have split into several components: those doing phenomenology, and those dealing with highly theoretical problems, with a few trying to bridge both domains.

The lectures by theoreticians covered many directions in the theory of elementary particles, from classics such as the Supersymmetric Standard Model to very recent ideas such as the relation between black holes, hydrodynamics, and gauge-gravity duality. The lectures by experimentalists explained in detail how intensively and how precisely the LHC collider has verified the theoretical predictions of the Standard Model, predictions that were at the front lines of experimental discovery during the 70’s, 80’s and 90’s, and how the LHC is ready to make new discoveries. They described many of the ingenious and pioneering techniques developed at CERN for the detection and the data analysis of billions of billions of proton-proton collisions.

Table Of Contents
1. The Large Hadron Collider, Lyndon Evans
2. The LHC machine: from beam commissioning to operation and future upgrades, M. Giovannozzi
3. The LHC detectors and the first CMS data, Dan Green
4. About the identification of signals at CMS: analysis and statistics, Bruno Mansoulie
5. Introduction to the theory of LHC collisions, Michelangelo L. Mangano
6. An introduction to the gauge gravity duality, Juan M. Maldacena
7. Introduction to the AdS/CFT correspondence, Jan de Boer
8. Hydrodynamics and black holes, Yaron Oz
9. Supersymmetry, Gian Francesco Giudice
10. Spontaneous breakdown of local conformal invariance in quantum gravity, Gerard ’t Hooft
11. Renormalization group flows and anomalies, Zohar Komargodski
12. Models of electroweak symmetry breaking, Alex Pomarol
13. String phenomenology, Luis Ibanez
14. The string landscape and low energy supersymmetry, Michael R. Douglas
15. The description of N = 1, d = 4 supergravity using twisted supersymmetric fields, Laurent Baulieu
16. AdS Crunches, CFT Falls and cosmological complexity, Eliezer Rabinovici
17. High-energy collisions of particles, strings and branes, Gabriele Veneziano

Adam Miklosi

Key Selling Points
- Builds on the reputation of the first edition, providing a fully revised and comprehensive successor
- Includes a new chapter on genetics, and expanded sections on social cognition
- Highlights directions for future research, and applications of the science for dog trainers and behaviourists

A comprehensive update to the first monograph on dog behaviour, evolution and cognition.

Summary
This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour, evolution, and cognition. The author presents a new ecological approach to the understanding of dog behaviour, demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment.

This second, fully updated edition of Dog Behaviour, Evolution and Cognition starts with an overview of the conceptual and methodological issues associated with the study of the dog, followed by a brief description of their role in human society. An evolutionary perspective is then introduced with a summary of current research into the process of domestication. The central part of the book is devoted to issues relating to the cognitive aspects of behaviour which have received particular attention in recent years from both psychologists and ethologists. The book’s final chapters introduce the reader to many novel approaches to dog behaviour, set in the context of behavioural development and genetics. This second edition recognizes and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology, such as genetic diseases and ageing. Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs, the importance of inter-specific communication in the success of dogs in human communities and the broad aspects of social cognition and how this may contribute to human-dog cooperation.

Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologies and analogies in both evolution and behaviour. The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including graduate students of animal behaviour and cognition, as well as a more general audience of dog enthusiasts, biologists, psychologists, veterinarians, and sociologists.

Animal Social Networks
Jens Krause, Richard James, Daniel Franks, Darren ... 

Key Selling Points
- Demonstrates the application of network theory to the social organization of animals
- Discusses methods as well as theory
- Includes a series of taxonomic overviews, describing methodological challenges and future research directions specific to certain animal groups
- Avoids technical jargon and is richly illustrated to make it accessible to the student reader
- Adopts an interdisciplinary approach

Demonstrates the application of network theory to the social organization of animals.

The scientific study of networks - computer, social, and biological - has received an enormous amount of interest in recent years. However, the network approach has been applied to the field of animal behaviour relatively late compared to many other biological disciplines. Understanding social network structure is of great importance for biologists since the structural characteristics of any network will affect its constituent members and influence a range of diverse behaviours. These include finding and choosing a sexual partner, developing and maintaining cooperative relationships, and engaging in foraging and anti-predator behavior.

This novel text provides an overview of the insights that network analysis has provided into major biological processes, and how it has enhanced our understanding of the social organisation of several important taxonomic groups. It brings together researchers from a wide range of disciplines with the aim of providing both an overview of the power of the network approach for understanding patterns and process in animal populations, as well as outlining how current methodological constraints and challenges can be overcome.

Animal Social Networks is principally aimed at graduate level students and researchers in the fields of ecology, zoology, animal behaviour, and evolutionary biology but will also be of interest to social scientists.

Contributor Bio

Granites

Petrology, Structure, Geological Setting, and Metallogeny

Anne Nedelec, Jean-Luc Bouchez, Peter Bowden

Key Selling Points

- Describes the petrology, geochemistry, structure, magnetic properties, tectonic setting, and metallogeny of granites
- Well-illustrated, including several detailed maps of specific granite plutons
- Includes granite examples from every continent
- Contains a comprehensive bibliography of over 350 references

A modern presentation of granitic rocks, translated into English and updated from the original French edition.

Summary

Granites are emblematic rocks developed from a magma that crystallized in the Earth's crust. They ultimately outcrop at the surface of every continent.

This book - translated, edited, and updated from the original French edition *Petrologie des Granites* published by Vuibert in 2011 - gives a modern presentation of granitic rocks, or granites, from magma genesis to their emplacement into the crust and their crystallization. Mineralogical, petrological, physical, and economical aspects are developed in a succession of 14 chapters. Special 'info boxes' discuss topics for those wishing to deepen their knowledge of the subject. Also included is a glossary, a comprehensive bibliography, as well as descriptions of modern techniques.

Granites are considered in their geological spatial and temporal frame, in relation with Plate Tectonics and Earth History, and assisted by a large number of high quality illustrations.

Contributor Bio

Anne Nedelec, University of Toulouse, Jean-Luc Bouchez, University of Toulouse

Anne Nedelec and Jean-Luc Bouchez are Professors in Earth Sciences at the University of Toulouse. Both are based at the Observatoire Midi-Pyrenees (Geosciences Environnement Toulouse). Anne is a petrologist, specialist of Precambrian Geology. Jean-Luc, a specialist in rock deformation, participated in the development of structural studies in magmatic rocks. Both have a broad experience in laboratory and field studies in Africa, Madagascar, Brazil, Iran, and France, among others.

Peter Bowden has been Professeur Invite in the Departement de Geologie at Universite de Saint Etienne since 1998. He was Editor-in-Chief of the Journal of African Earth Sciences from 1993 to 2001, and Senior Lecturer and co-ordinator for the BSc Geochemistry degree at the University of St Andrews, Scotland, from 1987 to 1998. He is a specialist in African Geology and an expert on A-type granites.

Table Of Contents

1. What is a granite?
2. Origin of granitic magmas
3. Segregation of granitic melt
4. Genesis of hybrid granitoids: mingling and mixing
5. Transport of granitic magma
6. Emplacement and shape of granite plutons
7. Thermomechanical aspects in the country rocks around granite plutons
8. Crystallization of granitics magmas
9. Microstructures and fabrics of granites
10. Magnetic fabrics in granites
11. Zoning in granite plutons
12. Granites and plate tectonics
13. Precambrian granitic rocks
14. Granite metallogeny

Masters of the Universe
Conversations with Cosmologists of the Past
Helge Kragh

Key Selling Points

- Presents the history of cosmology in a new and lively format
- Provides an engaging and distinctive portrait of each of the scientists involved
- By focusing on individuals, the book demonstrates the human complexity of scientific endeavours
- Additional comments and an extensive list of references provide full historical details and the chance to delve deeper into the subject
- Tells the fascinating history of cosmology using a series of fictitious interview transcripts with the field’s leading scientists

Summary

How did our modern picture of the universe come into being? Masters of the Universe tells this fascinating story in an unusual format that blends factual and fictional elements. It is based on a series of interviews that a fictional person conducted with leading astronomers and physicists between 1913 and 1965. Among the interviewed scientists are giants such as Albert Einstein, Edwin Hubble, and George Gamow, but also scientists who are less well known today or not primarily known as cosmologists such as Karl Schwarzschild, Paul Dirac, and Svante Arrhenius.

By following the interviews the reader gets a lively and "almost authentic" impression of the problems that faced this early generation of cosmologists. Although the interviews are purely fictional, a product of the author's imagination, they could have taken place in just the way that is described. They are solidly based on historical facts and, moreover, supplemented with careful annotations and references to the literature. In this way the book bridges the gap between scholarly and popular history of science.

Contributor Bio

Helge Kragh, Professor of History of Science, Aarhus University

After graduation from the University of Copenhagen in physics and chemistry, and a period as a high school teacher, Helge Kragh became Associate Professor at Cornell University, Departments of History and Physics. Since 1990 he has held positions as Curator at the Steno Museum for Science and Medicine, Aarhus University, and as Professor of History of Science at the University of Oslo. In 1997 he was appointed Professor of History of Science and Technology at Aarhus University, Denmark. Kragh is a member of the Royal Danish Academy of Science and Letters, the International Academy for History of Science, the European Society for History of Science, the European Physical Society, and the European Academy of Science.

Making 20th Century Science
How Theories Became Knowledge
Stephen G. Brush

Key Selling Points
• A large-scale examination of scientific development in the 20th century.
• Discusses cases like Mendeleev's Periodic Law, light-quantum hypothesis, and chromosome theory.
• Draws conclusions on the methodology behind the formation of scientific theories.

Summary
Historically, the scientific method has been said to require proposing a theory, making a prediction of something not already known, testing the prediction, and giving up the theory (or substantially changing it) if it fails the test. A theory that leads to several successful predictions is more likely to be accepted than one that only explains what is already known but not understood. This process is widely treated as the conventional method of achieving scientific progress, and was used throughout the twentieth century as the standard route to discovery and experimentation.

But does science really work this way? In Making 20th Century Science, Stephen G. Brush discusses this question, as it relates to the development of science throughout the last century. Answering this question requires both a philosophically and historically scientific approach, and Brush blends the two in order to take a close look at how scientific methodology has developed. Several cases from the history of modern physical and biological science are examined, including Mendeleev's Periodic Law, Kekule's structure for benzene, the light-quantum hypothesis, quantum mechanics, chromosome theory, and natural selection. In general it is found that theories are accepted for a combination of successful predictions and better explanations of old facts.

Making 20th Century Science is a large-scale historical look at the implementation of the scientific method, and how scientific theories come to be accepted.

Contributor Bio
Stephen G. Brush studied chemistry and physics (at Harvard and Oxford) and did research in theoretical physics at the Lawrence Livermore Laboratory. His group at Livermore showed that a gas of electrons (ignoring quantum effects) could condense to a solid at low temperatures and high densities. Inspired by a graduate seminar with Thomas Kuhn at Harvard, he also conducted research in history of science, and switched to that field full-time in 1968. He has published historical works on the kinetic theory of gases, planetary physics, and other topics.

An Introduction to Nonlinear Finite Element Analysis (2nd Edition)
with applications to heat transfer, fluid mechanics, and solid mechanics
J. N. Reddy

Key Selling Points
- A textbook with clear and simple explanations of concepts from nonlinear analysis of topics in engineering
- Covers three main areas: heat transfer, fluid mechanics, and solid and structural mechanics
- Contains worked out examples and problem sets so readers can test their understanding
- Thoroughly revised second edition with substantial amounts of revised material and new chapters
- There is no book on the market that compares with the present work in terms of details of (a) finite element model development, (b) computer implementation, (c) computations involved in solving example problems, and (d) exercise problems.
- To request a copy of the Solutions Manual, visit: //global.oup.com/uk/academic/physics/admin/solutions

Offers an easy-to-understand treatment of nonlinear finite element analysis, which includes element development from mathematical models and numerical evaluation of the underlying physics.

Summary
The second edition of An Introduction to Nonlinear Finite Element Analysis has the same objective as the first edition, namely, to facilitate an easy and thorough understanding of the details that are involved in the theoretical formulation, finite element model development, and solutions of nonlinear problems. The book offers an easy-to-understand treatment of the subject of nonlinear finite element analysis, which includes element development from mathematical models and numerical evaluation of the underlying physics.

The new edition is extensively reorganized and contains substantial amounts of new material. Chapter 1 in the second edition contains a section on applied functional analysis. Chapter 2 on nonlinear continuum mechanics is entirely new. Chapters 3 through 8 in the new edition correspond to Chapter 2 through 8 of the first edition, but with additional explanations, examples, and exercise problems. Material on time dependent problems from Chapter 8 of the first edition is absorbed into Chapters 4 through 8 of the new edition. Chapter 9 is extensively revised and it contains up to date developments in the large deformation analysis of isotropic, composite and functionally graded shells. Chapter 10 of the first edition on material nonlinearity and coupled problems is reorganized in the second edition by moving the material on solid mechanics to Chapter 12 in the new edition and material on coupled problems to the new chapter, Chapter 10, on weak-form Galerkin finite element models of viscous incompressible fluids. Finally, Chapter 11 in the second edition is entirely new and devoted to least-squares finite element models of viscous incompressible fluids. Chapter 12 of the second edition is enlarged to contain finite element models of viscoelastic beams. In general, all of the chapters of the second edition contain additional explanations, detailed example problems, and additional exercise problems. Although all of the programming segments are in Fortran, the logic used in these Fortran programs is transparent and can be used in Matlab or C++ versions of the same. Thus the new edition more than replaces the first edition, and it is hoped that it is acquired by the library of every institution of higher learning as well as serious finite element analysts.

The book may be used as a textbook for an advanced course (after a first course) on the finite element method or the first course on nonlinear finite element analysis. A solutions manual is available on request from the publisher to instructors who adopt the book as a textbook for a course.

To request a copy of the Solutions Manual, visit: //global.oup.com/uk/academic/physics/admin/solutions

J. N. Reddy, Distinguished Professor and Oscar S. Wyatt Endowed Professor, Texas A&M University

J. N. Reddy is internationally known for his contributions to theoretical and applied mechanics and computational mechanics. He is the author of more than 500 journal papers and 18 textbooks with multiple editions. He is the recipient of numerous awards including the Nathan M. Newmark Medal from the American Society of Civil Engineers, the Computational Solid Mechanics Award from the U.S. Association of Computational Mechanics, and the Computational Mechanics Award from the Japanese Society of Mechanical Engineers. Professor Reddy is a Fellow of AIAA, ASCE, ASME, American Academy of Mechanics, the American Society of Composites, the U.S. Association of Computational Mechanics, the International Association of Computational Mechanics, and the Aeronautical Society of India. He is a life fellow and Honorary Member of ASME.

Table Of Contents

1. General Introduction and Mathematical Preliminaries
2. Elements of Nonlinear Continuum Mechanics
3. The Finite Element Method: A Review
4. One-Dimensional Problems Involving a Single Variable
5. Nonlinear Bending of Straight Beams
6. Two-Dimensional Problems Involving Single Variable
7. Nonlinear Bending of Elastic Plates
8. Nonlinear Bending of Elastic Shells
9. Finite Element Formulations of Solid Continua
10. Weak-Form Finite Element Models of Flows of Viscous Incompressible Fluids
11. Least-Squares Finite Element Models of Flows of Viscous Incompressible Fluids
Appendix 1: Solution Procedures for Linear Equations
Appendix 2: Solution Procedures for Nonlinear Equations

Physical Hydrodynamics (2nd Edition)
Etienne Guyon, Jean-Pierre Hulin, Luc Petit, Catalin D. Mitescu

Key Selling Points
- Deeply enriched edition of a classical textbook on fluid dynamics
- Links macroscopic and microscopic transport phenomena
- Experiments on fluids are presented in detail
- Simple presentation of mechanisms of flow processes and instabilities
- Richly illustrated, including colour images
- Includes exercises at chapter ends and solutions at the end of the book

A deeply enriched second edition of a classical textbook on fluid dynamics.

Summary
This second edition of Physical Hydrodynamics is a deeply enriched version of a classical textbook on fluid dynamics. It retains the same pedagogical spirit, based on the authors' experience of teaching university students in the physical sciences, and emphasizes an experimental (inductive) approach rather than the more formal approach found in many textbooks in the field.

A new edition was necessary as contact between the mechanics and physics approaches and their communities has increased continuously over the last few decades. Today the field is more widely open to other experimental sciences: materials, environmental, life, and earth sciences, as well as the engineering sciences. Representative examples from these fields have been included where possible, while retaining a general presentation in each case. This book should be useful for researchers and engineers in these various fields.

Images have an essential place in fluid mechanics, and the illustrations in this edition have been completely revisited and widely improved. An inset of colour photographs is provided to stimulate the interest of readers. Exercises have also been added at the end of a number of chapters.

Table Of Contents
1. The physics of fluids
2. Momentum transport under various flow conditions
3. Kinematics of fluids
4. Dynamics of viscous fluids, rheology, and parallel flows
5. Conservation laws
6. Potential flow
7. Vorticity, vortex dynamics, and rotating flows
8. Quasi-parallel flows - lubrication approximation
9. Flows at low Reynolds number
10. Coupled transport; Laminar boundary layers
11. Hydrodynamic instabilities
12. Turbulence

Chern-Simons Theory, Matrix Models, and Topological Strings
Marcos Marino

Key Selling Points
- Only existing book on exciting new developments
- Pedagogical style, based on lectures
- Attractive to both mathematicians and physicists
- Covers well-established and important subjects
An introduction to some of the most recent developments in string theory

Summary
In recent years, the old idea that gauge theories and string theories are equivalent has been implemented and developed in various ways, and there are by now various models where the string theory / gauge theory correspondence is at work. One of the most important examples of this correspondence relates Chern-Simons theory, a topological gauge theory in three dimensions which describes knot and three-manifold invariants, to topological string theory, which is deeply related to Gromov-Witten invariants. This has led to some surprising relations between three-manifold geometry and enumerative geometry. This book gives the first coherent presentation of this and other related topics. After an introduction to matrix models and Chern-Simons theory, the book describes in detail the topological string theories that correspond to these gauge theories and develops the mathematical implications of this duality for the enumerative geometry of Calabi-Yau manifolds and knot theory. It is written in a pedagogical style and will be useful reading for graduate students and researchers in both mathematics and physics willing to learn about these developments.

Spectral Analysis of Musical Sounds with Emphasis on the Piano
David M. Koenig, Delwin D. Fandrich

Key Selling Points
• Unique and new graphical visualization tools
• Avoids the use of mathematics and focuses on discussion and graphics rather than derivation
• Describes graphical methods that can be used in the research, development, and manufacture of pianos
• Provides alternative viewpoints on many of the controversial topics in piano technology
• Can be used in piano technology curriculums

The tools of spectral analysis are applied via graphics to musical sounds, especially those coming from a piano, with emphasis on the visualization of musical sounds rather than the mathematics behind it.

Summary
This book addresses the analysis of musical sounds from the viewpoint of someone at the intersection between physicists, engineers, piano technicians, and musicians.

The study is structured into three parts. The reader is introduced to a variety of waves and a variety of ways of presenting, visualizing, and analyzing them in the first part. A tutorial on the tools used throughout the book accompanies this introduction. The mathematics behind the tools is left to the appendices. Part Two provides a graphical survey of the classical areas of acoustics that pertain to musical instruments: vibrating strings, bars, membranes, and plates. Part Three is devoted almost exclusively to the piano. Several two- and three-dimensional graphical tools are introduced to study various characteristics of pianos: individual notes and interactions among them, the missing fundamental, inharmonicity, tuning visualization, the different distribution of harmonic power for the various zones of the piano keyboard, and potential uses for quality control. These techniques are also briefly applied to other musical instruments studied in earlier parts of the book.

For physicists and engineers there are appendices to cover the mathematics lurking beneath the numerous graphs and a brief introduction to MatlabRG which was used to generate these graphs. A website accompanying the book (https://sites.google.com/site/analysisofsoundsandvibrations/) contains:
- MatlabRG scripts
- mp3 files of sounds
- references to YouTube videos
- and up-to-date results of recent studies

David M. Koenig, Engineering Associate (Retired), Corning, Inc.

David M. Koenig was born in Columbus, Ohio and lived in the nearby town of Grove City until age 17. He attended Bates College and the University of Chicago where he graduated with a B.S. in Chemistry. After obtaining a M.S. in Chemical Engineering at the University of Connecticut he received a Ph.D. in chemical engineering from The Ohio State University. He worked at Corning, Inc. for 27 years in the area of process control and analysis and wrote a book on that subject in 1991. After retirement he wrote a book on process control and then got interested in applying the analysis tools to the piano which led to this book.

Delwin D. Fandrich is Piano Research, Design and Manufacturing Consultant at Fandrich Piano Company.

Table Of Contents
Part 1: Some Basic Sound Waves and Some Simple Tools
1. An Introduction to Some Elementary Waves
2. The Basic Tools of Spectral Analysis
3. Analysis of Several Common Musical Instruments
4. Harmonics in Musical Sounds

Part 2: A Visual Analysis of Vibrating Objects (Strings, Membranes, Bars, Plates)
5. The Vibrating String
6. The Vibrating Bar
7. The Vibrating Membrane
8. The Vibrating Plate

Part 3: The Piano
9. An Introduction to Pianos
10. Some Individual Piano Notes and Interactions Between Them
11. The Missing Fundamental
12. Octave Stretching, Inharmonicity and Railsback Curves
13. Beating, Unisons and Tuning
14. Two Dimensional Graphical Metrics
15. Three Dimensional Graphical Metrics
16. An Investigation into Hammer Knock and Key Striking
17. Evaluation of a Wapin Bridge Conversion
18. Similarities between Pianos and Repeatability of Data Gathering Methods
19. Two Metrics Applied to Other Instruments
20. Use of the Metrics in Production and Development
21. Comments by Delwin Fandrich

Appendix 1. Mathematical Basis for Part One
Appendix 2. Mathematical Basis for Part Two
Appendix 3. Mathematical Basis for Part Three
Appendix 4. Experimental Setup
Appendix 5. A Brief Exposure to Matlab

Phase Space Methods for Degenerate Quantum Gases
Bryan J. Dalton, John Jeffers, Stephen M. Barnett

Key Selling Points
• The only textbook covering phase space theory for both bosonic and fermionic systems
• Shows how phase space theory for fermions based on Grassmann variables leads to equations that can be solved numerically
• Well-structured chapters present full explanations of key ideas and highlight key equations
• Includes end-of-chapter exercises
• Appendices include details of derivations for readers who wish to work through the proofs
Aims to provide a theoretical framework for understanding the physics of degenerate quantum gases.

Summary
Recent experimental progress has enabled cold atomic gases to be studied at nanokelvin temperatures, creating new states of matter where quantum degeneracy occurs - Bose-Einstein condensates and degenerate Fermi gases. Such quantum states are of macroscopic dimensions. This book presents the phase space theory approach for treating the physics of degenerate quantum gases, an approach already widely used in quantum optics. However, degenerate quantum gases involve massive bosonic and fermionic atoms, not massless photons.

The book begins with a review of Fock states for systems of identical atoms, where large numbers of atoms occupy the various single particle states or modes. First, separate modes are considered, and here the quantum density operator is represented by a phase space distribution function of phase space variables which replace mode annihilation, creation operators, the dynamical equation for the density operator determines a Fokker-Planck equation for the distribution function, and measurable quantities such as quantum correlation functions are given as phase space integrals. Finally, the phase space variables are replaced by time dependent stochastic variables satisfying Langevin stochastic equations obtained from the Fokker-Planck equation, with stochastic averages giving the measurable quantities.

Second, a quantum field approach is treated, the density operator being represented by a distribution functional of field functions which replace field annihilation, creation operators, the distribution functional satisfying a functional FPE, etc. A novel feature of this book is that the phase space variables for fermions are Grassmann variables, not c-numbers. However, we show that Grassmann distribution functions and functionals still provide equations for obtaining both analytic and numerical solutions. The book includes the necessary mathematics for Grassmann calculus and functional calculus, and detailed derivations of key results are provided.

Bryan J. Dalton, Professor, Centre for Quantum and Optical Science, Swinburne University of Technology, Melbourne; John Jeffers, Reader, Department of Physics, University of Strathclyde; Stephen M. Barnett, Professor of Quantum Optics, School of Physics and Astronomy, University of Glasgow

Bryan Dalton obtained a PhD degree in 1966 from Monash University. Following postdoctoral positions at University of Chicago and Australian National University, he joined the Department of Physics, University of Queensland in 1970, retiring as a Reader in 2000. His research was in theoretical quantum optics on topics such as non-classical states of light, coherent population trapping, laser-induced continuum structures, quantum beats, squeezed light spectroscopy and macroscopic cavity quantum electrodynamics. After 2000, he held research fellow positions at University of Sussex and Swinburne University of Technology, where he is currently an Adjunct Professor. He recently spent six months at University College, Cork as an ETS Walton Visiting Fellow. His more recent research interests have included decoherence effects in quantum...
computers, phase space theory in quantum and atom optics for Bose-Einstein condensates and Fermi gases, and entanglement theory for identical particle systems.

John Jeffers is a Reader in the Physics Department at the University of Strathclyde and has been a researcher in quantum optics for twenty years. He obtained his PhD in Theoretical Physics from the University of Essex in 1993. Since then his research interests have included quantum dielectrics, quantum imaging, retrodictive quantum theory, quantum communication, quantum optical amplification and degenerate quantum gases.

Stephen Barnett has been Professor of Quantum Optics since 1995, first at the University of Strathclyde and more recently at the University of Glasgow. He is best known for his discovery, with David Pegg, of the quantum phase operator, but he has wide-spread interests in quantum optics, quantum information, optics and, of course, cold-atom physics. His work has been recognised by the Royal Society, the Royal Society of Edinburgh and the Optical Society of America, all of which have elected him a Fellow. He was awarded the 2013 Dirac Medal and Prize for theoretical physics by the Institute of Physics.

Table Of Contents

1. Introduction
2. States and Operators
3. Complex Numbers and Grassmann Numbers
4. Grassmann Calculus
5. Coherent States
6. Canonical Transformations
7. Phase Space Distributions
8. Fokker-Planck Equations
9. Langevin Equations
10. Application to Few Mode Systems
11. Functional Calculus for C-Number and Grassmann Fields
12. Distribution Functionals in Quantum-Atom Optics
13. Functional Fokker-Planck Equations
14. Langevin Field Equations
15. Application to Multi-Mode Systems
16. Further Developments
Appendix A: Fermion Anti-Commutation Rules
Appendix B: Markovian Master Equation
Appendix C: Grassmann Calculus
Appendix D: Properties of Coherent States
Appendix E: Phase Space Distributions for Bosons and Fermions
Appendix F: Fokker-Planck Equations
Appendix G: Langevin Equations
Appendix H: Functional Calculus for Restricted Boson and Fermion Fields
Appendix I: Applications to Multi-Mode Systems

Living with the Stars
How the Human Body is Connected to the Life Cycles of the Earth, the Planets, and the Stars
Karel Schrijver, Iris Schrijver

Key Selling Points
- Shows the many connections between the human body and the world around it, from microbes to the stars
- Explains the impermanence of the human body and of the world in which we live, and how cycles of creation and destruction maintain our body
- Makes accessible complex concepts
- Enriches chapters with quotes and human interest stories
- All chapters end with a listing of key points

Describes the many fascinating connections between the universe and the human body, which range from the makeup of DNA and human cells, growth and aging, to stellar evolution and the beginning of the universe.

Summary

Living with the Stars tells the fascinating story of what truly makes the human body. The body that is with us all our lives is always changing. We are quite literally not who we were years, weeks, or even days ago: our cells die and are replaced by new ones at an astonishing pace. The entire body continually rebuilds itself, time and again, using the food and water that flow through us as fuel and as construction material. What persists over time is not fixed but merely a pattern in flux.

We rebuild using elements captured from our surroundings, and are thereby connected to animals and plants around us, and to the bacteria within us that help digest them, and to geological processes such as continental drift and volcanism here on Earth. We are also intimately linked to the Sun's nuclear furnace and to the solar wind, to collisions with asteroids and to the cycles of the birth of stars and their deaths in cataclysmic supernovae, and ultimately to the beginning of the universe. Our bodies are made of the burned out embers of stars that were released into the galaxy in massive explosions billions of years ago, mixed with atoms that formed only recently as ultrafast rays slammed into Earth's atmosphere. All of that is not just remote history but part of us now: our human body is inseparable from nature all around us and intertwined with the history of the universe.

Karel Schrijver, Senior Fellow, Lockheed Martin Advanced Technology Center, California, Iris Schrijver, Professor of Pathology and Pediatrics, Stanford University School of Medicine Pathology Department

Karel Schrijver is a Senior Fellow at Lockheed Martin's Advanced Technology Center in Palo Alto, California. He was trained as a stellar astrophysicist, but soon focused on the Sun as the one star that regulates life on Earth. His professional interests range from the magnetism in the solar interior and atmosphere to interplanetary space, to the environments of planets, and to the impacts of space weather on human technology. He has authored many research publications and several pieces for the general public, but this is the first book reaching beyond his daily work. He never tires from looking at the beautiful star that we live with, observed with instruments in space that capture the Sun's atmosphere in colors that cannot reach the unaided human eye.

Iris Schrijver is a Professor of Pathology and Pediatrics at Stanford University School of Medicine. She is a physician with medical specialty training in both genetics and pathology, and she directs the Molecular Pathology laboratory at the Stanford Medical Center. This laboratory provides diagnostic testing for children and adults with inherited conditions and with cancers. Depending on the condition tested for, the testing helps to make a diagnosis, to establish the prognosis, to select the right treatment, and to monitor for recurrence of disease. Her research targets the causes of hereditary hearing loss and cystic fibrosis, and the development and application of optimal diagnostic methods. She has authored and edited original research articles, book chapters, and
books. She is fascinated by all the connections between her world of DNA, Karel's universe, and the sheer multitude of links between them, so paramount to all aspects of life.

Introduction to Modern Dynamics
Chaos, Networks, Space and Time
David D. Nolte

Key Selling Points
- Introduces students to some of the most exciting contemporary topics of physics
- Mathematical descriptions are kept at a middle-undergraduate level for easy comprehension
- Contains many worked examples and computer simulations
- Includes current high-interest topics (network theory, econophysics, and evolutionary dynamics)
- Replaces traditional junior-level dynamics texts

Presenting a unifying approach to the physics of chaos, nonlinear systems, dynamic networks, evolutionary dynamics, econophysics, and the theory of relativity.

Summary
The best parts of physics are the last topics that our students ever see. These are the exciting new frontiers of nonlinear and complex systems that are at the forefront of university research and are the basis of many high-tech businesses. Topics such as traffic on the World Wide Web, the spread of epidemics through globally-mobile populations, or the synchronization of global economies are governed by universal principles just as profound as Newton's laws. Nonetheless, the conventional university physics curriculum reserves most of these topics for advanced graduate study. Two justifications are given for this situation: first, that the mathematical tools needed to understand these topics are beyond the skill set of undergraduate students, and second, that these are speciality topics with no common theme and little overlap.

Introduction to Modern Dynamics dispels these myths. The structure of this book combines the three main topics of modern dynamics - chaos theory, dynamics on complex networks, and general relativity - into a coherent framework. By taking a geometric view of physics, concentrating on the time evolution of physical systems as trajectories through abstract spaces, these topics share a common and simple mathematical language through which any student can gain a unified physical intuition. Given the growing importance of complex dynamical systems in many areas of science and technology, this text provides students with an up-to-date foundation for their future careers.

Introduction to General Relativity, Black Holes, and Cosmology
Yvonne Choquet-Bruhat

Key Selling Points
- Written by the key expert in the field of mathematical relativity
- Simple yet precise introduction to General Relativity
- Lays out the foundations and consequences of General Relativity, allowing the reader to understand the fundamental theory
- Provides recent remarkable experimental and observational results
- Problem and solution sections are included at the end of each chapter

A precise yet simple introduction to the foundations and main consequences of General Relativity.

Summary
General Relativity is a beautiful geometric theory, simple in its mathematical formulation but leading to numerous consequences with striking physical interpretations: gravitational waves, black holes, cosmological models, and so on.

This introductory textbook is written for mathematics students interested in physics and physics students interested in exact mathematical formulations (or for anyone with a scientific mind who is curious to know more of the world we live in), recent remarkable experimental and observational results which confirm the theory are clearly described and no specialised physics knowledge is required. The mathematical level of Part A is aimed at undergraduate students and could be the basis for a course on General Relativity. Part B is more advanced, but still does not require sophisticated mathematics.

Based on Yvonne Choquet-Bruhat's more advanced text, General Relativity and the Einstein Equations, the aim of this book is to give with precision, but as simply as possible, the foundations and main consequences of General Relativity. The first five chapters from General Relativity and the Einstein Equations have been updated with new sections and chapters on black holes, gravitational waves, singularities, and the Reissner-Nordstrom and interior Schwarzchild solutions.

The rigour behind this book will provide readers with the perfect preparation to follow the great mathematical progress in the actual development, as well as the ability to model, the latest astrophysical and cosmological observations. The book presents basic General Relativity and provides a basis for understanding and using the fundamental theory.

Contributor Bio
Yvonne Choquet-Bruhat, French Academy of the Sciences, Paris and the American Academy of Arts and Science

Yvonne Choquet-Bruhat has worked on General Relativity (and other subjects in mathematics and physics) for some sixty years, publishing over 300 scientific papers (the most recent in July 2011). She was elected President of the International Society of General Relativity between 1980 and 1983, was the first woman to be elected to the French Academy of Sciences, is a member of the Academy of Arts and Sciences in Boston, and an elected honorary member of both the Moscow and London Mathematical Societies. She is a recipient of the Danie Heineman Prize of the American Physical Society and of the Marcel Grossman prize. Professor Emeritus of the University of Paris she is also a permanent visitor of the l'institut des hautes etudes scientifiques.

Table Of Contents

Part A: Fundamentals
I. Riemannian and Lorentzian Geometry
II. Special Relativity
III. General Relativity
IV. The Einstein equations
V. The Schwarzschild spacetime.RK3
VI. Black holes
VII. Cosmology

Part B: Advanced Topics
VIII. General Einsteinian spacetimes. The Cauchy problem.
IX. Relativistic fluids
X. Relativistic Kinetic Theory

A Field Guide to the Reptiles of Thailand
Tanya Chan-ard, Jarujin Nabhitabhata, John W. K. Parr

Key Selling Points
- Contains species account of every known species of reptile in Thailand.
- Also features sections on the climate and zoogeography of Thailand, and discusses conservation of endangered species.
- Introduces terms and practices, making the book ideal for both herpetologists and ecologists as well as non-professional enthusiasts.

The definitive and complete guide to reptile life in Thailand, containing species accounts for every known species of reptile in the country.

Summary
Thailand is home to over 350 species of reptiles, consisting of many kinds of turtles and tortoises, lizards, snakes and crocodiles. With its extensive network of protected areas, Thailand is one of the richest and most ecologically diverse countries in the world. However, many of these species are being threatened more than ever before, including habitat loss caused by agricultural expansion and intensification, and from wildlife trade. For herpetologists and naturalists, understanding the reptiles of Thailand is now more important than ever before.

With A Field Guide to the Reptiles of Thailand, Tanya Chan-ard, John Parr, and Jarujin Nabhitabhata present the definitive resource for identifying and understanding all known species of reptile in the region. It is the only updated and complete guide to the country’s reptilian life in existence. The book contains an account of every species, complete with nomenclature, colour illustrations, and range maps of known locations. The accounts include discussion of behaviour, morphological measurements, and habitat, as well as the most current information on each species’ conservation status. The authors explain the current system of classifying the threat level of endangerment, making the presented information and terminology understandable and useful. The introduction to the book discusses the history of herpetology in Thailand, as well as its climate, physiography, and zoogeography. A section on how to use the guide most effectively has also been included to make the book accessible to a wide range of both scientists and nature enthusiasts. A Field Guide to the Reptiles of Thailand is the definitive and most comprehensive resource for herpetologists, naturalists, and conservationists working in Thailand.

Contributor Bio
Tanya Chan-ard is the Director of the Reference Collection at the Natural History Museum in Pathum Thani, Thailand.

**Novel Superfluids**

**Volume 2**

Karl-Heinz Bennemann, John B. Ketterson

---

**Key Selling Points**

- Broad coverage of superfluidity
- First book to treat superfluidity as a whole
- All chapters written by acknowledged experts
- Integrates diverse fields of physics
- Shows superfluidity is truly fundamental in physics

Continues the presentation of recent results on superfluids, including novel metallic systems, superfluid liquids, and atomic/molecular gases of bosons and fermions.

---

**Summary**

Volume 2 of *Novel Superfluids* continues the presentation of recent results on superfluids, including novel metallic systems, superfluid liquids, and atomic/molecular gases of bosons and fermions, particularly when trapped in optical lattices. Since the discovery of superconductivity (Leyden, 1911), superfluid 4He (Moscow and Cambridge, 1937), superfluid 3He (Cornell, 1972), and observation of Bose-Einstein Condensation (BEC) of a gas (Colorado and MIT, 1995), the phenomenon of superfluidity has remained one of the most important topics in physics. Again and again, novel superfluids yield surprising and interesting behaviors. The many classes of metallic superconductors, including the high temperature perovskite-based oxides, MgB2, organic systems, and Fe-based pnictides, continue to offer challenges. The technical applications grow steadily. What the temperature and field limits are remains illusive. Atomic nuclei, neutron stars and the Universe itself all involve various aspects of superfluidity, and the lessons learned have had a broad impact on physics as a whole.

Physics Project Lab
Paul Gluck, John King

Key Selling Points
• Satisfies a deeply felt need to involve beginners in extended experimental investigations of physical phenomena
• Describes over 50 extended projects
• Separate chapters devoted to mechanics, electricity, acoustics, liquids, optics and heat
• Projects make use of a wide range of easily-available materials

Over 50 extended projects are described in detail.

Summary
This book is the result of many years of experience of the authors in guiding physics projects. It aims to satisfy a deeply felt need to involve students and their instructors in extended experimental investigations of physical phenomena.

Over fifty extended projects are described in detail, at various levels of sophistication, aimed at both the advanced high school, as well as first and second year undergraduate physics students, and their instructors. Carrying out these projects may take anything from a few days to several weeks, and in some cases months. Each project description starts with a summary of theoretical background, proceeds to outline goals and possible avenues of exploration, suggests needed instrumentation, experimental setup and data analysis, and presents typical results which can serve as guidelines for the beginner researcher.

Separate parts are devoted to mechanics, electromagnetism, acoustics, optics, liquids, and thermal physics. An additional appendix suggests twenty further ideas for projects, giving a very brief description for each and providing references for pursuing them in detail. We also suggest a useful library of basic texts for each of the topics treated in the various parts.

Table Of Contents
Introduction: Projects: why and how?
Part 1: Mechanics
1. Bouncing balls
2. Mechanics of soft springs
3. Pulse speed in falling dominoes
4. A variable mass oscillator
5. Rotating vertical
6. Cycloidal paths
7. Physics of rubber bands and cords
8. Oscillation modes of a rod
Part 2: Electromagnetism
9. Physics of incandescent lamps
10. Propulsion with a solenoid
11. Magnetic dipoles
12. The jumping ring of Elihu Thomson
13. Microwaves in dielectrics I
14. Microwaves in dielectrics II
15. The Doppler effect
16. Noise
17. Johnson noise
18. Network analog for lattice dynamics
19. Resistance networks
Part 3: Acoustics
20. Vibrating wires and strings
21. Physics with loudspeakers
22. Physics of the tuning fork
23. Acoustic resonance in pipes
24. Acoustic cavity resonators and filters
25. Room acoustics
26. Musical instruments: the violin
27. Musical instruments: the guitar
28. Brass musical instruments

Part 4: Liquids
29. Sound from gas bubbles in a liquid
30. Shape and path of air bubbles in a liquid
31. Ink diffusion in water
32. Refractive index gradients
33. Light scattering by surface ripples
34. Diffraction of light by ultrasonic waves in liquids
35. The circular hydraulic jump
36. Vortex physics
37. Plastic bottle oscillator
38. Salt water oscillator

Part 5: Optics
39. Birefringence in cellulose tapes
40. Barrier penetration
41. Reflection and transmission of light
42. Polarisation by transmission
43. Laser speckle
44. Light scattering from suspensions
45. Light intensity from a line source
46. Light interference in reflecting tubes

Part 6: Temperature & Heat
47. Cooling I
48. Cooling II
49. The Leidenfrost effect I
50. The Leidenfrost effect II
51. The drinking bird
52. Liquid vapor equilibrium
53. Solar radiation flux

Appendix A: Project ideas
Appendix B: Facilities, materials, devices and instruments

**War, Peace, and Human Nature**
*The Convergence of Evolutionary and Cultural Views*
Douglas P. Fry

**Key Selling Points**
- Advances an interdisciplinary scientific understanding of war and peace within an evolutionary context
- Challenges a common assumption within evolutionary psychology and related fields that humans are warlike by nature and that war is an evolved adaptation

In War, Peace, and Human Nature, editor Doug Fry brings together leading experts in human behavioral ecology, and evolutionary biology, archeology, anthropology, and primatology to answer fundamental questions about conflict and human nature in an evolutionary context.

**Summary**
Have humans always waged war? Is warring an ancient evolutionary adaptation or a relatively recent behavior—and what does that tell us about human nature? In *War, Peace, and Human Nature*, editor Douglas P. Fry brings together leading experts in such fields as evolutionary biology, archaeology, anthropology, and primatology to answer fundamental questions about peace, conflict, and human nature in an evolutionary context. The chapters in this book demonstrate that humans clearly have the capacity to make war, but since war is absent in some cultures, it cannot be viewed as a human universal. And counter to frequent presumption the actual archaeological record reveals the recent emergence of war. It does not typify the ancestral type of human society, the nomadic forager band, and contrary to widespread assumptions, there is little support for the idea that war is ancient or an evolved adaptation. Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking.

Drawing upon evolutionary and ecological models; the archaeological record of the origins of war; nomadic forager societies past and present; the value and limitations of primate analogies; and the evolution of agonism, including restraint; the chapters in this interdisciplinary volume refute many popular generalizations and effectively bring scientific objectivity to the culturally and historically controversial subjects of war, peace, and human nature.

**Contributor Bio**

Douglas P. Fry, Ph.D., is Director of Peace, Mediation and Conflict Research at Åbo Akademi University in Vasa, Finland and an adjunct research scientist in the Bureau of Applied Research in Anthropology at the University of Arizona. Fry is author of *Beyond War* (2007, Oxford) and *The Human Potential for Peace* (2006, Oxford).

**Quotes**

“There can hardly be a more urgent task than to understand 'the causes of war and the potential for peace,' the guiding theme of this illuminating collection, drawing from a rich and varied array of sources. These deeply researched studies provide thoughtful and provocative insights into how we might at last be able achieve the promise of the UN Charter, 'to save succeeding generations from the scourge of war,' a recent innovation in human history, and not an ineradicable curse.”-Noam Chomsky, Institute Professor, Massachusetts Institute of Technology

“This encyclopedic collection of excellent, wide-ranging, and myth-busting essays by renowned scholars should be required reading for anyone interested in how we came to be who we are and the future of humankind. A much-needed paradigm shift is in the making because of the increased recognition that we are not inherently destructive and competitive beings. This remarkable book will facilitate this transition as we expand our compassion footprint and give peace the chance it deserves. Cooperation, empathy, and peace will prevail if we allow them to.”-Marc Bekoff, author of *The Emotional Lives of Animals, Wild Justice: The Moral Lives of Animals,* and *The Animal Manifesto: Six*
"Douglas Fry has produced another pioneering book of the highest quality and relevance. A distinguished international and interdisciplinary group of authors address the elusive concept of human nature in relation to war and peace rigorously marshalling clear reason and hard data. Together they systematically and effectively critique the Western cultural myth of the natural inevitability of war while also demonstrating that peace rather than war is ubiquitous. Moreover, practical ways are revealed for creating a more secure and peaceful world." - Leslie E. Sponsel, author of *Spiritual Ecology: A Quiet Revolution*

Index
Rethinking Colonial Pasts through Archaeology
Neal Ferris, Rodney Harrison, Michael V. Wilcox

Key Selling Points
• Chapters range from North America, Australia, and Africa to the Caribbean and Ireland, providing a broad context.
• Focuses on the archaeology of the lived life of the colonized through European colonialism over the last 600 years.
• Presents new developments in anthropological and archaeological theory and showcases how these ideas are applied to real world case studies.
• Considers the contemporary relevance and politics around questions of agency and identity.

An exploration of the archaeologies of daily living left by the indigenous and other displaced peoples impacted by European colonial expansion over the last 600 years.

Summary
Rethinking Colonial Pasts through Archaeology explores the archaeologies of daily living left by the indigenous and other displaced peoples impacted by European colonial expansion over the last 600 years. This new, comparative focus on the archaeology of indigenous and colonized life has emerged from the gap in conceptual frames of reference between the archaeologies of pre-contact indigenous peoples, and the post-contact archaeologies of the global European experience. Case studies from North America, Australia, Africa, the Caribbean, and Ireland significantly revise conventional historical narratives of those interactions, their presumed impacts, and their ongoing relevance for the material, social, economic, and political lives and identities of contemporary indigenous and other peoples (e.g. metis or mixed ancestry families, and other displaced or colonized communities).

The volume provides a synthetic overview of the trends emerging from this research, contextualizing regional studies in relation to the broader theoretical contributions they reveal, demonstrating how this area of study is contributing to an archaeology practiced and interpreted beyond conceptual constraints such as pre versus post contact, indigenous versus European, history versus archaeology, and archaeologist versus descendant. In addition, the work featured here underscores how this revisionist archaeological perspective challenges dominant tropes that persist in the conventional colonial histories of descendant colonial nation states, and contributes to a de-colonizing of that past in the present. The implications this has for archaeological practice, and for the contemporary descendants of colonized peoples, brings a relevance and immediacy to these archaeological studies that resonates with, and problematizes, contested claims to a global archaeological heritage.

Contributor Bio

Neal Ferris is Lawson Chair of Canadian Archaeology and an Associate Professor at the University of Western Ontario.

Rodney Harrison is a Reader in Archaeology, Heritage, and Museum Studies at University College London, and an Adjunct Fellow at the Institute for Culture and Society, University of West Sydney.

Michael V. Wilcox is an Associate Professor in the Department of Anthropology at Stanford University.

Pathways To Success Through Identity-based Motivation
Daphna Oyserman

Key Selling Points
• Reduces the aspiration-attainment gap.
• Discusses how motivation works, why education matters, and how to develop an identity-based motivation intervention.
• Outlines how to harness aspirations and provides evidence that this method works as well as the intervention manual itself.

In Pathways to Success Through Identity-Based Motivation Daphna Oyserman focuses on situational constraints and affordances that trigger or impede taking action.

Summary
Everyone can imagine their future self, even very young children, and this future self is usually positive and education-linked. To make progress toward an aspired future or away from a feared future requires people to plan and take action. Unfortunately, most people often start too late and commit minimal effort to ineffective strategies that lead their attention elsewhere. As a result, their high hopes and earnest resolutions often fall short.

In Pathways to Success Through Identity-Based Motivation Daphna Oyserman focuses on situational constraints and affordances that trigger or impede taking action. Focusing on when the future self matters and how to reduce the shortfall between the self that one aspires to become and the outcomes that one actually attains, Oyserman introduces the reader to the core theoretical framework of identity-based motivation (IBM) theory. IBM theory is the prediction that people prefer to act in identity-congruent ways but that the identity-to-behavior link is opaque for a number of reasons (the future feels far away, difficulty of working on goals is misinterpreted, and strategies for attaining goals do not feel identity-congruent). Oyserman’s book goes on to also include the stakes and how the importance of education comes into play as it improves the lives of the individual, their family, and their society. The framework of IBM theory and how to achieve it is broken down into three parts: how to translate identity-based motivation into a practical intervention, an outline of the intervention, and empirical evidence that it works. In addition, the book also includes an implementation manual and fidelity measures for educators utilizing this book to intervene for the improvement of academic outcomes.

Contributor Bio
Daphna Oyserman, Ph.D., is a social scientist at the University of Southern California; she is a Dean’s Professor of Psychology and Professor of Education and Communication as well as founding co-director of the Center for Mind and Society. She was recently a fellow at the Center for Advanced Studies in the Behavioral Sciences (2009-2010) and a senior fellow at the Michigan Society of Fellows (2012-2013); other honors include a W.T. Grant Faculty Scholar Award, the Humboldt Scientific Contribution Prize of the German Alexander von Humboldt Foundation, two "Best Research Paper" awards from the Society for Social Work Research, and Fellow status in the American Psychological Association, Association for Psychological Science, Society for Personality and Social Psychology, and Society for Experimental Social Psychology. Following her 1987 Ph.D. at the University of Michigan, she held faculty appointments at a number of universities before returning to the University of Michigan where she remained until 2014.

Quotes
"This unique book captures the pathway from a powerful theory to an effective intervention. Accessible to educators, but thorough enough for researchers, the book lays out the Identity-Based Motivation Theory then covers the research that supports it, how it was translated into an intervention, and the evaluation process that showed the intervention worked as the theory said it should. Dr. Oyserman has written a clear model for translating psychological theory into effective real-world intervention." --Brian Smith, PhD, Research Scientist at Committee for Children
"Pathways to Success Through Identity-Based Motivation provides students with the frameworks, time and space to consider who they hope to be as adults and recognize that what they are doing right now offers them a pathway to achieving their future possible selves." --Lucy Bailey, Co-Founder of How to Thrive www.howtothrive.org

"Daphna Oyserman beautifully lays out the evidence supporting the School to Jobs intervention for both researchers and teachers along with instructions to implement the intervention. Pathways to Success Through Identity-Based Motivation will help educators integrate identity work into their programs and inspire a generation of future researchers to carefully design interventions that are effective and easy to implement. This book should be at the top of every teacher's reading list." --Devora Shamah, Research Manager at Gateway to College National Network

"Professor Oyserman makes a compelling case for a way to help youths succeed in life. She furnishes both grounded, theoretical bases, and ready-to-use practical tools that adults responsible for guiding youths can use. I highly recommend this book to educators, youth, practitioners, and social workers interested in helping youths connect the dots and realize their dream." --Dr. John Tan, the Executive Director of CARE Singapore

"Students everywhere have vivid pictures of their future selves and of the jobs and careers they would like to attain. Why do so many fail to realize them? This compelling and clearly written volume provides the answer and a robust theoretical and practical blueprint for what to do about it. Oyserman's formula: begin with students' identities and design school settings that help them realize that their future starts now, that what they are doing in school is relevant to their desired possible selves, and that struggle and difficulty are to be expected on the path to the future. The science and the wisdom of this valuable book are essential for educators, parents, and researchers alike." --Hazel Rose Markus, Davis-Brack Professor in the Behavioral Sciences, Stanford University

"Professor Oyserman's possible selves approach has a sound theoretical basis and has been empirically supported by experimental and longitudinal evidence. What amazes me is that even though the possible selves approach is developed in North America, I think it potentially has the universality to work well in an Asian context as well. In fact, my preliminary research using a similar approach has been promising in improving youth's well-being in Singapore. The manual is very practical and easily adaptable to an Asian context." --Dr. Albert K. Liau, Assistant Head of Research for the Psychological Studies Academic Group of the National Institute of Education, at Nanyang

Social Workers' Desk Reference *(3rd Edition)*
Kevin Corcoran, Albert R. Roberts

**Key Selling Points**
- Comprehensive guide to social work practice containing responses to social issue changes occurring in society.
- Contains 159 chapters written by luminaries in the profession.
- Short, practical chapters containing updated references.

The third edition of Social Workers' Desk Reference continues to respond to the changes occurring in society and how they are impacting the education, research, and practice of social work as a whole.

**Summary**
People all over the world are confronted by issues such as poverty, a lack of access to quality education, unaffordable and or inadequate housing, and a lack of needed health and mental services on a daily basis. Due to these issues, there is a need for social workers who have access to relevant and timely scholarly materials in order to meet the needs of those facing these issues. The social, psychological, and biological factors resulting from these issues determine the level of a person's mental health at any given point in time and it is necessary for social workers to continue to evolve and develop to the new faces and challenges of the times in order to adequately understand the effects of these issues.

In the first and second editions of the *Social Workers' Desk Reference*, the changes that were occurring in social work practice, education, and research were highlighted and focused upon. This third edition continues in the same tradition and continues to respond to the changes occurring in society and how they are impacting the education, research, and practice of social work as a whole. With 159 chapters collaboratively written by luminaries in the profession, this third edition serves as a comprehensive guide to social work practice by providing the most recent conceptual knowledge and empirical evidence to aid in the understanding of the rapidly changing field of social work. Each chapter is short and contains practical information in addition to websites and updated references. Social work practitioners, educators, students, and other allied professionals can utilize the *Social Workers' Desk Reference* to gain interdisciplinary and interprofessional education, practice, and research.

Citizenship and Mental Health
Michael Rowe

Key Selling Points
- Unique combination of narrative, characters and their voices, social science theory, and research findings
- Accessible to, and may be of interest to, general readers as well as mental health specialists and social science and mental health researchers
- The only book to combine a rounded picture of the application of a socially-oriented theory in a range of mental health practices
- Topic of citizenship and mental health care recognizes that people with mental illnesses can receive effective treatment in their home communities and have a "life in the community"

Citizenship and Mental Health tells a 20-year story of practice, theory, and research to support the full participation of persons with mental illnesses who, in many cases, have also been homeless, have criminal charges in their past, and are poor.

Summary
More than 50 years ago, President Kennedy gave an address to congress that launched the community mental health movement in the U.S. This movement involved a vast and complex effort to replace the wholesale institutionalization of people with serious mental illnesses with community mental health centers, public education on mental illness, and prevention efforts. The mission and main thrust of this new movement, however, were quite simple: we would provide effective mental health treatment to people in their home communities and provide the conditions for them to have 'a life in the community.'

Starting in the 1990s with Jim, a person who was homeless and initially refused help from outreach workers, Citizenship and Mental Health tells a 20-year story of practice, theory, and research to support the full participation of persons with mental illnesses who, in many cases, have also been homeless, have criminal charges in their past, and are poor. As the first of its kind, this book addresses the concept of citizenship as an applied theory for fulfilling the promise of the community mental health center movement. Citizenship is defined as a strong connection to the 5 R's of rights, responsibilities, roles, resources, and relationships that society offers to its members, and a sense of belonging that comes from others' recognition of one's valued membership in society. The citizenship model supports the strengths, hopes, and aspirations of people with mental illnesses to become neighbors, community members, and citizens.

Contributor Bio
Michael Rowe, Ph.D., is a medical sociologist at the Yale School of Medicine Department of Psychiatry. After a dual career in human services and as a writer, he completed a Ph.D. in sociology and conducted groundbreaking research on mental health outreach to people who are homeless. This work led directly to his twenty-year work on citizenship and mental health, and this book.

Financial Capability and Asset Holding in Later Life
A Life Course Perspective
Nancy Morrow-Howell, Margaret Sherraden

Key Selling Points
- Concept of Financial Capability underscores the importance of acquiring knowledge and skills while addressing policies and services that can build financial security.
- Focus on how older people manage their finances as they age.
- Major focus on minority groups and other demographic groups among older adults.
- Volume speaks to a wide variety of helping professions, policy makers, and others interested in wealth accumulation and financial health among especially vulnerable populations.

In Financial Capability and Asset Holding in Later Life: A Life Course Perspective the concept of Financial Capability is used to underscore the importance of acquiring knowledge and skills while also addressing policies and services than can build financial security.

Summary
With today's availability of Social Security and Medicare, we typically think of the older years as a stage in life where people are supported financially. However, of the more than 40 million old adults currently living in the US, many are struggling financially living below or near the poverty line. They are lacking the assets necessary to see them through a period of life that is often longer than expected and that requires more health and long-term care. While financial vulnerability can be most pronounced in old age, it is often created across decades, revealing itself in later years when there is little opportunity to reverse a lifetime of disadvantage. The concept of Financial Capability refers to both an individual and structural idea that combines a person’s ability to act with their opportunity to act in their best financial interests.

In Financial Capability and Asset Holding in Later Life: A Life Course Perspective the concept of Financial Capability is used to underscore the importance of acquiring knowledge and skills while also addressing policies and services than can build financial security. The volume assembles the latest evidence on financial capability and assets among older adults using a life course perspective, arguing that older adults need financial knowledge and financial services in order to build secure lives, and that this process needs to begin before it is too late to make effective changes and choices.

Broken into three parts, the chapters in this book written by leading experts in the field blend together empirical findings, economic and social theory, and case studies. Part 1 opens the book with a conceptual and empirical overview of financial capability and assets among older adults using a life course perspective. Part 2 presents chapters addressing financial vulnerability of diverse racial and ethnic groups, people with disabilities, and immigrants. Part 3 includes chapters describing current policies, programs, and innovations, including a review of important issues of working and caregiving in later life, and a detailed assessment of "age-friendly" banking principles, banking products, services, and policies.

Contributor Bio

Margaret Sherrard Sherraden, PhD, is Professor, School of Social Work, University of Missouri-St. Louis, and Research Professor, Center for Social Development (CSD), Washington University in St. Louis.

Nancy Morrow-Howell, MSW, PhD, is the Ralph and Muriel Pumphrey Professor of Social Work and the Director of the Harvey A. Friedman Center for Aging at Washington University.

Michael Sherraden, MSW, PhD, is the Benjamin E. Youngdahl Professor of Social Development and founding director of the Brown School's Center for Social Development (CSD) at Washington University in St Louis. In 2010, Sherraden was listed on the Time 100 most influential people in the world.

Participatory Action Research
Hal A. Lawson, James Caringi, Loretta Pyles, Janin...

Key Selling Points
- Discusses the relationship between PAR and the scientific method.
- Provides distinctions between PAR and other kinds of action research.
- Addresses innovative health PAR initiatives with good results to show.
- The authors' model is now the Children's Bureau's (US Department of Health and Human Services) recommended model for turnover interventions (via the National Child Welfare Workforce Development Institute).

Conventional textbooks present PAR from a distanced perspective and with the assumption that beginners will gain practical PAR knowledge on their own. This book provides real world examples—first-hand accounts by the researchers who designed and implemented these PAR innovations.

Summary
As novel, complex social problems increase, especially those involving vulnerable people who reside in challenging places, the limitations of conventional research methods implemented by just one or two investigators become apparent. Research and development alternatives are needed, particularly methods that engage teams of researchers in real world problem solving while simultaneously generating practice- and policy-relevant knowledge. Research methods that effectively tap the expertise of everyday people, especially those impacted by these targeted social problems, are a special priority because academic researchers often lack experiential knowledge that stems from direct, everyday encounters with these vexing problems.

Participatory action research (PAR) responds to these manifest needs. It provides a methodological structure and operational guidelines for preparing and deploying people from various walks of life as co-researchers, and it provides a proven strategy for generating practice- and policy-relevant knowledge as problem-solving in real world contexts proceeds.

Contributor Bio
Hal A. Lawson, PhD, is a Professor of Social Welfare and Professor of Educational Administration and Policy Studies at the University at Albany, State University of New York.

James Caringi, PhD, is an Assistant Professor of Social Work at the University of Montana.

Quotes
"A very helpful pocket guide! The authors articulate the key principles and phases of PAR in a compelling way. The real-world examples of how researchers, practitioners, and community members have used PAR showcase the value of this unique methodology in social work research. I highly recommend this guide to those interested in using PAR to understand and problem-solve complex social issues." --Dawn Anderson-Butcher, PhD., LISW-S; Professor, The Ohio State University

"This is an excellent theoretical and practical text on participatory research and a valuable resource for any researcher or student interested in conducting this type of research. This is an excellent addition to any library." --Charles Auerbach, Ph.D, Professor, Wurzweiler School of Social Work

"This book is a timely text from research to macro-practice classes, as well as the change agent's indispensable tool in the field. A brilliant and accessible combination of theory with a practitioner's eye to how things really work 'on the ground' in organizations and systems. It will never be far from my reach." --Carenlee Barkdull, Ph.D., LCSW, Associate Professor and Chair, Department of Social Work, University of North Dakota

Table Of Contents
Chapter 1. Introducing Action Research and Participatory Action Research

Chapter 2. Action Research Cycles with Reflection, Knowledge Generation, and Action Learning While Problem-solving

Chapter 3. The Social Work of Participatory Action Research with Adaptive Problems and Wicked Ones

Chapter 4. Participatory Action Research for an Adaptive Problem: Design Teams to Address Undesirable Workforce Turnover in Public Child Welfare Systems

Chapter 5. An Adaptive-Wicked Problem Affecting Preschool Children and Their Families: Addressing Childhood Obesity and Related Health Disparities with Community-based Participatory Research

Chapter 6. The Critical-Emancipatory Traditions of Participatory Action Research: Post-disaster Work on Wicked Problems

Chapter 7. Looking Ahead with Key Lessons Learned for Social Work's Action Researchers

Developing, Selecting, and Using Measures
David F. Gillespie, Brian E. Perron

Key Selling Points
• Review of contemporary validity theory.
• Fundamental shift in how social work researchers typically think about validity.

This book provides a detailed review of contemporary validity theory; an update on the major issues of reliability; common errors in measurement of latent variables; and suggestions on measurement of social networks and collectives.

Summary
Measurement refers generally to the process of assigning a numeric value to, or ordering characteristics or traits of, entities under study. Measurement is necessary for building and testing theory, specifying problems, and defining goals. It is arguably one of the most important and difficult tasks in social work research. Social work researchers who are not expert in developing, selecting, and using measures will not be able to contribute maximally to the social work knowledge base. Such knowledge and skills related to measurement ultimately determines the extent to which social work research can effectively inform social policy and social work interventions.

This book is to serve as a guide for developing, selecting, and using measures in social work research. In particular, this book provides a detailed review of contemporary validity theory; an update on the major issues of reliability; common errors in measurement of latent variables; and suggestions on measurement of social networks and collectives.

An important theme of this book is the focus on the creative potential of measurement - that is, helping social work researchers think about the wide variety of ways that social work concepts can be measured. Reflecting on these differences raises questions about underlying assumptions that in turn inspires creative theoretical insights. Rather than seeing measurement as simply a task to be completed in the research process, we will encourage the reader to think creatively about measurement and theory.

This book also addresses the interdependency of measurement and theory construction. In other words, this book covers how measurement and theory are connected in two different ways. First, every measure has its own working theory that relates the measure to the concept being measured. Second, theory construction is dependent on measurement. What we learn using a given measure could be different if a concept was measured in a different way.

Some Men
Feminist Allies in the Movement to End Violence against Women
Michael A. Messner, Max A. Greenberg, Tal Peretz

Key Selling Points
- Contributes to an expanding field of the study of "allies" in social movements.
- A timely topic, at a moment when the opportunities for men to do violence prevention work with boys and men—through internships and paid occupations—is expanding in schools, college sports, fraternities, the U.S. military and workplaces.
- Illuminates both the promise of men’s violence prevention work, as well as the strains and tensions that inhere, both for men as feminist allies, and for the women they work with

Summary
What does it mean for men to join with women as allies in preventing sexual assault and domestic violence? Based on life history interviews with men and women anti-violence activists aged 22 to 70, Some Men explores the strains and tensions of men’s work as feminist allies. When feminist women began to mobilize against rape and domestic violence, setting up shelters and rape crisis centers, a few men asked what they could do to help. They were directed "upstream," and told to "talk to the men" with the goal of preventing future acts of violence.

This is a book about men who took this charge seriously, committing themselves to working with boys and men to stop violence, and to change the definition of what it means to be a man. The book examines the experiences of three generational cohorts: a movement cohort of men who engaged with anti-violence work in the 1970s and early 1980s, during the height of the feminist anti-violence mobilizations; a bridge cohort who engaged with anti-violence work from the mid-1980s into the 1990s, as feminism receded as a mass movement and activists built sustainable organizations; a professional cohort who engaged from the mid-1990s to the present, as anti-violence work has become embedded in community and campus organizations, non-profits, and the state. Across these different time periods, stories from life history interviews illuminate men's varying paths—including men of different ethnic and class backgrounds—into anti-violence work.

Some Men explores the promise of men's violence prevention work with boys and men in schools, college sports, fraternities, and the U.S. military. It illuminates the strains and tensions of such work—including the reproduction of male privilege in feminist spheres—and explores how men and women navigate these tensions.

Contributor Bio

Michael A. Messner is Professor of Sociology and Gender Studies at the University of Southern California.

Max A. Greenberg is a Ph.D. Candidate in Sociology at the University of Southern California.

Tal Peretz is Lecturer in Sociology at Seattle University.

Quotes
"In the last four decades or so, there has grown up a diverse activist community of men who understand that feminism is their movement, too - not only because they support daughters, wives, mothers and co-workers, but because they see violence against females as a normalization of all violence, and a powerful way of limiting men’s full humanity, too. If you want to meet them, learn more and hope more, you'll find them in the pages of Some Men, a practical, readable, inspiring guide to a crucial, growing, yet rarely reported American movement." -Gloria Steinem

"Some Men is a splendid book. Authors Messner, Greenberg and Peretz combine moving narrative, careful research, and sharp analysis. Their book tells in depth the story of
those American men who have worked to end rape, domestic violence, and other forms of men's violence against women. Tracing the complex relations with changing feminism, and the intense debates, failures and successes of three generations of activist men, this is vividly-written contemporary history from which everyone concerned with gender justice can learn. " - Raewyn Connell, Author of Masculinities and Confronting Equality

"For more than 40 years, a growing tribe of males has been making an exodus from the desert of conventional manhood. The remarkable journeys of a number of them are recounted in this inspiring chronicle of the profeminist men's movement. Some Men is sure to stir the hearts of anyone championing a world where men denounce violence against women and advocate for the liberation of men." - Rob Okun, Editor of the anthology, VOICE MALE: The Untold Story of the Profeminist Men's Movement

"In this moving book, the authors provide insight into the hearts and minds of men who took seriously the feminist call by making lifetime commitments as allies in the movement to end violence against women. A stellar book that is carefully grounded in the history of the feminist and anti-violence movements, it is a must-read not only for students and scholars of gender, masculinity, feminism, and the anti-violence movement, but also for policy-makers and activists working toward ending gender-based violence." - Verta Taylor, Professor Sociology and Feminist Studies, University of California Santa Barbara

The Politics of Consolation
Memory and the Meaning of September 11
Christina Simko

Key Selling Points
• Offers rich and innovative theoretical contributions to the issues of cultural trauma and collective memory.
• Argues that a key function of American political leaders is to provide consolation in the aftermath of calamitous, unexplainable tragedies.
• Simko reveals the evolving narrative of national pride invoked after national tragedies by tracing the tropes employed by American political leaders throughout history.

Examines how American political leaders have addressed the question What meaning can be found in calamity and suffering?

Summary
What meaning can be found in calamity and suffering? This question is in some sense perennial, reverberating through the canons of theology, philosophy, and literature. Today, The Politics of Consolation reveals, it is also a significant part of American political leadership. Faced with uncertainty, shock, or despair, Americans frequently look to political leaders for symbolic and existential guidance, for narratives that bring meaning to the confrontation with suffering, loss, and finitude. Politicians, in turn, increasingly recognize consolation as a cultural expectation, and they often work hard to fulfill it.

The events of September 11, 2001 raised these questions of meaning powerfully. How were Americans to make sense of the violence that unfolded on that sunny Tuesday morning? This book examines how political leaders drew upon a long tradition of consolation discourse in their effort to interpret September 11, arguing that the day's events were mediated through memories of past suffering in decisive ways. It then traces how the struggle to define the meaning of September 11 has continued in foreign policy discourse, commemorative ceremonies, and the contentious redevelopment of the World Trade Center site in lower Manhattan.

Perfect Children
Growing Up on the Religious Fringe
Amanda van Eck Duymaer van Twist

Key Selling Points
- Explores behavior on both institutional and individual levels
- Draws on over 50 in-depth interviews with individuals born into new religious groups

Summary
Children born and raised on the religious fringe are a distinctive yet largely unstudied social phenomenon. They are irreversibly shaped by the experience, having been thrust into radical religious cultures that often believe children to be endowed with heightened spiritual capabilities. The religious group is all encompassing: it accounts for their family, their school, social networks, and everything that prepares them for their adult life.

Using research gathered from over fifty in-depth interviews, Amanda van Eck Duymaer van Twist explores the lives of individuals born into new religious groups, some of whom have stayed in these groups, and some of whom have left. The groups she considers include the Bruderhof, Scientology, the Family International, the Unification Church, and the International Society for Krishna Consciousness. The book draws on the author's visits to these groups, their schools and homes, and support websites maintained by those who left the religious groups that raised them. It also details her experiences at conferences held by NGOs concerned with the welfare of children in "cults."

The arrival of a second generation of participants in new religious movements raises new concerns and legal issues. Whether they stay or leave, children raised on the religious fringe experience a unique form of segregation in adulthood. Perfect Children examines the ways these movements adapt to a second generation, how children are socialized, what happens to these children as they mature, and how their childhoods have affected them.

Amanda van Eck Duymaer van Twist is the deputy director of Inform, a non-profit information center specializing in minority religious movements, spiritualities, and fringe political movements, based at the London School of Economics and Political Science in London. As part of her work, she has encountered and researched a range of topics and issues dealing with minority and/or new religions.

Contributor Bio

Amanda van Eck Duymaer van Twist is Deputy Director of INFORM (Information on Religious Movements) at the London School of Economics.

Quotes

"Perfect Children is an insightful and sometimes disturbing study of youth growing up in new or sectarian religious movements. The author shows us that the experimental project of rearing "perfect children" comes with a very imperfect road map. With the best of intentions and noblest of spiritual pursuits, the introduction of children into the group changes everything. Amanda van Eck Duymaer van Twist offers us a window into the intimate lives of these offspring, with all the trials, challenges, and choices they face. This work is a unique and vital contribution to the research literature on new religions." -- Stuart Wright, Professor of Sociology, Lamar University

The Weight of Violence
Religion, Language, Politics
Saitya Brata Das, Soumyabrata Choudhury

Key Selling Points
• Grapples with theoretical and conceptual questions on the social cognition of violence and its role in perpetuation of violence.
• Written from an interdisciplinary perspective; the contributors come from a variety of social science disciplines.
• Will be useful to both theoreticians/academics as well as activists.

Taking up the religious and linguistic forms of violence as their main focus, this collection of essays offers varied perspectives on the place of violence from an interdisciplinary perspective.

Summary
The essays collected in this volume deal with one central theme: How do we now make sense of existence in a world that is constantly threatened by destruction of sense. The contributors, exploring answers to this complex problematique from different disciplinary perspectives maintain that the question concerning the sense of existence and its destruction is essentially tied up with the question of violence: violence as radical destruction of sense for and of existence. Responses to this question, however, can be as irreducible and singular as can they be varied and multiple.

Taking up the religious and linguistic forms of violence as their main focus, these essays argue that the place of violence in our contemporary historical condition has accelerated to an ever immeasurable measure, and that this demands urgent responses from intellectuals and activists alike.

A Sociology of Modern China
Jean-Louis Rocca

Key Selling Points
• Concise portrait of Chinese society
• Rocca charts how business, private life and consumerism are being radically altered by the country's economic surge.
• Readable history that avoids cliches and oversimplifications

Summary
Jean-Louis Rocca’s admirably concise A Sociology of Modern China wears its scholarship lightly and paints an intimate and complex portrait of Chinese society, all the while avoiding clichés and simplifications. He delves into China's history and examines the country's many different social strata so as to better understand the enormous challenges and opportunities with which its people are confronted.

After discussing the "long march toward reform" and the crises along the way - among them the 1989 protests which culminated in the events in Tiananmen Square and elsewhere - Rocca dedicates the second half of the book to the major questions facing the country (or, at the very least, its political elites) today: new forms of social stratification; the interaction between the market and the state; growing individualism; and the pressures exerted by social conflict and political change. In eschewing culturalist visions, Rocca thoroughly and successfully deconstructs received wisdom about Chinese society to reveal a thriving nation and its people.

Contributor Bio
Jean-Louis Rocca is a sociologist, Professor and Researcher at CERI Sciences-Po in Paris and at Tsingshua University in Beijing.

Quotes
"Many years of personal observations, in conjunction with a keen sociological eye, have allowed [Rocca] to produce a book that is far more sensible, original and insightful than most of the similar books that I have read in recent years. EL the writing is very clear and accessible. EL I must stress again that this is a very good book, perhaps a classic. It is certainly the best textbook about contemporary China that I have read for a long time. The book has a chance to become a must read for undergraduate and graduate students who are interested in China and even for the general public who want to know more about China." - Dingxin Zhao, Professor, Department of Sociology, University of Chicago

"I really like this book. It is very perceptive and has a lot of insights. It is refreshingly different from the run-of-the-mill stuff. For example, viewing the reform as thermidor following the revolution; seeing parallels between the Chinese revolution and the French; discussions of the specificities of Chinese capitalism. EL The writing is very succinct and to the point." - Guobin Yang, Associate Professor of Sociology and Communication, University of Pennsylvania

A Sociology of Modern China
Jean-Louis Rocca

Key Selling Points
- Concise portrait of Chinese society
- Rocca charts how business, private life and consumerism are being radically altered by the country's economic surge.
- Readable history that avoids clichés and oversimplifications

Summary
Jean-Louis Rocca's admirably concise A Sociology of Modern China wears its scholarship lightly and paints an intimate and complex portrait of Chinese society, all the while avoiding clichés and simplifications. He delves into China's history and examines the country's many different social strata so as to better understand the enormous challenges and opportunities with which its people are confronted.

After discussing the "long march toward reform" and the crises along the way - among them the 1989 protests which culminated in the events in Tiananmen Square and elsewhere - Rocca dedicates the second half of the book to the major questions facing the country (or, at the very least, its political elites) today: new forms of social stratification; the interaction between the market and the state; growing individualism; and the pressures exerted by social conflict and political change. In eschewing culturalist visions, Rocca thoroughly and successfully deconstructs received wisdom about Chinese society to reveal a thriving nation and its people.

Contributor Bio

The Turbulent World of Middle East Soccer
James Dorsey

Key Selling Points
- DT A fascinating look at Middle Eastern and North African football, a key battleground for political control, social justice, identity and gender rights.
- Football evokes deep-seated passions and offers unique insight into the region
- DT Examples include clandestine Saudi women football clubs, political demonstrations at Algerian matches, Somali child soldiers turned soccer stars and Iranian women who disguise themselves as men to watch matches.

A fascinating look at Middle Eastern and North African football, a key battleground for political control, social justice, identity and gender rights.

Summary
James M. Dorsey introduces the reader to the world of Middle Eastern and North African football - an arena where struggles for political control, protest and resistance, self-respect and gender rights are played out. Politics was the midwife of soccer in the region, with many clubs being formed as pro- or anti-colonial platforms and engines of national identity and social justice. This book uncovers the seldom-told story of a game that evokes deep-seated passions.

Football fans are shown to be a major political force and one of the largest civic groups in Egypt after the Muslim Brotherhood: their demands for transparency, social justice, and an end to corruption sparked vicious street battles that left scores dead and thousands wounded. Discontent in Algeria erupts regularly at matches where fans demand the ouster of military leaders. A folk-song crooning national goalkeeper leads protests in Homs, Syria's third largest city and scene of some of the worst violence perpetrated by Bashar al-Assad's regime. In a country that bans physical education for girls, Saudi women have established clandestine football clubs and leagues. The book further tells the story of Somali child soldiers turned soccer stars and Iranian women who dress as men to smuggle themselves into stadiums to watch matches.

Contributor Bio
James M. Dorsey is an award-winning journalist and a senior fellow at the S. Rajaratnam School of International Studies at Singapore's Nanyang Technological University. He is Co-Director of the University of Würzburg's Institute of Fan Culture, a visiting scholar at its Institute of Sport Science, and author of the 'The Turbulent World of Middle East Soccer' blog.

Understanding Vineyard Soils (2nd Edition)
Robert E. White

Key Selling Points
- Explains to a wide audience how soils form and why they are so variable
- Describes essential chemical and physical processes involving nutrients, water, oxygen and carbon dioxide, moderated by the activities of soil organisms
- Proposes remedies to alleviate adverse conditions such as soil acidity, compaction, poor drainage and salinity
An introduction to viticulture and soil science for both amateur vineyard growers and scientists.

Summary
The first edition of Understanding Vineyard Soils, published in 2009, has been praised for its comprehensive coverage of soil topics relevant to viticulture, and is a major resource for professionals in the industry. However, the subject is not static--new developments are occurring in the field all the time. For example, the 'organic movement' in viticulture continues to grow in importance and the emphasis on wine quality relevant to quantity is changing in an increasingly competitive world market. The promotion of organic and biodynamic practices has raised a general awareness about 'soil health' and methods to assess it, which is often associated primarily with the biological status of the soil. Many commercial laboratories offer an extensive range of tests for soil (biological) health, the relevance of which is not clear to many growers. However, the development of new tools for characterizing soil microorganisms and identifying the specific functions of taxonomic groups is an exciting area of research that may offer answers to some of these questions in the future. This second edition of White's influential book presents the latest updates and developments in vineyard and soil management practices. Just like the first edition, Understanding Vineyard Soils introduces readers from all backgrounds to the principles of viticulture.

Contributor Bio
Robert White has had an outstanding international career in soil, water and nutrient management for more than 40 years. After working for many years in broad-acre agriculture, he turned his attention to the fascinating interaction between soil and the flavor and aromas of wines world-wide, a topic that happily marries sensory pleasure with science.

Bioseparations Science and Engineering *(2nd Edition)*
Roger G. Harrison, Paul W. Todd, Scott R. Rudge, D...

**Key Selling Points**

- Contains a chapter covering the costs of bioprocess design and economics.
- Discusses both theory and various applications of the principles of bioseparations engineering.

An updated edition of a comprehensive and authoritative chemical engineering textbook on bioseparations science, updated to include new information on topics like moment analysis, chromatography, and evaporation.

**Summary**

Designed for undergraduates, graduate students, and industry practitioners, *Bioseparations Science and Engineering* fills a critical need in the field of bioseparations. Current, comprehensive, and concise, it covers bioseparations unit operations in unprecedented depth. In each of the chapters, the authors use a consistent method of explaining unit operations, starting with a qualitative description noting the significance and general application of the unit operation. They then illustrate the scientific application of the operation, develop the required mathematical theory, and finally, describe the applications of the theory in engineering practice, with an emphasis on design and scaleup. Unique to this text is a chapter dedicated to bioseparations process design and economics, in which a process similar, SuperPro Designer® is used to analyze and evaluate the production of three important biological products.

New to this second edition are updated discussions of moment analysis, computer simulation, membrane chromatography, and evaporation, among others, as well as revised problem sets. Unique features include basic information about bioproducts and engineering analysis and a chapter with bioseparations laboratory exercises. *Bioseparations Science and Engineering* is ideal for students and professionals working in or studying bioseparations, and is the premier text in the field.

**Contributor Bio**

Business Politics in the Middle East
Steffen Hertog, Giacomo Luciani, Mark Valeri

Key Selling Points
- How to do business in the Middle East today
- First volume ever to provide a political sociology of MENA business
- Examines state-business relations in the wake of economic liberalization, privatization, and the Arab Spring

How to do business in the Middle East today

Summary
Although most Arab countries remain authoritarian, many have undergone a restructuring of state-society relations. Lower- and middle-class interest groups have lost ground, while big business has benefited in terms of its integration into policy-making and the opening-up of economic sectors that used to be state-dominated. Arab businesses have also started taking on aspects of public service provision in health, media and education that used to be the domain of the state, while also becoming increasingly active in philanthropy.

Among the topics addressed by the contributing authors are: the role of business in recent regime change; the political outlook of businessmen; the consequences of economic liberalization on the composition of business elites in the Middle East; the role of the private sector in orienting government policies; lobbying of government by business interests; and the mechanisms by which governments seek to keep businesses dependent upon them.

The Arab Spring is likely to lead to a more pluralistic political order in the Middle East and this makes it all the more important to understand business interests in the region. They are a segment of society that have often been close to the ancien regime, but will undoubtedly play a pivotal role in a future social contract.

Contributor Bio

STEFFEN HERTOG is a Lecturer in Comparative Politics in the Department of Government at the London School of Economics. GIACOMO LUCIANI is Scientific Director of the Masters in International Energy of the Paris School of International Affairs at Sciences Po, and a Princeton University Global Scholar attached to the Woodrow Wilson School and the Department of Near Eastern Studies. MARC VALERI is a Lecturer in Political Economy of the Middle East at the University of Exeter.

Quotes
"This is a superb volume on a critically important topic that often does not receive the careful attention it deserves. The book is impressive in both breadth and depth as it offers incisive analyses on significant issues related to business politics across the Middle East, especially insofar as public and private sector reforms and the 2011 uprisings are concerned. With essays rich in empirical data and with robust analytical frameworks, this is a significant contribution to the literature on the political economy of the Middle East." - Mehran Kamrava, Professor and Director of the Center for International and Regional Studies at the Georgetown University School of Foreign Service in Qatar

"After years of apparent political stability, economic growth and liberal reform, the Middle East is in turmoil and many of the business groups that anchored this development have all but vanished from the political scene. For those who want to understand this dynamic who are the business leaders, what has been their impact, and what are their prospects now? this volume provides valuable insight." - Lisa Anderson, President of The American University in Cairo

" ... exquisitely written and well researched. I highly recommend this book to anyone
interested in the origins of the Kosovo conflict, the modern history of Kosovo, guerilla warfare and insurgency movements." - Political Studies Review

Guinea
Masks, Music and Minerals
Bram Posthumus

Key Selling Points
• An affectionately written portrait of the mineral-rich but little known West African state that voted for independence from France in 1958.
• Case study of the classic paradox of a country suffering from desperate poverty while being resource rich
• Highlights Guinea's cultural accomplishments, most notably its globally renowned music

Summary
Guinea is rich, both materially and culturally, with the world’s largest bauxite reserves, gold, diamonds and iron ore. It abounds in culture and traditions and has a remarkable, if often turbulent, history. Guinea is also exceptional in that it was the first French colony proudly to declare its independence, in 1958. Thereafter, the country suffered under the tyranny of Sekou Toure. Today, headed for the first time by an elected president, Guineans are trying to put their troubled past behind them and fulfil the promise of a decent life for all.

It will not be easy. Tens of thousands perished in the years of chaos and even more human potential continues to go to waste. Guinea is the classic paradox: there are vast mineral reserves, its peoples are resourceful and the earning potential of agriculture and tourism is evident. And yet, most citizens are desperately poor and lack even the most basic services. Governance lies at the heart of this problem.

Posthumus touches on all these themes, while taking the reader to all corners of Guinea, which is captivating and exasperating in equal measure. He also highlights Guinea’s remarkable cultural accomplishments, most notably its globally renowned music.

Contributor Bio
Bram Posthumus is a journalist who first visited Guinea in 1995, the beginning of an enduring fascination with the country, its people and its cultures. Based in Dakar, he reports on political, cultural and economic events in West Africa for the Dutch and other European media.

Battles of the New Republic
A Contemporary History of Nepal
Prashant Jha

Key Selling Points
• Story of Nepal's transformation from war to peace
• This lively account of Nepal's recent history conveys the complexities of life in its better-known Himalayan regions as well as in the Terai, or foothills.
• Written by a journalist born in Kathmandu
Story of Nepal's transformation from war to peace

Summary
Battles of the New Republic: A Contemporary History of Nepal is a story of Nepal's transformation from war to peace, monarchy to republic, a Hindu kingdom to a secular state, and a unitary to a potentially federal state.

Part-reportage, part-history, part-analysis, part-memoir, and part-biography of the key characters, the book breaks new ground in political writing from the region. With access to the most powerful leaders in the country as well as diplomats, it gives an unprecedented glimpse into Kathmandu's high politics. But this is coupled with ground-level reportage on the lives of ordinary citizens of the hills and the plains, striving for a democratic, just and equitable society.

It tracks the hard grind of political negotiations at the heart of the instability in Nepal. It traces the rise of a popular rebellion, its integration into the mainstream, and its steady decline. It investigates Nepal's status as a partly-sovereign country, and reveals India's overwhelming role. It examines the angst of having to prove one's loyalties to one's own country, and exposes the Hindu hill upper-caste dominated power structures.

Battles of the New Republic is a story of the deepening of democracy, of the death of a dream, and of that fundamental political dilemma - who exercises power, to what end, and for whose benefit.

Contributor Bio
Prashant Jha is an Associate Editor at Hindustan Times. He has extensively covered Nepal's political transformation over the past decade, and was a political columnist for the country's leading dailies. Born in Kathmandu, he now lives in New Delhi.

Quotes
"No one writes about Nepal more incisively and presciently than Prashant Jha. This is a meticulously researched and deeply passionate book. Generations of readers will turn to it to understand Nepal's fraught transition to democracy." -- Manjushree Thapa

"Prashant Jha is one of India's finest journalists. This is a meticulous, clear-eyed and riveting story of the revolutionary changes in Nepal, told with narrative flair, historical insight and a depth of knowledge rare in the field. It may be the one indispensable book on the subject. But the story of revolution and reaction, high idealism and low politics, universal aspiration and community division, will be of much wider interest. A major achievement." -- Pratap Bhanu Mehta, President of the Centre for Policy Research, New Delhi

"Nepal's democratic revolution is one of the most remarkable political and social developments of the twenty-first century and there cannot be a better chronicle of this story than Prashant Jha's Battles of the New Republic." -- Siddharth Varadarajan, former editor of The Hindu

"A book of remarkable detail and comprehensiveness, with both historical and sociological depth ... Battles of the New Republic is both intellectually serious and accessibly written ... [E]ssential reading for anyone who hopes to understand India's
messy, fragile and tragic neighbourhood." -- Keshava Guha, Scroll.in

"Jha, one of the most remarkable young journalists from South Asia and undoubtedly a leading voice on Nepal, has made its history comprehensive through his maiden but seminal book, Battles of the New Republic. ... This is a definitive account and should be on the essential list of all enthusiasts of South Asian political history." -- Millennium Post

"A must read ... [T]he book truly reflects Jha's access to leaders and sources on all sides of Nepal's political spectrum (including India). ... Vividly captures the modern history of that country and provides much needed understanding." -- Avalok Langer, Tehelka

"A lucid, living and logical document that expertly intertwines the personal and the political in chronicling Nepal's trajectory over the last 20 years. ... Battles of the New Republic presents meticulously researched facts and reasoning, straddling with ease the line between opinion and reportage. ... [A]n engaging read for leaders, journalists, students of politics and indeed anyone interested in comprehensive and insightful observations about a country in transition." -- Maoist leader Hisila Yami, The Kathmandu Post

**The Landscape of Silence**

**Sexual Violence Against Men in War**

Amalendu Misra

**Key Selling Points**

- Why is it that sexual violence against men, both soldiers and civilians, remains so pervasive in conflict?
- Tackles a taboo subject-sexual violence against men in war
- First serious examination of male on male sexual violence in the context of war
- Considers sexual violence, men and war

**Summary**

Why is it that men and boys have been and still are violated in human conflict, be it in conventional war, insurgencies or periods of civil and ethnic strife? Above all, why, throughout history, have victims, perpetrators and society as a whole refused to acknowledge this violation, and why do episodes of male-on-male rape and sexual abuse feature so rarely in accounts of war, be they official histories, eye-witness accounts or popular narratives? Is there more to this elision of memory than simply shame? Is there more to it than the victor’s desire to violate the enemy body?

Amalendu Misra's startlingly original research into male sexual violence explores the meaning and role of the male body prior to its abuse and how it is altered by violation in wartime. He examines the bio-political contexts of conflict in which primarily men and occasionally women sexually violate men; he details the inadequate legal safeguards for survivors of such events; and in unearthing and analysing an ignored aspect of war, he inquires whether such violence can ever be deterred.

**Contributor Bio**

Amalendu Misra teaches at Lancaster University and the University of Anahuac, Mexico. He is the author of *Politics of Civil Wars, Afghanistan: The Labyrinth of Violence and Identity & Religion*.
Revolt in Syria (2nd Edition)
Eye-Witness to the Uprising
Stephen Starr

Key Selling Points
- DT Author is Irish journalist who has lived and worked in Syria, reporting for some of the world's leading newspapers
- DT Shows why many Syrians fear enforced regime change
- DT A compelling narrative of how the everyday lives of Syrians have been molded by the state
Offers inside knowledge on why Syrians are worried about enforced regime change.

Summary
In January 2011 President Bashar al-Assad told the Wall Street Journal that Syria was stable and immune from revolt. In the months that followed, and as regimes fell in Egypt and Tunisia, thousands of Syrians took to the streets calling for freedom, with many dying at the hands of the regime. Stephen Starr delves deep into the lives of Syrians whose destiny has been shaped by the state for almost fifty years. In conversations with people from all strata of Syrian society, Starr draws together and makes sense of perspectives illustrating why Syria, with its numerous sects and religions, was so prone to violence and civil strife. Through his unique access to a country largely cut off from the international media during the unrest, Starr delivers compelling first hand testimony from both those who suffered and benefited most at the hands of the regime. Revolt in Syria details why many Syrians wanted Assad's government to stay as the threat of civil war loomed large, the long-standing gap between the state apparatus and its people and why the country's youth stood up decisively for freedom. Starr also sets out the positions adhered to by the country's minorities and explains why many Syrians believe that enforced regime change might precipitate a region-wide conflict. This revised and updated edition contains a chapter bringing it up to the end of 2013, and examines the experiences of those who have fled the fighting to Turkey and elsewhere.

Contributor Bio
STEPHEN STARR is a freelance Irish journalist who has been reporting from Damascus since 2007. He covered the Syrian uprising for some of the world's leading newspapers and his work has been published in The Washington Post, Financial Times, The Times and Sunday Times, The Los Angeles Times and The Irish Times. He is also the founder and editor-in-chief of Near East Quarterly.

Quotes
"[Starr's] material is vivid, thought-provoking and sometimes shocking...As eyewitness testimony, it has great value, not least because it challenges some of the simple certainties that have characterised coverage of the Syrian uprising. Mr. Starr captures the pain of a deeply torn society in the throes of a bitter struggle, one that has estranged brother from brother, friend from friend."--The Economist
"Starr's book is the only account that gives previously unheard voices a chance to be heard...his familiarity with the sectarian and political milieu in Syria is better than anyone I know. He has spent five years in the country, marrying into Syrian society if there is one Irishman that the Syrians would describe as muta rrib, Arabised, it is him...Through a series of vignettes and anecdotes, Starr provides us with a plethora of voices from minorities: Sunnis, Shias, Kurds, Palestinians, pro-regime and anti regime Syrians...The book is a witness to a dilapidated regime [and] Starr captures it all brilliantly."--New Statesman
"Unlike most western reporters who have written from Syria, Stephen Starr brings to bear a great deal of personal experience of the country, having lived and worked in Damascus for four years, including a spell with the state media. He's the sort of man who notices the price of milk going up and the increased presence of security forces on the streets as the noose tightens. With a wide network of friends and contacts, he conveys the warp and weft of daily life with an admirably nuanced understanding of the place."--The Spectator
"Stephen Starr has taken on the mammoth task of elucidating this confusing country. After four years in Syria, he has some insight... The general conclusion is that no one in Syria knows what is going on, either inside or outside their own neighbourhoods. It is therefore a strange kind of enlightenment that this book offers, but probably an accurate on." -- Times Literary Supplement

"The book is an important contribution to the hugely stifled subject of Syria." -- Huffington Post

"In the style of Kapuscinski, Revolt in Syria offers the reader a lively text, filled with interesting anecdotes and conversations detailing the first year of the conflict. Aided by five years as a freelance journalist based in Damascus, Starr draws on a broad array of interviewees when offering examples of the decay afflicting many of the country's institutions." -- José Ciro Martínez, New Middle Eastern Studies

"Stephen Starr has written an extraordinary account of the uprising against the regime of Bashar al-Assad...[An] impressive and insightful eye-witness account." -- Irish Times

Table Of Contents

Prologue

Introduction

1. Damascus: Dragged towards Revolt

2. Minorities and Syria's Revolt

3. Lies, Half-Truths and Videos

4. Gap Between State and Society

5. Revolution through the Eyes of Rich and Poor

Creating Africa
Struggles Over Nature, Conservation and Land
Knut Nustad

Key Selling Points
- A trenchant reassessment of colonial and postcolonial conservation policies in Africa and their impact on local inhabitants
- Author shows how conservationists need to be more creative in their strategies lest they are accused of neo-colonial land grabbing
- Argues that we need to re-assess the rights of locals when considering conservation policies in Africa
- Examines a high-profile case both in South Africa and abroad

Summary
In Africa, conflicts between protected areas for fauna and flora and space for their surrounding human populations continue despite years spent trying to find an accommodation between the needs of both parties.

Creating Africa investigates the roots of the current conservation boom, demonstrates that it is part of a struggle over various definitions of existing realities, and examines the global effects of this struggle. The book discusses the first UNESCO World Heritage Site in South Africa, the Isimangaliso (St Lucia) Wetland Park. Here, conservation interests are pitted against those of industrial forestry, commercial farming, and local communities struggling to have their lands returned to them. They all seek to define and create their own realities, but do so with very different resources at their disposal. In his expert analysis, Nustad treats these realities not as different representations but rather as multiple, often competing, viewpoints that involve a wide range of actors, both human and non-human.

Nustad posits that in order to avoid being accused of neo-colonial land grabbing, the conservation lobby will need to find a new way of imagining nature and protection that includes people.

Contributor Bio
Knut G. Nustad has written about urban policy, informal processes and development policy, as well as the anthropology of state formation and conflicts around protected areas in South Africa. He is Associate Professor at the University of Oslo and Senior Researcher at the Norwegian Institute of International Affairs (NUPI).

Quotes
"Drawing on a lucid synthesis of current anthropological debates about ontology, materiality, and enactment, Knut Nustad offers an acute ethnography of the history and politics of the Dukuduku forest in South Africa. This is an intensely used and contested landscape, where sugar farmers, small holders, and conservationists enact different natures and forms of politics. Creating Africa helps us think about how we might life differently in the natural world, and in so doing, begin to craft a more hopeful environmental politics." -- Andrew S. Mathews, Associate Professor of Anthropology, University of California, Santa Cruz, and author of Instituting Nature: Authority, Expertise and Power in Mexican Forests

"Creating Africa is a theoretically innovative work, thinking through the implications of the 'ontological turn' in anthropology for the study of communities and protected areas. It is also an important contribution to the study of protected areas in Africa, highlighting the ways the history of parks in KwaZulu-Natal diverge from the 'Yellowstone Model'. Nustad combines history and ethnography to show how the Dukuduku forest came to be both 'conservation nature' and a site of small-scale agriculture, and highlights the ongoing conflicts between these competing ontologies of place. Highly recommended." - - Derick A. Fay, Assistant Professor of Anthropology, University of California, Riverside
The Mediator
A Biography of Martti Ahtisaari
Katri Merikallio, Tapani Ruokanen

Key Selling Points
- The first biography in English of the Nobel Peace Prize winning Finnish statesman and diplomat who brokered peace deals in Kosovo, Namibia and Indonesia.
- World's most successful mediator in international conflicts
- Authorized biography based on extensive interviews with the man himself as well as family, friends, and colleagues

Summary
Martti Ahtisaari is the world's most renowned and successful mediator in international conflicts. In 2008 he was awarded the Nobel Peace Prize for his lead role in bringing independence to Namibia, Serbia's withdrawal from Kosovo, the decommissioning of weapons in Northern Ireland and autonomy for Aceh in Indonesia. Ahtisaari's range of international contacts and global experience are remarkable and his is the name which is still most often mentioned when the world looks for an individual to try to broker a peace deal.

Ahtisaari also served for six years as President of Finland, the first holder of that office to be directly elected. Upon leaving office, he founded Crisis Management Initiative, an international NGO specialising in conflict resolution and development issues. The Mediator is an authorized biography, based on extensive interviews with Ahtisaari himself as well as his family, friends and colleagues.

Contributor Bio
Katri Merikallio and Tapani Ruokanen are both Senior Editors of the leading Finnish periodical, Suomen Kuvalehti.

Table Of Contents

PART ONE: FROM VIIPURI TO WINDHOEK
1. The Nobel Prize After All

6. Development Aid and the Foreign Ministry Fledgling
7. Diplomatic Life in Tanzania
8. With Two Hats to Namibia
9. The King of Namibia
10. The UN Feels the Pinch

PART TWO: THE PEOPLE'S PRESIDENT
11. Presidential Elections
12. President of the Republic
13. Export Sales or Human Rights?
15. Media War and Displacement

PART THREE: EXPERIENCED PEACE NEGOTIATOR AVAILABLE
16. Sealed Weapons in a Potato Cellar
17. Seeking Wise Heads
18. Banned from Jenin
19. Martti's Guide to Marching Index
The Arabs at War in Afghanistan
Mustafa Hamid, Leah Farrall

Key Selling Points
- A former senior mujahidin fighter teams up with an ex-counter terrorism analyst in this remarkable account from the frontlines of the jihad
- Reveals the real origins of the Taliban and al-Qaeda and shatters our misconceptions
- A history of the Arab volunteers in Afghanistan during and after the war against the Soviets.
- Offers valuable new insight on militant Islam

Summary
A former senior mujahidin figure and an ex-counter terrorism analyst cooperating to write a book on the history and legacy of Arab-Afghan fighters in Afghanistan is a remarkable and improbable undertaking. Yet this is what Mustafa Hamid, aka Abu Walid al-Masri, and Leah Farrall have achieved with the publication of their ground-breaking work.

The result of thousands of hours of discussions over several years, The Arabs at War in Afghanistan offers significant new insights into the history of many of today's militant Salafi groups and movements. By revealing the real origins of the Taliban and al-Qaeda and the jostling among the various jihadi groups, this account not only challenges conventional wisdom, but also raises uncomfortable questions as to how events from this important period have been so badly misconstrued.

Contributor Bio
Mustafa Hamid was among the first Arabs to join the jihad against the Soviets, and rose to become an influential figure, counting leading Afghan commanders and, later, senior Taliban and al-Qaeda figures among his friends. He was eyewitness to and a participant in events that shaped not only Afghanistan's history, but also the destiny of the Arab volunteers who joined in its liberation. After fleeing Afghanistan after 9/11 he spent close to a decade detained in Iran and has now returned to his native Egypt.

Leah Farrall was formerly a senior counterterrorism analyst with the Australian Federal Police, before turning to academia. Her research focuses on al-Qaeda and other jihadi groups, especially the myths surrounding their emergence, evolution and persistence.

Quotes
"An extraordinary, fascinating document. This combination of investigation, testimony and analysis will be essential reading for any one interested in the truth about the foreign involvement in the war against the Soviets and the early history of al-Qaeda." -- Jason Burke, South Asia correspondent, The Guardian, and author of The 9/11 Wars

"Leah Farrell and Mustafa Hamid's creative dialogue provides a unique synthesis between an insider's knowledge and a critical expert's analysis of the origins of global jihadism. Each helps the other, and both help us, see this multi-faceted movement in new and sometimes contradictory ways." -- Barnett Rubin, Senior Fellow and Director at the Center on International Cooperation, New York University

"This is an incredible book. Gripping, detailed, and important, it lays bare a story that is all too often shrouded in myth. Read it and understand the roots of al-Qaeda, ISIS, and many of the other crises ripping through the Middle East." -- Gregory D. Johnsen author of The Last Refuge: Yemen, Al-Qaeda, and America's War in Arabia

"Essential reading for anyone who studies militancy in the Islamicate world. Hamid and Farrall offer a persuasive alternative history of the foundation of al-Qaeda and the internal politics of foreign fighters inside Afghanistan. This insider account is an important document that deserves to be studied for many years to come." -- Alex Strick van Linschoten, co-author of An Enemy We Created: The Myth of the Taliban/Al-Qaeda Merger in Afghanistan, 1970-2010
1. INTRODUCING MUSTAFA HAMID
On how we met
From a rocky introduction, dialogue and, eventually, a book

2. THE ARAB-AFGHAN JIHAD

America's Covert War In East Africa
Surveillance, Rendition, Assassination
Clara Usiskin

Key Selling Points
- A tough-minded investigation of how legal process and human rights have been ignored in the search for often non-existent terrorists in Africa.
- Author has been on the ground exposing human rights abuses and has been deported from both Kenya and Uganda (and is persona non grata) for her work
- Considers both the short-term and long-term impact of this intensive militarization on vulnerable ethnic and religious groups in this highly volatile region

Critical investigation into US policies in East Africa

Summary
Clara Usiskin has spent eight years investigating the "War on Terror" and its effects in the East and Horn of Africa, documenting hundreds of cases of rendition, secret detention and targeted killings. As a result of her work exposing abuses carried out by regional governments and their international partners, Clara was deported from Kenya and Uganda and is currently persona non grata in both countries.

Her book sets out the historical background to today's covert war, including the early Somali jihads and British repression in colonial Kenya, through to the 1998 US Embassy Bombings in Nairobi and Dar es Salaam, and President Clinton's early rendition programme. America's Covert War in East Africa then looks at the US Military's new Africa Command, with its emphasis on counterterrorism, alongside increasing use of targeted killings by security forces in the region, and continued renditions and secret detention.

Finally, Usiskin investigates the shorter and longer term consequences of such intensive militarisation, and the proliferation of surveillance and other technologies of control in East Africa and its surrounding waters, focussing in particular on their impact on vulnerable ethnic and religious groups in a highly volatile region.

Contributor Bio
Clara Usiskin is a human rights investigator who documents national security-related abuses around the world, with a particular focus on the East and Horn of Africa. She was formerly a National Security Fellow at the Open Society Justice Initiative and Deputy Director of the Secret Prisons team at Reprieve.

Boundaries Undermined
The Ruins of Progress on the Bangladesh/India Border
Delwar Hussain

Key Selling Points

- An anthropological study of coal mining communities with significant implications for how we understand the globalized world.
- Based on first-hand experience, this book investigates the lives of Bangladeshis who labor in the coal mines that straddle the Bangladesh/India borderlands.

An anthropological study of coal mining communities with significant implications for how we understand the globalized world.

Summary

When anthropologist Delwar Hussain arrived in a remote coal mining village on the Bangladesh/India border to research the security fence India is building around its neighbor, he discovered more about the globalised world than he had expected. The present narrative of the Bangladesh/India border is one of increasing violence. Not so long ago, it was the site of a monumental modernist master-plan, symbolic of a larger optimism which was to revolutionize post-colonial nations around the world. Today this vision and what it gave rise to lies in spectacular ruin; the innards of the decomposing industrial past are scattered across the borderlands. The dream of a top-down, organized state and society has been replaced by a vibrant, market determined, cross-border coal industry that has little respect for the past, people or the environment. In keeping with these changes, there are new opportunities and prospects too. Social and intimate lives have transformed in unexpected and hopeful ways. While the book explores the relationship between those with a vision for the future and those without, it ultimately seeks to shed light on the communities and places that pay the highest price for the present need to develop. By focusing on the peripheries, the book at once gets to the contradictions at the heart of the neoliberal condition.

Contributor Bio

Delwar Hussain is a writer and anthropologist focusing on the contemporary Indian Sub-continent. He was educated in London and Cambridge and has written on Bangladesh for The Guardian since 2009. Hussain is currently researching his next book, a social and cultural history of Dhaka.

Quotes

"Hussain adds the skill of a journalist to his expert eye as an anthropologist." - Asian Affairs

"Delwar Hussain has explored one of the still remote borderlands of the world; a place where marginality becomes central, and the periphery is at the heart of life. This was a line of partition between India and Pakistan; and when the former East Pakistan became independent, it divided India from Bangladesh. It was the site of a major limestone project, monument of post-colonial industrialization, now abandoned and derelict. Today's livelihoods depend on the cross-border coal trade, much of it illegal, between small-scale entrepreneurs, who employ ill-paid migrant laborers. Delwar Hussain, who writes with humane clarity, tells a compelling story of colonial memory, independence, decolonization, and neo-liberalism, the ambiguous freedoms and mutating poverties of development." - Jeremy Seabrook, author of Freedom Unfinished: Fundamentalism and Popular Resistance in Bangladesh and Consuming Cultures: Globalization and Local Lives

"This rich and detailed account of the Bangladeshi-Indian borderlands addresses urgent questions concerning "development" and its failures, the uneven effects of industrialization and the lived realities of geopolitics in South Asia. Delwar Hussain s vivid prose makes the book an engrossing as well as an informative read." - Katy Gardner, Professor of Anthropology, University of Sussex, and author of Discordant Development: Global Capitalism and the Struggle for Connection in Bangladesh

For Humanity Or For The Umma?
Aid and Islam in Transnational Muslim NGOs
Marie Juul Petersen

Key Selling Points
- A discussion of how Muslim NGOs function and their global impact in disaster relief and development.
- Challenges stereotypes that Muslim NGOs are simply fronts for jihadist networks or backers of resistance groups

Summary
In the wake of 9/11 and the 'War on Terror', transnational Muslim NGOs have too often been perceived as illegitimate fronts for global militant networks such as al-Qaeda or as backers of national political parties and resistance groups in Palestine, Afghanistan and elsewhere. Yet clearly there is more to transnational Muslim NGOs. Most are legitimate providers of aid to the world’s poor, although their assistance may sometimes differ substantially from that of secular NGOs in the West.

Seeking to broaden our understanding of these organisations, Marie Juul Petersen explores how Muslim NGOs conceptualise their provision of aid and the role Islam plays in this. Her book not only offers insights into a new kind of NGO in the global field of aid provision; it also contributes more broadly to understanding 'public Islam' as something more and other than political Islam.

The book is based on empirical case studies of four of the biggest transnational Muslim NGOs, and draws on extensive research in Britain, Kuwait, Saudi Arabia, Lebanon, Jordan and Bangladesh, and more than 100 interviews with those involved in such organisations.

Contributor Bio
Marie Juul Petersen is a researcher at the Danish Institute for Human Rights. She has researched and written extensively on religion, aid and NGOs, and her work has appeared in several scientific journals, including Development in Practice, International Journal of Middle East Studies, Third World Quarterly and Voluntas: International Journal of Voluntary and Non-Profit Organizations.

Table Of Contents

1. INTRODUCTION. STUDYING TRANSNATIONAL MUSLIM NGOs

Transnational Muslim NGOs. Faith-based organisations or fronts for terrorism?
Actors and meanings
Processes of Islamization
Ideologies of aid
Aid cultures
Sacralised and secularised aid
Structure of the book

2. APPROACHING TRANSNATIONAL MUSLIM NGOs

Introducing the four organisations
Studying organisational ideologies
The challenges of multi-sited fieldwork
Questions of positioning: Studying the familiar and the foreign
Accessing transnational Muslim NGOs
3. THE CULTURES OF DEVELOPMENT AND ISLAMIC AID

A common humanity: A brief history of development aid
Solidarity with the umma: A brief history of Islamic aid
Dichotomies of aid? Comparing the cultures of development and Islamic aid

4. TRAJECTORIES OF TRANSNATIONAL MUSLIM NGOs

Competition: Transnational Muslim NGOs in the Horn of Africa
Conflicts: Transnational Muslim NGOs in Afghanistan
Co-existence: Transnational Muslim NGOs in Bosnia
A new situation: 9.11. and the 'War on Terror'
Navigating between cultures

5. PIETY AND PROFESSIONALISM: CLAIMS TO AUTHORITY IN IIROSA AND IICO

Designations and financial decline. IICO and IIROSA after 9.11.

Islamic dignitaries and pious Muslims
Islamic authority: 'Because of believing in God...'
Professional authority: 'Our activities are transparent'
Running a health clinic or working in an Islamic organisation?

6. 'IT'S ALL IN ISLAM!' AID IDEOLOGIES IN IIROSA AND IICO

Visions of aid
The rationale of aid: A religious duty and a moral responsibility
Strategies of aid: Relief, da'wa, education and empowerment
A sacralised aid?

7. PROFESSIONALISM AND (A BIT OF) PIETY. CLAIMS TO AUTHORITY IN ISLAMIC RELIEF AND MUSLIM AID

Fame and funding opportunities. Islamic Relief and Muslim Aid after 9.11.
Islamic personalities and young professionals
Professional authority: 'Working towards international standards'
Islamic authority: 'The humanitarian spirit of Islam'
'In faith-based organisations, you will never get 100 per cent professionalism'

8. 'WHAT'S SO ISLAMIC ABOUT US?' IDEOLOGIES OF AID IN ISLAMIC RELIEF AND MUSLIM AID

Visions of aid
The rationale of aid
Strategies of aid
A secularised aid?

9. CONCLUSION

Studying transnational Muslim NGOs
Cultures of aid: Development and Islamic aid
Trajectories of transnational Muslim NGOs
Sacralised or secularised aid?
Developmentalising Islamic aid and Islamising development aid
The emergence of new aid cultures?

"We Love Death As You Love Life"
Britain's Suburban Mujahedeen
Raffaello Pantucci

Key Selling Points
• DT Case study of how extremist Islamist thought can capture the imaginations of young Western Muslims
• Offers insight into what motivates British Muslims drawn to jihadist ideas
• DT First comprehensive look at home-grown jihadist violence in the UK

Summary
As Mohammed Siddique Khan led his group of fellow-believers into London on the morning of July 7, 2005 it is unlikely that they were thinking much beyond the immediate impact of their actions. Driven by anger at the West’s treatment of Muslims worldwide, ideas fed to them by foreign extremists, and a sense of extreme rejection of the society in which they were born, they sought to reshape the world in an image they thought would be pleasing to God. But while they felt they were on a holy mission -- as enunciated in Khan's chilling video message, *We Love Death As You Love Life* -- a far more earthly arc of history underlay their actions.

This book offers an insight into the motivations behind Khan and his group, as well as the hundreds of young British Muslims who have been drawn by jihadist ideas to fight on battlefields at home and abroad. Starting with the arrival of immigrant communities to the UK and the establishment of diasporas with strong ethnic connections to the Middle East and South Asia, to the arrival of jihadist warriors fresh from the anti-Soviet war in Afghanistan, this book looks at the history that came before Mohammed Siddique Khan and places his action within its larger context. This book provides the first comprehensive history of jihadist ideas and violence in the United Kingdom.

Contributor Bio
Raffaello Pantucci is an Associate Fellow at the International Center for the Study of Radicalization at King's College, London. He has worked on questions around terrorism and radicalization in London and Washington, and has been published widely in both the media and the academic and specialist press. This is his first book.

Critical Muslim 13
Race
Ziauddin Sardar, Robin Yassin-Kassab

Key Selling Points
• Global in outlook
• Little research available on the issue of race in Islam
• Islamic look at the issue of 'race'

Summary
Hassan Mahamdallie argues that racism is twenty-first century's main problem, Shannon Shah detects racial overtones within Islam, Robert Irwin examines race and racism in the Arabian Nights, Hugh Kennedy uncovers the ninth century Zanj slave uprisings, Sejad Mekic looks for signs of hope in Bosnia, Sadiyya Shaikh explores religious imaginaries of ibn Arabi, Avaes Mohammad evokes parallel lives in Blackburn, Gary MacFarlane revisits the Christian fundamentalism of abolitionist John Brown, Ziauddin Sardar has unsavoury encounters in Saudi Arabia, and Naima Khan accuses South Asian Muslims of looking down on Africans.

Also in this issue: Ruth Waterman's photographs of Bosnia, an epic poem on Bhopal, poetry by Dorothea Smartt, a short story by Aiysha Jahan, race relations in Trinidad and our list of ten political organisations that promote Islamophobia.

Contributor Bio
Ziauddin Sardar is a renowned writer, broadcaster and cultural critic. A former columnist on the New Statesman, he has also served as a Commissioner on the Equality and Human Rights Commission. He is professor of Law and society at Middlesex University, and the author of numerous books, the most recent being Reading the Qur'an (Hurst); Desperately Seeking Paradise: Journeys of a Sceptical Muslim (Granta); What Do Muslims Believe? (Granta); and Balti Britain: A Provocative Journey Through Asian Britain (Granta). Robin Yassin-Kassab is the author of the acclaimed novel, The Road From Damascus (Penguin). Born in west London, he has lived and worked in France, Pakistan, Turkey, Syria, Morocco, Saudi Arabia and Oman. He is a regular contributor to the literary pages of The Guardian and The Independent.

Understanding Contemporary Ethiopia
Gérard Prunier, Éloi Ficquet

Key Selling Points
• Seeks to dispel the myths and cliches surrounding contemporary perceptions of Ethiopia by providing a rare overview of the country's recent history, politics and culture
• Explores the unique features of this often misrepresented country as it strives to make itself heard in the modern world
• Gerard Prunier is a renowned historian of contemporary Africa with a strong publishing track record, including the well reviewed Africa's World War, published by OUP (rights sold by Hurst)
Understanding Contemporary Ethiopia seeks to offer readers a comprehensive overview of the country's recent history, politics and culture that goes beyond the usual guidebook fare.

Summary
When we think of Ethiopia we tend to think in cliches: Solomon and the Queen of Sheba, the Falasha Jews, the epic reign of Emperor Haile Selassie, the Communist Revolution, famine and civil war. Among the countries of Africa it has a high profile yet is poorly known. How ever all cliches contain within them a kernel of truth, and occlude much more. Today's Ethiopia (and its painfully liberated sister state of Eritrea) are largely obscured by these mythical views and a secondary literature that is partial or propagandist. Moreover there have been few attempts to offer readers a comprehensive overview of the country's recent history, politics and culture that goes beyond the usual guidebook fare. Understanding Contemporary Ethiopia seeks to do just that, presenting a measured, detailed and systematic analysis of the main features of this unique country, now building on the foundations of a magical and tumultuous past as it struggles to emerge in the modern world on its own terms.

Contributor Bio

Éloi Ficquet is an anthropologist and historian, professor at the EHESS, and Director of the French Center for Ethiopian Studies in Addis Ababa. He is the author of A French-Amharic Dictionary and of many articles on Ethiopian history and culture.

Understanding Kashmir and Kashmiris
Christopher Snedden

Key Selling Points
• Compelling narrative of the Kashmir dispute
• The seemingly intractable Kashmir dispute and the fate of Kashmiris throughout South Asia and beyond are the twin themes in Snedden's meticulously researched book.
• It puts the whole J&K region and the Kashmir dispute into its geo-strategic, historic and political setting.

Summary
In 1846, the British created the state of Jammu and Kashmir (J&K) - popularly called "Kashmir" - and then quickly sold this prized region to the wily and powerful Raja, Gulab Singh. Intriguingly, had they retained it, the India-Pakistan dispute over possession of the state may never have arisen, but Britain's concerns lay elsewhere -- expansionist Russia, beguiling Tibet and unstable China "circling" J&K -- and their agents played the 'Great Game' in Afghanistan and 'Turkistan'.

Snedden contextualizes the geo-strategic and historical circumstances surrounding the British decision to relinquish prestigious 'Kashmir', and explains how they and four Dogra maharajas consolidated and controlled J&K subsequently. He details what comprised this diverse princely state with distant borders and disunified peoples and explains the Maharaja of J&K's controversial accession to India on 26 October 1947 - and its unintended consequences.

Snedden weaves a compelling narrative that frames the Kashmir dispute, explains why it continues, and assesses what it means politically and administratively for the divided peoples of J&K and their undecided futures.

Contributor Bio
Christopher Snedden is an Australian politico-strategic analyst who has visited J&K often and interviewed many elder statesmen involved in the Kashmir dispute. He is author of The Untold Story of the People of Azad Kashmir.
From Slave Ship to Harvard
Yarrow Mamout and the History of an African American Family
James H. Johnston

Key Selling Points
• The remarkable story of an African-American family's rise from American slavery to the American dream
• Yarrow Mamout's portrait is a go-to image as the "face of slavery" and though mentioned in passing in countless US history textbooks, this is the first time his story has been told in a book-length treatment
• This book not only follows the life of a remarkable individual, but chronicles the experiences of an entire family throughout all of American history—very much like a non-fiction Roots
• Yarrow and his family were important figures in the history of Georgetown, Maryland, as evidenced by the many streets and neighborhoods that bear their name
A fascinating case study of race in America—the 275-year history of an African American family in Maryland.

Summary
The biography of a remarkable individual and the chronicle of a family's rise from slavery to winning the American dream.

From Slave Ship to Harvard is the true story of an African American family in Maryland over six generations. The author has reconstructed a unique narrative of black struggle and achievement from paintings, photographs, books, diaries, court records, legal documents, and oral histories. From Slave Ship to Harvard traces the family from the colonial period and the American Revolution through the Civil War to Harvard and finally today.

Yarrow Mamout, the first of the family in America, was an educated Muslim from Guinea. He was brought to Maryland on the slave ship Elijah and gained his freedom forty-four years later. By then, Yarrow had become so well known in the Georgetown section of Washington, D.C., that he attracted the attention of the eminent American portrait painter Charles Willson Peale, who captured Yarrow's visage in the painting that appears on the cover of this book. The author here reveals that Yarrow's immediate relatives—his sister, niece, wife, and son—were notable in their own right. His son married into the neighboring Turner family, and the farm community in western Maryland called Yarrowsburg was named for Yarrow Mamout's daughter-in-law, Mary "Polly" Turner Yarrow. The Turner line ultimately produced Robert Turner Ford, who graduated from Harvard University in 1927.

Just as Peale painted the portrait of Yarrow, James H. Johnston's new book puts a face on slavery and paints the history of race in Maryland. It is a different picture from what most of us imagine. Relationships between blacks and whites were far more complex, and the races more dependent on each other. Fortunately, as this one family's experience shows, individuals of both races repeatedly stepped forward to lessen divisions and to move America toward the diverse society of today.

Contributor Bio

JAMES H. JOHNSTON, an attorney and journalist, has published extensively on national affairs, law, telecommunications, history, and the arts. His contributions include papers on local Washington, D.C., history, Yarrow Mamout, and an edition of The Recollections of Margaret Cabell Brown Loughborough.

Quotes
"...a masterfully researched detective story with a wealth of detail about the rise of an African-American family."-John R. Wennersten, University of Maryland, Eastern Shore
"... Portray[s] an illuminating, thought-provoking, relatively unusual moment in early American history."—Publishers Weekly

"James H. Johnston has given us a clear and vivid look at a long-neglected aspect of American history. This book is in turn disturbing and elevating, horrifying and inspiring. It is impossible to ignore."—Harold Holzer, The Metropolitan Museum of Art

"An absorbing study and story of a slave in America. Once begun, this book is very hard to put down. It weaves a prodigious amount of research into a compelling narrative, of not just one man's journey, but also of the struggle of every man and woman to achieve identity and success against often overwhelming odds. This is a book that no book club and no course on slavery in America should be without."—Edward Papenfuse, Director of the Maryland State Archives

"Part historical narrative, part genealogical detective work, this book will appeal to a range of academic and general readers, especially those interested in race relations in early America."—Library Journal

"Johnston has given Americans a rare treasure, a true story of an African American family, and its triumph over slavery. The great American painter Charles Willson Peale, best remembered for his portrait paintings of leading figures of the American Revolution, would have very much approved--Johnston's done with a whole lot of research, patience, and writing, what Peale did with his brush almost 200 years ago."—Sidney Hart, Senior Historian, National Portrait Gallery

Artists' SoHo
50 Episodes of Intimate History
Richard Kostelanetz

Key Selling Points
• A very important first-hand contribution to the history of a unique art community that changed not only the art, but also the city, of New York.--Jonas Mekas
• The chapters that focus on Nam June Paik, Meredith Monk, Richard Foreman, and other such pivotal figures offer the book's best insights into the essence of the SoHo phenomenon. Of particular interest to artists and New York City buffs, this savvy little history should also be appealing to those intrigued by the sociology of counterculture and the traditions of avant-garde art.--Library Journal
• The book's major contribution is its meticulous recounting of the unprecedented confluence of gray-area zoning and occupancy laws coupled with sheer pioneering spirit that led to the area's development in the first place. Like the neighborhood it describes, Kostelanetz's cheerfully episodic book is full of odd corners, secret alleys and sudden vistas.--Publishers Weekly

Richard Kostelanetz traces the development of a legendary artists' colony within an industrial slum in lower Manhattan.

Summary
During the 1960s and 1970s in New York City, young artists exploited an industrial wasteland to create spacious studios where they lived and worked, redefining the Manhattan area just south of Houston Street. Its use fueled not by city planning schemes but by word-of-mouth recommendations, the area soon grew to become a world-class center for artistic creation indeed, the largest urban artists' colony ever in America, let alone the world.

Richard Kostelanetz's Artists' SoHo not only examines why the artists came and how they accomplished what they did but also delves into the lives and works of some of the most creative personalities who lived there during that period, including Nam June Paik, Robert Wilson, Meredith Monk, Richard Foreman, Hannah Wilke, George Macuinas, and Alan Suicide. Gallerists followed the artists in fashioning themselves, their homes, their buildings, and even their streets into transiently prominent exhibition and performance spaces.

SoHo pioneer Richard Kostelanetz's extensively researched intimate history is framed within a personal memoir that unearths myriad perspectives: social and cultural history, the changing rules for residency and ownership, the ethos of the community, the physical layouts of the lofts, the types of art produced, venues that opened and closed, the daily rhythm, and the gradual invasion of "new people." Artists' SoHo also explores how and why this fertile bohemia couldn't last forever. As wealthier people paid higher prices, galleries left, younger artists settled elsewhere, and the neighborhood became a "SoHo Mall" of trendy stores and restaurants.

Compelling and often humorous, Artists' SoHo provides an analysis of a remarkable neighborhood that transformed the art and culture of New York City over the past five decades.

Contributor Bio

RICHARD KOSTELANETZ is a critical cultural historian and literary artist who has been active in New York arts for more than five decades. He moved to SoHo just as it was being developed by the arts community and his loft studio home aptly named Wordship became legendary. Now residing along the L-Train in FarEast BushWick, he is a rare living witness to the life and times of New York City's artistic neighborhoods.

Quotes

"Kostelanetz tells a great neighborhood story as important for understanding the past as for reinventing the future. Those thinking about New York City, the avant-garde,
architectural preservation, urban planning, and American utopias, will find it rich and provocative." - Jane Mushabac, co-author of A Short and Remarkable History of New York City, a "Best of the Best" of the American Association of University Presses

"Kostelanetz's approach to the history of SoHo, with an emphasis on its heyday as a community of artists during the 1960s through the 1980s, is prismatic, covering all relevant perspectives: the history of the era, the rental laws of the period, the ethos of the community, the variety of physical layouts of the residential/studio lofts, the sort of art being produced, the stores that opened and closed in the neighborhood, the daily rhythm of activity and quiet, the gradual discovery and invasion of SoHo by a wealthier population, the economics of the locale, the surrounding neighborhoods, and much more. The cumulative effect is a complex and encyclopedic portrait of a place and time in New York City history." - Joyce Morgenroth, Cornell University

"Kostelanetz tells a great neighborhood story as important for understanding the past as for reinventing the future. Those thinking about New York City, the avant-garde, architectural preservation, urban planning, and American utopias, will find it rich and provocative." - Jane Mushabac, co-author of A Short and Remarkable History of New York City, a "Best of the Best" of the American Association of University Presses

Reading Publics
New York City’s Public Libraries, 1754-1911
Tom Glynn

Key Selling Points
- The history of Gotham’s early libraries is an important part of the social and cultural history of New York City and the United States.
- Fascinating examination of the public and private values associated with reading and the shifting views of literature and popular fiction and how readers’ tastes mirrored constructions of class and gender.

How did the New York Public Library come to be? Reading Publics explores the unique history behind our institutions.

Summary
This lively, nuanced history of New York City’s early public libraries traces their evolution within the political, social, and cultural worlds that supported them.

On May 11, 1911, the New York Public Library opened its "marble palace for book lovers" on Fifth Avenue and 42nd Street. This was the city's first public library in the modern sense, a tax-supported, circulating collection free to every citizen. Since before the Revolution, however, New York's reading publics had access to a range of "public libraries" as the term was understood by contemporaries. In its most basic sense a public library in the eighteenth and most of the nineteenth centuries simply meant a shared collection of books that was available to the general public and promoted the public good. From the founding in 1754 of the New York Society Library up to 1911, public libraries took a variety of forms. Some of them were free, charitable institutions, while others required a membership or an annual subscription. Some, such as the Biblical Library of the American Bible Society, were highly specialized; others, like the Astor Library, developed extensive, inclusive collections. What all the public libraries of this period had in common, at least ostensibly, was the conviction that good books helped ensure a productive, virtuous, orderly republic-that good reading promoted the public good.

Tom Glynn's vivid, deeply researched history of New York City's public libraries over the course of more than a century and a half illuminates how the public and private functions of reading changed over time and how shared collections of books could serve both public and private ends. Reading Publics examines how books and reading helped construct social identities and how print functioned within and across groups, including but not limited to socioeconomic classes. The author offers an accessible while scholarly exploration of how republican and liberal values, shifting understandings of "public" and "private," and the debate over fiction influenced the development and character of New York City's public libraries in the eighteenth and nineteenth centuries.

Reading Publics is an important contribution to the social and cultural history of New York City that firmly places the city's early public libraries within the history of reading and print culture in the United States.

Contributor Bio

TOM GLYNN is a librarian at Rutgers University, where he is the selector and liaison for British and American history, the history of science, American studies, and political science.

Quotes

"A deeply researched, well-written, and solid contribution to library history literature that will not only interest members of the library profession, but also scholars and students of intellectual, cultural, social, urban, and print culture history whose own research has been heavily influenced by the rich collections Glynn discusses." -Wayne Wiegand, Professor of Library and Information Studies Emeritus, Florida State University.
"With humor and sensitivity as well as exemplary scholarship Tom Glynn vividly recounts the story of libraries open to the public prior to the creation of the New York Public Library, and of their readers. Throughout he explores major themes of republican values for reading and information, liberalism, shifting understandings of public and private, and the debate over fiction. By concentrating on New York, Glynn provides a nuanced interpretation of the development of public libraries in a city that holds a unique position in the national imagination, and in so doing makes a significant contribution to the histories of readers and reading, of libraries, and of American culture."--Christine Pawley, University of Wisconsin-Madison

Exploring Lincoln
Great Historians Reappraise Our Greatest President
Harold Holzer, Craig L. Symonds, Frank J. Williams

Key Selling Points
- Sponsored the The Lincoln Forum (www.thelincolnforum.org), the leading national association of scholars, journalists, teachers, history buffs, and others who meet annually each November in Gettysburg, PA
- The annual Forum meeting is the most important single gathering of Lincoln scholars--covered regularly and in depth by C-SPAN
- The essays in this collection are compelling and provocative; they have great appeal to both professional and amateur historians, as well as Lincoln and Civil War hobbyists

Summary
Ubiquitous and enigmatic, the historical Lincoln, the literary Lincoln, even the cinematic Lincoln have all proved both fascinating and irresistible. Though some 16,000 books have been written about him, there is always more to say, new aspects of his life to consider, new facets of his persona to explore. Enlightening and entertaining, Exploring Lincoln offers a selection of sixteen papers presented at the Lincoln Forum symposia over the past three years.

Shining new light on particular aspects of Lincoln and his tragically abbreviated presidency, Exploring Lincoln presents a compelling snapshot of current Lincoln scholarship and a fascinating window into understanding America's greatest president.

Contributor Bio
HAROLD HOLZER is Roger Hertog Fellow at the New-York Historical Society and one of the nation's leading authorities on Lincoln and the political culture of the Civil War era. He is chairman of the Abraham Lincoln Bicentennial Foundation and has written, co-written, or edited forty-seven books, most recently Lincoln and the Power of the Press.

Quotes
"The rich variety of insights and information on Lincoln and the Civil War served up in this book makes it truly a moveable feast. Some traditional interpretations are confirmed; others are challenged and new perspectives set forth; and all are of unfailing interest. This is a volume to be kept handy on your shelf and consulted again and again."--James McPherson, Princeton University

"This is a veritable feast for Lincoln devotees as astute historians probe Lincoln through many perspectives, with perhaps the most thrilling account being the sensational discovery of a cache of Mary Todd Lincoln's letters. A must-read for those who want a better understanding of the sixteenth president."--Anthony S. Pitch, author, "They Have Killed Papa Dead!" The Road to Ford's Theatre, Abraham Lincoln's Murder, and the Rage for Vengeance

Memory and Complicity
Migrations of Holocaust Remembrance
Debarati Sanyal

Key Selling Points
• A lucid but sophisticated and nuanced intervention in the growing field of memory studies, as well as in Holocaust and trauma studies.
• Rather than take the Holocaust as absolutely unique, Sanyal demonstrates how crucial Holocaust memory has been to subsequent historical moments. In showing how Holocaust memory was deployed around the pivotal anticolonial struggle in Algeria and exploring the dangerous political reverberations around that comparison, Sanyal shows the importance of the Holocaust for postcolonial studies and vice versa.

Summary
Since World War II, French and Francophone literature and film have repeatedly sought not to singularize the Holocaust as the paradigm of historical trauma but rather to connect its memory with other memories of violence, namely that of colonialism. These works produced what Debarati Sanyal calls a "memory-incomplicity" attuned to the gray zones that implicate different regimes of violence across history as well as those of different subject positions such as victim, perpetrator, witness, and reader/spectator. Examining a range of works from Albert Camus, Primo Levi, Alain Resnais, and Jean-Paul Sartre to Jonathan Littell, Assia Djebar, Giorgio Agamben, and Boualem Sansal, Memory and Complicity develops an inquiry into the political force and ethical dangers of such implications, contrasting them with contemporary models for thinking about trauma and violence and offering an extended meditation on the role of aesthetic form, especially allegory, within acts of transhistorical remembrance. What are the political benefits and ethical risks of invoking the memory of one history in order to address another? What is the role of complicity in making these connections? How does complicity, rather than affect based discourses of trauma, shame and melancholy, open a critical engagement with the violence of history? What is it about literature and film that have made them such powerful vehicles for this kind of connective memory work?

As it offers new readings of some of the most celebrated and controversial novelists, filmmakers, and playwrights from the French-speaking world, Memory and Complicity addresses these questions in order to reframe the way we think about historical memory and its political uses today.

Contributor Bio
Debarati Sanyal is Professor of French at the University of California, Berkeley.

Quotes
Memory and Complicity offers a sophisticated, nuanced, and beautifully written account of the intersecting legacies of genocide and colonialism in postwar France. In this significant and much needed intervention, Sanyal illuminates both the possibilities and dangers of transcultural trauma and memory studies. --Michael Rothberg, author of Multidirectional Memory: Remembering the Holocaust in the Age of Decolonization
Memory and Complicity is a very impressive book. Sanyal is unusually well acquainted with the relevant literature (which is extensive), her arguments are clear and compelling, her writing is unfailingly lucid and accessible, and her scholarship is beyond reproach. --Thomas Trezise, Princeton University

Against Identification: Bad Education, Trauma, and Citizenship
Holocaust Memory, Gray Zones and the War on Terror: Boualem Sansal's Le Village de l'Allemand

Afterword
Minima Philologica
Werner Hamacher, Catherine Diehl, Jason Groves

Key Selling Points
• A rousing manifesto for the future of literary studies by one of the leading literary theorists in the world.
• This may well become required reading for seminars in literature, but its implications stretch beyond those fields to any fields that deal with texts—such as religious studies.

Summary
Minima Philologica brings together two essays by Werner Hamacher that are meant to revitalize philology as a practice beyond its restriction to the restoration of linguistic data and their meanings. In these two texts, "95 Theses on Philology" and "For-Philology," Hamacher propounds a notion of generalized philology that is equivalent to the real production of linguistic utterances, and indeed utterances not limited to predicative or even discursive statements. Philology, in speaking for language where no clear and distinct language is given, exhibits and exposes the structure of language in general. The first text, "95 Theses on Philology," challenges academic philology as well as other disciplines across the humanities and sciences that "use" language, assuming it to be a given entity and not an event. The theses develop what Hamacher calls the "idea of philology" by describing the constitution of its objects, its relation to knowledge, its suspension of consciousness, and its freedom for what remains always still to be said.

In "For-Philology," both speaking and writing, Hamacher argues, follow, discursively and non-discursively, the desire for language. Desire-philía—is the insatiable affect that drives the movement between utterances toward the next and the one after that. Desiring language-logos—means to respond to an alien utterance that precedes you, ignorant about where the path will lead, accepting loss and uncertainty, thinking in and through language and the lack of it, exceeding, returning, responding to others, cutting into and off what is to be said. In arguing this, Hamacher responds, directly or obliquely, to other philological thinkers such as Plato and Schlegel, Nietzsche, Benjamin, and Heidegger, as well as to poets such as Rene Char, Francis Ponge, Paul Celan, and Friedrich Holderlin. Taken together, the essays of Minima Philologica constitute a manifesto for a new understanding of linguistic existence that breaks new ways of attending to language and those who live by it.

Contributor Bio

Werner Hamacher is Emmanuel Levinas Professor of Philosophy at the European Graduate School, and Professor emeritus of General and Comparative Literature at the Goethe University Frankfurt.

Catharine Diehl, a Ph.D. from Princeton University, is a research assistant in Philosophy at Humboldt University of Berlin.

Jason Groves is a postdoctoral fellow in the Department of Germanic Languages and Literatures at Yale University.

Quotes

"Even as Minima Philologica prompts comparison with such masterpieces of aphoristic prose as Schlegel's Athenäum Fragments, Nietzsche’s Gay Science, and Adorno’s Minima Moralia, it asks of its readers that they explore the incomparable—in other words, the philological—elements in whatever falls under the categories of culture, science, and morality."—Peter Fenves, Northwestern University

Misfit Forms
Paths Not Taken by the British Novel
Lorri G. Nandrea

Key Selling Points
- Explores the "other paths" taken in the eighteenth- and nineteenth-century novel.
- The author's sensitivity to the various meanings produced by books' material form, such as typography, offers a distinctive contribution to book history as well as to questions of literary form.

Summary

The complicated junctions negotiated by the novel during the eighteenth century reveal not only achievements but also exclusions. Misfit Forms offers a speculative reconstruction of roads less traveled. What if typographical emphasis and its associated transmission of sensuality and feeling had not lost out to "transparent" typography and its paradigms of sympathetic identification? What was truncated when cumulative narrative structures were declared primitive in relation to the unified teleological plot? What visions of the novel's value as an arena for experience were sidelined when novel reading was linked to epistemological gain?

Reading novels by Sterne, Charlotte Brontë, Defoe, Gaskell, Hardy, and Woolf in tandem with less-known works, Nandrea illuminates the modes and techniques that did not become mainstream. Following Deleuze, Nandrea traces the "dynamic repetitions" of these junctures in the work of later writers. Far from showing the eclipse of primitive modes, such moments of convergence allow us to imagine other possibilities for the novel's trajectory.

Contributor Bio

Lorri Nandrea is an independent scholar.

Lyric Apocalypse
Milton, Marvell, and the Nature of Events
Ryan Netzley

Key Selling Points
- Netzley offers fresh readings of two major seventeenth-century poets as a way to intervene in contemporary theoretical explorations of the category of the event, by Agamben, Badiou, Deleuze, and others.
- Netzley's theorization of lyric poetry as an event in itself offers fresh ways to approach the politics of literature through form, rather than against it.

Summary
What's new about the apocalypse? Revelation does not allow us to look back after the end and enumerate pivotal turning points. It happens in an immediate encounter with the transformatively new.

John Milton's and Andrew Marvell's lyrics attempt to render the experience of such an apocalyptic change in the present. In this respect they take seriously the Reformation's insistence that eschatology is a historical phenomenon. Yet these poets are also reacting to the Regicide, and, as a result, their works explore very modern questions about the nature of events, what it means for a significant historical occasion to happen.

Lyric Apocalypse argues that Milton's and Marvell's lyrics challenge any retrospective understanding of events, including one built on a theory of revolution. Instead, these poems show that there is no "after" to the apocalypse, that if we are going to talk about change, we should do so in the present, when there is still time to do something about it. For both of these poets, lyric becomes a way to imagine an apocalyptic event that would be both hopeful and new.

Contributor Bio
Ryan Netzley is Associate Professor of English and Director of Graduate Studies at Southern Illinois University, Carbondale.

Quotes
"Netzley offers a theoretically sophisticated contemplation of the relationship between lyric and history. As he shows, lyric's concern with the momentary and eventual holds the potential to disrupt historical narrativization, which in the sixteenth and seventeenth centuries is also the potential to query the Providential and the prophetic. This book ought to be read by scholars of Milton and Marvell, and will be appreciated well beyond early modern studies for an approach to lyric poetry informed by the work of Agamben, Adorno, and Deleuze and Guattari."--Feisal Mohamed, author of Milton and the Post-Secular Present
"Lyric Apocalypse is a fine piece of work: timely, original, and persuasive--a powerful combination of theoretical argument with illuminating close reading. Netzley's sensitivity to verbal and syntactical alternatives is remarkable."--Judith H. Anderson, Indiana University

The Storm at Sea
Political Aesthetics in the Time of Shakespeare
Christopher Pye

Key Selling Points
- Pye's shows how early modern works of art, in their engagement with the problem of aesthetic autonomy, profoundly explore art's relations to law, state, sovereignty and political subjectivity.
- Pye's account of political aesthetics rewrites the accounts of political theology by which theorists have recently explored early modern drama.
- The book includes close readings of four Shakespeare plays, as well as chapters on Leonardo and Hobbes.

Summary
The Storm at Sea: Political Aesthetics in the Time of Shakespeare counters a tradition of cultural analysis that judges considerations of aesthetic autonomy in the early modern context to be either anachronistic or an index of political disengagement. Pye argues that for a post-theocratic era in which the mise-en-forme of the social domain itself was for the first time at stake, the problem of the aesthetic lay at the very core of the political; it is precisely through its engagement with the question of aesthetic autonomy that early modern works most profoundly explore their relation to matters of law, state, sovereignty, and political subjectivity.

Pye establishes the significance of a "creationist" political aesthetic--at once a discrete historical category and a phenomenon that troubles our familiar forms of historical accounting--and suggests that the fate of such an aesthetic is intimately bound up with the emergence of modern conceptions of the political sphere.

The Storm at Sea moves historically from Leonardo da Vinci to Thomas Hobbes; it focuses on Shakespeare and English drama, with chapters on Hamlet, Othello, A Winter's Tale, and The Tempest, as well as sustained readings of As You Like It, King Lear, Thomas Kyd's Spanish Tragedy, and Christopher Marlowe's Doctor Faustus. Engaging political thinkers such as Carl Schmitt, Giorgio Agamben, Claude Lefort, and Roberto Esposito, The Storm at Sea will be of interest to political theorists as well as to students of literary and visual theory.

Contributor Bio
Christopher Pye is Class of 1924 Professor of English at Williams College. He is the author of The Regal Phantasm: Shakespeare and the Politics of Spectacle and The Vanishing: Shakespeare, the Subject, and Early Modern Culture.

Quotes
In a forceful reconsideration of the aesthetic as itself a site of political thought, Pye is throwing down the gauntlet against the prevailing climate of historicist work in early modern literary criticism, which has placed the Renaissance before the arrival of the aesthetic as a category. -Andrew Daniel, Johns Hopkins University
Drawing on a rich and wide-ranging selection of important works from Leonardo da Vinci to Thomas Hobbes's Leviathan, through the plays of Thomas Kyd, Christopher Marlowe, and Shakespeare, Christopher Pye makes a powerful case for the existence of an autonomous early modern aesthetic prior to Kant, through readings that are highly attentive to textual detail and theoretically informed by thinkers from philosophy, political theory, and psychoanalysis. --Philip Lorenz, Cornell University

Cinepoetry
Imaginary Cinemas in French Poetry
Christophe Wall-Romana

Summary

Cinepoetry analyzes how French poets have remapped poetry through the lens of cinema for more than a century. In showing how poets have drawn on mass culture, technology, and material images to incorporate the idea, technique, and experience of cinema into writing, Wall-Romana documents the long history of cross-media concepts and practices often thought to emerge with the digital.

In showing the cinematic consciousness of Mallarmé and Breton and calling for a reappraisal of the influential poetry theory of the early filmmaker Jean Epstein, Cinepoetry reevaluates the bases of literary modernism. The book also explores the crucial link between trauma and trans-medium experiments in the wake of two world wars and highlights the marginal identity of cinepoets who were often Jewish, gay, foreign-born, or on the margins.

What results is a broad rethinking of the relationship between film and literature. The episteme of cinema, the book demonstrates, reached the very core of its supposedly highbrow rival, while at the same time modern poetry cultivated the technocultural savvy that is found today in slams, e-poetry, and poetic-digital hybrids.

Contributor Bio

Christophe Wall-Romana is Associate Professor of French at the University of Minnesota.

Quotes

"Discusses writers from Mallarmé and Jean Epstein to Max Jeanne and Nelly Kaplan." - The Chronicle Review

"Wall-Romana uncovers a not previously recognized genre in French literature: cinepoetry: a modernist poem that responds to challenges the cinema posed to writing. This book traces the new genre from Mallarme's Une Coup de Des to contemporary work, revealing how poets have found inspiration in cinema's visuality, control of movement and projected light-and in the process discovered new forms for poetry."-- Tom Gunning, University of Chicago

"This long-awaited book uncovers new territory for French literature and cultural studies, French film and intermedia, and poetics and new media, revealing the literary projects--cinematic avant la lettre--that shaped the early imagining of cinema and its French history."--Felicia McCarren, Tulane University

An Atmospherics of the City
Baudelaire and the Poetics of Noise
Ross Chambers

Key Selling Points
- A careful, succinct reading of Baudelaire by one of the country's most original literary critics.
- Ties Baudelaire's poetics to his sense of the city, delineating the new beauty Baudelaire found in the aesthetics of noise.
- Shows how Baudelaire urban aesthetic drew on the supernaturalism and sublimity to be found in entropy, a malevolent but temptingly beautiful force with which Baudelaire contended.

Summary
What happens to poetic beauty when history turns the poet from one who contemplates natural beauty and the sublime to one who attempts to reconcile the practice of art with the hustle and noise of the city?

An Atmospherics of the City traces Charles Baudelaire's evolution from a writer who practices a form of fetishizing aesthetics in which poetry works to beautify the ordinary to one who perceives background noise and disorder—the city's version of a transcendent atmosphere—as evidence of the malignant work of a transcendent god of time, history, and ultimate destruction.

Analyzing this shift, particularly as evidenced in Tableaux parisiens and Le Spleen de Paris, Ross Chambers shows how Baudelaire's disenchantment with the politics of his day and the coincident rise of overpopulation, poverty, and Haussmann's modernization of Paris influenced the poet's work to conceive a poetry of allegory, one with the power to alert and disalienate its otherwise inattentive reader whose senses have long been dulled by the din of his environment.

Providing a completely new and original understanding of both Baudelaire's ethics and his aesthetics, Chambers reveals how the shift from themes of the supernatural in Baudelaire to ones of alienation allowed a new way for him to articulate and for his fellow Parisians to comprehend the rapidly changing conditions of the city and, in the process, to invent a "modern beauty" from the realm of suffering and the abject as they embodied forms of urban experience.

Contributor Bio

Ross Chambers is Professor Emeritus of Comparative Literature at the University of Michigan. He is the author of several books including Untimely Interventions: AIDS Writing, Testimonial, and the Rhetoric of Haunting, Facing It: AIDS Diaries and the Death of the Author, Loiterature, and The Writing of Melancholy: Modes of Opposition in Early French Modernism.

Quotes
The book, moving seamlessly between close analyses of poems and broader theoretical contextualization, is a model for scholarship in the rigorous and delicate attention it pays to the texture of poems; the ease of move between singular details and universal categories; the depth and clarity of thought expressed in precise prose; deep erudition condensed into concise footnotes that keep to the essential, and the inventive receptivity toward texts that presents a new interface with one of the most canonical authors of the Western culture. --Claire Lyu, University of Virginia

"The title of Ross Chambers' brilliant work encapsulates its central paradox: it defines poetry not as music, but as noise; not as formal order, but as what cuts against?? it: its atmospherics."--Elisabeth Cardonne-Arlyck, Vassar College

Harrying
Skills of Offense in Shakespeare's Henriad
Harry Berger, Jr.

Key Selling Points
- Harry Berger is a marvelous and very witty reader of Shakespeare, alert to the many absurdities in which Shakespearean characters indulge.
- This book expands hints about the Henry plays from such earlier classics as his Making Trifles of Terrors.
Berger combines close reading with cultural analysis to show how the language characters speak always says more than the speakers mean to say in the four plays of Shakespeare's Henriad.

Summary
Harrying considers Richard III and the four plays of Shakespeare's Henriad--Richard II, Henry IV Part 1, Henry IV Part 2, and Henry V. Berger combines close reading with cultural analysis to show how the language characters speak always says more than the speakers mean to say.

Shakespeare's speakers try to say one thing. Their language says other things that often question the speakers' motives or intentions. Harrying explores the effect of this linguistic mischief on the representation of all the Henriad's major figures.

It centers attention on the portrayal of Falstaff and on the bad faith that darkens the language and performance of Harry, the Prince of Wales who becomes King Henry V.

Contributor Bio
Harry Berger, Jr., is Professor Emeritus of Literature and Art History at the University of California, Santa Cruz. His most recent books include The Perils of Uglytown: Studies in Structural Misanthropy from Plato to Rembrandt and A Fury in the Words: Love and Embarrassment in Shakespeare's Venice (both Fordham).

Quotes
"Harrying will no doubt surprise and delight readers with the unrivaled close readings Berger is famous for, but what makes this book so resonant is that it works this critical practice across a series of interlocking plays, turning Shakespeare's histories into a powerful 'tetralogical echo chamber.' The effects are dazzling."-Nina Levine, University of South Carolina
"At the center of Berger's approach to the histories is his insistence on the continuities across plays that close attention to linguistic echoes reveals. Page by page, line by line, word by word, his detailed examination of the texts leads him, and us, to new insights and new understanding."-Peter Erickson, Northwestern University

Table Of Contents
1. Misanthropy in Richard III
2. "Here, Cousin, Seize the Crown": The Triumphant Fall of Richard, the Self-Harrier
3. Richard's Soliloquy: Richard II, 5.5.1-166
4. Despair in Richard II

Figures of a Changing World
Metaphor and the Emergence of Modern Culture
Harry Berger, Jr.

Key Selling Points
- A master critic exams the tropes of metaphor and metonymy--especially a shift from the latter to the former a symptom of "the problematics of cultural change."
- Berger writes beautifully and very accessibly, with a great deal of wit.
- The book is potentially a classic in examining the question of literary periodization. Figures of a Changing World develops an account of culture change that is based on the distinction between the two rhetorical figures of metaphor and metonymy.

Summary
Figures of a Changing World offers a dramatic new account of cultural change, an account based on the distinction between two familiar rhetorical figures, metonymy and metaphor. The book treats metonymy as the basic organizing trope of traditional culture and metaphor as the basic organizing trope of modern culture. On the one hand, metonymies present themselves as analogies that articulate or reaffirm preexisting states of affairs. They are guarantors of facticity, a term that can be translated or defined as fact-like-ness. On the other hand, metaphors challenge the similarity they claim to establish, in order to feature departures from preexisting states of affairs.

On the basis of this distinction, the author argues that metaphor and metonymy can be used as instruments both for the large-scale interpretation of tensions in cultural change and for the micro-interpretation of tensions within particular texts. In addressing the functioning of the two terms, the author draws upon and critiques the work of Friedrich Nietzsche, Roman Jakobson, Christian Metz, Paul Ricoeur, Umberto Eco, Edmund Leach, and Paul de Man.

Contributor Bio

Harry Berger, Jr., is Professor Emeritus of Literature and Art History at the University of California, Santa Cruz. His most recent books include The Perils of Uglytown: Studies in Structural Misanthropology from Plato to Rembrandt and A Fury in the Words: Love and Embarrassment in Shakespeare’s Venice (both Fordham).

Quotes
"Figures of a Changing World is the twelfth in a remarkable series of literary and visual studies over the past quarter century that comprise Harry Berger’s extraordinarily wide-ranging critical oeuvre. This new book articulates the larger linguistic context and cultural change that undergird Berger’s heroic acts of brilliantly detailed close reading of early modern texts and images." - Peter Erickson, Northwestern University

"Berger presents a fresh and stimulating account of the rhetorical and critical histories of metaphor and metonymy. The dialectical procedure of the book carries real drama: it depicts a mind in the process of thinking through the problem of how to gauge the ideological force of these quasi-shibboleth terms, not as a semiotician or linguist but as a scholar of literary and cultural history. Berger’s handling of the often vexed relation between metaphor and metonymic figuration gives new insights into the mechanisms of perceived cultural change. The writing is elegant and lucid, and the argument is gracefully organized." - Lowell Gallagher, University of California, Los Angeles

"In Figures of a Changing World, Harry Berger, Jr. distills into brief scope a masterful review and critique of a major topic in twentieth century critical theory: the post-Nietzschean theory of tropes. Berger’s work is always welcomed by scholars in his fields (plural), but this little book on a big topic has the potential to be among the most widely read and appreciated of his many volumes because the subject is of interest to so many academic practitioners, because his treatment of it is as trenchant and pointed as it is wide-ranging, and because his style is so appealingly distinctive." - David Lee Miller, University of South Carolina

Figures of a Changing World

**Metaphor and the Emergence of Modern Culture**

Harry Berger, Jr.

**Key Selling Points**

- A master critic exams the tropes of metaphor and metonymy especially a shift from the latter to the formers a symptom of "the problematics of cultural change."
- Berger writes beautifully and very accessibly, with a great deal of wit.
- The book is potentially a classic in examining the question of literary periodization.

Figures of a Changing World develops an account of culture change that is based on the distinction between the two rhetorical figures of metaphor and metonymy.

**Summary**

*Figures of a Changing World* offers a dramatic new account of cultural change, an account based on the distinction between two familiar rhetorical figures, metonymy and metaphor. The book treats metonymy as the basic organizing trope of traditional culture and metaphor as the basic organizing trope of modern culture. On the one hand, metonymies present themselves as analogies that articulate or reaffirm preexisting states of affairs. They are guarantors of facticity, a term that can be translated or defined as fact-like-ness. On the other hand, metaphors challenge the similarity they claim to establish, in order to feature departures from preexisting states of affairs.

On the basis of this distinction, the author argues that metaphor and metonymy can be used as instruments both for the large-scale interpretation of tensions in cultural change and for the micro-interpretation of tensions within particular texts. In addressing the functioning of the two terms, the author draws upon and critiques the work of Friedrich Nietzsche, Roman Jakobson, Christian Metz, Paul Ricoeur, Umberto Eco, Edmund Leach, and Paul de Man.

Vladimir Jankélévitch: The Time of Forgiveness
Aaron T. Looney

Key Selling Points
- Jankelevitch, the son of Russian Jewish parents who immigrated to France, studied philosophy under Henri Bergson in the 1920s. He was also a musicologist, but is probably best known for Forgiveness (published in English by Chicago, 2013).
- This book now has a competitor, which turns out to have been in press when it was accepted. But that attests to the growing interest in Jankelevitch, and the need for introductions to his work.

Summary
Vladimir Jankélévitch: The Time of Forgiveness traces the reflections of the French philosopher and musicologist Vladimir Jankelevitch on the conditions and temporality of forgiveness in relation to creation, history, and memory. The author demonstrates the influence of Jewish and Christian thought on Jankelevitch's philosophy and compares his ideas about the gift character of forgiveness, the role of retributive emotions in conceptions of justice, and the limits of reason with those of Aristotle, Butler, Kant, Kierkegaard, Nietzsche, Scheler, Arendt, Derrida, Levinas, and Ricoeur.

The Shoah was the pivotal historical event in Jankelevitch's life. As this book shows, Jankelevitch's question "Is forgiveness possible as a response to evil?" remains a potent philosophical conundrum today. Paradoxically, for Jankelevitch, evil is both the impetus and the obstacle to forgiveness.

Contributor Bio
Aaron T. Looney teaches Philosophy at Eberhard-Karls University, Tübingen, Germany.

Quotes
"Looney gives a general introduction to Jankélévitch's thought, then goes on to provide an in-depth study of Jankélévitch's book Forgiveness by comparing and contrasting it with thinkers such as Max Scheler, Nietzsche, Levinas, Derrida, Aristotle, and other prominent writers in moral thought." -Andrew Kelley, Bradley University

"Aaron Looney carefully lays out the hyperbolic logic of pure forgiveness demanded by Jankélévitch. He shows us that the two most important books by Jankélévitch both differ dramatically from each other and yet can be read as being in continuity. Looney presents a rich tapestry in which he considers such influences on Jankélévitch as Bergson, Nietzsche, and Scheler. He also examines the relationship between Jankélévitch and such thinkers as Arendt and Derrida (showing Derrida to be much closer to Jankélévitch than one might think). The result is a moving work in which we are reminded just how central forgiveness is to human existence." -Bruce Ellis Benson, Wheaton College

"Vladimir Jankélévitch: The Time of Forgiveness is an insightful analysis of the thought of the twentieth-century French philosopher, providing a long overdue consideration of Jankélévitch in English. Aaron Looney deftly explicates Jankélévitch's subtle and complex perspectives on evil and forgiveness within religious and philosophical traditions. The result is a sensitive and evocative interpretation of Jankélévitch and a wonderfully rich meditation on forgiveness." -Johannes Brachtendorf, Eberhard Karls Universität

Senses of the Subject
Judith Butler

Key Selling Points
• Butler is the closest thing we have in the humanities to a rock star—an academic author with a high media profile and important sales potential.
• A close engagement, by one of today's most important intellectuals, with her major philosophical predecessors: Spinoza, Hegel, Kierkegaard, Merleau-Ponty, Sartre, Irigaray, and Fanon.
• Butler's philosophical engagements around subjectivity in this book provide the crucial grounding to her influential writings on gender.
A close engagement, by one of today's most important intellectuals.

Summary
This book brings together a group of Judith Butler's philosophical essays written over two decades that elaborate her reflections on the roles of the passions in subject formation through an engagement with Hegel, Kierkegaard, Descartes, Spinoza, Malebranche, Merleau-Ponty, Freud, Irigaray, and Fanon. Drawing on her early work on Hegelian desire and her subsequent reflections on the psychic life of power and the possibility of self-narration, this book considers how passions such as desire, rage, love, and grief are bound up with becoming a subject within specific historical fields of power.

Butler shows in different philosophical contexts how the self that seeks to make itself finds itself already affected and formed against its will by social and discursive powers. And yet, agency and action are not necessarily nullified by this primary impingement. Primary sense impressions register this dual situation of being acted on and acting, countering the idea that acting requires one to overcome the situation of being affected by others and the linguistic and social world. This dual structure of sense sheds light on the desire to live, the practice and peril of grieving, embodied resistance, love, and modes of enthrallment and dispossession. Working with theories of embodiment, desire, and relationality in conversation with philosophers as diverse as Hegel, Spinoza, Descartes, Merleau-Ponty, Freud, and Fanon, Butler reanimates and revises her basic propositions concerning the constitution and deconstitution of the subject within fields of power, taking up key issues of gender, sexuality, and race in several analyses. Taken together, these essays track the development of Butler's embodied account of ethical relations.

Contributor Bio
JUDITH BUTLER is Maxine Elliot Professor in the Departments of Comparative Literature and the Program of Critical Theory at the University of California, Berkeley. Her books include Gender Trouble: Feminism and the Subversion of Identity; The Psychic Life of Power: Theories of Subjection; Precarious Life: Powers of Violence and Mourning; Undoing Gender; Giving an Account of Oneself (Fordham); Frames of War: When Is Life Grievable?; and Parting Ways: Jewishness and the Critique of Zionism.

Quotes
Butler concludes the Introduction to this book thus: Acted on, I act still, but it is hardly this I that acts alone, and even though, and precisely because, it never gets done with being undone. In these eloquent, passionately dialectical, and vertiginous essays, Butler relentlessly tracks our being undone by others, by language, by things, by institutions, and by the normative formations that hold us upright beyond our standing upright in the writings of, among others, Descartes, Spinoza, Hegel, Merleau Ponty, Irigaray, and Fanon. This is echt Butler: a necessity for those who already know her work, and a generous point of entry for those philosophers who have yet to find their way to her thought. --J. M. Bernstein, New School for Social Research
"In this exceptional collection, Judith Butler displays the unusually vivid, even startling insight that makes her indisputably the world's most interesting contemporary philosopher. These lucid essays climb in and out of the me, the her, the you, dream and
reality, subject, object, nature and the preternatural, meaning and its deadly discontents. Butler wrestles the narratives of embodiment into language that lives."--Patricia J. Williams, Columbia Law School

"For me, Judith Butler is simply the most important philosopher of our age. This is an extremely interesting and wide-ranging collection of essays by that provide characteristically close readings of an impressive range of philosophers, some more closely associated with Butler's work (Hegel, Kierkegaard, Sartre and Irigaray) others much less so (Descartes, Malebranche, Spinoza and Merleau-Ponty). What ties the whole book together is a powerful and interconnected set of concerns with the pre-conscious, sensate formation of subjectivity and the ethical valence of the experience of dependence and susceptibility."--Simon Critchley, The New School for Social Research

"Judith Butler's reading of major works on the construction of the subject, ranging from Descartes and Spinoza to Irigaray and Fanon, intertwines three projects, which prove intimately related: a symptomatic reading of texts, where the materiality of their writing reveals a permanent uncertainty about the "sovereignty" or "autonomy" that they claim; a phenomenology of the affective "third substance" which, being neither mind nor body, must also encroach on both; and a critique of normative ontological binarisms which, in particular, confuse sexual otherness with a difference of given places. In this account of the latent "sensible" mover of metaphysics, she also gives an account of herself as incarnated thinker, beautifully complex and inventive. Her book will generate admiration and continuous reflection."--Étienne Balibar, author of Equaliberty

Sometimes Always True
Undogmatic Pluralism in Politics, Metaphysics, and Epistemology
Jeremy Barris

Key Selling Points
- This examines a little-known area of logic, the study of logically permissible contradictions and their consequences.
- It applies these insights in logic to literature, epistemology, and politics, thus providing a new logical underpinning for pluralism.

Summary
Sometimes Always True aims to resolve three connected problems. First, we need an undogmatic pluralist standpoint in political theory, metaphysics, and epistemology. But genuine pluralism suffers from the contradiction that making room for fundamental differences in outlook means making room for outlooks that exclude pluralism.

Second, philosophy involves reflecting on the world and meaning as a whole, yet this means adopting a vantage point in some way outside of meaning.

Third, our lived experience of the sense of our lives similarly undermines its own sense, as it involves having a vantage point in some way wholly outside ourselves.

In detailed engagement with, among others, Davidson, Rorty, Heidegger, Foucault, Wilde, and gender and sexuality theory, the book argues that these contradictions are so thoroughgoing that, like the liar's paradox, they cancel the bases of their own meaning. Consequently, it argues, they resolve themselves and do so in a way that produces a vantage point on these issues that is not dogmatically circular because it is, workably, both within and outside these issues' sense. The solution to a genuinely undogmatic pluralism, then, is to enter into these contradictions and the process of their self-resolution.

Contributor Bio
Jeremy Barris is Professor of Philosophy at Marshall University and author of Paradox and the Possibility of Knowledge: The Example of Psychoanalysis and of The Crane's Walk: Plato, Pluralism, and the Inconstancy of Truth (Fordham).

Intentionality, Cognition, and Mental Representation in Medieval Philosophy
Gyula Klima

Key Selling Points
- Serves as an introduction to medieval theories of cognition and philosophical psychology.
- Essays offer both general overviews of the topic and in-depth analyses of particular philosophers.
- Covers all the major thinkers of the period, as well as touching on some lesser-known figures.
- The questions of intentionality and cognition as formulated in the medieval period have important implications for later philosophical traditions.

Summary
It is commonly supposed that certain elements of medieval philosophy are uncharacteristically preserved in modern philosophical thought through the idea that mental phenomena are distinguished from physical phenomena by their intentionality, their intrinsic directedness toward some object. The many exceptions to this presumption, however, threaten its viability.

This volume explores the intricacies and varieties of the conceptual relationships medieval thinkers developed among intentionality, cognition, and mental representation. Ranging from Aquinas, Scotus, Ockham, and Buridan through less-familiar writers, the collection sheds new light on the various strands that run between medieval and modern thought and bring us to a number of fundamental questions in the philosophy of mind as it is conceived today.

Contributor Bio
Gyula Klima is Professor of Philosophy at Fordham University.

Quotes
"This constitutes a very significant collection of essays on medieval theories of cognition and philosophical psychology."--Richard Cross, University of Notre Dame

Cyclorama
Daneen Wardrop

Key Selling Points
- Selected by Kimiko Hahn as the winner of the 2014 Poets Out Loud Prize.
- This is the author’s second published collection of poetry. She has also published three critical books on nineteenth-century American poetry.
- The author’s poems have appeared in many journals, including Antioch Review, Northwest Review, The Southern Review, TriQuarterly, and Virginia Quarterly Review. She is the recipient of the Poetry Society of America Robert H. Winner Memorial Award; the Bentley Prize for Poetry from Seattle Review; and two Pushcart prize nominations. A beautifully developed collection of poems written from the standpoint of historical figures--many of them ordinary men and women--who took part in some way in the U.S. Civil War.

Summary
In a stunning cycle of persona poems, Daneen Wardrop offers us a panoramic view of the inner lives of those forgotten among the violence and strife of the American Civil War: the nurse and the woman soldier, the child and the draftee, the prostitute, the black slave, and the Native American soldier. Each one speaks out to be seen and heard, bearing witness to the mundanity of suffering experienced by those whose presence was ubiquitous yet erased in the official histories of the War Between the States. Cyclorama takes its name from the theater-sized, in-the-round oil paintings popular in the late nineteenth century, and with each poem, Wardrop adds a panel to her expansive, engrossing portrait of the bloodshed and tears, the tedium and fear experienced by the Civil War living and the dying. With pathos and lyric force, she brings sharply into focus perspectives on an unfathomable experience we thought we already knew and understood.

Contributor Bio
DANEEN WARDROP is Professor of English at Western Michigan University. She is the author of one book of poetry, The Odds of Being, and three books of criticism: Emily Dickinson and the Labor of Clothing; Word, Birth, and Culture in the Poetry of Poe, Whitman, and Dickinson; and Emily Dickinson's Gothic.

Quotes
When Wardrop touches her own psychological nerve she touches the reader’s nerve. Now see the finely-developed craft: the cadence of storm-clenched days, the diction of tumult and solitude, and a lyricism that holds all. . . . Daneen Wardrop places the reader square in the center of her panoramic panels and bids us experience the scenes 360°. What a glorious way to enter these histories." --Kimiko Hahn, from the foreword

"Prepare yourself, as you read Cyclorama, to hear voices that will stay in your head long after you've put the book down, voices that seem to rise up from the depths of history. It's the women speakers here who haunt me the most as they record the horrifying loss of life and limb that circles these women like a cyclorama and at times engulfs them. Line by memorable line, Daneen Wardrop revives and adapts the form of the dramatic lyric to move from striking descriptions--of Civil War battles and wounds, places, and events--to unforgettable moments of quiet revelation."--Ed Folsom, The University of Iowa

"This long poem, pitched in so many American voices, is a powerful summoning--back. . . . Cyclorama keeps our dead with us, alongside the living souls we carry in our unfinished civil war. Daneen Wardrop is a rare poet of conscience."--Jean Valentine

"Daneen Wardrop has done deep research in the life and times and art of the U.S. Civil War, and transformed it into exuberant and moving poetry. She speaks as women spies, soldiers and officers, kids exploring the ruins of Jefferson's Monticello, a prostitute who keeps a flask tucked in her crinoline, Union musicians who find themselves playing 'Lorena' with Reb musicians, and so much more. Wardrop's music makes you proud of the American language. Cyclorama is one of the most stunning books of poems I've seen in years. I can't wait to see what Wardrop will do next."--Alicia Ostriker
"Daneen Wardrop gives us her own Cyclorama not as answer but as stunningly sympathetic example. Whereas a person following a perspective to the horizon might, in the painted cyclorama, run into the canvas on which it's painted, a reader enters into the pages of these poems and finds that the words give way to some intimacy that history should preclude. But the poet knows different. Tracing in their own voices--mimicry that is here a form of valor and virtue--Wardrop gives image back to all those wounded and wounding. Such traces tend to be lost, just a thread in an archive. Wardrop takes such threads and in her hand finds a selvage that pulled on gently reveals the whole garment: those interwoven lives whose voices exist without our knowing inside our own speaking. Cyclorama gives us this primary poetic gift: that we enter it, and what it shows in its pages, not only makes history real to us, but in doing so, makes us more real to ourselves."--Dan Beachy-Quick
Cyclorama
Daneen Wardrop

Key Selling Points
- Selected by Kimiko Hahn as the winner of the 2014 Poets Out Loud Prize.
- This is the author's second published collection of poetry. She has also published three critical books on nineteenth-century American poetry.
- The author's poems have appeared in many journals, including Antioch Review, Northwest Review, The Southern Review, TriQuarterly, and Virginia Quarterly Review. She is the recipient of the Poetry Society of America Robert H. Winner Memorial Award; the Bentley Prize for Poetry from Seattle Review; and two Pushcart prize nominations. A beautifully developed collection of poems written from the standpoint of historical figures—many of them ordinary men and women—who took part in some way in the U.S. Civil War.

Summary
In a stunning cycle of persona poems, Daneen Wardrop offers us a panoramic view of the inner lives of those forgotten among the violence and strife of the American Civil War: the nurse and the woman soldier, the child and the draftee, the prostitute, the black slave, and the Native American soldier. Each one speaks out to be seen and heard, bearing witness to the mundanity of suffering experienced by those whose presence was ubiquitous yet erased in the official histories of the War Between the States. Cyclorama takes its name from the theater-sized, in-the-round oil paintings popular in the late nineteenth century, and with each poem, Wardrop adds a panel to her expansive, engrossing portrait of the bloodshed and tears, the tedium and fear experienced by the Civil War living and the dying. With pathos and lyric force, she brings sharply into focus perspectives on an unfathomable experience we thought we already knew and understood.

Contributor Bio
DANEEN WARDROP is Professor of English at Western Michigan University. She is the author of one book of poetry, The Odds of Being, and three books of criticism: Emily Dickinson and the Labor of Clothing; Word, Birth, and Culture in the Poetry of Poe, Whitman, and Dickinson; and Emily Dickinson's Gothic.

Quotes
When Wardrop touches her own psychological nerve she touches the reader's nerve. Now see the finely-developed craft: the cadence of storm-clenched days, the diction of tumult and solitude, and a lyricism that holds all . . . Daneen Wardrop places the reader square in the center of her panoramic panels and bids us experience the scenes 360°. What a glorious way to enter these histories." --Kimiko Hahn, from the foreword
"Prepare yourself, as you read Cyclorama, to hear voices that will stay in your head long after you've put the book down, voices that seem to rise up from the depths of history. It's the women speakers here who haunt me the most as they record the horrifying loss of life and limb that circles these women like a cyclorama and at times engulfs them. Line by memorable line, Daneen Wardrop revives and adapts the form of the dramatic lyric to move from striking descriptions--of Civil War battles and wounds, places, and events--to unforgettable moments of quiet revelation."--Ed Folsom, The University of Iowa
"This long poem, pitched in so many American voices, is a powerful summoning-back . . . . . Cyclorama keeps our dead with us, alongside the living souls we carry in our unfinished civil war. Daneen Wardrop is a rare poet of conscience."--Jean Valentine
"Daneen Wardrop has done deep research in the life and times and art of the U.S. Civil War, and transformed it into exuberant and moving poetry. She speaks as women spies, soldiers and officers, kids exploring the ruins of Jefferson's Monticello, a prostitute who keeps a flask tucked in her crinoline, Union musicians who find themselves playing 'Lorena' with Reb musicians, and so much more. Wardrop's music makes you proud of the American language. Cyclorama is one of the most stunning books of poems I've seen in years. I can't wait to see what Wardrop will do next."--Alicia Ostriker
"Daneen Wardrop gives us her own Cyclorama not as answer but as stunningly sympathetic example. Whereas a person following a perspective to the horizon might, in the painted cyclorama, run into the canvas on which it's painted, a reader enters into the pages of these poems and finds that the words give way to some intimacy that history should preclude. But the poet knows different. Tracing in their own voices—mimicry that is here a form of valor and virtue—Wardrop gives image back to all those wounded and wounding. Such traces tend to be lost, just a thread in an archive. Wardrop takes such threads and in her hand finds a selvage that pulled on gently reveals the whole garment: those interwoven lives whose voices exist without our knowing inside our own speaking. Cyclorama gives us this primary poetic gift: that we enter it, and what it shows in its pages, not only makes history real to us, but in doing so, makes us more real to ourselves."—Dan Beachy-Quick
On Generation & Corruption
Poems
Terrence Chiusano

Key Selling Points
• Winner of the 2014 Poets Out Loud Editor's Prize.
• A complex, intricate volume of poetry, masterfully structured around the conceits of location (or dislocation) and story-telling (or resistance to narrative).
• Chiusano's playful wit is reminiscent of the metaphysical poets as well as of contemporary poets like Heather McHugh and Paul Muldoon.

Summary
Explores the use of procedural constraints in the production of poetry, prose and prose poetry. Examines issues of realism, narrative and narrativity, and confronts the problem of how place is constructed on the page. Follows Aristotle's original On Generation and Corruption (or, On Coming to Be and Passing Away) in considering the question of permanence and change.

Contributor Bio

TERRENCE CHIUSANO received his B.A. in Poetry Writing from the University of Pittsburgh and his M.A. in Literature from the University at Buffalo. His poems have appeared in Colorado Review, Cordite Poetry Review, Yellow Field, Kenning, Ixnay, Queen Street Quarterly, Basinski: A Zine of the Arts, Ignation, and elsewhere. He lives in Pittsburgh.

Quotes
"Ten years ago I wrote of Mr. Chiusano that he is 'almost frighteningly good,' and here, in his first full-length book, the fear factor has only flowered. His is a world of familiar shapes rendered strange by unspeakable events offstage, a country where the intimate processes of nature and gender turn raw in late afternoon sun. Had he written only the luscious, Edward Goreyesque 'Abecedary,' his name would live forever in poetic history. And yet there is much more to On Generation & Corruption than its set-pieces. A compelling volume, rich with chills and fever."--Kevin Killian

"Philosophy always ends in a 'halo of fact.' That is why its findings are neither eternal nor sufficient, and its ceaseless agenda is the leitmotif of Terrence Chiusano's On Generation & Corruption. Taking off from Aristotle, but also Robert Creeley and Vladimir Nabokov, Chiusano proceeds to define a precinct especially for his materials. Lyric distillation is Chiusano's 'gloomy grip' (he has it like no other), and he uses it to structure an esoteric monument. But it's not esoteric as it happens--again, like philosophy, you read merely because you exist and may yet belong to something called 'civilization,' and you need to figure it out, too. And suddenly: mystery solved. Brilliant."--Patrick Durgin

"Chiusano gives us deft story-telling that gives hints of horror within scenes of the ordinary and the aesthetic, testing how we read both landscapes and language. On Generation & Corruption plays with orders, patterns, and modes of distinction, playfully moving between the miniature and major, field and street, foreground and background, parable and spin. Combining a sensual lyricism with philosophical edge, the sustained, layered performance and dazzling stunt-work of this collection confirm Chiusano as a stand-out poet to watch and listen to today."--Anne Vickery

"'Explorative,' 'meta-narrative,' all such designations are too tame for describing the brainy and bold manner in which Terrence Chiusano's On Generation & Corruption presides over the disruption of 'the clinical completeness of the daily briefing, the dull dit-dot-dash of a poetry-making telegraph...' Discursive, formally inventive, endlessly sharp-witted, and gorgeously written, [this] is one of the freshest and most unorthodox books (let alone first books) I have read in a very long time."--Lynn Emanuel

Affliction
Health, Disease, Poverty
Veena Das

Key Selling Points
• Drawing on nearly a decade and a half of fieldwork among the poor of Delhi, this eloquent book by a master of anthropological writing presents a moving portrait of the everyday strategies used by the poor to cope with the situation of illness.
• The author’s prose is beautiful analytically profound, but also warm and intimate
• The book will be a tremendous intervention into studies of medicine, anthropology, philosophy, economics, "global health," public health practice, ethics, and health policy.

Affliction: Health, Disease, Poverty inaugurates a novel way of understanding the trajectories of health and disease in the context of poverty. It traces the unfolding of illness within families, local communities, neighborhood markets, and occult worlds. Privileging the experience of people living in these neighborhoods, it asks, How can global health be made to take this experience into account rather than escape from it?

Summary
Affliction inaugurates a novel way of understanding the trajectories of health and disease in the context of poverty. Focusing on low-income neighborhoods in Delhi, it stitches together three different sets of issues.

First, it examines the different trajectories of illness: What are the circumstances under which illness is absorbed within the normal and when does it exceed the normal putting resources, relationships, and even one's world into jeopardy?

A second set of issues involves how different healers understand their own practices. The astonishing range of practitioners found in the local markets in the poor neighborhoods of Delhi shows how the magical and the technical are knotted together in the therapeutic experience of healers and patients. The book asks: What is expert knowledge? What is it that the practitioner knows and what does the patient know? How are these different forms of knowledge brought together in the clinical encounter, broadly defined? How does this event of everyday life bear the traces of larger policies at the national and global levels?

Finally, the book interrogates the models of disease prevalence and global programming that emphasize surveillance over care and deflect attention away from the specificities of local worlds. Yet the analysis offered retains an openness to different ways of conceptualizing "what is happening" and stimulates a conversation between different disciplinary orientations to health, disease, and poverty.

Most studies of health and disease focus on the encounter between patient and practitioner within the space of the clinic. This book instead privileges the networks of relations, institutions, and knowledge over which the experience of illness is dispersed. Instead of thinking of illness as an event set apart from everyday life, it shows the texture of everyday life, the political economy of neighborhoods, as well as the dark side of care. It helps us see how illness is bound by the contexts in which it occurs, while also showing how illness transcends these contexts to say something about the nature of everyday life and the making of subjects.

Contributor Bio

Veena Das is Krieger-Eisenhower Professor of Anthropology and Professor of Humanities at Johns Hopkins University. She is the author most recently of Life and Words: Violence and the Descent into the Ordinary and co-editor of The Ground Between: Anthropologists Engage Philosophy.

Quotes
"Reading Affliction: Health, Disease, Poverty, is like observing a master at work. A formidable piece of scholarship immersed in over a decade of ethnographic engagement
etched in stunningly crafted anthropological prose. This longitudinal immersion in the
everyday lives of urban poor produces a tender and intimate account without lapsing
into unwitting sentimentality. An ethnographic and theoretical tour de force!"—Aditya
Bharadwaj, The Graduate Institute, Geneva

Veena Das offers a complex ethnographic meditation on illness among the urban poor
and the diverse kinds of response (practical, methodological, ethical) it invites. As Das
so precisely attends to affliction, readers have the privilege of following one of
anthropology’s most distinctive and distinguished voices."—Michael Lambek, University
of Toronto

"Over four decades Veena Das has established herself as one of the most imaginative
and sensitive writers to be found in any of the human sciences. In this brilliant book,
she attends to the everyday work of care and endurance that makes up the life of the
poor in Delhi. As ever, her ear is attuned to the fateful turn of phrase, the pause, the
silence. But in this new volume she attends to other voices as well—[not only] the
voices of health professionals and economists, struggling to put their understanding of
the objective conditions that shape the experience of health and poverty to practical
use but also the voices of fellow anthropologists wrestling with the limitations of their
theoretical and descriptive language. Affliction is a work of great generosity and no little
beauty. It is, if anything even more remarkable than its predecessors in Das's
remarkable oeuvre."—Jonathan Spencer, University of Edinburgh

"In this beautiful collection, Veena Das continues her quest into the minor events and
enduring suffering, the mundane intensity of the present and remembrance of things
past, which constitute ordinary human existence, thus opening a novel line of reflection
and research in what can be called an anthropology of life."—Didier Fassin, author of
Humanitarian Reason: A Moral History of the Present

"Told with delicacy, vigour and a sharply critical eye, this compelling account of the
everyday events of illness in low income neighborhoods [in Delhi] shows what
anthropological attentiveness can do. If its power comes from the evident power of the
mind behind it, it also comes from a modestly understated account of how to be both in
the company of people and a recorder of affliction. Above all, it is a work of exquisite
attention to the incoherences and normalizations that disease makes of family
circumstances, medical practices, state provisioning, singular lives, and that these make
of it. Socially sensitive and world-alert at the same time, Das's narrative holds the
reader in (gripping, edifying) suspense between its different planes. No less perhaps
than one would expect from this author, but a model of social science writing all the
same."—Marilyn Strathern, University of Cambridge

Cultural Techniques
Grids, Filters, Doors, and Other Articulations of the Real
Bernhard Siegert, Geoffrey Winthrop-Young

Key Selling Points
- He worked for many years with the legendary media theorist Friedrich Kittler. Though he has developed his own distinctive style and themes (especially in his writings on painting), there are ways in which his work continues the imaginative energies of Kittler’s.
- The Introduction may be the best account yet available of German media analysis since the eighties—of its stakes (attempting to deal with the loss of the transcendental) and its trajectory.

Summary
In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium’s individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur.

Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from first-order to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational.

Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signaldistinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l’oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic.

Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Contributor Bio

Bernhard Siegert is Gerd Bucerius Professor of the History and Theory of Cultural Techniques at the Bauhaus Universitat Weimar and Director of the International Research Center for Cultural Techniques and Media Philosophy at Weimar. Together with Friedrich Kittler, Norbert Bolz, and Wolfgang Coy, he is one of the pioneers of German media theory. He is the author of Relays: Literature as an Epoch of the Postal System.

Geoffrey Winthrop-Young is Professor of German at the Department of Central, Eastern and Northern European Studies at the University of British Columbia.

Quotes
"An excellent collection of essays from one of the most widely known and respected scholars of media, media theory, and cultural techniques working in Germany. The scholarship is erudite, sophisticated, and impressively wide-ranging."--Michael Wutz, Weber State University
Cultural Techniques displays a stunning amount of historical knowledge, exploring texts and technological innovations that fall into fields such as the history of science, art
history, architecture, cultural anthropology, ethnology, literary studies, and philosophy.
. . Highly important. --Edgar Landgraf, Bowling Green State University

Summary
In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur.

Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from firstorder to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational.

Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signaldistinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l'oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic.

Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Contributor Bio
Bernhard Siegert is Gerd Bucerius Professor of the History and Theory of Cultural Techniques at the Bauhaus Universitat Weimar and Director of the International Research Center for Cultural Techniques and Media Philosophy at Weimar. Together with Friedrich Kittler, Norbert Bolz, and Wolfgang Coy, he is one of the pioneers of German media theory. He is the author of Relays: Literature as an Epoch of the Postal System.

Geoffrey Winthrop-Young is Professor of German at the Department of Central, Eastern and Northern European Studies at the University of British Columbia.

Quotes
"An excellent collection of essays from one of the most widely known and respected scholars of media, media theory, and cultural techniques working in Germany. The scholarship is erudite, sophisticated, and impressively wide-ranging."--Michael Wutz, Weber State University

Cultural Techniques displays a stunning amount of historical knowledge, exploring texts and technological innovations that fall into fields such as the history of science, art...
history, architecture, cultural anthropology, ethnology, literary studies, and philosophy.

Highly important. -- Edgar Landgraf, Bowling Green State University

Table Of Contents

Acknowledgments 000
Translator's Note 000

Introduction: Cultural techniques, or, The end of the intellectual postwar in German media theory
1. Cacography or Communication? Cultural techniques of sign-signal-distinction
2. Eating Animals-Eating God-Eating Man: Variations on the Last Supper, or, The cultural techniques of communion
3. Parlètres: The cultural techniques of anthropological difference
4. Medusas of the western Pacific: The cultural techniques of seafaring
5. Pasajeros a Indias: Registers and biographical writing as cultural techniques of subject constitution (Spain, 16th century)
6. (Not) in Place: The grid, or, cultural techniques of ruling spaces
7. White spots and hearts of darkness: Drafting, projecting and designing as cultural techniques
8. Waterlines: Striated and smooth spaces as techniques of ship design
10. Door Logic, or, The materiality of the symbolic: From cultural techniques to cybernetic machines

Wadaiko
An Introduction to the Sounds and Rhythms of Japanese
AJALT

Key Selling Points
• All-new stand-alone textbook from one of the foremost authorities on Japanese-language education
• Based on a teaching approach proven successful in the classroom by AJALT in Japan
• 64 color pages, with approx. 150 illus. and photos
• Songs, poems, tongue twisters, and other games expose students to Japanese culture and the beauty of the Japanese language
• Text is mostly in Japanese (preferred by teachers), with romanized Japanese and English in the appendixes and for vocabulary, which appears at the bottom of the pages
• Free CD containing audio of the songs featured in the book

An innovative, engaging approach to learning Japanese through its sounds and rhythms
- from the authors of the best-selling Japanese for Busy People series

Summary
From the authors of the best-selling Japanese for Busy People series comes an innovative, engaging new way to learn Japanese. Based on a teaching approach which has been used successfully in the classroom by AJALT in Japan, Wadaiko immerses students in the sounds and rhythms of the Japanese language through songs, poetry, tongue twisters, and other word games. The purpose is to get learners to "feel" Japanese, to absorb it with the ears, without being expected to understand it all. The book is divided into two parts. Part 1 is made up of five lessons, and Part 2 of four "seasons." Color illustrations and photographs appear on almost every page. Romanized Japanese is used as an aid for those who haven't learned the writing yet; English translations of the songs and poems are also shown, but otherwise the text is in Japanese. There are exercises and questions, quizzes, and other interactive features. A free CD contains audio of Japanese folk songs that students can sing along with. Wadaiko has been designed with the National Standards for Foreign Language Education in mind.

Contributor Bio
The Association for Japanese-Language Teaching (AJALT) was recognized as a nonprofit organization by the Japanese Ministry of Education in 1977. It was established to meet the practical needs of people who are not necessarily specialists on Japan but who wish to communicate effectively in Japanese. In 1992, AJALT was awarded the Japan Foundation Special Prize; and in 2010, it became a public interest incorporated association. AJALT created the best-selling Japanese for Busy People series, as well as the Japanese for Young People series, both published by Kodansha. AJALT's website is www.ajalt.org http://www.ajalt.org.

Teaching Transatlanticism
Resources for Teaching Nineteenth-Century Anglo-American Print Culture
Linda Hughes, Sarah Robbins

Key Selling Points
- Provides readers with help about the conceptual and practical issues
- Classroom accounts address multiple genres, issues and media
- Reflections on real-world teaching contexts are blended with scholarly analysis of key issues in the field today
- The specially designed project website supports the book and invites continued conversations through a moderated discussion space and submission venue for readers' own teaching materials

An essential resource for teaching 19th-century print culture in Transatlantic Studies

Summary
An essential resource for teaching 19th-century print culture in Transatlantic Studies

The 18 chapters in this book outline conceptual approaches to the field and provide practical resources for teaching, ranging from ideas for individual class sessions to full syllabi and curricular frameworks.

The book is divided into 5 key sections: Curricular Histories and Key Trends; Organising Curriculum through Transatlantic Lenses; Teaching Transatlantic Figures; Teaching Genres in Transatlantic Context; and Envisioning Digital Transatlanticism. Individual chapters from experts in the field range from reconceptualising entire courses to revisiting individual texts, authors, and genres through a transatlantic lens. Weaving in strategies from innovative teaching shaped by the digital humanities, the collection also looks ahead to the future of this growing field.

A dedicated Teaching Transatlanticism website accompanies the book: https://teachingtransatlanticism.tcu.edu/

Contributor Bio

Linda K. Hughes, Addie Levy Professor of Literature at TCU, specializes in the intersections of 19th-century gender, genre, and publishing history, including transnational circulation. Co-editor of A Feminist Reader: Feminist Thought from Sappho to Satrapi (4 vol., Cambridge UP, 2013) and author of The Cambridge Introduction to Victorian Poetry (2010), she won the biennial British Women Writers Association Award for scholarly contributions and mentoring (2012), and several TCU teaching awards.

Sarah Robbins, author/editor of seven books, is Lorraine Sherley Professor of Literature at TCU, where she teaches American literature and transatlantic and cross-cultural studies. Before coming to TCU, she served as founding director of a National Writing Project site in Georgia, where she earned the Governor's Humanities Award for programs including the National Endowment for the Humanities-funded "Domesticating the Secondary Canon," "Making American Literatures," and "Keeping and Creating American Communities."

Table Of Contents

Acknowledgments;

Introduction (Linda K. Hughes and Sarah R. Robbins);

I. Curricular Histories and Key Trends; On Not Knowing Any Better (Susan M. Griffin);
Transatlantic Networks in the Nineteenth Century (Susan David Bernstein);
Rewriting the Atlantic: Symbiosis, 1997-2013 (Christopher Gair);

II. Organising Curriculum through Transatlantic Lenses; Anthologising and Teaching
Transatlantic Literature (Chris Koenig-Woodyard); "Flat Burglary"? A Course on Race, Appropriation, and Transatlantic Print Culture (Daniel Hack); Dramatizing the Black Atlantic: Live Action Projects in Classrooms (Alan Rice);

III. Teaching Transatlantic Figures; The Canadian Transatlantic: Susanna Moodie and Pauline Johnson (Kate Flint); Frederick Douglass, Maria Weston Chapman, and Harriet Martineau: Atlantic Abolitionist Networks and Transatlanticism's Binaries (Marjorie Stone); 'How did you get here? and where are you going?': Transatlantic Literary History, Exile and Textual Traces in Herman Melville's Israel Potter (Andrew Taylor); Americans, Abroad: Reading Portrait of A Lady in a Transatlantic Context (Sandra Zagarell);

IV. Teaching Genres in Transatlantic Context; Making Anglo-American Oratory Resonate (Tom F. Wright); Genre and Nationality in Nineteenth-Century British and American Poetry (Meredith McGill, Scott Challener, Isaac Cowell, Bakary Diaby, Lauren Kimball, Michael Monescalchi, and Melissa Parrish); Teaching Transatlantic Sensations (John Cyril Barton, Kirstin Huston, Jennifer Phegley, and Jarrod Roark); Prophecy, Poetry and Democracy: Teaching through the International Lens of the Fortnightly Review (Linda Freedman);

V. Envisioning Digital Transatlanticism; Transatlantic Mediations: Teaching Victorian Poetry in the New Print Media (Alison Chapman); Digital Transatlanticism: An Experience of and Reflections on Undergraduate Research in the Humanities (Erik Simpson); Twenty-first-Century Digital Publics and Nineteenth-Century Transatlantic Public Spheres (Tyler Branson);

VI. Afterword; Looking Forward (Larisa Asaeli, Rachel Johnston, Molly Leverenz, and Marie Martinez);

On the Edge
Coastlines of Britain
Robert Duck

Key Selling Points
- First evaluation of the physical impact of railway construction on the British coast
- Unique combination of environmental and historical research
- Timely given the impact of the storms of January and February 2014
- Covers the breaching of the South Devon, Cambrian and Cumbrian coastal lines

Summary
A first evaluation of the physical impact of railway construction on the British coast

The building of railways has had a profound but largely ignored physical impact on Britain's coasts. This book explores the coming of railways to the edge of Britain, the ruthlessness of the companies involved and the transformation of our coasts through the destruction or damage to the environment.

In many places today, railways are the first defence against the sea and similarly the embankments of long-closed lines act as sea walls. It is ironic, at a time when climate change is very much favouring rail as a means of transport, that many lines are increasingly exposed to extreme weather and the very actions associated with their construction have exacerbated coastal erosion. With the benefit of hindsight, many coastal railways have been built in locations that would not have been chosen today.

As our climate changes and storminess potentially increases, what might be the implications for some of Britain's lines on the edge?

Key features:
- First evaluation of the physical impact of railway construction on the British coast
- Unique combination of environmental and historical research
- Timely given the impact of the storms of January and February 2014
- Covers the breaching of the South Devon, Cambrian and Cumbrian coastal lines

Robert Duck is Dean of the School of Environment at the University of Dundee, and Professor of Environmental Geoscience. He is the author of This Shrinking Land: Climate Change and Britain's Coasts, (DUP, 2011). His research specialises in coasts and estuaries, and furthering the public understanding of science and climate change.

Table Of Contents
Preface;
Chapter 1 Cometh the Railway;
Chapter 2 Over the Edge;
Chapter 3 The Edge of Collapse;
Chapter 4 Across Salt Marsh, Mudflat, Slob and Sleech;
Chapter 5 Removing Shingle from the Beach is Prohibited;
Chapter 6 A Little Exercise of Observation and Reflection

The Great Seljuk Empire
A. C. S. Peacock

Key Selling Points
- The first book in a western language to offer an overview of this major Islamic empire
- Provides a narrative history and a thematic analysis of the empire's institutions and aspects of life in the Seljuk world
- Examines the political, administrative, military, religious, economic and social organization of the Great Seljuk Empire using a wide variety of historical and literary sources
- Draws on the evidence of archaeology and material culture
- Illustrated with images, maps, charts, family trees
- Text boxes introduce key themes and institutions

The first textbook introduction to the history of the Great Seljuk Islamic Empire to be published in English

Summary
The Great Seljuk Empire was the Turkish state which dominated the Middle East and Central Asia in the eleventh and twelfth centuries. This book surveys that period, which was one of exceptional importance, witnessing profound demographic, religious, political and social changes in the Islamic Middle East. The Turkish invasions played a role in provoking the Crusades, led to the collapse of Byzantine power in Anatolia and brought about the beginnings of Turkish settlement in what is now Turkey and Iran, permanently altering their ethnic and linguistic composition.

Contributor Bio
A.C.S. Peacock is Lecturer in Middle Eastern History at St Andrews University. Previous publications include Early Seljuq History: a new interpretation (London, 2010) and as co-editor (with Sara Nur Yildiz) The Seljuks of Anatolia: Court and Society in the Medieval Middle East (London, 2013).

The Edinburgh History of the Greeks, 1768 to 1913
The Long Nineteenth Century
Thomas Gallant

Key Selling Points
- An interdisciplinary approach bridges history, anthropology and archaeology
- Emphasises social history, including an in-depth discussion of Greek rural society and economy
- Brings Greek history and Ottoman history into dialogue in a way that hasn't been done before
- Includes over 70 figures -- maps, illustrations, tables and line drawings -- which illustrate the key aspects of Greek social life
- Traces the rich social, cultural, economic and political history of the Greeks from 1768 to 1913

Summary
Often referred to as the 'Long Nineteenth Century' this period witnessed the establishment of a Greek nation-state which had a profound impact on the Greeks everywhere.

Innovatively situating the story of the Greeks into a broader Ottoman and Mediterranean context, Thomas Gallant presents the most in-depth exploration of Greek society and culture available in any language. This is a substantive and original contribution to the study of the Greek people during the Modern period

Contributor Bio
Thomas W. Gallant is Professor of Modern Greek History at the University of California, San Diego.

### Summary

Often referred to as the 'Long Nineteenth Century' this period witnessed the establishment of a Greek nation-state which had a profound impact on the Greeks everywhere.

Innovatively situating the story of the Greeks into a broader Ottoman and Mediterranean context, Thomas Gallant presents the most in-depth exploration of Greek society and culture available in any language. This is a substantive and original contribution to the study of the Greek people during the Modern period

Sociolinguistics and Mobile Communication
Ana Deumert

Key Selling Points
- Illustrates core concepts in sociolinguistics and linguistic anthropology
- Applies sociolinguistic theories of language from Humboldt and Sapir to post-structuralism to new media
- Provides a global and multilingual perspective on digital communication practices and discusses digital inequality and its consequences for sociolinguistic research
- Includes a focus on linguistic creativity and poetic language

Summary
What does it mean to be able to speak or write to anyone, anywhere, 24/7/365, and get an immediate response? And what does the current profusion of these technologies mean for the study of language in social life? Do we need to develop new approaches, methodologies and theories? Taking a global perspective, this volume provides readers with a nuanced, ethnographically-informed understanding of mobile communication and sociolinguistics. The text explores a wide range of digital applications, including SMS, email, tweeting, Facebook, YouTube, chatting, blogging, Wikipedia, Second Life and gaming Raising important questions about the nature of language and the creativity of speakers, Ana Deumert examines the role of multimodality and intertextuality in creating meaning, as well as the realities and consequences of digital linguistic inequality. Drawing on examples from across the world, as well as original multilingual data and analyses from South Africa, this innovative textbook provides undergraduate and postgraduate readers with accessible explanations of sociolinguistic theories as they apply to the growing field of mobile communication.

Contributor Bio
Ana Deumert is Associate Professor in Linguistics at the University of Cape Town, South Africa. She has published extensively in the field of sociolinguistics, with a strong African and interdisciplinary focus.

Language and Identity in Modern Egypt
Reem Bassiouney

Key Selling Points
- Offers an in-depth study of identity in modern Egyptian public discourse
- Focuses on nationalist discourse before, during and after the Egyptian revolution of 2011
- Based on a broad and representative selection of data
- Helps us to decode and understand the messages put forward by the competing factions in Egyptian politics

Examines language and identity in modern Egypt using theories from discourse analysis and sociolinguistics

Summary
How is language used in Egyptian public discourse to illuminate the collective identity of Egyptians? How does this identity relate to language form and content? These questions are explored in this book, using a broad selection of data, including newspaper articles, caricatures, blogs, patriotic songs, films, school textbooks, TV talk-shows, poetry and novels. As well as furthering our understanding of the relationship between identity and language in general, Language and Identity in Modern Egypt also yields insights about the intricate ways in which media and public discourse help shape and outline identity through linguistic processes.

Contributor Bio
Reem Bassiouney (DPhil, Oxon.) is Associate Professor of Linguistics at The American University of Cairo. Her academic books include, Functions of Code-Switching in Egypt (2006), Arabic Sociolinguistics (2008), Arabic and the Media (2010), Arabic Language and Linguistics (2012 co-ed). Her research and publications focus on topics in Arabic sociolinguistics, including code-switching, language and gender, leveling, register, language policy, and discourse analysis. She is also an award winning novelist.

Quotes
“This is a timely book by a knowledgeable scholar who has a deep and sophisticated appreciation of the complexities of language and identity in Egypt.” - Abbas Benmamoun, University of Illinois

Table Of Contents
Introduction
1. Identity and beyond: Setting the framework of analysis
2. A historical overview of the development of national identity in modern Egypt with reference to language: The formative period
3. "Arabic" indexes amidst a nation and a nation-state: Ideologies, attitudes and linguistic realities
4. Social attributes of Egyptian identity
5. Narration and identity construction
6. The politics of identity and linguistic unrest: The case of the Egyptian revolution
7. Conclusions

Edinburgh Handbook of Evaluative Morphology
Nicola Grandi, Lívia Körtvélyessy

Reviews and debates the latest theoretical approaches to evaluative morphology

Summary
With examples drawn from over 200 world languages, this ground-breaking volume presents a state-of-the-art overview of evaluative morphology. Offering an innovative approach to major theoretical questions, the Edinburgh Handbook analyses the field from a cross-linguistic perspective, considering semantic, pragmatic and sociolinguistic aspects, as well as word-formation processes and evaluative morphology acquisition.

Complementing the synchronic approach with a diachronic perspective, this study establishes a picture of intriguing diversity in evaluative morphology manifestations, and offers a comprehensive analysis of the situation in dozens of languages and language families.

Divided into 2 distinct parts, the handbook begins with 13 chapters discussing evaluative morphology in relation to areas such as pragmatics, semantics, linguistic universals and sociolinguistics. The second part is comprised of descriptive chapters, broken into the following subsets: Eurasia, South-East Asia and Oceania, Australia-New Guinea, Africa, North America and South America.

Contributor Bio
Nicola Grandi is Associate Professor of Linguistics at the University of Bologna. Lívia Körtvélyessy is a lecturer at P.J. Safárik University, Kosice. Her research interests include word formation from cross-linguistic and sociolinguistic perspectives, and cross-linguistic research into morphology.

Table Of Contents

PART I
1. Introduction: why evaluative morphology? Nicola Grandi and Lívia Körtvélyessy
2. The semantics of evaluative morphology, Victor M. Prieto
3. Evaluative morphology and pragmatics, Lavinia Merlini Barbaresi
4. Word formation processes in evaluative morphology, Pavol %Stekauer
5. Evaluative morphology and language universals, Lívia Körtvélyessy
6. The place of evaluation within morphology, Nicola Grandi
7. Evaluative morphology and number/gender, Nicola Grandi
8. Evaluative morphology and aspect/actionality, Lucia Tovena
9. Evaluative morphology and sociolinguistic variation, Livio Gaeta
10. Evaluative morphology and language acquisition, Wolfgang Dressler and Katharina Korecky-Kröll
11. Evaluative morphology in a diachronic perspective, Katrin Mutz
12. Evaluative Morphology in sign languages, Giulia Petitta, Isabella Chiari, Alessio di Renzo
13. Evaluative morphology in Pidgin and Creoles, Barbara Turchetta

PART II
14. Evaluative morphology from a cross-linguistic perspective: Introduction to the descriptive chapters, Lívia Körtvélyessy

**English Sociophonetics**
Kevin Watson

**Key Selling Points**

A global study of sociophonetics in the English language

**Summary**

Rich with examples of standard and nonstandard English-language practices in Britain, Australia, the United States, and other English-speaking countries, this volume is the first to consider English-language varieties in transnational geographical and social contexts.

In its exploration of global sociophonetics, the text introduces the technical terminology and theoretical concepts behind auditory and acoustic phonetics and draws on cognition, speech technology, linguistic theory, and forensic speech science in its analyses. Written in a lively, accessible style, the volume provides the necessary background for students and general readers eager to make meaning from sociophonetic literature, while also struggling to find the confidence to embark on their own research projects. The text explains how phonetic difference can geographically and socially place a range of speakers and covers the fundamentals of language change and applied linguistics. It also describes the use of sociophonetics in professional practice and ethics and identifies ways to conduct sociophonetics in multiple methodologies and disciplines.

**Contributor Bio**

Kevin Watson is lecturer in English phonetics at Lancaster University.

Delivering Energy Law and Policy in the EU and the US
A Reader
Raphael Heffron

What are the component parts of successful energy law and policy for nuclear energy in the 21st century?

Summary
What are the component parts of successful energy law and policy for nuclear energy in the 21st century?

Nuclear power has been a consideration and part of energy policies of many countries across the world since its emergence as an electricity provider after the Second World War. Nuclear energy is a low-carbon energy source and therefore can contribute to reducing the effects of climate change. However, it is also faced with issues of high start-up costs, risk and waste disposal.

Drawing on over 90 interviews completed across Belgium (Brussels), Romania, the United States, and the United Kingdom, this book focuses on the development and formulation of energy law and policy in civil nuclear energy in the EU, the US and beyond. Heffron deconstructs the constituent parts of effective energy law and policy within the complex and often controversial energy industry. Pulling out what has and what has not worked, he suggests ways to improve the delivery of the central aims of law and policy.

Contributor Bio
Raphael Heffron is a qualified lawyer and Lecturer in Law at the University of Leeds and Associate Researcher at the Energy Policy Research Group, University of Cambridge.

He has published in many energy law and policy journals such as: *Oil, Gas and Energy Law; International Energy Law Review; Journal of World Energy Law and Business; Technology Forecasting and Social Change; Energy Policy*; and *Applied Energy*. Raphael's research interests are in energy and electricity policy and in particular on low carbon emitting energy. He is a contributing author to *Law Making and the Scottish Parliament: The Early Years*, E, Sutherland, K Goodall, G Little and F Davidson (eds), Edinburgh University Press, Edinburgh, 2011.

The Decadent Short Story
An Annotated Anthology
Kostas Boyiopoulos, Yoonjoung Choi, Matthew Brinto...

Key Selling Points
• Brings a variety of rare and important stories together in one volume reflecting an influential literary genre
• Expands the scope of Decadence by bringing together male and female voices, obscure and famous authors, and stylistic and thematic concerns such as New Woman fiction, the Gothic, Impressionism, Realism, paganism, class, homosexuality, and science
• Includes a detailed introduction, an introduction and endnotes for each story, 3 appendices containing parodies, background sources, a chronologically arranged and annotated list of Aesthetic and Decadent stories, and a select bibliography

Summary
The first anthology of Decadent short stories reflecting a variety of fin de siècle themes

This wide-ranging anthology showcases for the first time the short story as the most attractive genre for British writers who experimented with Decadent themes and styles. From familiar writers such as Ernest Dowson, Arthur Symons and Oscar Wilde to less well known writers such as Charles Ricketts, Victoria Cross and Ella D'Arcy, the 36 stories demonstrate ideas of class, gender, sexuality, and science as well as the Gothic, social satire, Symbolist fantasy, fairy tale, Naturalism/Realism, Impressionism, erotica, and the scientific romance. The selections represent the important role that magazine culture played in the unprecedented explosion of the Decadent short story in the 1890s. A full introductory essay sets the scene, while an introduction and endnotes for each story and explanatory material at the end of the book - including a chronologically arranged and annotated list of Aesthetic and Decadent stories and a select bibliography - make this anthology stand out.

Key Features:
- Brings a variety of rare and important stories together in one volume reflecting an influential literary genre
- Expands the scope of Decadence by bringing together male and female voices, obscure and famous authors, and stylistic and thematic concerns such as New Woman fiction, the Gothic, Impressionism, Realism, paganism, class, homosexuality, and science
- Includes a detailed introduction, an introduction and endnotes for each story, 3 appendices containing parodies, background sources, a chronologically arranged and annotated list of Aesthetic and Decadent stories, and a select bibliography

Contributor Bio

Kostas Boyiopoulos is Associate Tutor at the Department of English Studies at Durham University. He is the author of the forthcoming monograph The Decadent Image: The Poetry of Wilde, Symons, and Dowson (Edinburgh UP, 2015) and co-editor (with Mark Sandy) of the essay collection Decadent Romanticism (Ashgate, 2015). He has published a number of articles on a wide variety of fin-de-siècle aspects, especially on Decadent poetics. In July 2013, he co-organised an international conference on "We Speak a Different Tongue": Maverick Voices and Modernity, 1890-1939.

Dr Yoonjoung Choi is a Teaching Associate at Durham University. He has published articles on Oscar Wilde and on H. G. Wells in The Explicator, Critical Survey and The Wellsian and is writing a monograph on Romance, Readership, and Class in H. G. Wells.

Dr Matthew Brinton Tildesley is Assistant Professor of English Literature at Hanuk University of Foreign Studies, South Korea. He has published articles on fin de siècle topics in The Wildean, the Bulletin of the Emile Zola Society and in the Dictionary of

'Minstrelsy of the Scottish Border' Complete First Edition, 1802
Sigrid Rieuwerts

Key Selling Points
- Presents the first modern critical edition of Scott's ballads and songs
- Provides insight into the oral and the literate culture of Scotland at a critical point of transition between the two
- Reveals the roots of Scott's impact on Romantic perceptions and on the creation of an imagined Scotland
- Setstle the question of authenticity: identifies the relationship of Scott's published versions of each ballad to the sources and parallels available to Scott, mainly in manuscript

This critical edition of Scott's Minstrelsy presents a seminal 19th-century work for a 21st-century audience

Summary
This critical edition of Scott’s *Minstrelsy* presents a seminal 19th-century work for a 21st-century audience

The first volume in this three volume set contains all Scott's ballad texts with his introductions and notes together with an introductory essay on Border history and an essay on fairy tradition and popular superstition. The essay provides valuable context to the 52 ballads published in 1802, which are printed in full within this volume.

Key Features:
- Presents the first modern critical edition of Scott's ballads and songs
- Provides insight into the oral and the literate culture of Scotland at a critical point of transition between the two
- Reveals the roots of Scott's impact on Romantic perceptions and on the creation of an imagined Scotland
- Setsle the question of authenticity: identifies the relationship of Scott's published versions of each ballad to the sources and parallels available to Scott, mainly in manuscript

Rieuwerts Sigrid

Key Selling Points
- Presents the first complete modern critical edition of Scott's ballads and songs
- Provides insight into the oral and the literate culture of Scotland at a critical point of transition between the two
- Reveals the roots of Scott's impact on Romantic perceptions and on the creation of an imagined Scotland
- Sets the question of authenticity: identifies the relationship of Scott's published versions of each ballad to the sources and parallels available to Scott, mainly in manuscript

This critical edition of Scott's Minstrelsy presents a seminal 19th-century work for a 21st-century audience

Summary
This critical edition of Scott's Minstrelsy presents a seminal 19th-century work for a 21st-century audience

The second volume in this three volume set includes the full text of the ballads from the 1803, 1806, 1810 and 1812 editions with supplementary editorial notes, summaries, emendations, revisions and remarks. Each ballad is discussed intensively, and has been supplemented by extensive biographical and bibliographical material. Special consideration has been given to Scandinavian cognates and to the impact of the Minstrelsy in Germany through the study of its reception and translation during Scott's lifetime.

'Minstrelsy of the Scottish Border': Sources and Commentary
Sigrid Rieuwerts

Key Selling Points
• Presents the first complete modern critical edition of Scott's ballads and songs
• Provides insight into the oral and the literate culture of Scotland at a critical point of transition between the two
• Reveals the roots of Scott's impact on Romantic perceptions and on the creation of an imagined Scotland
• Sets the question of authenticity: identifies the relationship of Scott's published versions of each ballad to the sources and parallels available to Scott, mainly in manuscript

This critical edition of Scott's Minstrelsy presents a seminal 19th-century work for a 21st-century audience

Summary
This critical edition of Scott's Minstrelsy presents a seminal 19th-century work for a 21st-century audience

The third volume in this three volume set fully contextualises the Minstrelsy in discussing the 1830 edition. It includes an introductory essay on popular poetry and on various collections of ballads of Britain, particularly those of Scotland, and an essay on the ancient ballad. This volume places Scott's Minstrelsy text within the broad framework of traditional ballad studies and contemporary compositions. The ballads are printed in full (with music where available) from MS 877, MS 893 and other manuscripts, chap-books, letters and books available to Scott with contextual commentary provided for each ballad as appropriate. The first part of the commentary comprises a literary discussion of Scott's choice of text followed by a discussion of oral traditions, including the singer and the Sitz-im-Leben.

Archipelagic Modernism
Literature in the Irish and British Isles, 1890-1970
John Brannigan

Key Selling Points
- Questions established terms such as 'Modernism' or 'the Angry Young Men' and explores new terms such as 'critical realism' and literary developments such as 'the Scottish New Wave'
- Takes the study of 20th-century literature into the 21st century providing a single volume treatment of the distinct national literary traditions of the British Isles
- Provides students with a provocative revisionist approach and in-depth coverage

Summary
Offers a new archipelagic history of twentieth-century literature in Britain and Ireland

Archipelagic Modernism examines the anglophone literatures of the archipelago from 1890 to 1970 for what they tell us about changing identities, geographies, and ecologies. The book argues that these literatures constitute an important resource for how we might begin to think about alternative political geographies, and alternative practices of belonging to place and environment. From the height of the British Empire in 1890, to the increasing sense by 1970 of the imminent 'break-up' of Britain, 'archipelagic modernism' turned to the 'peripheral' spaces of islands, coastlines, and the sea to re-invent the Irish and British archipelago as a plural and connective space.

Key Features:
- Questions established terms such as 'Modernism' or 'the Angry Young Men' and explores new terms such as 'critical realism' and literary developments such as 'the Scottish New Wave'
- Takes the study of 20th-century literature into the 21st century providing a single volume treatment of the distinct national literary traditions of the British Isles
- Provides students with a provocative revisionist approach and in-depth coverage

A Feminine Enlightenment
British Women Writers and the Philosophy of Progress, 1759-1820
JoEllen DeLucia

Key Selling Points
- Establishes the centrality of gender to Enlightenment discussions of social and historical development
- Uncovers evidence of women writers' participation in the Scottish Enlightenment's theorization of sentiment and historical progress
- Provides literary and historical background for ongoing discussions of the history of emotion and the study of affect
- Revises established understandings of British women writers' contributions to Enlightenment narratives of social and historical progress

Summary
Revises established understandings of British women writers' contributions to Enlightenment narratives of social and historical progress

Drawing on original archival research, A Feminine Enlightenment argues that women writers shaped Enlightenment conversations regarding the role of sentiment and gender in the civilizing process. By reading women's literature alongside history and philosophy and moving between the eighteenth century and Romantic era, JoEllen DeLucia challenges conventional historical and generic boundaries. Beginning with Adam Smith's Theory of Moral Sentiments (1759), she tracks discussions of "women's progress" from the rarified atmosphere of mid-eighteenth-century Bluestocking salons and the masculine domain of the Scottish university system to the popular Minerva Press novels of the early nineteenth century. Ultimately, this study positions feminine genres such as the Gothic romance and Bluestocking poetry, usually seen as outliers in a masculine Age of Reason, as essential to understanding emotion's role in Enlightenment narratives of progress. The effect of this study is twofold: to show how developments in women's literature reflected and engaged with Enlightenment discussions of emotion, sentiment, and commercial and imperial expansion; and to provide new literary and historical contexts for contemporary conversations that continue to use "women's progress" to assign cultures and societies around the globe a place in universalizing schemas of development.

Key Features
- Establishes the centrality of gender to Enlightenment discussions of social and historical development
- Uncovers evidence of women writers' participation in the Scottish Enlightenment's theorization of sentiment and historical progress
- Provides literary and historical background for ongoing discussions of the history of emotion and the study of affect

Letter Writing Among Poets
From William Wordsworth to Elizabeth Bishop
Jonathan Ellis

Key Selling Points
- A comprehensive collection of essays on the art and genre of letter writing among Romantic, Victorian and Twentieth Century poets
- Contributors are leading international biographers, critics and poets, including Hermione Lee, Paul Muldoon, Daniel Karlin, Hugh Haughton, Anne Fadiman, Edna Longley and Angela Leighton
- An absorbing history of literary friendship, literary love, and literary rivalry
- A sensitive study of the often close relationship between letter writing and poetry

The first book to look at poets' letters seriously as an art form

Summary
The first book to look at poets' letters seriously as an art form

Fifteen enlightening chapters by leading international biographers, critics and poets examine letter writing among poets in the last two hundred years. They range from Coleridge, Wordsworth, Keats and Shelley in the nineteenth-century to Eliot, Yeats, Bishop and Larkin in the twentieth. In doing so, they respond to the following questions. Who are the great letter writers of the past? Why is reading other people's mail so addictive? What is the relationship between letter writing and other literary genres such as poetry? Divided into three sections - Contexts and Issues, Romantic and Victorian Letter Writing, and Twentieth-Century Letter Writing - the volume demonstrates that real letters still have an allure that virtual post struggles to replicate.

**Writing for The New Yorker**

**Critical Essays on an American Periodical**

Fiona Green

**Key Selling Points**

- Eleven new perspectives on major American writers, including Roth, Cheever, Plath, and Updike, in relation to their first publication contexts
- Reconsiders modern and contemporary American writing and periodical culture, focusing critical attention on commercially successful 'smart' magazines
- Draws on new research in The New Yorker's manuscript and digital archives
- A distinctive combination of close critical reading and cultural analysis

Original critical essays on an iconic American periodical, providing new insights into twentieth-century literary culture

**Summary**

Original critical essays on an iconic American periodical, providing new insights into twentieth-century literary culture

This collection of newly commissioned critical essays reads across and between New Yorker departments, from sports writing to short stories, cartoons to reporters at large, poetry to annals of business. Attending to the relations between these kinds of writing and the magazine's visual and material constituents, the collection examines the distinctive ways in which imaginative writing has inhabited the 'prime real estate' of this enormously influential periodical. In bringing together a range of sharply angled analyses of particular authors, styles, columns, and pages, this book offers multiple perspectives on American writing and periodical culture at specific moments in twentieth-century history.

**Contributor Bio**

Kathleen Jamie
Essays and Poems on Her Work
Rachel Falconer

Key Selling Points
- Presents the first collection of scholarly essays on Kathleen Jamie, one of the UK’s foremost living poets
- Contains creative responses to Jamie’s work by leading Scottish, Irish and English poets, including Michael Longley, Andrew Greig, Leontia Flynn and Jamie McKendrick
- Provides a full bibliography of works by and about Kathleen Jamie
- Includes an audio recording of Kathleen Jamie, reading from works discussed in the volume

The first collection of critical essays on the writing of Kathleen Jamie

Summary
The first collection of critical essays on the writing of Kathleen Jamie

Kathleen Jamie's works are classics. No one can read Kathleen Jamie and remain indifferent or unchanged. Nationally acclaimed since her first major publications in the 1980s, Jamie stands out from other contemporary poets in her exceptional musicality, her strikingly unusual perspectives, her wry humour, translucent imagery, and hard-edged economy of expression. These 16 newly commissioned critical essays and 7 previously unpublished poems by leading poets make up the first full-length study of Kathleen Jamie's writing. The essays discuss all of her poetry collections, including The Queen of Sheba (1994), Jizzen (1999), Mr and Mrs Scotland Are Dead: Poems 1980-94 (2002), The Tree House (2004) and The Overhaul (2012), as well as her travel writing, including Among Muslims (2002), her nature writing, Findings (2005) and Sightlines (2012) and her collaborative work, including Frissure (2013), with artist Brigid Collins. Whether engaging with national politics, with gender, with landscape and place, or with humanity's relation to the natural environment, this volume demonstrates that Kathleen Jamie's verse teaches us new ways of listening, of seeing and of living in the contemporary world.

Contributor Bio

The Vogue for Russia
Modernism and the Unseen in Britain 1900-1930
Caroline Maclean

Key Selling Points
- Draws on unpublished archive material as well as on periodicals, exhibition catalogues, reviews, diaries, fiction and the visual arts
- Addresses the omission in modernist studies of the importance of Russian aesthetics and Russian discourses of the occult to British modernism
- Challenges the dominant Western European and transatlantic focus in modernist studies and provides an original contribution to our understanding of new global modernisms
- Combines literary studies with aesthetics, modernist history, the history of modern esotericism, film history, periodical studies and science studies
- Explores the influence of Russian aesthetics on British modernists

Summary
Explores the influence of Russian aesthetics on British modernists

In what ways was the British fascination with Russian arts, politics and people linked to a renewed interest in the unseen? How did ideas of Russianness and 'the Russian soul' - prompted by the arrival of the Ballets Russes and the rise of revolutionary ideals - attach themselves to the existing British fashion for theosophy, vitalism and occultism?

In answering these questions, this study is the first to explore the overlap between Slavophilia and mysticism between 1900 and 1930 in Britain. The main Russian characters that emerge are Fedor Dostoevsky, Boris Anrep, Vasily Kandinsky, Petr Ouspensky and Sergey Eisenstein. The British modernists include Roger Fry, Virginia Woolf, Mary Butts, John Middleton Murry, Michael Sadleir and Katherine Mansfield.

Key Features:
- Draws on unpublished archive material as well as on periodicals, exhibition catalogues, reviews, diaries, fiction and the visual arts
- Addresses the omission in modernist studies of the importance of Russian aesthetics and Russian discourses of the occult to British modernism
- Challenges the dominant Western European and transatlantic focus in modernist studies and provides an original contribution to our understanding of new global modernisms
- Combines literary studies with aesthetics, modernist history, the history of modern esotericism, film history, periodical studies and science studies

- Engages with recent and contemporary philosophical approaches to literature, including work by Derrida, Badiou, Levinas, and Adorno
- Makes a unique contribution to theoretical work on comedy and laughter
- Provides a rigorous introduction to the theoretical debates surrounding the relationship between modernist literature and a post-war ethics of representation

Reads Beckett's comic timing as part of a post-war ethics of representation

---

**Summary**

Reads Beckett's comic timing as part of a post-war ethics of representation

Samuel Beckett is a funny writer. He is also an author whose work is taken to respond ethically to the unspeakable seriousness of the post-Holocaust situation. How can these two statements sit together?

Ranging widely over Beckett's fiction, drama and critical writings, and including readings of Murphy, the Trilogy, Waiting for Godot, Endgame, the late prose and the late plays, this book demonstrates that it is through Beckett's comic timing that we can understand the double gesture of his art: the ethical obligation to represent the world how it is while, at the same time, opening up a space for how it ought to be.

---

**Key Features:**

- Presents innovative readings of the comedy found in Beckett's fiction, drama and critical writings
- Spans Beckett's entire oeuvre, using published and unpublished sources
- Engages with recent and contemporary philosophical approaches to literature, including work by Derrida, Badiou, Levinas, and Adorno

Literature of the 1940s: War, Postwar and 'Peace'
Volume 5
Gill Plain

Key Selling Points
- Detailed and theoretically informed case studies of canonical writers such as Bowen, Orwell, Greene and Waugh
- Case studies and critical re-evaluations of popular genre writers and forgotten writers
A groundbreaking re-reading of the literary response to a decade of trauma and transformation

Summary
A groundbreaking re-reading of the literary response to a decade of trauma and transformation

This study undoes the customary division of the 1940s into the Second World War and after. Instead, it focuses on the thematic preoccupations that emerged from writers' immersion in and resistance to the conflict. Through seven chapters - Documenting, Desiring, Killing, Escaping, Grieving, Adjusting and Atomising - the book sets middlebrow and popular writers alongside residual modernists and new voices to reconstruct the literary landscape of the period. Detailed case studies of fiction, drama and poetry provide fresh critical perspectives on writers as diverse as Margery Allingham, Alexander Baron, Elizabeth Bowen, Keith Douglas, Henry Green, Graham Greene, Georgette Heyer, Alun Lewis, Nancy Mitford, George Orwell, Mervyn Peake, J. B. Priestley, Terence Rattigan, Mary Renault, Stevie Smith, Dylan Thomas and Evelyn Waugh.

Key Features
Detailed and theoretically informed case studies of canonical writers such as Bowen, Orwell, Greene and Waugh
Case studies and critical re-evaluations of popular genre writers and forgotten writers

Contributor Bio
Gill Plain is Professor of English at the University of St Andrews. She has published extensively on twentieth-century popular culture, crime fiction, gender, sexuality and the writing of the two world wars. Her previous books include John Mills and British Cinema (Edinburgh 2006), Twentieth-Century Crime Fiction: Gender, Sexuality and the Body (Edinburgh, 2001), and Women's Fiction of the Second World War (Edinburgh, 1996).

Quotes
The main attraction of Gill Plain's book lies in its entertainingly accessible coverage of literary texts and social, intellectual issues. It is grounded in scholarly research, yet it is impressively free of scholarly jargon.

Classes of Ladies of Cloistered Spaces
Writing Feminist History through Biography in Fin-de-siècle Egypt
Marilyn Booth

Key Selling Points
- Includes descriptions of biographies of women from the US, Britain, Europe, India and the Maldives, as well as the Middle East (Iran, Turkey and the Arab world)
- Presents Fawwaz's dictionary as a key text in the debates on gender and national efficacy in 1890s Egypt and Ottoman Syria
- Closely examines issues of text circulation and borrowing
- Argues that Fawwaz's book can be regarded as 'feminist history'

Explores the writing and influence of the first Arabic-language global biographical dictionary of women

Summary
Zaynab Fawwaz (c.1860-1914) was a forceful voice in support of women's rights to education and work choices in colonial-era Egypt. Her volume of 453 women's lives, al-Durr al-manthur fi tabaqat rabbat al-khudur (Pearls scattered in times and places: Classes of ladies of cloistered spaces, 1893-6) - featuring Boudicca, Catherine the Great, Zaynab (granddaughter of the Prophet Muhammad), Victoria Woodhull, the Turkish poet Sirri Hanim and many others - built on the Arabic-Islamic biographical tradition to produce a work for women in the modern era, grafting European, Turkish, Arab and Indian life narratives, amongst others, onto Arabic literary patterns.

In Classes of Ladies of Cloistered Spaces Marilyn Booth argues that Fawwaz's work was less 'exemplary biography' than feminist history, in its exploration of achievement but also of what Booth labels patriarchal trauma in the lives of women across times and places. She traces Fawwaz's creative use of her sources, her presentation of biographical narratives in the context of the political essays she wrote in the Arabic press, her publicised dialogue with the President of the Board of Lady Managers of the 1893 World Columbian Exposition - where she attempted to send the volume - and how her inscription of a feminine ancient history diverged from that of men writing history in 1890s Egypt.

Contributor Bio
Marilyn Booth holds the Iraq Chair in Arabic and Islamic Studies, University of Edinburgh. She has previously edited Harem Histories: Envisioning Places and Living Spaces (2010), and a Journal of Women's History issue, 'Women's autobiography in the Middle East and South Asia' (2013). She is Middle East/Europe editor of, Encyclopedia of Women and Islamic Cultures.

New Critical Thinking
Criticism to Come
Julian Wolfeys

Key Selling Points
- Presents cutting-edge debates presented to more advanced students in an engaging yet sophisticated way
- Provides a wide range of 'case studies' including poetry, film, reading devices, popular fiction & non-fiction prose
- Reflects newly emerging ways of teaching critical ideas in the classroom
- Opens criticism to dialogue and possibility
- Introduces advanced students of literature to the latest critical thinking

Summary
Following a scene-setting Introduction which reflects on the state of 'theory' today, the 11 chapters in this volume introduce new areas of critical thinking which go beyond the standard 'isms': Literary Reading in a Digital Age; Critical Making in the Digital Humanities; Thing Theory; Memory Work and Criticism; Body, Objects, Technology; Criticism and 'The Animal'; Multimodality and Linguistic Approaches to Literary Study; Critical and Creative Practice: Conditions for Success in the Writing Workshop; Affect Theory; Spectrality; Critical Climate Change.

A final rounding off chapter on Historicising presents debates around historically oriented criticism, including a 'round table' among the contributors. Each chapter also provides a critical 'case study' of a text or texts, including poetry writing guides, a Seamus Heaney poem, film adaptations of Jane Austen's Pride and Prejudice and Charlotte Brontë's Jane Eyre, e-readers and kindles, First World War poetry and prose, steampunk, and Robert Macfarlane's The Old Ways.

From 'Thing Theory' to animal theory, multimodality to film adaptation, and from acts of reading in a digital age to the creative writing workshop, the volume reflects a radical reorientation in critical modes of thinking.

Introduces advanced students of literature to the latest critical thinking

Summary
Following a scene-setting Introduction which reflects on the state of 'theory' today, the 11 chapters in this volume introduce new areas of critical thinking which go beyond the standard 'isms': Literary Reading in a Digital Age; Critical Making in the Digital Humanities; Thing Theory; Memory Work and Criticism; Body, Objects, Technology; Criticism and 'The Animal'; Multimodality and Linguistic Approaches to Literary Study; Critical and Creative Practice: Conditions for Success in the Writing Workshop; Affect Theory; Spectrality; Critical Climate Change.

A final rounding off chapter on Historicising presents debates around historically oriented criticism, including a 'round table' among the contributors. Each chapter also provides a critical 'case study' of a text or texts, including poetry writing guides, a Seamus Heaney poem, film adaptations of Jane Austen's *Pride and Prejudice* and Charlotte Brontë's *Jane Eyre*, e-readers and kindles, First World War poetry and prose, steampunk, and Robert Macfarlane's *The Old Ways*.

From 'Thing Theory' to animal theory, multimodality to film adaptation, and from acts of reading in a digital age to the creative writing workshop, the volume reflects a radical reorientation in critical modes of thinking.

Contributor Bio

Julian Wolfreys is author and editor of more than 40 books on nineteenth- and twentieth-century English literature and literary theory. Most recently he has published *Dickens's London* and *The Derrida Wordbook*, both with EUP. He is Professor of English Literature at the University of Portsmouth, where he is also Director of the Centre for Studies in Literature. He recently published his first novel, *Silent Music*.

The Edinburgh Festivals
Culture and Society in Post-war Britain
Angela Bartie

Key Selling Points
- First critical history of the first twenty five years of the world's biggest arts festival
- Uses festivals (and key theatre ventures) in Edinburgh as a lens for understanding wider social and cultural change in post-war Britain
- as a practical exercise in the application of cultural criticism by combining social and cultural history with insights from cultural studies and contemporary festivals and events literature
- Draws upon a range of archival sources, including original oral history interviews with key players in the arts scene of Edinburgh and beyond
- Provides a valuable addition to the history of the arts in British society in the period c. 1945-1971, and to our understanding of cultural and social change in post-war Britain
- A history of the formative years of The Edinburgh Festivals as the world's largest arts festival

Summary
'The Edinburgh Festival' - and the Fringe that it inspired - has been the hub for numerous 'culture wars' since its inception in 1947. This book is the first major study of the origins and development of this leading annual arts extravaganza, examining a moving stage of debate on such issues as the place of culture in society, the practice and significance of the arts, censorship, the role of organised religion, and the meanings of morality.

From the beginning, the Edinburgh International Festival sought to use culture to bolster European civilisation. For this it was considered for the Nobel Peace Prize in 1952. Culture was seen by churches as a 'weapon of enlightenment', by the labour movement as a 'weapon in the struggle', and by the new generation of artistic entrepreneurs coming to the fore in the 1960s as a means of challenge and provocation. High-profile controversies resulted, such as the nudity trial of 1963 and the scandal over a play about bestiality in 1967.

These ideas, conservative and liberal, elite and diverse, traditional and avant-garde, have all clashed every August in Edinburgh, making the Festivals an effective lens for exploring major changes in culture and society in post-war Britain.

East, West and Centre
Reframing post-1989 European Cinema
Michael Gott, Todd Herzog

Key Selling Points
- The most comprehensive investigation of Central European cinema in the early 21st century
- Contributions address recent films from or about Bulgaria, France, Germany, Lithuania, and Romania
- Aims to introduce readers to new films and directors from different national and transnational cinemas
- An essential read for those interested in wider European studies, as well as students and scholars in film and media studies

Summary
Twenty-five years have passed since the fall of the Berlin Wall and the end of communism in Eastern Europe, and ten years have passed since the first formerly communist states entered the E.U. An entire post-Wall generation has now entered adulthood, yet scholarship on European cinema still tends to divide the continent along the old Cold War lines.

In East West and Centre the world's leading scholars in the field assemble to consider the ways in which notions such as East and West, national and transnational, central and marginal are being rethought and reframed in contemporary European cinema. Assessing the state of post-1989 European cinema, from (co)production and reception trends to filmic depictions of migration patterns, economic transformations and socio-political debates over the past and the present, they address increasingly intertwined cinema industries that are both central (France and Germany) and marginal in Europe (Romania, Bulgaria, Lithuania).

This is a ground-breaking and essential read, not just for students and scholars in film and media studies, but also for those interested in wider European studies as well.

Contributor Bio
Michael Gott is Assistant Professor of French at the University of Cincinnati. Todd Herzog is an Associate Professor and Chair of German Studies at the University of Cincinnati.

Films on Ice
Cinemas of the Arctic
Scott MacKenzie, Anna Westerståhl Stenport

Key Selling Points
- The first book to address the vast diversity of Northern circumpolar cinemas from a transnational perspective
- Transforms the study, reception, and reach of Arctic cinema, film, and moving image culture
- Establishes the significance of the term Global North in relation to film studies
- Brings together an international array of European, Russian, Nordic, and North America of scholars and researchers, with content expertise transcending limited national or regional boundaries
A comprehensive study of films made in and about one of the world's most breathtaking landscapes: The Arctic

Summary
The first book to address the vast diversity of Northern circumpolar cinemas from a transnational perspective, Films on Ice: Cinemas of the Arctic presents the region as one of great and previously overlooked cinematic diversity. With chapters on polar explorer films, silent cinema, documentaries, ethnographic and indigenous film, gender and ecology, as well as Hollywood and the USSR's uses and abuses of the Arctic, this book provides a groundbreaking account of Arctic cinemas from 1898 to the present. Challenging dominant notions of the region in popular and political culture, it demonstrates how moving images (cinema, television, video, and digital media) have been central to the very definition of the Arctic since the end of the nineteenth century. Bringing together an international array of European, Russian, Nordic, and North American scholars, Films on Ice radically alters stereotypical views of the Arctic region, and therefore of film history itself.

Contributor Bio
Scott MacKenzie teaches in the Department of Film and Media, and is cross-appointed to the Graduate Program in Cultural Studies, at Queen's University, Canada

Anna Westerståhl Stenport is Associate Professor of Scandinavian Studies and Media and Cinema Studies, and Director of the European Union Center, at the University of Illinois at Urbana-Champaign.

Quotes
"Gathering leading scholars across the three continents meeting in the Arctic, MacKenzie and Stenport open up the utopian, dystopian and heterotopian dimensions of Arctic film, a shimmering, crystalline view not only on the contest over the meanings of polar space, but onto the possibilities for reconceptualising world cinema." - Sean Cubitt, Professor of Film and Television, Goldsmiths, University of London

Table Of Contents
Introduction: What Are Arctic Cinemas?
Part I. Global Indigeneity; 1. 'Who Were We? And What Happened to Us?': Inuit Memory and Arctic Futures in Igloolik Isuma Film and Video
3. Frozen in Film: Alaska Eskimos in the Movies
4. Cultural Stereotypes and Negotiations in Sami Cinema
5. Cinema of Emancipation and Zacharias Kunuk's Atanarjuat: The Fast Runner
6. Cosmopolitan Inuit: New Perspectives on Greenlandic Film
7. Arctic Carnivalesque: Ethnicity, Gender and Transnationality in the Films of Tommy Wirkola
Part II. Hollywood Hegemony
8. Fact and Fiction in 'Northerns' and 'Early Arctic Films'
9. California's Yukon as Comic Space
10. 'See the Crashing Masses of White Death': Greenland, Germany, and the Sublime in the 'Bergfilm' SOS Eisberg
11. The Threat of the Thaw: The Cold War on the Screen
13. White on White: Twenty-First Century Norwegian Horror Films Negotiate Masculinist Arctic Imaginaries
Part III. Ethnography and the Documentary Dilemma
14. The Creative Treatment of Alterity: Nanook as the North
15. From Objects to Actors: Knud Rasmussen's Ethnographic Feature Film The Wedding of Palo
16. Arctic Travelogues: Conquering the Soviet North
17. A Gentle Gaze on the Colony: Jette Bang's Documentary Filming in Greenland 1938 - 9
18. Exercise Musk-Ox: The Challenges of Filming a Military Expedition in Canada's Arctic
19. The Tour: A Film About Longyearbyen, Svalbard. An Interview with Eva la Cour
Part IV. Myths and Modes of Exploration
20. The Changing Polar Films: Silent Films from Arctic Exploration 1900 - 1930
21. The Attractions of the North: Early Film Expeditions to the Exotic Snowscape
22. Frozen in Motion: Ethnographic Representation in Donald B. MacMillan's Arctic Films
23. 'My Heart Beat for the Wilderness': Exploring with the Camera in the Work of Isobel Wylie Hutchison, Jenny Gilbertson, Margaret Tait, and other Twentieth-Century Scottish Women Filmmakers
24. 'Here will be a Garden-City': Soviet Man on an Arctic Construction Site
25. Transcending the Sublime: Arctic Creolisation in the Works of Isaac Julien and John Akomfrah

Grindhouse Nostalgia
Memory, Home Video and Exploitation Film Fandom
David Church

Key Selling Points
• The first in-depth critical examination of the recent and ongoing "retrosploitation" cycle
• Expands a growing body of research on the importance of home video as containers of material history
• Unites cultural memory studies and fan studies in productive ways for understanding a broad range of fan investments
• Restores questions of affect and non-ironic reception to understandings of exploitation cinema's continuing appeal

An indispensable study of exploitation cinema's continuing allure

Summary
Too often dismissed as nothing more than 'trash cinema', exploitation films have become both earnestly appreciated cult objects and home video items that are more accessible than ever. In this wide-ranging new study, David Church explores how the history of drive-in theatres and urban grind houses has descended to the home video formats that keep these lurid movies fondly alive today.

Arguing for the importance of cultural memory in contemporary fan practices, Church focuses on both the re-release of archival exploitation films on DVD and the recent cycle of 'retrosploitation' films like Grindhouse, Machete, Viva, The Devil's Rejects, and Black Dynamite. At a time when older ideas of subcultural belonging have become increasingly subject to nostalgia, Grindhouse Nostalgia presents an indispensable study of exploitation cinema's continuing allure, and is a bold contribution to our understanding of fandom, taste politics, film distribution, and home video.

Contributor Bio

Department of Communication and Culture, Indiana University

Quotes

'By taking fans' nostalgia seriously, Grindhouse Nostalgia makes a brilliant contribution to understanding cult movies and fandom. Exploring historical complexities of the drive-in and the grind house, David Church builds an impressive theory of subcultural value, retrosploitation and cultural memory. The 'new' might not always be better, but this new study most definitely challenges and surpasses previous work in the field.'
- Professor Matt Hills, Aberystwyth University

Media, Persuasion and Propaganda
Marshall Soules

Key Selling Points
• An eclectic, interdisciplinary overview of persuasive strategies and propaganda techniques
• Uses global examples and case studies to define the spectrum of persuasion, from promotion to propaganda
• Examines the performance of propaganda, from orality to new media
• Includes exercises in each chapter to reinforce the key themes and promote discussion
A one-stop guide through the spectrum of persuasion, from everyday promotion to globe-altering propaganda

Summary
Living in a saturated media environment, we are crowded from all sides by persuasive messages and information. Advice, promotion and propaganda form a spectrum of persuasion, and everywhere we see it performed in its full theatricality, complete with actors, scripts, props and costumes.

Based on enduring rhetorical principles, these persuasive techniques and the psychology behind them have become increasingly sophisticated during the 'age of persuasion', a century of applied research in advertising, advocacy, public relations, mass entertainment and social control. Media, Persuasion and Propaganda guides the reader through the many varieties of persuasion and its performance, exploring the protocols of rhetoric unique to the medium, from orality and print to film and digital images. Using case studies and exercises, this innovative study poses challenging questions, such as: How do individuals and organisations exert influence to build communities and networks? What role do media play in communicating persuasive messages? How do we use recent discoveries in cognitive science to promote a cause, advocate social change or market ideas and products? How do we defend ourselves against manipulation and undue influence, and when does persuasion turn into propaganda?

Returning to Revolution
Deleuze, Guattari and Zapatismo
Thomas Nail

Key Selling Points
- An account of the concept of revolution in the work of Deleuze and Guattari
- Outlines the theoretical and practical origins of the return to political revolution
- Provides the first full-length account of Deleuze and Guattari’s relationship to a concrete revolutionary struggle
An account of the concept of revolution in the work of Deleuze and Guattari

Summary
An account of the concept of revolution in the work of Deleuze and Guattari

We are witnessing the return of political revolution. However, this is not a return to the classical forms of revolution: the capture of the state, the political representation of the party, the centrality of the proletariat or the leadership of the vanguard. After the failure of such tactics over the last century, revolutionary strategy is now headed in an entirely new direction.

This book argues that Deleuze, Guattari and the Zapatistas are at the theoretical and practical heart of this new direction. Returning to Revolution is the first full-length book devoted to Deleuze and Guattari’s concept of revolution and to their connection with Zapatismo.

Deleuze and the Naming of God
Post-Secularism and the Future of Immanence
Daniel Colucciello Barber

Key Selling Points
- Addresses the intersection between Deleuze's philosophy and the question of religion
- Develops the idea of immanence into a way of escaping the stale binary between religion and the secular
- Changes the perception of Deleuze's philosophy from simple affirmation to one in which themes such as suffering become central
- Draws on the thought of Adorno and Yoder in addition to Deleuze
- Addresses the relationship between Deleuze's differential immanence and the notion of religion

Summary
Deleuze's philosophy of immanence vigorously rejects every appeal to the beyond. For this reason, it is often presumed to be indifferent to the concerns of religion. Daniel Barber shows that religion and Deleuze's thought are both motivated by a demand to create new modes of existence. Thus, the enemy of Deleuze's philosophy is not religion but the transcendent. Deleuze and the Naming of God shows how Deleuzian immanence is able both to oppose religious transcendence and to enter an alliance with immanent accounts of the name of God. In doing so, it shows a way out of the paralysing debate between religion and the secular.

Contributor Bio
Daniel Colucciello Barber is Fellow at the The Berlin Institute for Cultural Inquiry. He is the author of On Diaspora: Christianity, Religion, and Secularity (Cascade, 2011).

Quentin Meillassoux (2nd Edition)
Philosophy in the Making
Graham Harman

Key Selling Points
- The first book on Quentin Meillassoux - described as the fastest-rising star of French philosophy since Derrida
- Assesses Meillassoux's English-language publications from After Finitude to The Number and the Siren
- Include an insightful interview with Meillassoux and extensive translated excerpts from L'Inexistence divine (The Divine Inexistence), his famous but still unpublished major work
An in-depth study of the emerging French philosopher Quentin Meillassoux

Summary
An in-depth study of the emerging French philosopher Quentin Meillassoux

In this expanded edition of his landmark 2011 work on Meillassoux, Graham Harman covers new materials not available to the Anglophone reader at the time of the first edition. Along with Meillassoux's startling book on Mallarmé's poem "Un coup de dés jamais n'abolira le hasard," Harman discusses several new English articles by Meillassoux, including his controversial April 2012 Berlin lecture and its critique of "subjectalism."

Freshly called to a professorship at the Sorbonne, Meillassoux's star has continued to rise. This expanded edition of the only book on Meillassoux remains the best introduction to one of Europe's most promising thinkers.

**Iconoclastic Theology**
*Gilles Deleuze and the Secretion of Atheism*
F. LeRon Shults

**Key Selling Points**
- The first exposition of Deleuze's radical critique of religion, demonstrating the crucial role this creative destruction plays throughout his philosophical corpus
- Provocatively describes this aspect of Deleuze's work as 'theology', following his own (paradoxical, humorous, diabolical) description of that discipline as 'the science of non-existing entities'
- Brings Deleuze studies into dialogue with the bio-cultural sciences of religion, which are transforming the current debates about the value of atheism in the academy and the public sphere

A new reading of Deleuze's whole corpus in light of his treatment of religion and theological themes

**Summary**

F. LeRon Shults explores Deleuze's fascination with theological themes and shows how his entire corpus can be understood as a creative atheistic machine that liberates thinking, acting and feeling. Shults also demonstrates how the flow of a productive atheism can be increased by bringing Deleuzian concepts into dialogue with insights derived from the bio-cultural sciences of religion.

Gilles Deleuze consistently hammered away at icons, overturning pretentious images taken as true copies of ideal models. He was particularly critical of religious Figures. In What is Philosophy? Deleuze argued that religion and transcendence, like philosophy and immanence, always come (and go) together. What value, then, could he possibly have found in engaging theology, which is typically bound to a particular religious coalition? Chipping away at repressive religious representations was valuable in itself for Deleuze, but he also believed that religion produced something of considerable value. He insisted that every religion secretes atheism, and none more so than Christianity.

**Contributor Bio**

F. LeRon Shults is Professor of Theology and Philosophy at the University of Agder, Norway.

**Table Of Contents**

Acknowledgements
Book Abbreviations

1. **Hammering Theology**
The Science of Non-Existing Entities
Anti-Oedipus, Anti-Christ
Anthropomorphic Promiscuity and Sociographic Prudery
Sacerdotal and Iconoclastic Trajectories
The Secrets of Theism

2 **Breaking Theological Icons**
The Inversion of Pluralism
Christ as the Image of God
Anthropomorphic Prudery and Sociographic Promiscuity
3. Loosening Theological Chains
The Dogmatic Image of Thought
Christ as the Logos of God
The First Shackle: Analogy of Judgment
The Second Shackle: Identity in the Concept
The Third Shackle: Opposition of Predicates
The Fourth Shackle: Resemblance in Perception
The Liberation of Thinking

4. Releasing Theological Events
Paradox and Becoming
Christ as the Incarnation of God
The Aleatory Point
The Line of the Aion
The Metaphysical Surface
Sexuality and Pious Intentions
The Liberation of Acting

5. Assembling Theological Machines
Desiring-Machines
Christ as the Judgment of God
Theology and the Territorial Machine
Theology and the Despotic Machine
Theology and the Capitalist Machine
Theology and the War Machine
The Liberation of Feeling

6. Secreting Atheism
The Production of Atheism
The Gospel According to Deleuze
The Forces of Theology

**Lacan Deleuze Badiou**
A.J. Bartlett, Justin Clemens, Jon Roffe

**Key Selling Points**
- The first book to examine Lacan, Deleuze and Badiou together
- Reconstructs a fundamental conceptual history of Badiou, Deleuze and Lacan's influences and intellectual context
- Identifies and examines the key themes in contemporary European thought: the event, time and truth
- Shows how Deleuze and Badiou have followed and contravened the Lacanian intervention without reverting to pre-Lacanian positions

A critical intervention into some key conceptual dissensions between 3 influential thinkers

**Summary**
The theoretical writings of Jacques Lacan, Gilles Deleuze and Alain Badiou stand at the heart of contemporary European thought. While the combined corpus of these three figures contains a significant number of references to each other's work, such references are often simply critical, obscure or both. *Lacan Deleuze Badiou* guides us through these crucial, under-remarked interrelations, identifying the conceptual passages, connections and disjunctions that underlie the often superficial statements of critique, indifference or accord.

Working through the rubrics of the contemporary, time, the event and truth, Bartlett, Clemens and Roffe present a new, lucid account of where these three thinkers stand in relation to one another and why their nexus remains unsurpassed as a point of reference for contemporary thought itself.

**Contributor Bio**

**A. J. Bartlett** is an Adjunct Research Fellow at the Research Unit in European Philosophy at Monash University. He is the author of *Badiou and Plato: An Education by Truths* (Edinburgh University Press) and translator, with Alex Ling, of Badiou's *Mathematics of the Transcendental* (Bloomsbury).

**Justin Clemens** is Senior Lecturer at the University of Melbourne. Recent books include *Psychoanalysis is an Antiphilosophy* (Edinburgh University Press).

**Jon Roffe** is Mackenzie Postdoctoral Fellow at the University of Melbourne.

The Badiou Dictionary
Steven Corcoran

Key Selling Points
- The first dictionary dedicated to Badiou's work, bringing together over 35 leading scholars in the field
- Around 150 main entries look at Badiou's ideas and influences, from 'capital/ism (parliamentarocapitalism)' and 'equality' to 'transcendental regime' and 'void (unicity)'
- 50 further 'linking' entries connect lesser concepts and figures to wider concepts in Badiou's thought
- Includes an introduction to using the dictionary and to Badiou's body of work and a bibliography of further reading
- Contributors include: Alenka Zupancic, Christopher Norris, Justin Clemens, Nina Power, Bruno Besana, Frank Ruda

Summary
The first dictionary dedicated to Badiou's work, bringing together over 35 leading scholars in the field

Badiou's work has an incredible breadth of engagement. 200 entries in this dictionary provide a full survey of the extent and depth of his work. These are written by leading scholars in the field, giving expert insights into the work of Badiou while also reflecting the crucial divergences in Badiou scholarship in a way that is productive and enlightening for readers.

Contributors include: Alenka Zupancic, Christopher Norris, Justin Clemens, Nina Power, Bruno Besana and Frank Ruda

Contributor Bio
Steven Corcoran is a writer and translator living in Berlin.

Fields of Sense
A New Realist Ontology
Markus Gabriel

Key Selling Points
- Develops a new realist ontology based on the concept of fields of sense
- Outlines a realist epistemology grounded in ontology
- The first contribution to a speculative epistemology on the basis of an ontology-first method

Summary
A new realist ontology based on the concept of fields of sense

Markus Gabriel presents us with an innovative answer to one of the central questions of philosophy: What is the meaning of 'being' - or, rather, 'existence' - and how does that concept relate to the totality of what there is?

Gabriel argues that there is no all-encompassing totality: that the world, in the traditional sense of a domain of all domains, cannot exist. Yet, he convincingly shows that this does not entail ontological nihilism. Rather, he argues that the non-existence of the world entails an infinity of domains and shows that this motivates a general realism - we can know things in themselves because our knowledge of things in themselves is itself part of these things.

This ontology hinges on Gabriel's concept of fields of sense, which shows that, fundamentally, he opposes the idea that mathematics or the natural sciences could ever replace a richer philosophical understanding of what there is and how we know about it.

Contributor Bio

Markus Gabriel is Chair in Epistemology, Modern and Contemporary Philosophy at Bonn University. He is the author of many books and articles in German. His publications in English include Scepticism and Idealism in Ancient Philosophy, translated by Ryan David Mullins (OUP, forthcoming), Transcendental Ontology: Essays on German Idealism (Continuum, 2011) and co-author with Slavoj Zizek of Mythology, Madness and Laughter: Subjectivity in German Idealism (Continuum, 2009).

Table Of Contents

Introduction

Part I: Negative Ontology

1. Existence is not a proper property
2. What's wrong with Kant and Frege?
3. Limits of set-theoretical ontology
4. Domains of Objects and Fields of Sense
5. The Sense of Fields
6. The No-World-Thesis

Part II: Positive Ontology

7. Transfinite Fields of Sense
8. How Flat Can Ontology Be?
9. Modalities I: Existence and Possibility
10. Modalities II: Necessity and Contingency
11. Forms of Knowledge
12. Senses as Ways Things Are in Themselves

Politics of Dialogue

Non-consensual Democracy and Critical Community
Leszek Koczanowicz

Uses Bakhtin's thought to reassess the roles of dialogue, community and democracy in political theory

Summary

A Bakhtinian reassessment of the roles of dialogue, community and democracy in political theory

Contemporary democracy is in crisis. People believe less and less in a system of democratic institutions that can cope with today's social problems. Leszek Koczanowicz sheds new light on this problem, using the ideas of M. M. Bakhtin and others to show that dialogue in democracy can transcend both antagonistic and consensual perspectives.

Koczanowicz provides an overview of the history of the dialogue/antagonism opposition as it is embedded in modern political theory, and the concept of dialogue in contemporary political theory. He goes on to demonstrate that Bakhtin's theory of dialogism can introduce a new quality into political theory, allowing us to overcome the liberalism/communitarianism debate. To conclude, he introduces a concept of 'critical community' - a dialogical, self-reflective community critical of its own tradition - to show that collective identities can be constructed in critical dialogue with the tradition and values of community.

Contributor Bio

Leszek Koczanowicz is Associate Professor in the Warsaw School of Humanities and Social Sciences, Wroclaw, Poland.

Index
Nancy and the Political
Sanja Dejanovic

Key Selling Points
- Examines Jean-Luc Nancy's latest contributions to the study of the political
- 10 essays engage with other key contemporary thinkers including Badiou, Ranciere, Foucault, Agamben and Lefort
- Re-orient the study of the political by delving into dimensions of Nancy's political thought that have not yet been explored
- Covers the entirety of Nancy's corpus

Summary
Jean-Luc Nancy's latest contributions to philosophy compel us to ask: what sort of politics do we have once we are exposed to the finitude of sense? The contributors to this collection illuminate some of the most challenging aspects of Nancy's thought, making previously unexplored connections and offering spirited interpretations.

Focussed around three core themes - capitalism, the metaphysics of democracy and aesthetics - these 11 essays emphasise the potential of Nancy's political thought, and collectively situate it within a broader intellectual context which includes engagements with Badiou, Ranciere, Foucault, Agamben and Lefort. It is an essential read for anyone interested in current trends in political philosophy, aesthetics, critical theory and social and political thought.

Contributor Bio
Sanja Dejanovic is Adjunct Professor in the Department of Philosophy at Trent University.

The Concept of the State in International Relations
Philosophy, Sovereignty and Cosmopolitanism
Robert Schuett, Peter M. R. Stirk

Key Selling Points
- A critical reassessment of the concepts of the State and sovereignty in International Relations theory
- Written by a transatlantic mix of scholars, many with established reputations in the field
- Strongly focuses on the nature of the state and sovereignty
- Opens up wider debates about these concepts, which will stimulate new research
- A critical reassessment of the concepts of the state and sovereignty in international relations theory

Summary
A critical reassessment of the concepts of the state and sovereignty in international relations theory

The concept of the state plays a central role in international relations, particularly in realist and neo-realist approaches. Yet, the meaning of the state is persistently taken to be self-evident by both advocates of the sovereign state and its critics. This volume counters this trend. It systematically considers the nature of the state, the concept of sovereignty and the challenges globalisation and cosmopolitanism.

Featuring contributions from some of the most reputed theorists of the state, the essays in this collection give you a coherent and, at the same time, distinctively pluralist set of original reflections on the role and nature of the state.

Contributor Bio
Robert Schuett has a Ph.D. from the School of Government and International Affairs at Durham University, UK. His research interests are primarily based in political theory of international relations and security/strategic studies. He joined the Austrian Federal Civil Service in 2011.

Peter M. R. Stirk is a Senior Lecturer in Politics at Durham University. His publications include The Politics of Military Occupation (Edinburgh University Press, 2009) and Twentieth-Century German Political Thought (Edinburgh University Press, 2006).

Table Of Contents
Introduction: The Concept of the State in International Relations, Peter M.R. Stirk; Chapter 1: International Law and Statehood: A Performative View, Janis Grzybowski & Martti Koskenniemi; Chapter 2: The State as a Universe of Discourse, Peter J. Steinberger; Chapter 3: Sovereignty and the Personality of the State, Jens Bartelson; Chapter 4: The State as Urban Myth: Governance without Government in the Global South, Oliver Jütersonke and Moncef Kartas; Chapter 5: 'Decolonizing Sovereignty: Globalisation and the Return of Hyper-Sovereignty', John M. Lyrics of Life
Sa'di on Love, Cosmopolitanism and Care of the Self
Fatemeh Keshavarz

Key Selling Points
- Examines the poetic strategies that give Sa'di's substantive and sumptuous lyrics their unique status
- Highlights the role of classical Persian poetry as the 'silk road of the imagination', connecting many polities and diverse ways of life
- Includes hundreds of verses in translation, making it ideal for use by students
- Explores the connections between poetry and lived experience

A creative and analytical study of important facets of classical Persian poetry

Summary
This imaginative and accessible study of the lyrical, humorous, social and educational aspects of classical Persian poetry focuses on the works of the master medieval poet Sa'di of Shiraz (d. 1291), one of the funniest, most influential and lyrical figures in classical Persian poetry. Sa'di, a prominent ethicist and a devout teacher of virtues, stands out for his worldliness, his practical teachings, and his love for living a wholesome life, as well as for his signature elegance and artistry that has compelled critics to call his lyrics perfectly polished diamonds.

In a language deliberately free of technical jargon, Keshavarz argues for the versatility of Sa'di's poetic voice and portrays his notion of love as open to multiple perspectives including homoerotic aesthetics. She brings to life the worldly wisdom that kept the lyrical, adventurous, and ethical legacy of Sa'di fresh and effective through the passage of time.

Contributor Bio
Fatemeh Keshavarz is Director of Roshan Institute for Persian Studies and the Roshan Institute Chair in Persian Studies at the University of Maryland. She is a published poet and author of six books including Reading Mystical Lyric: the Case of Jalal al-Din Rumi, Recite in the Name of the Red Rose: Poetic Sacred Making in Twentieth Century Iran, and Jasmine and Stars: Reading More than Lolita in Tehran. In 2009, her NPR appearance on 'On Being: The Ecstatic Faith of Rumi' received the Peabody Award, and she received the Hershel Walker Peace and Justice Award.

Table Of Contents
1. At the Brink of Writing: Which Doors to Open First?
2. Cosmopolitan Kinship: The Making of a Multi-world Subjectivity In the Poetry of Sa'di
3. Sa'di on Care of the Self: Ethical Games of Power in Practice Of Freedom
4. "Every New Flower Arriving in the World": Sa'di and the Art of Ghazal Writing
5. Gazing at the Garden of your Beauty: Love in the Garden
6. My Poor Heart Sometimes Runs, Sometimes Whirls: Meet Sa'di the Comedian
7. Epilogue: Leaving the Garden Already? Here Are a Few Things I Hope You Take Along

US Government and Politics (3rd Edition)
William Storey

Key Selling Points

Your one-stop guide to US politics, covering the key issues, political systems and governing institutions

Summary

Your one-stop guide to US politics, covering the key issues, political systems and governing institutions

Each chapter touches on the central question of whether the US political system manages to protect freedom and opportunity - by making it almost impossible for power to become concentrated in the hands of a few - and gives the reader the information needed to make a judgement on how well the system works.

Chapters include
The Constitution - Federalism - Race and Ethnic Politics - Elections - Political Parties - Pressure Groups - The Judiciary - Congress

Contributor Bio

William Storey has been Principal Examiner for A2 US Government and Politics (Edexcel) in the UK for several years and, more recently, was Principal Examiner for A2 Key Issues in UK Politics (Edexcel). He provides consultancy to schools and colleges on teaching strategies and leads intensive revision courses. He is has written two revision guides on US Government & Politics and is a regular contributor to Politics Review, all published by Philip Allan.

Multiculturalism Rethought
Varun Uberoi, Tariq Modood

Explores contemporary multicultural dilemmas through the lens of Bhikhu Parekh’s political thought

Summary
Explores contemporary multicultural dilemmas through the lens of Bhikhu Parekh’s political thought

Bhikhu Parekh's work is widely regarded as amongst the most original and significant contributions to the political theory of multiculturalism. In this book, a selection of leading theorists of multiculturalism revisit aspects of Parekh's work both to underline its continuing importance and the ongoing vitality of multiculturalist theory. Some contributors locate Parekh in the tradition of British pluralism or as inspired by Gandhi; some apply his theory to a range of controversial multicultural dilemmas; and others extend it in new directions.

Contributor Bio

Varun Uberoi is Lecturer in Political Theory and Public Policy at Brunel University.

Tariq Modood is Professor of Sociology, Politics and Public Policy and the founding Director of the Centre for the Study of Ethnicity and Citizenship at the University of Bristol.

Multiculturalism Rethought
Varun Uberoi, Tariq Modood

Explores contemporary multicultural dilemmas through the lens of Bhikhu Parekh’s political thought

Summary
Explores contemporary multicultural dilemmas through the lens of Bhikhu Parekh’s political thought

Bhikhu Parekh’s work is widely regarded as amongst the most original and significant contributions to the political theory of multiculturalism. In this book, a selection of leading theorists of multiculturalism revisit aspects of Parekh’s work both to underline its continuing importance and the ongoing vitality of multiculturalist theory. Some contributors locate Parekh in the tradition of British pluralism or as inspired by Gandhi; some apply his theory to a range of controversial contemporary multicultural dilemmas; and others extend it in new directions.

Contributor Bio

Varun Uberoi is Lecturer in Political Theory and Public Policy at Brunel University.

Tariq Modood is Professor of Sociology, Politics and Public Policy and the founding Director of the Centre for the Study of Ethnicity and Citizenship at the University of Bristol.

Multicultural Immunisation
Liberalism and Esposito
Alexej Ulbricht

Key Selling Points
- A substantive and original critique that allows us to reassess liberal theories of multiculturalism
- Examines three liberal processes of immunisation using the work of Kymlicka, Parekh and Taylor
- First major application of Roberto Esposito's work on immunity in English
- Opens up new perspectives on how we might organise cultural coexistence

A critical intervention in liberal theories of multiculturalism

Summary
A critical intervention in liberal theories of multiculturalism

Multiculturalism has recently been declared dead; at the same time, the value of diversity is still emphasised. How can we explain this? In this book, Alexej Ulbricht sets out to completely reassess liberal theories of multiculturalism, and argues that the 'backlash' is actually the strengthening of tendencies already present in liberal multiculturalism. Using the theories of Roberto Esposito, he argues that liberal multiculturalism is best understood as a series of immunitary processes. He examines some of these processes and looks to what cultural coexistence beyond immunity might be like.

Contributor Bio
Alexej Ulbricht is a Teaching Fellow in the Department of Politics and International Studies at SOAS, University of London. His research is in issues of culture and critical theory.

**Obligation in Exile**
The Jewish Diaspora, Israel and Critique
Ilan Zvi Baron

**Key Selling Points**
- Presents a radical re-interpretation of political obligation
- Establishes a theoretical framework for the analysis of diaspora politics
- Looks at the Jewish diaspora and the Israel relationship as an example of international political obligation
- Explores the complex relationship between Israel and the Diaspora Jewish identity

**Summary**
Explores the complex relationship between Israel and the Diaspora Jewish identity

Combining political theory and sociological interviews spanning four countries, Ilan Zvi Baron explores the Jewish Diaspora/Israel relationship and suggests that instead of looking at Diaspora Jews’ relationship with Israel as a matter of loyalty, it is one of obligation.

Baron develops an outline for a theory of transnational political obligation and, in the process, provides an alternative way to understand and explore the Diaspora/Israel relationship than one mired in partisan debates about whether or not being a good Jew means supporting Israel. He concludes by arguing that critique of Israel is not just about Israeli policy, but about what it means to be a Diaspora Jew.

The Ethics of the Global Environment *(2nd Edition)*
Robin Attfield

**Key Selling Points**
- Takes a distinctive approach to climate ethics
- Integrates environmental ethics with ethical theory

Learn how ethical principles and concepts apply to global environmental problems

**Summary**

Learn how ethical principles and concepts apply to global environmental problems

This fully updated and expanded textbook gives you new reflections on global environmental issues. It looks at issues including climate change, sustainable development and biodiversity preservation, and sensitively addresses global developments such as the Summits at Durban on climate and at Nagoya on biodiversity. Robin Attfield gives an ethical critique of current international environmental problems and negotiations, and explains how international regimes will need to change to be able to cope with global environmental problems.

**Contributor Bio**

Robin Attfield is Professor of Philosophy at Cardiff University, where he has taught philosophy since 1968. He has also served as Visiting Lecturer in Philosophy, University of Ife, Nigeria (1972-3), Inter-University Council Visiting Lecturer in Philosophy, University of Nairobi, Kenya, 1975, and National Research Council (Republic of South Africa) Visiting Research Fellow (July/August 1999).

Reforging a Forgotten History
Iraq and the Assyrians in the 20th Century
Sargon Donabed

Key Selling Points
- Includes oral history and ethnographic research on the Assyrians
- Presents comprehensive and in-depth data pertaining to Iraqi Assyrian villages as well as ancient churches, monasteries, schools and other material culture edifices
- Utilizes Assyrian-Aramaic/Syriac as well as Arabic primary sources to illuminate and corroborate the Assyrian narrative of Iraqi history
- Situates an Assyrian narrative within the history of modern Iraq

Summary
Who are the Assyrians and what role did they play in shaping modern Iraq? Were they simply bystanders, victims of collateral damage who played a passive role in the history of Iraq? And how have they negotiated their position throughout various periods of Iraq's state-building processes?

This book details the narrative and history of Iraq in the 20th century and reinserts the Assyrian experience as an integral part of Iraq's broader contemporary historiography. It is the first comprehensive account to contextualize this native people's experience alongside the developmental processes of the modern Iraqi state. Using primary and secondary data, this book offers a nuanced exploration of the dynamics that have affected and determined the trajectory of the Assyrians' experience in 20th century Iraq.

Contributor Bio
Sargon Donabed is Assistant Professor in the Department of History at Roger Williams University. He is co-editor of The Assyrian Heritage: Threads of Continuity and Influence (Acta Universitatis Upsaliensis, 2012), Religion and the State: Europe and North America in the 17th and 18th centuries (Lexington Books, 2012) and The Assyrians of Eastern Massachusetts (Arcadia Publishing, 2006).

Table Of Contents
1. Integrating the Assyrian Question; A Historiography of Historiography and a Theoretical Framework; Key Sources: Mapping Iraqi Assyrians and Sectarianisation
2. Framing the Assyrian Narrative: Late 19th and Early 20th Century; Assyrian Demography: Between Deteriorating Empires and Colonial Expansion; Modern Roots of Inter-Religious Animosity; World War 1; From Versailles 1919 to Lausanne 1923; The Period of the Iraq Levies and the Assyrian Settlement
3. Iraq: Building a 'Nation'-State; The Patriarch and Temporal Authority; The Massacre at Simele; International Recognition; Road to the Republic
4. The Birth of the Republic and an Autonomist Struggle; The 1958 Coup and Renewed Internal Strife; ?oriya Massacre of 1969; Demographic Situation
5. Enduring Discord: Political Machinations and Border Clearings; A Resumption of Violence; The Border Clearings of 1977 -- 1978
6. New Movements and War on the Horizon; Iraq-Iran War; The Calm Before the Storm; Renewed International Interest in Iraq: The Anfal Campaign
7. Nation-State Formation, Nation-State Building and Contentious Pluralism; Situating the Assyrian Experience; Agency, Failed Strategies and Transdenominationalism; Simele
Revisited; Development and Further Consequences of Urbanisation and Arabisation; State-Sponsored Acculturation

**Contemporary Islamic Law in Indonesia**  
Shari’ah and Legal Pluralism  
Arskal Salim

**Key Selling Points**
- Covers legal disputes surrounding inheritance, marriage and divorce, legislation and law-making, land, non-Muslims and shari'ah, and religious courts  
- Includes compelling legal case studies from the post-disaster situation  
- Presents law as a site of contestation reflecting the unique set of conflicts arising after the 2004 tsunami  
The first ethnographic account of legal disputes, practice and institutions in post-tsunami Aceh

**Summary**

Indonesia has probably the fastest changing legal system in the Muslim world. This ethnographic account of legal pluralism in the post-conflict and disaster situation in Aceh addresses changes in both the national legal system and the regional legal structure in the province. Focusing on the encounter between diverse patterns of legal reasoning advocated by multiple actors and by different institutions (local, national and international; official and unofficial; judicial, political and social cultural) it considers the vast array of issues arising in the wake of the December 2004 earthquake and tsunami in Aceh.

It investigates disputes about rights to land and other forms of property, power relations, the conflict of rules, gender relationships, the right to make decisions, and prevailing norms. These disputes are presented on multiple levels and in various forums, either through negotiation or adjudication, regardless of whether they are settled or not. The cases involve various actors from villages, the courts, the provincial government and the legislature, the national Supreme Court and the central government of Indonesia.

**Contributor Bio**

Arskal Salim is Senior Lecturer at the Religion and Society Research Centre of the School of Social Sciences and Psychology, University of Western Sydney, Australia. Prior to this, he was Assistant Professor at the Aga Khan University Institute for the Study of Muslim Civilisations in London and Research Fellow at the Max Planck Institute for Social Anthropology in Germany. He received his PhD from Melbourne Law School, University of Melbourne. His research interests cross anthropology and law, with a particular focus on the legal ethnography of Muslim societies, Islamic and comparative Law, human rights, Islam in Indonesia, and property disputes in Aceh. He has published on the colonial and Indonesian policies on Islamic alms or zakat (Pacific Rim Law and Policy Journal) and the contested plural legal orders of contemporary Aceh (Journal of Legal Pluralism). He is the author of *Challenging the Secular State: The Islamization of Laws in Modern Indonesia* (2008).

thingworld
International Triennial of New Media Art
Fan Di'an, Zhang Ga

Key Selling Points
• Published to coincide with the International Triennial of New Media Art at the National Art Museum Of China in June/July 2014
• Includes an array of international artists and writers
• A beautifully illustrated and lavishly produced catalogue
The catalogue of the 2014 International Triennial of New Media Art held at the National Art Museum of China.

Summary
Richly illustrated and boasting an array of distinguished artists, scholars and curators, thingworld is the catalogue of the International Triennial of New Media Art held at the National Art Museum of China.

The theme 'thingworld' alludes to traditional Chinese worldviews on nature, materiality, and cosmology. The exhibits demonstrate the relationship between diverse ecological conditions and multiple life forms, human and natural substances, and the relationships between all things.

From metal balls ascending in an uncanny anti-gravitational movement to a Victorian sofa standing precariously à l'attitude; from miniature instruments which require a magnifying glass to peek at their elegance to monumental inflatables that entwine and elongate to permeate 5,000 square feet of gallery space; from murmuring tweets from the virtual void to billions of algorithmically generated configurations of a mere 24 cards depicting an 18th-century genre painting; the exhibition unfolds its three themes: 'Monologue: Ding An Sich'; 'Dialogue: Ding to Thing'; and 'Ensemble: Parliament of Things' in a reciprocal interrelation.

In celebration of thingworld, there emerges an opportunity to reinvigorate the impasse of cultural production that is contingent solely on the premise of a human subject through a much-expanded field of operation; there will be a newfound world of discussions, concerns giving rise to new forms of artistic experimentation and new vocabularies of aesthetic manifestation that resonate with a vision of equity molded by a renewed political ecology, that is the "Equality of All Things".

Collective Conviction
The Story of Disaster Action
Anne Eyre, Pam Dix

Key Selling Points
- The story of a charity that grew out of a series of tragedies in the 1980s, including Hillsborough, Zeebrugge and the Marchioness
- Published to influence policy-makers and to aid survivors and the bereaved
- Includes best practice for responders and the media to deal with disasters

The story of Disaster Action, a charity founded by survivors and bereaved people from major disasters.

Summary
Collective Conviction tells the story of Disaster Action, a small charity founded in 1991 by survivors and bereaved people from the disasters of the late 1980s, including Zeebrugge, King's Cross, Clapham, Lockerbie, Hillsborough and the Marchioness. The aims were to create a health and safety culture in which disasters were less likely to occur and to support others affected by similar events. The founders could not have anticipated the degree to which they would influence emergency planning and management and the way people are treated after disasters.

Aware of the value of lessons learned over 22 years, the trustees felt that this corporate memory should be captured. Collective Conviction encapsulates that memory, so that it can be called upon by survivors, bereaved, government and others for years to come.

The book sets out the chronology of Disaster Action's history, with first-person accounts and case studies of disasters interweaved with chapters on the needs and rights of individuals, the treatment of bereaved and survivors, inquests and inquiries, the law, the media, memorials and commemorations, and the importance of corporate memory. Additionally, the book contains guidance notes for survivors and bereaved on dealing with a disaster, and best practice guidance for responders and the media.

This book is essential reading for those in a wide range of disciplines with an interest in: planning for, responding to, reporting on and dealing with the aftermath of disaster. And importantly, people affected by disaster should find solace and support in the personal stories of others.

Contributor Bio
Anne Eyre is a sociologist specialising in psychosocial aspects of major incidents, emergency planning and disaster management and Vice Chair of Disaster Action.

Pam Dix is a writer and researcher, a board member of the UK Psychological Trauma Society and Executive Director of Disaster Action.

Porous City
A Cultural History of Rio de Janeiro
Bruno Carvalho

Key Selling Points
- A timely and beautifully written cultural history of Rio de Janeiro
- Captures a moment of transition in the city destined to host the next Olympic Games and World Cup
- Ranges widely across literature, architecture, art, history and music.
A timely and original cultural history of Rio de Janeiro.

Summary
During the 1990s Rio de Janeiro earned the epithet of 'divided city', an image underscored by the contrast between its upper-class buildings and nearby hillside 'favelas.' The city's cultural production, however, has been shaped by porous boundaries and multi-ethnic encounters. Drawing on a broad range of historical, theoretical and literary sources, Porous City generates new ways of understanding Rio’s past, its role in the making of Brazilian culture, and its significance to key global debates about modernity and urban practices.

This book offers an original perspective on Rio de Janeiro that focuses on the New City, one of the most compelling spaces in the history of modern cities. Once known as both a 'Little Africa' and as a 'Jewish Neighborhood,' the New City was an important reference for prominent writers, artists, pioneering social scientists and foreign visitors (from Christian missionaries to Orson Welles). It played a crucial role in foundational narratives of Brazil as 'the country of carnival' and as a 'racial democracy.' Going back to the neighborhood’s creation by royal decree in 1811, this study sheds light on how initially marginalized practices - like samba music - became emblematic of national identity.

A critical crossroads of Rio, the New City was largely razed for the construction of a monumental avenue during World War II. Popular musicians protested, but 'progress' in the automobile age had a price. The area is now being rediscovered due to developments spurred by the 2016 Olympics. At another moment of transition, Porous City revisits this fascinating metropolis.

Contributor Bio
Bruno Carvalho is Assistant Professor of Spanish and Portuguese Languages and Cultures and George H. and Mildred F. Whitfield University Preceptor in the Humanities at Princeton University.

Quotes
"Every page bursts with insights... This is a wonderfully erudite but also congenial work, inviting the reader to a deeper understanding of Rio de Janeiro's history over the past centuries through close investigation of the neighborhood of Cidade Nova, its changing population and architecture, and the many works of literature, visual arts, and popular song connected to those histories. A groundbreaking perspective on Rio's history."--Professor Bryan McCann, Georgetown University

"This brilliant cultural history of Rio de Janeiro, while focusing on the specific neighborhood of Cidade Nova, is anything but insular in its methodology and scope. Drawing on a dazzling array of sources-- urban theories, literature, painting, popular music and film, but also city plans, censuses, oral testimonies, memoirs, letters and travel accounts--Bruno Carvalho offers incisive readings of texts, including canonical ones. Lively, judicious, and erudite, Porous City makes a fundamental contribution to debates about urban modernism and cultural formations, of interest to both beginning and seasoned scholars of Brazil and Latin America."--Professor Marta Peixoto, New York University

"Through what he genially calls spatial porosity Carvalho engages a highly informed and
inspiring treatment of a great city's throbbing geology. Readers will learn much about Rio in its development and what a gamut of inhabitants have made of it. *Porous City* is a vital and lasting contribution to urban and cultural studies."--Tom Conley, Abbott Lawrence Lowell Professor of Romance Languages & Literature, Harvard University

"Bruno Carvalho's *Porous City* is an admirably hybrid rumination on culture, geography, and history in Rio de Janeiro's Cidade Nova [...] Carvalho's erudite book forces us to see beyond the binary of division and democracy, to a city and nation defined by their porous contradictions."--Brazilian Studies Association (BRASA) prize committee [*Porous City* awarded prestigious Roberto Reis Award in 2014]

Introducing English Medieval Book History
Manuscripts, their Producers and their Readers
Ralph Hanna

Key Selling Points
- The first book to provide a true introduction to 'book history' as opposed to confining itself to the narrower concerns of palaeographically oriented studies.
- Combines work on seminal texts, such as 'Beowulf', with new analyses of less established texts.
- By suggesting worthwhile research topics to suit a range of book-history interests, Hanna engages constructively with the student-reader.

This book is the first to address medieval book history for graduate students of medieval English literature. Ralph Hanna presents a history of the English medieval book through a series of examples centred on carefully chosen texts and their physical and cultural surrounds.

Summary
This book offers an introduction to medieval English book-history through a sequence of exemplary analyses of commonplace book-historical problems. Rather than focus on bibliographical particulars, the volume considers a variety of ways in which scholars use manuscripts to discuss book culture, and it provides a wide-ranging introductory bibliography to aid in the study. All the essays try to suggest how the study of surviving medieval books might be useful in considering medieval literary culture more generally. Subjects covered include authorship, genre, discontinuous production, scribal individuality and community, the history of libraries and the history of book provenance.

The Companion to Hard Times
Margaret Simpson

Key Selling Points
- The most comprehensive annotation of Hard Times published.
- Supplies information on historical, literary and topical allusions which inform the novel.
- An invaluable research and reference tool for scholars.
- The essential authority on Hard Times for the serious general reader.
Sixth volume in the Dickens Companions series, offering comprehensive annotation of the novel Hard Times.

Summary
This is the sixth volume to be published in "The Dickens Companions" series. Information is arranged in the form of notes presented for convenient use with any edition of Hard Times. Short notes supply historical data on a variety of topics. Longer, discursive notes assemble facts and contextual information which students need in order to understand issues central to the novel. Thus, for example, details about food, costume and transport appear alongside notes about the political and social concerns of the day. To help readers find annotated material from the novel's text, "The Companion" provides in italics the opening phrase of the paragraph to which the annotation refers, followed in bold by the words or passage to be annotated and then the explanatory note. Readers of the novel in search of more information about a note or phrase have only to find the appropriate chapter in "The Companion", looking for the italicized phrase that identifies the paragraph and then the bold entry. This format makes accessible to any reader allusions that may seem otherwise dense or puzzling, as well as providing dependable factual information about the novel's historical and cultural background, especially helpful to students. Each book is the result of extensive research, making the series useful to the community of scholars interested both in Dickens and in all aspects of Victorian Britain.

Contributor Bio
Margaret Simpson received her PhD from the Queen's University Belfast, where she has been an occasional tutor in the School of English. She has published articles and reviews on Dickens and on aspects of Victorian social history.

Quotes
"Margaret Simpson's admirably thorough Companion can stand as a valuable supplement to paperback and scholarly editions, not least because a reader can keep it open next to the novel itself. Not even the longest on-page footnote could comfortably provide as much background on nineteenth-century labour relations as Simpson's annotations, some of which are almost essays in themselves. Even more useful are the links made between the serialized sections of the novel and contemporary articles on similar topics in Household Words. But the incidental delights are also worthy of notice - this book is comprehensive without being coercive; it should prompt gratitude - and not just from research students engaged in one-upmanship."--Times Literary Supplement

"Hard Times [...] has never been explained so clearly, justified so fully, and on the basis of original research explained so well as in the account given by this present, ever helpful, alert and attentive companion. It is encyclopaedic; not everything in it is vital to every reading; but it is difficult to envisage a reading that would not gain from much that it tells us."--K.J. Fielding, Dickens Quarterly

"This is a book in its own right, a fragmentary social and cultural history oriented around a single fictional text. It makes for fascinating reading, maybe even for those who have little or no knowledge of the novel itself."--Dickensian

"As I've indicated, everything necessary for the student of Hard Times is here in abundance: explanations of allusions, details of relevant political, social and cultural issues, and bibliographical material. All readers of Dickens's comparatively short but
taut, intense novel will find this Companion an indispensable fund of information."--
Donald Hawes, Analytical & Enumerative Bibliography

"The Dickens Companions are clearly indispensable to the scholar."--Modern Language

The Companion to Great Expectations
David Paroissien

Key Selling Points
- The most comprehensive annotation of Great Expectations published.
- Supplies information on historical, literary and topical allusions which inform the novel.
- An invaluable research and reference tool for scholars.
- The essential authority on Great Expectations for the serious general reader.

Summary
This study sets out to recover and illuminate the Victorian culture and allusive verbal worlds that inform Charles Dickens's novel Great Expectations. How distinctive are the story's temporal and topographical settings? How carefully has Dickens integrated Pip's life story with the embedded histories of a mad, jilted spinster, a beautiful orphan girl, an unscrupulous con man, a fierce yet tender convict and a brilliant criminal lawyer? What relevance does the "then" of Pip's childhood and the "now" when he relates the story of his evolution into gentleman have to the revised controversial ending Dickens adopted on the advice of a fellow novelist? David Paroissien draws on a range of 19th century sources to illuminate the novel's late Georgian and mid-Victorian contexts: the brutal punishments that characterized Hanoverian England's legal system; the transportation of felons and their rough lives in Australia's first penal colony; the social mobility a public school education conferred on a swindler and forger; the struggle to gain the desired status of "gentleman" among brewers, bakers and a raw young blacksmith from the country ignorant of the ways of society and its social graces; the genteel city of Rochester, whose quiet nooks and stately historic houses exercised a powerful hold over Dickens's imagination; the nearby Hoo peninsular, with its lonely marsh villages and picturesque churchyards; and the changing face of early 19th century London, with its Inns of Chancery and Inns of Court, the vibrant life of the Thames, where watermen struggle against steamers as technological changes brought the old and the new face to face; and the river's lower, deserted reaches, bound by mists, marshes and tidal flats, which serve as background for the novel's brilliant menacing opening.

Contributor Bio
David Paroissien is also the author of 'The Companion to "Oliver Twist"', also in this series. He co-edits the series with Susan Shatto and until his retirement in 2001 taught English literature at the University of Massachusetts, USA.

Quotes
"... If in any doubt, consult 'The Companion to "Great Expectations"' by David Paroissien, an extraordinary behind-the-scenes tour of Dickens's novel ..." -- Times Literary Supplement

"Thorough, well-considered, clear, incisive and complete, the Companion to 'Great Expectations' gives readers everything needed for its full appreciation. It is a comprehensive and enjoyable work of reference and scholarship about Dickens as well as the novel, precisely mapped and illustrated. It takes the student through the novel's origins, completion, dense allusions, and what Graham Greene calls its 'secret prose'. We are shown it directly: written about an earlier period and addressed to its time." -- K.J Fielding

"Paroissien's passion for finding the illuminating detail and for getting the detail right is evident. ... readers will find Paroissien's companionship rich in research and of breathtaking fullness." -- Patrick MacCarthy, Dickens list-serv (online)

"The Dickens Companions are clearly indispensable to the scholar." -- Modern Language Review (from review of 'The Companion to A Tale of Two Cities')
"The Companion to Great Expectations will remain a landmark study for students of the novel, for many years to come."--*Dickens Quarterly*

The Companion to Martin Chuzzlewit
Nancy Aycock Metz

Key Selling Points
• The most comprehensive annotation of Martin Chuzzlewit published.
• Supplies information on historical, literary and topical allusions which inform the novel.
• An invaluable research and reference tool for scholars.
• The essential authority on Martin Chuzzlewit for the serious general reader.

Eighth volume in the Dickens Companions series, offering comprehensive annotation of the novel Martin Chuzzlewit.

Summary
Critical responses to Martin Chuzzlewit have varied. By examining the overlapping contexts within which Dickens wrote, this study makes original contributions to our understanding of the novel and its critical reception. The notes revise and expand the conventional wisdom regarding the sources for the American chapters, demonstrating that Dickens drew on a much wider field of writings about America than has been previously acknowledged. By reading the novel in the light of contemporary professional journals, Nancy Aycock Metz also exposes issues of that period which underlay Dickens's portrayal of Pecksniff, young Martin and the architectural scene. Finally the notes point to previously unidentified influences on the plot and characters, illuminating the impact on Dickens's thinking of a wide range of texts, from the Bridgewater Treatises to the Bible, from popular songs and newspaper advertisements to medical treatises and parliamentary reports.

Contributor Bio
Dr Nancy Aycock Metz has written articles on Dickens, Trollope and Victorian urban culture. She is an Associate Professor of English at Virginia Tech, USA.

Quotes
"The latest in this admirable series of Companions to Dickens's works maintains the high standards of its precursors and immediately becomes an indispensable guide to one of Dickens's funniest novels. Nancy Aycock Metz shows, beneath its exuberant facade, how deeply "Martin Chuzzlewit" is engaged with contemporary political, social and historical debate, in particular with the 'socially constructed nature of personality and behaviour', and how significant are its allusions to Rousseau and Paley, and to the wild children and orang-utans that inhabited and tested the boundaries of human nature" -- Times Literary Supplement

"Nancy Aycock Metz's The Companion to "Martin Chuzzlewit" one of the now familiar Companion series to Dickens's novels, is a wonderful opportunity to immerse oneself in the thick details of Dickens's fictional worlds - to learn, for example, that Montague Tigg's "hollow square" was an absurd military formation for an attack [pp. 121-2] and that Mrs. Gamp's "cowcumbers" were considered an "aristocratic delicacy" [p. 343]. A nice bonus is an appendix of the novel's more egregious Americanisms." -- IStudies in English Literature 1500-1900

"Nancy Metz's Companion to "Martin Chuzzlewit" is a wonderful book and a good example of how scholarship at its best can be both enlightening and fun to read. ...this book is a feast! Metz writes in clear, concise prose and the quality and quantity of the information she provides makes this reference book a pleasure to read through, even from cover to cover." -- IDickens Studies Annual, 33

"The Dickens Companions are clearly indispensable to the scholar." -- Modern Language Review

The Companion to Little Dorrit
Trey Philpotts

Key Selling Points
• The most comprehensive annotation of Little Dorrit published.
• Supplies information on historical, literary and topical allusions which inform the novel.
• An invaluable research and reference tool for scholars.
• The essential authority on Little Dorrit for the serious general reader.

Summary
The Companion to Little Dorrit provides the most extensive information yet available on the political, cultural, and personal backgrounds of a novel that today is considered a central text of Dickens's 'dark' period, and a major work of nineteenth-century literature. The Companion emphasizes the importance of the Crimean War through both the complex political rhetorical surrounding the Circumlocution Office, and Dickens's depiction of Daniel Doyce, as well as through many other textual details. The Companion also makes important distinctions between administrative reform and civil service reform, and points to differences between boards of inquiry, committees and reports that conventional wisdom has frequently confused. Of special interest are the notes on the political figures of the day - Lord Palmerston, Lord Aberdeen, Sir Charles Treveylan and Austen Henry Layard, among many others - and on the debates in the House of Commons that were reported by The Times and that eventually found expression in Little Dorrit.

Contributor Bio
Trey Philpotts is Professor of English at the University of Arkansas at Little Rock and author of The Companion to Dombey and Son (Liverpool University Press, 2014).

Quotes
"It seems perfectly possible to imagine this book being extremely useful to all manner of Victorianists, quite independently of its connection with Little Dorrit" – Times Literary Supplement

"This ambitious, admirable, and attractive book significantly assists us in seeing how the two approaches that Dickens blends - realism and illusion - interact in Little Dorrit." – Dickens Quarterly

"The Companion has a readable, accessible, and attractive format, and the text is supplemented with 33 illustrations, several appendices, an endpaper map of Little Dorrit's London, ample bibliography, and thorough index. It is, in sum, one of the most interesting and unquestionably the most valuable of scholarly contributions to Dickens studies in 2003." – Dickens Studies Annual, 35

"The Dickens Companions are clearly indispensible to the scholar." – Modern Language Review (review of 'The Companion to A Tale of Two Cities')

**The Companion to A Tale of Two Cities**
Andrew Sanders

**Key Selling Points**
- The most comprehensive annotation of A Tale of Two Cities published.
- Supplies information on historical, literary and topical allusions which inform the novel.
- An invaluable research and reference tool for scholars.
- The essential authority on A Tale of Two Cities for the serious general reader.

Fourth volume in the Dickens Companions series, offering comprehensive annotation of the novel A Tale of Two Cities.

**Summary**
*A Tale of Two Cities*, published originally in 1859, remains one of Charles Dickens's consistently popular works, admired as much for its succinct plot as for its vivid setting in the French Revolution. Dickens himself thought it the best story he had ever written. This Companion, by concentrating on the factual, reveals the great care Dickens took with the planning and preparation of his story and its roots in the work of Thomas Carlyle, one of the most influential thinkers of the Victorian age. It also explores aspects of Dickens's life. The Companion identifies the multitude of allusions to what Dickens often regarded as the whims of eighteenth-century justice, religion, philosophy, fashion and society. The 'Companion to A Tale of Two Cities' provides the modern reader with both fundamental sources of information and a fascinating account of the creation of a complex historical novel. It can be read alongside any edition of the novel.

**Contributor Bio**

**Andrew Sanders** is Professor of English at Durham University and is the author of many works on Victorian literature.

**Quotes**

"[Sanders'] time-scheme for the novel, setting fictional against historical events, is especially helpful."--*Times Literary Supplement*

"What Andrew Sanders offers is, to quote his general editors, a 'factual rather than critical' annotation of the complete novel. . . 'A Tale of Two Cities' responds particularly well to such treatment and the job is meticulously done.... the Dickens Companions are clearly indispensible to the scholar."--*Modern Language Review*

"Le travail d'Andrew Sanders sur 'A Tale of Two Cities' maintient...le niveau élevé d'intelligence et de savoir qui avait été établi dans les trois premiers volumes. Sanders connaît à fond le livre qu'il note, ainsi qu'une grande partie des études qui lui ont été consacrées... Sanders enrichit, par l'énorme masse de documents et d'informations qu'il apporte, notre connaissance de l'oeuvre de Dickens, de sa genèse, de ses sources, de son arrière-plan. ... '[L]e volume est d'ores et déjà solides et parfois brillant.'"--*Études Anglaises*

Essays in Romanticism, Volume 21.1 2014
Alan Vardy

Key Selling Points
- Provides a snapshot of a year's work in North American Romanticism.

Summary
Essays in Romanticism, a peer-reviewed journal edited by Alan Vardy, is the official journal of the International Conference on Romanticism, succeeding Prism(s): Essays in Romanticism. Available to purchase as a single issue, EiR continues the tradition of its predecessor in encouraging contributions within an interdisciplinary and comparative framework. More broadly, it welcomes submissions on any aspect of Romanticism, and especially work using emergent or innovative perspectives and approaches.

Contributor Bio

Alan Vardy teaches at Hunter College and the Graduate Center, CUNY.

The Companion to Dombey and Son
Trey Philpotts

Key Selling Points
- The most comprehensive annotation of Dombey and Son published.
- Supplies information on historical, literary and topical allusions which inform the novel.
- An invaluable research and reference tool for scholars.
- The essential authority on Dombey and Son for the serious general reader.
- Endpapers include a map of London with locations from the novel pinpointed.

Tenth volume in the Dickens Companions series, offering comprehensive annotation of the novel Dombey and Son.

Summary
Dombey and Son (1846-48), Dickens's seventh novel, stands at the mid-point of his career. It was begun in Switzerland after a break from near-continuous novel writing and bears the hallmarks of its long gestation and Dickens's deepening engagement with the many cross-currents shaping Britain's social, cultural and political life. Predominant among them are public debates about the need to provide schooling for young children, ethical questions prompted by the demolition of neighbourhoods to make way for railways, the discussion of sanitary reforms to improve the nation's health, and divergent responses to prostitution and other crimes inextricably linked with poverty, illiteracy and deprivation. Drawing on contemporary documentation, Dickens's letters, his journalism and the novelist's own personal involvement with schemes to improve the lives of the poor, this 'Companion to Dombey and Son' offers an authoritative and exhaustive study of the many contemporary contexts that inform Dickens's panoramic examination of mid-Victorian life.

Of equal importance and intimately connected with the novel's engagement with public issues is the moral thread that binds the whole, a familial story about pride and the pursuit of riches. Private matters accordingly receive comparable attention as Dickens exposes some of the consequences of mid-century domestic ideology, examining the nursing of infants, the education of young children, and the pressure on both men and women to marry.

In compelling scenes artfully interwoven, the story of the novel's prosperous merchant unfolds, in language, as the annotations show, enriched from fairy tale, science and pseudo-science, archaeology, popular and classical literature, poetry, the Bible and voyages and travels. Dombey and Son also illuminates in its extended portrait of a Lear-like figure truths about loss and love central to Dickens's fiction.

The Birds of Herefordshire
Mervyn Davies, Peter Eldridge, Chris Robinson, Nic...

Key Selling Points
- The first systematic assessment of the breeding and wintering distribution and abundance of the bird species of the county of Herefordshire.
- Richly illustrated with photographs, vignettes and maps.
- The culmination of five years fieldwork.
A richly illustrated atlas of the breeding and wintering distribution and abundance of bird species in the county of Herefordshire.

Summary
The Birds of Herefordshire is the first systematic assessment of the breeding and wintering distribution and abundance of the bird species of the county of Herefordshire. It is the culmination of a project, undertaken over a period of ten years, by the Herefordshire Ornithological Club (HOC). The Club, founded in 1950, has carried out many surveys and published annual reports, but never an undertaking as large as a county Bird Atlas.

The opportunity provided by the initiation of the British Trust for Ornithology’s ambitious Bird Atlas 2007-11, published in 2013, gave the invaluable stimulus and collaborative framework for HOC to embark on the task. Field work, conducted over the five years 2007-12 amassed a volume of data from a total of 545 tetrads (2-km squares) surveyed across the county. Observations by HOC members and numerous other birders contributed nearly a quarter of a million records to combined BTO and HOC datasets.

The Atlas presents 215 species accounts and includes 348 distribution and abundance maps with colour plates of many species. Together with supporting chapters, this Atlas provides a unique benchmark of the current status of the birds of Herefordshire, which will not only expand our understanding but form the basis of future monitoring of the county's bird populations. It will also be of value for research, conservation and, indeed, to all interested bodies working to maintain the well-being of Herefordshire birdlife.

The Extended Self
Architecture, Memes and Minds
Chris Abel

Key Selling Points
• Based on recent research in the neurosciences and other fields, this book takes a fresh look at the built environment as the physical and spatial embodiment of minds
• Refuting popular concepts of the self as separate beings, the author proposes a new theory of the 'extended self' as a product of the coevolution of humankind and technology, comprising both social and material elements
• Defining technology as an artificial extension of human capacities, the book traces its typical forms and impacts from the first tools to the motorized urban culture now changing the planet itself
• The first step towards curing the global dependency on fossil fuels and its effects, the author argues, is to understand and acknowledge their roots in the wider human dependency on technology

Summary
In this wide-ranging study of architecture and cultural evolution, the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology-based culture and its energy-hungry products. The book traces the roots of that culture to the coevolution of Homo sapiens and technology, from the first use of tools as artificial extensions of the human body, to the motorised cities spreading around the world, whose uncontrolled effects are changing the planet itself.

Advancing a new concept of the meme, called the 'technical meme', as the primary agent of cognitive extension and technical embodiment, the author proposes a theory of the 'extended self' encompassing material and spatial as well as psychological and social elements.

Drawing upon research from philosophy, psychology and the neurosciences, the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis.

Politics personified
Portraiture, caricature and visual culture in Britain, c.1830-80
Miller Henry

Key Selling Points
- First study of role of visual culture in Victorian politics
- Essential to understanding how Victorians saw politics and how politicians, parties and movement exploited new visual technologies
- Essential to understanding the public image of key figures, e.g. Gladstone, Disraeli, Palmerston, Russell
- Based on a huge and diverse range of visual and textual sources that makes it a pioneer in this field
- Different from conventional art history/visual studies in uncovering new evidence as to how these images were produced, circulated, distributed and used as material objects

Summary
The remarkable popularity and cultural resonance of political likenesses in the Victorian period is the central theme of this book, which explores how politicians and publishers exploited new visual technology to appeal to a broad public. The first extensive study of the role of commercial imagery in nineteenth century politics, Politics Personified shows how visual images created and reshaped political identities, constructed political narratives and projected a favourable public image of politics and political actors. Furthermore, it offers fascinating insights into how politicians themselves negotiated their relationship with this imagery. Drawing on a vast and diverse range of sources, including prints, photographs, paintings, illustrations, banners, statues, medals and coins, this book highlights how and why politics was visualised, but also how these images were critically received and used.

Beginning with an examination of the visual culture of the 1832 Reform Act and the emergence of new visual technologies, the study investigates how Reformers, Conservatives and Radicals used portraiture to connect with supporters and build identity. The role of group portraiture in fashioning national reforming narratives and the presentation of MPs as independent representatives reiterates the importance of the image in any understanding of Victorian popular politics and political culture. The final part of the book examines how major politicians, including Lord Palmerston, William Gladstone and Benjamin Disraeli, interacted with mass commercial imagery.

The book will appeal to a broad range of scholars and students across political, social and cultural history, art history and visual studies, cultural and media studies and literature.

Women, the arts and globalization
Eccentric experience
Meskimmon Marsha, Rowe Dorothy C.

Key Selling Points
- A rare exploration of the dynamics of globalization as it relates to women's art
- Includes texts from scholars and artists, written from a range of perspectives that have not been brought together in a single volume before
- Focuses on specific art works and practices so its theoretical perspectives are grounded in women's experiences
- Accessible and direct

This book brings transnational feminist theory and criticism together with women's art practices to discuss the connections between aesthetics, gender and identity in a global world; shows the movement of women globally rarely matches dominant models of global exchange; traces their eccentric experiences of the effects of globalization.

Summary
Contemporary art is embedded within the structures that characterise globalization - from the transnational circulation of artworks as commodities to the cross-cultural exchange of images, objects and ideas - and the multiple and mobile territories described by these structures are always, already gendered. Women, the Arts and Globalization: Eccentric experience is the first anthology to address these interlinked issues, bringing transnational feminist theory and criticism together with women's art practices in a coherent and sustained discussion of the legacy and trajectory of aesthetics, gender and identity on a global scale. The essays in Women, the Arts and Globalization demonstrate that women in the arts are rarely positioned at the centre of the art market, and the movement of women globally (as travelers or migrants, empowered artists/scholars or exiled practitioners), rarely corresponds with the dominant models of global exchange. Rather, contemporary women's art practices provide a fascinating instance of women's eccentric experiences of the myriad effects of globalization. Women, the Arts and Globalization offers a multifaceted approach to this topic, from a variety of perspectives and positions; some texts argue for paradigm shifts in disciplines, fields or methodologies, others provide first-hand accounts of making art as a border-crossing activity. Some essays take a dialogic, interview form, whilst others use a micro-level mode of 'close reading' to demonstrate how particular works of art can articulate transnational and gendered aesthetics. The book is relevant to artists, art historians, feminist theorists and humanities scholars interested in the impact of globalization on culture in the broadest sense.

The Matter of Art
Materials, Practices, Cultural Logics, c.1250–1750
Christy Anderson, Anne Dunlop, Pamela Smith

Key Selling Points
- Contributes to the growing interest in objects as evocative and potent 'containers of meaning' that help us to understand history
- Shows how artists and craftsman created objects, highlighting the role of craft and making in an historical context
- Looks at materials from an historical and global point of view
- Looks at materials from an historical and global point of view

Summary
Materials carried the meaning of early modern art. Transformed and crafted from the matter of nature, art objects were the physical embodiment of both the inherent qualities of materials and the forces of culture that used, refined and produced them. The study of materials offers a new approach to this important period in the history of art, science and culture, linking the close study of painting, sculpture and architecture to much wider categories of the everyday and the exotic. Drawing on new research and models from anthropology, material culture and the history of art, scholars in The Matter of Art explore topics as diverse as Inka stonework, gold in panel painting, cork platforms for shoes, and the Christian eucharist.

Cinematic Countrysides
Robert Fish

Key Selling Points
- Considers the role that countrysides play in histories of cinema and their relationship to both popular and amateur forms of film production
- Introduces the innovative idea of 'cinematic countrysides' to debates about 'cinematic space'
- Case study examples of how ideas of 'countryside' are produced through different film genres and across different national traditions of cinema
- Examines the relationship between cinema and the material transformation of rural spaces though the processes of commodification and cinematic display
- Critically explores the way 'countrysides in film' frame key markers of social-spatial identity, including notions of masculinity, childhood, the city and nationhood

An innovative study of the neglected topic of cinematic representations of the countryside, through historical analysis, theoretical critique and explorations of genre, national cinema and urban representations

Summary
Recent years have witnessed an explosion of interest in the 'spatialities of cinema' across the social sciences and humanities, yet to date critical inquiry has tended to explore this issue as a question of the 'city' and the 'urban'. For the first time, leading scholars in geography, film and cultural studies have been drawn together to explore the multiple ways in ideas of cinema and countryside are co-produced: how 'film makes rural' and 'rural makes film'. From the expanse of the American great west to the mountainous landscapes of North Korea, Cinematic Countrysides draws on a range of popular and alternative film genres to demonstrate how film texts come to prefigure expectations of rural social space, and how these representations come to shape, and be shaped by, the material and embodied circumstances of 'lived' rural experience.

At the heart of this volume's varied apprehensions of the 'cinematic countryside' is a concern to argue that ideas of rurality in film are central to wider questions of 'modernity' and 'tradition', 'self' and 'other', 'nationhood' and 'globalisation', and crucially, ones that are central to an account of the 'cinematic city'.

The Open University
A History
Daniel Weinbren

Key Selling Points
• A few personal reminiscences apart, there is no one account of this pioneering institution which has become the largest and most distinctive university in the country
• It considers how The Open University has disturbed the idea of the university by enabling adults easily to study in homes, prisons and all over the world
• It explores how The Open University so swiftly became a national treasure familiar to millions of students and their employers and families, as well as BBC viewers
• It combines the personal narratives of learners, the recollections of staff, the records of key individuals, governments and the BBC - some of them only recently available and the records of teaching and pedagogy recorded by the University itself. It has critically engaged with a wide range of secondary literature about the university, higher education and the broader society
• The breadth of its engagement with the histories of universities in their national and international context makes this book necessary reading for anyone interested in post-war politics, society, economy and higher education

Summary
This historical perspective on The Open University, founded in 1969, frames its ethos (to be open to people, places, methods and ideas) within the traditions of correspondence courses, commercial television, adult education, the post-war social democratic settlement and the Cold War. A critical assessment of its engagement with teaching, assessment and support for adult learners offers an understanding as to how it came to dominate the market for part-time studies. It also indicates how, as the funding and status of higher education shifted, it became a loved brand and a model for universities around the world.

Drawing on previously ignored or unavailable records, personal testimony and recently digitised broadcast teaching materials, it recognises the importance of students to the maintenance of the university and places the development of learning and the uses of technology for education over the course of half a century within a wider social and economic perspective.

The Open University
A history
Weinbren Daniel

Key Selling Points
- A few personal reminiscences apart, there is no one account of this pioneering institution which has become the largest and most distinctive university in the country
- It considers how The Open University has disturbed the idea of the university by enabling adults easily to study in homes, prisons and all over the world
- It explores how The Open University so swiftly became a national treasure familiar to millions of students and their employers and families, as well as BBC viewers
- It combines the personal narratives of learners, the recollections of staff, the records of key individuals, governments and the BBC - some of them only recently available and the records of teaching and pedagogy recorded by the University itself. It has critically engaged with a wide range of secondary literature about the university, higher education and the broader society
- The breadth of its engagement with the histories of universities in their national and international context makes this book necessary reading for anyone interested in post-war politics, society, economy and higher education

Summary
This analysis of The Open University's precedents, personalities, politics and pedagogies contextualises learners' experiences and illuminates the changing values of our society and our ideas about learning and our use of a variety of media.

In April 1963, Labour Party leader Harold Wilson sketched a proposal for a University of the Air. He launched the idea in the autumn and in April 1969 The Open University, OU was granted a Royal Charter. Aiming to be open to people places, methods and ideas, it has supported the learning of millions and, despite hostility from Ministers of the Crown and some within the BBC, the civil service, the academy and the press, it has won a place in the affections of the nation.

The OU produced relevant, successful innovations in teaching, technology, student guidance and ideas about learning for a wide variety of adults, including those without A-levels and those with disabilities, in prison, in the Services, and with full-time jobs. Its supported, open learning strategies and enabled living rooms to become laboratories, telephones to be used for tutorials and the bus to be where you caught up with your University reading.

Now the clear leader in part-time provision it is subject to the same constraints and opportunities as other universities operating within an increasingly globalised marketplace. This account of its development sheds light on the wider social and political developments and on the history of learning by adults. It reveals how a single institution has transformed the notion of the university.

Britain's lost revolution?
Jacobite Scotland and French grand strategy, 1701-8
Szechi Daniel

Key Selling Points
• A major reinterpretation of the Jacobite movement in early 18th century Scotland
• Reveals how close Britain came to civil war within one year of the Union of England and Scotland
• A new take on the Stuart dynasty in exile, bringing out the exceptional role of Queen Mary of Modena
• Opens up the internal politics of grand strategy at the court of Louis XIV

Summary
The orthodox view of eighteenth-century Britain is of a stable polity dominated by 'politeness' and 'commercialism'. It projects a world that was safe and comfortable for the landed elite and full of opportunity for the middling sorts marching towards their Victorian destiny.

But what kind of stable polity undergoes two revolutions within one hundred years and lapses into internal war on seven occasions during 1688-1803? Our cosy vision of the eighteenth century is surely deep-seated, but it cannot cope with revolutionary movements like Jacobitism, the American Patriots and the United Irishmen. By recovering a 'lost' rebellion that had a serious chance of triggering a revolution as sweeping as that of 1688, this book directly challenges the paradigm.

We have long assumed that the Jacobite movement was reactionary and hostile to reform of any kind. Yet in the early eighteenth century, the Scottish Jacobite movement was transformed into a vehicle for revolutionary change. In the course of the political battles against Anglo-Scottish union, the Scots Jacobites broke with their past and developed a new, radical ideology. At its core was a vision of a future Scotland in which a Stuart restoration went hand-in-hand with a new constitution that would have reduced the Stuart dynasty to mere figureheads presiding over a noble demi-republic. It would also have been a Scotland directly economically attached to France and its empire, and thus able to demand a far more equal relationship with England. Jacobite success would have drastically rebalanced power relations between the three kingdoms in the British Isles. In 1708, it seems, the polite and commercial empire of our happy orthodoxy was on the edge of a precipice.

Daniel Szechi is Professor of Early Modern History at the University of Manchester

Quotes
Published in the year of the Scottish independence referendum, Britain's lost revolution? is a deeply researched and readable account of the alternatives that existed at the time of the Anglo-Scottish Union of 1707. It presents a lost past of radical change and European realignments. Built on totally new research in UK and international archives, Szechi tells the story of the revolution that never was in a way that illuminates the present and provides endless opportunity for counterfactual history. This is a What If book par excellence' -- Professor Murray Pittock, University of Glasgow

Table Of Contents

# Materials and Medicine

**Trade, Conquest and Therapeutics in the Eighteenth Century**  
Pratik Chakrabarti

## Key Selling Points
- The first book to trace the links between colonialism and medicine on a global geographical and conceptual scale
- Aligning the trajectories of intellectual and material wealth, this book uncovers how medicine acquired a new materialism as well as new materials in the context of global commerce and warfare
- Draws from wide ranging resources of naval, military, missionary, Orientalist, medical and natural history from the archives in the UK, West Indies and India
- Will appeal to experts and students in a wide range of areas; histories of medicine, science, imperialism as well as south Asian and Caribbean history

Medicine was transformed in the eighteenth century. Aligning the trajectories of intellectual and material wealth, this book uncovers how medicine acquired a new materialism as well as new materials in the context of global commerce and warfare.

## Summary

Medicine was transformed in the eighteenth century. Aligning the trajectories of intellectual and material wealth, this book uncovers how medicine acquired a new materialism as well as new materials in the context of global commerce and warfare. Bringing together a wide range of sources, this book argues that the intellectual developments in European medicine were inextricably linked to histories of conquest, colonisation and the establishment of colonial institutions.

This is the first book to trace the links between colonialism and medicine on such a geographical and conceptual scale. Chakrabarti examines the texts, plants, minerals, colonial hospitals, dispensaries and the works of surgeons, missionaries and travellers to demonstrate that these were shaped by the material constitution of eighteenth century European colonialism.

This book will appeal to experts and students in histories of medicine, science, and imperialism as well as south Asian and Caribbean history.

## Contributor Bio

Pratik Chakrabarti is Wellcome Lecturer in the History of Modern Medicine at the University of Kent, UK.

## Quotes

"Chakrabarti has produced a fascinating and highly readable book, full of unique information and detailed, thoughtful analysis. It will be a catalyst for new comparative research, and it is an essential text for students of colonial medicine, Enlightenment-era science, global trade, and imperialism, as well as specialists in Caribbean and South Asian history." - Timothy Walker, *Isis* Vol. 102 No. 4, 1 February 2012

Emile and Isaac Pereire
Bankers, Socialists and Sephardic Jews in nineteenth-century France
Davies Helen M.

Key Selling Points
• First biography of Emile and Isaac Pereire in English
• Leaders of nineteenth century French industrial revolution
• France 1800-80
• Jewish emancipation

Summary
Emile (1800-75) and Isaac Pereire (1806-80) were pivotal and sensational figures, their lives and careers a lens through which to re-examine the history of France in the nineteenth century. They were among the first generation of Jews emancipated by the French Revolution. Significant Saint-Simonians, they contributed to its philosophy of financial and economic reform. They were among the first to implement the new rail technology in France and their Saint-Simonian understanding that major railway development required investment capital on an unprecedented scale saw them launch the first investment bank of any size in Europe, the Crédit Mobilier. This became the holding company for a series of significant enterprises in which it had major investments. The Pereires came to stand behind banks and railways throughout Europe and in the Ottoman Empire and were integral to Napoleon III’s foreign as well as domestic policies, major players in France’s industrialisation and the modernisation of its banking system.

This is their first biography in English. Commencing with their early lives in the Sephardic community of Bordeaux, it follows their introduction to Saint-Simonianism in Restoration Paris, their early careers as railways entrepreneurs, and the dizzying heights they reached ultimately in Napoleon III’s Second Empire. It is equally a social and cultural history of Jews in France, addressing the means through which the Pereires managed their business empire and the role played by family life in its success. It will appeal to teachers and students interested in French and Jewish history, and to the general reader of biography.

Missionary families
Race, gender and generation on the spiritual frontier
Manktelow Emily J.

Key Selling Points
- First comprehensive and complex history of missionary families and their impact upon the missionary enterprise
- Fuses cultural, postcolonial and gendered approaches to history to bring current preoccupations with gender, intimacy and family history into relation with colonial history and the history of mission in new and more coherent ways
- Makes essential contributions to debates on missions and race, the professionalism of missionary women, and the rise and fall of the 'civilising mission'
- Leads the field into new and exciting directions: missionary masculinity, the importance of life-cycle and life-stage to mission history, and the profound impact of missionary children upon the enterprise
- Presents an innovative argument for the significance of missionaries' familial relations in the philosophy, conduct and outcomes of mission work during the nineteenth century.

Summary
Missionary families presents an innovative argument for the significance of missionaries' familial relations in the philosophy, conduct and outcomes of mission work during the nineteenth century. With regional anchors in London, the Pacific and southern Africa, it uses both the personal writings of individual missionaries and the institutional records of the London Missionary Society to argue that the history of Christian mission can be redrawn.

Bringing together cultural, postcolonial and gendered approaches to history, Manktelow explores missionary marriage, parenting and childhood; issues such as life-cycle, life-stage and generation; and the interplay between discourses of difference mediated by both everyday interaction and complex cultural ideologies. Focusing on gendered identities of both male and female missionaries and how these impacted upon such things as professionalism on the one hand, and personal interaction on the other, overall this volume reflects upon the ways in which the institutional hub of the enterprise in London reacted to and dealt with the formal consequences of private lives. It concludes that missionary families had a profound impact upon the ideology and practice of Christian mission - and that mission history can no longer be written without attention to the personal, the intimate, and the affective aspects of missionary lives.

Attractive to academics and students alike, this book brings a fresh perspective to the history of Christian mission, and contributes to debates in the history of religion, imperialism and gender.

The Levellers
Radical political thought in the English Revolution
Foxley Rachel

Key Selling Points
- The first full-length study of the Levellers in English for 50 years
- The only book to offer a thematic analysis of the Levellers' political thought
- Makes original arguments about the nature and origins of the Levellers' thought
- Offers a full discussion of the relationship of the Leveller movement with parliamentarianism, the New Model Army, and the republican authors of the 1650s
- Takes account of specialist work on the Levellers by other historians from the 1970s to the present

Offers a fresh analysis of the originality and character of Leveller thought. Foxley challenges received ideas about the Levellers as social contract theorists and Leveller thought as a mere radicalization of parliamentarian thought.

Summary
The Leveller movement of the 1640s campaigned for religious tolerance and a radical remaking of politics in post-civil war England. This book, the first full-length study of the Levellers for fifty years, offers a fresh analysis of the originality and character of Leveller thought. Challenging received ideas about the Levellers as social contract theorists and Leveller thought as a mere radicalisation of parliamentarian thought, Foxley shows that the Levellers' originality lay in their subtle and unexpected combination of different strands within parliamentarianism.

The book offers a systematic analysis of different aspects of the Levellers' developing political thought, considering their accounts of the origins of government, their developing views on the relationship between parliament and people, their use of the language of the law, and their understanding of the relationship between religious liberty and political life. It goes on to examine the Levellers' relationship with the New Model Army and the influence of the Levellers on the republican thought of the 1650s. The book takes full account of revisionist and post-revisionist scholarship, and contributes to historical debates on the development of radical and republican politics in the civil war period, the nature of tolerationist thought, the significance of the Leveller movement, and the extent of Leveller influence in the ranks of the New Model Army.

The Levellers fills a gap in the current historiography of radicalism in the English revolution, and will be useful to undergraduates and researchers in early modern political history and the history of political thought.

Population, providence and empire
Roddy Sarah

Key Selling Points
- Treats together, in depth and for the first time, two of the most significant phenomena in the story of modern Ireland - mass emigration and religious change/conflict
- One of few historical interventions into an emerging field in sociology/economics/development studies which concerns the effects of mass emigration on the sending country
- Examines a wide range of previously unused and underused primary sources, including religious archival sources
- Takes full advantage of the digitisation revolution that has changed how historical research is carried out over the past decade, to call on a huge number of sources new to the field
- Written to be intelligible to and appeal to undergraduates and interested non-academic readers as well as to postgraduates and academics

Summary
Over seven million men, women and children left Ireland over the course of the nineteenth century. This book is the first to put that huge population loss in its religious context, by asking how the Irish Catholic, Anglican and Presbyterian churches responded to mass emigration. Did they facilitate it, object to it, or limit it? Were the three Irish churches themselves changed by this demographic upheaval?

Comprising a fresh focus on the effects of emigration on Ireland rather than its diaspora, and merging two of the most important phenomena in the story of modern Ireland - mass emigration and religious change - this study offers new insights for both nineteenth-century Irish history and historical migration studies in general.

The book explores in turn the churches' social and economic thought in relation to emigration, the practical involvement of clergy in departures, the missionary endeavours of each church as they related to emigrants, the key role that emigration played in intensifying sectarian rivalry at home and the place of emigrants in the churches' 'imperial' ambitions.

Based on a large body of previously unused and underexploited archival and printed sources from all over Ireland and beyond, and employing the analytical techniques of, variously, economic, religious and cultural historians, the book examines the extent to which the churches were able to influence emigration and the extent to which their development was itself influenced by it. It concludes that, on balance, emigration determined the churches' fates to a far greater extent than the churches determined emigrants' fates.

Contributor Bio
Sarah Roddy is a Hallsworth Fellow in History in the School of Arts, Languages and Cultures at the University of Manchester

Table Of Contents

John Galsworthy and Disabled Soldiers of the Great War
With an Illustrated Selection of his Writings
Jeffrey S. Reznick

Key Selling Points
- The most comprehensive study published to date of John Galsworthy's philanthropic support for and his compositions about soldiers disabled in the Great War
- Makes available for the first time in a single edition the most significant of Galsworthy's compositions about soldiers disabled in the Great War
- Recovers these texts from scholarly neglect, examining their value as historical documents and connecting them to iconic images and artefacts of the 1914-1918 period
- Essential reading for scholars who study the Great War from a range of disciplines
- Includes over forty provocative illustrations

The most comprehensive study published to date about John Galsworthy's philanthropic support for, and his compositions about soldiers disabled in the Great War. It makes available for the first time in a single edition the most significant of his compositions about the war disabled and examining their value as historical documents.

Summary
John Galsworthy - recipient of the 1932 Nobel Prize for literature - was one of the best-selling authors of the twentieth century. His literary reputation overshadows what he achieved during the Great War, which was his humanitarian support for and his compositions about soldiers disabled in the conflict.

John Galsworthy and disabled soldiers of the Great War represents the most comprehensive study published to date about this literature of the 'war to end all wars'. It makes available for the first time in a single edition the most significant of his compositions about disabled soldiers, recovering them from scholarly neglect, examining their value as historical documents and connecting them to iconic images and artifacts of the period.

This study will be of interest to a wide academic audience, to readers interested in the history of the Great War, to policymakers associated with veterans' issues, and to medical professionals in the fields of physical medicine and rehabilitation.

Defending the Realm?
The Politics of Britain's Small Wars Since 1945
Aaron Edwards

Key Selling Points
- This is the only book to explore civil-military relations in Britain's small wars
- Profiles the nature of the irregular threats confronting Britain
- Examines these campaigns in their proper historical, political and strategic context
- Written in an engaging manner which will appeal to both scholars, students and the interested general reader

Summary
Britain is often revered for its extensive experience of waging 'small wars'. Its long imperial history is littered with high profile counter-insurgency campaigns, thus marking it out as the world's most seasoned practitioner of this type of warfare. This is the first book to detail the tactical and operational dynamics of Britain's small wars, arguing that the military's use of force was more heavily constrained by wider strategic and political considerations than previously admitted. Outlining the civil-military strategy followed by the British in Palestine, Malaya, Kenya, Cyprus, Aden, Northern Ireland, Iraq and Afghanistan, Defending the realm?, available for the first time in paperback, argues that Britain's small wars since 1945 were fought against the backdrop of an irrevocable decline in British power. Written from a theoretically-informed perspective, grounded in rich archival sources, oral testimonies and a revisionist reading of the literature on counter-insurgency and counter-terrorism, this is the definitive account of the politics of Britain's small wars.

Quotes
"Counterinsurgency campaigns are too often analysed in the context of competing tactical approaches. Aaron Edwards focuses on the strategy and civil-military relations of post-World War II British counterinsurgency, making Defending the Realm? an important and timely contribution to current debates on the challenges and costs of counterinsurgency." - Douglas Porch, Distinguished Professor of National Security Affairs at the Naval Postgraduate School, Monterey, California

"A tour de force of modern British counterinsurgency, spanning over eight major campaigns since 1945 - Dr Aaron Edwards deserves congratulations for such meticulous research into each of these politically unique episodes. He has drawn on much material previously unpublished in his analysis of Britain's imperial decline and his focus on the political dimension rather than the military actualities of each campaign is refreshing. In all, Dr Edwards has provided an invaluable account of the differences between each and every British counterinsurgency campaign since 1945, explaining why they differed rather than attempting to develop yet another paradigm in counterinsurgency." - Col. David Benest, Former CO, 2 Para and former counter-insurgency advisor to the British Ambassador in Afghanistan

"Aaron Edwards subjects Britain's experience of warfare against irregular enemies in 'small wars' since 1945 to the thorough strategic examination that it needs. While Defending the realm? tells the stories of eight 'small wars' in convincing detail, it does so very much with appropriate help from the guiding light provided by a firm grasp of the theory of strategy. Edwards' work is outstanding in its achievement of a successful marriage between history and strategic studies. He uses Clausewitz pervasively, though not intrusively or slavishly, as he insists on analysing the British strategic experience in its full political context. This is an exceptional book that must register as a major contribution to our understanding." - Professor Colin S. Gray, Department of Politics and International Relations, University of Reading, UK
"Edwards provides an invaluable account of the differences between each British counter-insurgency campaign since 1945, explaining why they differed rather than attempting to develop yet another paradigm of counter-insurgency." - David Benest, RUSI Journal, 1 July 2013

"A concise, readable text that should be of interest to students and scholars of British foreign policy, international relations, and security studies." - Andrew Holt, LSE Blog, 17 September 2011

"Edwards offers rich historical descriptions of important case-studies." - Jane Gaskarth, University of Plymouth, International Affairs 89:4, 2013

Colonial naval culture and British imperialism, 1922-67
Spence Daniel Owen

Key Selling Points
- The first ever study of British colonial naval forces, their cultural, social and political impact, transnationally analysed from sources in the UK, Caribbean, East Africa, Southeast Asia and Hong Kong
- Provides new perspectives on how British imperialism reacted to internal and external pressures of overstretch, war and nationalism, and reinforced its authority materially and ideologically during the twilight of Empire
- Broadens studies of 'naval theatre' and navalism beyond pre-First World War Europe and the Dominions, by providing new cases in British colonies, dependencies and mandate/trust territories up to decolonisation
- Suggests for the first time that imperial racial ideology and discourses of power fostered a 'seafaring race' theory for colonial officials, a distinctly naval variation of 'martial race' theory
- Advances the new imperial and maritime histories, by examining navies as social and cultural institutions where power was expressed through the ideas and relations they cultivated, as through their guns

Summary
Between 1933 and 1941, fifteen indigenous naval forces were raised in Britain's colonies, protectorates and mandate territories, and fought for the Empire during the Second World War. Though barely receiving a footnote within the existing historiography, if examined beyond naval strategy and more in relation to the cultural turn, they provide an important new lens for understanding imperial power and colonial relations at the twilight of the British Empire.

Through a transnational and comparative analysis of 'official' and 'subaltern' sources in the United Kingdom, the Caribbean, East Africa, East and Southeast Asia, this book examines for the first time the political, social and cultural impact of colonial naval forces. It explores their emergence in a climate of 'imperial overstretch' and geopolitical tensions, as bulwarks for preserving British 'prestige' against rival imperialisms and colonial nationalism; the importance of 'men on the spot', 'collaboration', 'naval theatre', 'invented traditions', and propaganda in mobilising colonial 'navalism'; the role of naval 'paternalism' and training within the 'civilising mission', and its social and economic 'development' of colonial 'character'; and how racial ideology and discourses of power fostered a 'seafaring race' theory, influencing naval recruitment, strategy and management, and affecting imperial sentiment, ethnic relations, colonial identities, customs and order.

This book thus appeals to imperial, maritime and regional historians, and advances the cultural turn in those disciplines by broadening our understanding of navies as social and cultural institutions, where power was expressed as much in the ideas and relations they cultivated, as through the barrels of their guns.

**The Political Writings of Archbishop Wulfstan of York**
Andrew Rabin

**Key Selling Points**
- Never before have Wulfstan's political writings been gathered together in a single volume. Many of the texts collected here have been translated into modern English for the first time.
- The translations are accompanied by an in-depth introduction and extensive notes that document in detail Wulfstan's sources and influences-in many instances, the first time this work has been done.
- These texts offer among the earliest major discussions of significant aspects of medieval political thought, most notably the division of society into three orders: those who fight, those who labour, and those who pray.
- Wulfstan's prominence as Archbishop of York and a royal councilor makes him an unparalleled witness to the history and politics of eleventh-century England.
- Wulfstan is widely recognized as one of the foremost Anglo-Saxon authors, yet only a very few of his works have been published in either a language or format accessible to modern readers. This volume more than doubles the number of Wulfstan's works available in modern English.

**Summary**
Archbishop Wulfstan of York (d. 1023) is among the most important legal and political thinkers of the early Middle Ages. A leading ecclesiastic, innovative legislator, and influential royal councilor, Wulfstan witnessed firsthand the violence and social unrest that culminated in the fall of the English monarchy before the invading armies of Cnut in 1016. In his homilies and legal tracts, Wulfstan offered a searing indictment of the moral failings that led to England's collapse and formulated a vision of an ideal Christian community that would influence English political thought long after the Anglo-Saxon period had ended. These works, many of which have never before been available in modern English, are collected here for the first time in new, extensively annotated translations that will help readers reassess one of the most turbulent periods in English history and re-evaluate the career of Anglo-Saxon England's most important political visionary.

The cult of the Duce
Mussolini and the Italians
Gundle Stephen, Duggan Christopher, Pieri Giuliana

Key Selling Points
• The first book analysing the personality cult of a European dictator
• A key contribution to the understanding of Italian Fascism
• An important complement (and alternative) to biographies of Mussolini
• Examines the long-range influence of the Mussolini cult in the postwar era

Summary
The cult of the Duce is the first book to explore systematically the personality cult of Benito Mussolini. It examines practices that began before Mussolini's rise to power and which multiplied as Fascism consolidated its support among the Italian population. By approaching the subject from many different angles, including those of the visual arts and the media as well as social and political history, this book makes a decisive contribution to the understanding of Fascism and modern leadership.

The conviction that Mussolini was an exceptional individual first became dogma among Fascists and then was communicated to the people at large. Intellectuals and artists helped fashion the idea of the Duce as a new Caesar while the modern media of press, photography, cinema and radio aggrandised his every public act. Mussolini’s image was ubiquitous and varied; he adopted the guises of bourgeois politician, man of culture, sportsman, family man and warrior as he appealed to different audiences. The book explores in detail many manifestations of the cult and the way in which Italians experienced it. It also considers its controversial resonances in the postwar period. The founder of Fascism was the prototype dictator of the twentieth century. As such his cult is a crucial topic in the study of a century that produced many examples of dictators, some of them explicitly modelling themselves on Mussolini. Academics and students with interests in Italian and European history and politics will find the volume indispensable to an understanding of the modern era. Among the contributions is an Afterword by Mussolini’s leading biographer, R.J.B. Bosworth.

Workers and politics in occupied Austria, 1945-55
Lewis Jill

Key Selling Points
- Readable and original contribution to scholarship
- Sets the social and economic difficulties that Austria encountered in this crucial decade
- Discusses the long-term implications of the Austrian culture of consensus
- The impact of this decade still has relevance for present-day political developments in Austria

This book examines the way in which Austria escaped absorption into the Soviet Bloc after 1945 and the impact this had on its domestic politics.

Summary
In March 1946 Winston Churchill warned the world about the 'Iron Curtain' that had descended across Europe and behind which now lay, he said, the eight capitals of the ancient states of central and Eastern Europe. In fact, one of these eight, Vienna, escaped absorption into the Soviet bloc. Between 1945 and 1955, Austria and its capital were occupied by the Four (increasingly mutually antagonistic) Allied Powers. During this decade of confusion, insecurity, suspicion and fear, and confronted by poverty and the threat of famine, Austria's political and economic elites joined forces to promote a culture of political unity and harmony from which eventually emerged the Austrian model of corporatism, commonly referred to as the Social Partnership. Conservatives, Socialists and Communists initially co-operated in a coalition government, industrialists embraced nationalisation, and union leaders abandoned class conflict, accepting wage controls in return for a role in national policy formation. However, by 1948 the two Super-Powers were competing for influence in the country: the USA through the Marshall Plan and the USSR by asserting what it considered to be its rights in the country. Food shortages and low wages started to lead to grass-roots protest, which union leaders opposed and Austrian Communists sought to exploit. These culminated in two mass strikes in 1950, wrongly dubbed the 'September Putsch'.

This book sets the social and economic difficulties that Austria encountered in this crucial decade in their international context and examines how they were contained. The author also discusses the long-term implications of the Austrian culture of consensus, not only for the way in which the country dealt with its recent past, but also for present-day political developments.

A remarkable study that will be essential reading for students and scholars of twentieth-century European history.

Murder Capital
Suspicious Deaths in London, 1933–53
Amy Helen Bell

Key Selling Points
• Discover the hidden crimes of a vanished London
• Learn more about the tools the Metropolitan Police used to investigate murders
• Capture the atmosphere of danger and excitement in cosmopolitan wartime London
• Uncover tragic family secrets hidden for generations
• Trace the history of forensic investigations in the Metropolitan Police

Summary
Murder Capital is a historical study of unexpected deaths whose circumstances required official investigation in mid-twentieth-century London. Suspicious deaths - murders in the family and by strangers, infanticides and deaths from illegal abortions - reveal moments of personal and communal crisis in the social fabric of the city. The intimate details of these crimes revealed in police investigation files, newspaper reports and crime scene photographs hint at the fears and desires of people in London before, during and after the profound changes brought by the dislocations of the Second World War. By setting the institutional ordering of the city against the hidden intimate spaces where crimes occurred and were discovered, the book presents a new popular history of the city, in which urban space circumscribed the investigation, classification and public perceptions of crime.

Soliman and Perseda, by Thomas Kyd
Erne Lukas

Key Selling Points
- Neglected work by Thomas Kyd, author of recognised masterpiece The Spanish Tragedy
- Dramatises cultural conflict in sixteenth-century Mediterranean
- Fullest available analysis of the text
- Throws light on Elizabethan drama by one of Shakespeare's major contemporaries

Summary
Soliman and Perseda, written c. 1588 and first published in 1592 or 1593, is a late Elizabethan romantic tragedy by Thomas Kyd, author of The Spanish Tragedy. It dramatises the triangular relationship of the Turkish emperor Soliman, his captive Perseda and her beloved Erastus, and the fortunes of the comic servant Piston and the braggart knight Basilisco, against the fictionalised backdrop of the Turkish invasion of Rhodes in the early sixteenth century. The introduction to this facsimile edition contains the fullest analysis of the text to date. It also provides an account of the play's editorial history, a detailed analysis of its original printing, and lists of all erroneous readings in the first quarto, together with significant differences between the first and second quartos. This edition provides the best access we have to an important play by one of Shakespeare's leading early contemporaries.

That devil's trick
Hypnotism and the Victorian popular imagination
Hughes William

Key Selling Points
• The most substantial study of how nineteenth-century British readers viewed and understood mesmerism and hypnotism
• Contains a vast body of material, drawn especially from the popular press, which has never been used in criticism or in cultural and medical history before
• An important aid in the study of key texts such as Edwin Drood and Dracula, this an essential resource for those studying the popular fiction, as well as the mass culture, of the period

Summary
That Devil's Trick is the first study of nineteenth-century hypnotism based primarily on the popular - rather than medical - appreciation of the subject. Drawing on the reports of mesmerists, hypnotists, quack doctors and serious physicians printed in popular newspapers from the early years of the nineteenth century to the Victorian fin de siècle, the book provides an insight into how Continental mesmerism was first understood in Britain, how a number of distinctively British varieties of mesmerism developed, and how these were continually debated in medical, moral and legal terms.

This is no dry history of medicine, however. It opens and closes with two vignettes of how mesmerists were depicted on stage at the eighteenth- and nineteenth century fins des siècles, and its contents are highly relevant to the study of the many authors - Charles Dickens, George Eliot, Bram Stoker and Conan Doyle among them - whose fiction was informed by the imagery of hypnotism and mesmerism. Its contents are enlivened by liberal quotation from the often scandalous observations of those who watched or participated in mesmeric séances, these being regarded at times as salacious exhibitions likely to undermine the morality of the nation.

That Devil's Trick will be an essential resource for anybody working with the popular and literary culture of the nineteenth century. Its unique contents allow it to bridge the disciplinary boundaries of literary criticism and broader Victorian studies, the breath and liveliness of its coverage also making it an important work for medical historians and the general reader.

Imagining Women Readers, 1789–1820
Well-regulated Minds
Richard De Ritter

Key Selling Points
- Imagining Women Readers offers a critical re-appraisal of the significance of the female reader in the period 1789-1820
- It bridges the gap between recent work on the history of reading, literary analysis and feminist scholarship on the discursive construction of femininity
- Drawing upon a diverse range of writing, it identifies how the seemingly domestic occupation of reading was frequently depicted through the language of the public, rather than the private, sphere
- It suggests that rather than being a wasteful and indulgent leisure activity, reading offered women a virtuous mode of symbolic labour
- It complicates the widely held perception that reading was considered a 'dangerous' occupation, by drawing attention to the ways in which it conferred moral and cultural authority on women

Summary
Imagining Women Readers reassesses the cultural significance of women's reading in the period 1789-1820. From the turbulent years following the French Revolution to the fiction of Jane Austen, this book charts the rise of a self-regulating reader, who possesses both moral and cultural authority. Rather than an unproductive leisure activity, for the writers discussed in this study the act of reading is crucial to imagining forms of female participation in national life. The book thus offers a unique perspective on the relationship between reading, education and the construction of femininity, shedding new light on the work of some of the most celebrated women writers of the period.

It will appeal to students and scholars interested in the history and representation of reading, and in women's writing of this period more generally.

Shakespeare's Storms
Jones Gwilym

Key Selling Points
- The first and only book-length study of Shakespeare's storms
- Storms are theatrical set pieces, and sources of metaphor. This book shows how stage practices shape Shakespeare's language. It's the only book that traces such development across his whole career
- The only book to integrate the early modern understanding of weather with the stage effects that were used to represent that weather
- Sets the agenda for a historicist, non-activist, ecocriticism, thereby broadening the field's appeal and widening its methodology. It is essential for anyone working in, or interested in, ecocriticism
- Establishes a place for theatre history in contemporary theory in genuinely novel ways. It is therefore indispensible for anyone working in early modern performance studies

Summary
This is the first comprehensive study of Shakespeare's storms. Whether the apocalyptic storm of King Lear or the fleeting thunder imagery of Hamlet, the shipwrecks of the comedies or the thunderbolt of Pericles, there is an instance of storm in every one of Shakespeare's plays.

This book explains the special effects used to represent storms in the early modern playhouses, and details how those effects filter into Shakespeare's dramatic language. With chapters on Julius Caesar, King Lear, Macbeth, Pericles and The Tempest, Jones traces the development of the storm over the second half of the playwright's career, when Shakespeare took the storm to new extremes. We see Shakespeare's management of sound and light, and of actor and audience. Shakespeare uses storms to delight and surprise, but also to investigate the nature of representation in the theatre. Interspersed with the readings of plays are chapters on thunder, lightning, wind and rain, in which Jones reveals Shakespeare's meteorological understanding of storms and offers nuanced readings of his imagery. Throughout, Shakespeare's Storms brings theatre history to bear on modern theories of literature and the environment. This is a work that brings these two disciplines together in new and important ways. Suitable for advanced undergraduates and experts alike, Shakespeare's Storms is essential reading for anyone interested in Shakespeare, ecocriticism or early modern drama.

'Curing queers'
Mental nurses and their patients, 1935-74
Dickinson Tommy

Key Selling Points
- Focuses on the history of nursing and the history of sexuality
- Discovers the hidden gay lives of nurses
- Based on original oral histories
- Reveals subversion among nurses

Summary
Drawing on a rich array of source materials including previously unseen, fascinating (and often quite moving) oral histories, archival and news media sources, 'Curing queers' examines the plight of men who were institutionalised in British mental hospitals to receive 'treatment' for homosexuality and transvestism, and the perceptions and actions of the men and women who nursed them.

The book begins in 1935 with the first official report on the use of aversion therapy to combat homosexual desire and continues until 1974, when the American Psychiatric Association removed homosexuality from its diagnostic manual as a category of psychiatric disorder. It thereby covers a critical period in British queer history during which the reigning public and professional discourse surrounding homosexuality shifted from crime to sickness to tolerance. The majority of nurses followed orders in administering treatment in spite of the zero success-rate in 'straightening out' queer men, but a small number surreptitiously defied their superiors by engaging in fascinating subversive behaviours. This book provides an in-depth examination of both groups, and offers some intriguing insights into the hidden gay lives of some of the nurses themselves, and the inevitable tension between their own identities and desires and the treatments they administered to others.

'Curing queers' makes a significant and substantial contribution to the history of nursing and the history of sexuality, bringing together two sub-disciplines that combine only infrequently. Therefore, it will be of interest to scholars and students in nursing, history, gender studies, health care ethics and law, as well as the general reader.

Networks of sound, style and subversion
The punk and post-punk worlds of Manchester, London, Liverpool and Sheffield, 1975-80
Crossley Nick

Key Selling Points
- The first book length study to use social network analysis to explain and explore popular music worlds
- Challenges earlier understandings and explanations of the rise of punk and post-punk
- Develops an innovative concept of 'music worlds', building upon and developing Howard Becker's highly influential account of 'Art Worlds'
- The first book length academic study of the British post-punk music world of the late 1970s

Summary
In this important book Nick Crossley examines the birth of punk in the UK and its transformation, within a short period of time, into post-punk. Dominant explanations of these developments have tended to focus upon strains and frustrations, both social and aesthetic, which are said to have provoked a generation of young people into rebellious action. Crossley identifies a number of problems with such explanations, stressing in particular their failure to explore punk's 'micro-mobilisation'. UK punk emerged within the interactions of a small, circumscribed and geographically concentrated network of music enthusiasts, he argues, and sociological analysis of it must start there; with this network and the events and mechanisms which allowed it grow to a national scale, diffusing punk culture. Similarly, to fully understand post-punk we must investigate the various city-based networks, generated in some part through excitement about punk, which incubated both frustration at what it soon became and creative attempts to transcend its limitations.

Deploying innovative concepts of 'critical mass', 'social networks' and 'music worlds', and using sophisticated techniques of 'social network analysis', Crossley engages with the detail of punk's emergence, diffusion and subsequent transformation into post-punk, offering a highly original and robust account of these fascinating and culturally important processes.

Written in an accessible style, this book is essential reading for anybody with an interest in either UK punk and post-punk or the impact of social networks on cultural life and the potential of social network analysis to explore this impact.

Catherine Breillat
Keesey Douglas

Key Selling Points
- The first full-length monograph in English on this critically acclaimed and controversial film director
- Her films - including Romance, A ma soeur! and Sex is Comedy - are studied all over the world
- Keesey investigates the thorny differences between Breillat's films and patriarchal pornography
- He covers all eleven of her feature films and reveals the ground between their inspirations and their critical reception
- Contextualises Breillat with other French and Anglo-American film makers

The first full-length monograph in English devoted to one of the most acclaimed and controversial directors in contemporary cinema

Summary
This is the first English-language book on controversial female director Catherine Breillat, whose films include Romance, A ma soeur! (Fat Girl), Anatomy of Hell and most recently, The Last Mistress.

This volume explores the director's complex relation to religion and to feminism, and it examines the differences between Breillat's films and patriarchal pornography, engaging in detailed analysis of her intimate scenes between men and women. Keesey also discusses the literature, films, paintings and photos that have influenced Breillat's work, and extends this to show how Breillat's films have influenced other filmmakers and artists in turn.

A lively and accessible introduction, this book will appeal to students and researchers, as well as all those with an interest in gender studies, French film and contemporary cinema.

Jacques Rivette
Morrey Douglas, Smith Alison

Key Selling Points
- This is the first full-length study of Jacques Rivette in English
- Jacques Rivette was one of the key filmmakers of the French New Wave, and is widely taught on university Film Studies courses
- Jacques Rivette was one of the key filmmakers of the French New Wave, and is widely taught on university Film Studies courses
- Rivette's work is distinctive and often experimental, and has been very influential in France
A complete survey - the first in English - of Jacques Rivette's sixty-year career in French cinema, from the New Wave to the present day.

Summary
Jacques Rivette is perhaps the best-kept secret of French cinema. A founding figure in the New Wave, and at the centre of the *Cahiers du cinéma* team, he developed into one of the most unusual and adventurous French directors of the last sixty years, yet his work remains little-known in comparison with his contemporaries, and this study is the first in English to look at the full span of his career. Starting with his decisively influential film criticism of the 1950s, it moves from the New Wave through the complex, experimental films of the 1970s to the challenging, playful dramas which ensured his visibility during the following two decades, and ends in the present, including Rivette's most recent films, *Histoire de Marie et Julien* (2003) and *Ne touchez pas la hache* (2007).

The book takes a thematic approach, offering detailed discussion of key elements of Rivette's film world, including games, conspiracy and jealousy, as well as a study of what Rivette's cinema adds to our understanding of key theoretical concepts in Film Studies such as narrative, space and adaptation. There are many close analyses of sequences from Rivette's films including *Paris nous appartient* (1961), *Céline et Julie vont en bateau* (1974) and *La Belle Noiseuse* (1991).

Contributor Bio
Douglas Morrey is Associate Professor in the Department of French Studies in the University of Warwick

Quotes
This book makes a strong case for explaining what is specific, innovative and exciting about Rivette's films, focusing on his exploration of form and the relationship of artist to audience.
Smith and Morrey offer a vital defence of some of Rivette's more maligned films. This overdue study makes for an erudite introduction and a thoroughly explanatory 'user guide' to its slightly forbidding subject.

Interpreting Rock Movies
The Pop Film and Its Critics in Britain
Andrew Caine

Key Selling Points
• First book to concentrate on the new genre of British and American pop films in the 1950s and 60s
• First book to concentrate on the new genre of British and American pop films in the 1950s and 60s
• Looks at all the well-known artists: Elvis, Cliff, The Beatles and, of course, Bill Haley
• The hardback proved successful for researchers in film as well as media and cultural studies, popular music and cultural history

Summary
Andrew Caine details the reaction to British and American pop films during the 1950s and 1960s. By examining the British reception of films such as Rock Around the Clock, Love Me Tender, A Hard Day's Night and Summer Holiday the book provides a valuable insight into British film criticism, teenage culture during the 1950s and 1960s and the generic status of rock films/teen movies and cultural hierarchies.

Interpreting Rock Movies not only contains an extensive account of how the film and music press reacted to rock 'n roll films, but also fully explores issues about taste and distinction within reviewing practices. The movie output of Elvis Presley, the Beatles, and numerous others is located within the context of popular music during the 1950s and 1960s.

Contributor Bio
Andrew Caine has taught film, media and cultural studies in several higher education institutions.

Scottish Cinema
Texts and Contexts
Christopher Meir

Key Selling Points
• An essential overview of the most exciting period in Scottish film history, an account which is both broad in historical scope and textually grounded in specific films
• The only work on Scottish cinema that is organized around detailed case studies of individual films
• Offers definitive studies of high profile Scottish films such as Local Hero, The Last King of Scotland and Mrs. Brown
• Comprehensively situates Scottish cinema within contexts including Scottish history, culture and changing national and transnational industrial networks

Summary
Over the last three decades, Scottish cinema has seen an unprecedented number of international successes. Films ranging from Local Hero to The Last King of Scotland have not only raised the profile of film-making north of Hadrian's Wall, but have also raised a number of questions about the place of cinema originating from a small, historically marginalised, as yet stateless nation, within national and transnational film cultures.

By providing detailed case studies of some of the biggest films of contemporary Scottish cinema, including Local Hero, Mrs. Brown, Morvern Callar and others, this volume will help readers to understand the key works of the period as well as the industrial, critical and cultural contexts surrounding their creation and reception. As the field of Scottish film studies has also grown and developed during this period, this volume will also introduce readers to the debates sparked by the key works discussed in the book.

Contributor Bio
Christopher Meir is Lecturer in Film at the University of West Indies, St. Augustine.

Jacques Demy
Waldron Darren

Key Selling Points
- Constitutes the first full-length book devoted to Jacques Demy in the English language
- Provides a comprehensive study of Jacques Demy’s cinema, including detailed analyses of all of his films, both short and full length
- Examines and reappraises Demy's cinema in relation to debates in film studies and emphasises how they illustrate some of the key concerns of twentieth century philosophy around affect, subjectivity, self-other relations, gender and sexuality, class, freedom and free will
- Brings together key points and arguments that have been invoked in critical discussions of Demy's films in France, the UK, the USA and Spain

Summary
Saccharine for some, poignant for others, Jacques Demy's 'enchanted' world is familiar to generations of French audiences accustomed to watching Christmas repeats of his fairytale Peau d’âne (1970) or seeing Catherine Deneuve and Françoise Dorléac prance and pirouette in Les Demoiselles de Rochefort (1966). Demy achieved international recognition with Les Parapluies de Cherbourg (1963), which was awarded the Palme d'Or at Cannes. However, beneath the apparently sugary coating of his films lie more philosophical reflections on some of the most pressing issues that preoccupy Western societies, including affect, subjectivity, self/other relations and free will.

This wide-ranging book addresses many of the key aspects of Demy's cinema, including his associations with the New Wave, his unique approach to musicals, his adaptations of fairytales, his representations of gender and sexuality and his legacy as an iconic director for generations of audiences and filmmakers.

Contributor Bio
Darren Waldron is Senior Lecturer in French Screen Studies at the University of Manchester

Habermas and European integration
Social and cultural modernity beyond the nation state
Singh Grewal Shivdeep

Key Selling Points
- The only single volume study which tackles this important subject head-on
- A fascinating look at Habermas and the European project, which is still of strong ongoing and topical interest for today's scholars
- Well written, accessible and concise
- Interdisciplinary in approach, the book will be a vital port of call for students and scholars from a wide array of disciplines
This is the first in-depth account of his project. Emphasis is placed on the conception of the European Union that informed his political prescriptions—this approach entails a deep engagement with his academic and political writings, and with influential treatments of the European integration process, such as the writings of E.B. Haas.

Summary
From its conception to the referenda of 2005 where it met its end, German philosopher Jürgen Habermas wrote in support of the European Constitution. This is the first in-depth account of his project. Emphasis is placed on the conception of the European Union that informed his political prescriptions—this approach entails a deep engagement with his academic and political writings, and with influential treatments of the European integration process, such as the writings of E.B. Haas.

The book is divided into three parts. The first considers the unfolding of 'social modernity' at the level of the EU; among the subjects covered are Habermas's concept of juridification, the latter's affinities with integration theories such as neofunctionalism and the application of Habermas's democratic theory to the EU. The second part addresses 'cultural modernity' in Europe—'Europessimism' is argued to be a subset of the broader cultural pessimism that has assailed the project of modernity in recent decades with renewed intensity in the wake of 9/11. The final section looks at the conceptual landscape of the Constitutional Convention, demonstrating how the ideas of social and cultural modernity may be employed in the service of empirical research.

Interdisciplinary in approach, this book engages with European/EU studies, political theory, globalisation studies, and the history of ideas. Concise and clearly written, it will be of interest to advanced undergraduates and postgraduates, scholars and professionals with an interest in these subjects.

Contributor Bio
Shivdeep Grewal has taught at Brunel University and University College London

Quotes
Habermas and European Integration starts with a review of Habermas's changing attitudes towards European unification over the past 30 years. Then Grewal...reconstructs pertinent aspects of Habermas's scholarly work over roughly the same period, surveying it in the context of the philosopher's developing political concerns. -- Scott McLemee, Inside Higher Ed
This splendid little book traces some interesting and important connections between Habermas's theoretical work and his analyses of the European Union, linking one of Europe's most important contemporary thinkers with its most important current political project. -- William Outhwaite, Newcastle University
a particularly worthwhile read for scholars and postgraduate students of European studies who are interested in an analysis of the EU beyond the scope of mainstream theories. -- Nele Kortendiek , The London School of Economics, LSE blog
The work... offers a new, insightful perspective on Habermas's work...'

Roots of the Pax Americana
Decolonisation, development, democratisation and trade
Louw Eric

Key Selling Points
• A fascinating account of how Americans built an informal trading empire, removing rivals such as the British Empire
• Compares the Pax Americana with the Pax Britannica and looks at different forms of imperialism
• Examines how America's informal empire is governed and explores the roles played by multilateralism, free trade, soft power, military power and comprador-partners

This fascinating book examines how and why Americans built an informal trading empire and why the British Empire needed to be removed before a Pax Americana could be built. It offers a systematic explanation for the rise of this super empire, and explains in detail how it is governed.

Summary
This book examines how and why Americans built an informal trading empire and why the British Empire needed to be removed before a Pax Americana could be built. The Pax Americana is a phenomenon of global significance, and this fascinating book offers a systematic explanation for the rise of this super empire and examines in detail how it is governed.

A core feature of the book is a concern with America's vision of the world and how the USA has attempted (especially since 1945) to export this vision across the globe. The book identifies and examines the underlying discourses and belief systems that gave rise to a Pax Americana. An eclectic range of methodologies and theories are deployed to explain the phenomenon of this informal empire, ranging from to materialist (political economy) explanations of 'US imperialism' through to those explanations grounded in the non-materialist realm of values, ideas and world views. The result is an exploration of the curious phenomenon of an 'anti-imperialist' empire with both 'economic' and 'moral' roots.

East German intelligence and Ireland, 1949-90
Wiel Jérôme

Key Selling Points
- No previous study has analyzed the history of Ireland's bilateral relations with a continental European country at intelligence, political, economic and cultural levels
- This study incorporates the Irish and East German view points and is not solely based on the Irish side only (i.e. exclusively English-speaking sources)
- Ireland's importance during the First World War as seen from a French, German and Austro-Hungarian angle
- Espionage & terrorism. Generally these topics tend to attract academics and the general public alike

Summary
This book examines in depth Ireland's relations with a country behind the Iron Curtain during the Cold War, the former East Germany. It is based on extensive research undertaken in Germany and Ireland, especially in the archive of the former Stasi. The first part of the book analyses Irish-East German bilateral relations at political, diplomatic, economic and cultural levels, but as is very clear the Stasi was never too far away. The extraordinary story of the repatriation of the remains of IRA-volunteer Frank Ryan from Dresden to Dublin is related in detail. The second part of the book focuses exclusively on intelligence. It shows the activities of the HVA, the Main Directorate of Foreign Intelligence, and reveals the information obtained and the names of East German agents and sources involved. The onset of the conflict in Northern Ireland caught the attention of the HVA but also of Department HA-XXII in charge of terrorism. HA-XXII monitored the Provisional IRA and the INLA's campaign against the British Army of the Rhine in West Germany. It obtained its information thanks to moles deep inside the West German security and intelligence services. The PIRA and the INLA's contacts with West German terrorist groups are examined, so are Soviet and Romanian intelligence activities.

This book makes an original contribution to the much neglected area of Ireland's relations with continental European countries during the twentieth century and also Ireland's position during the Cold War. It will be of interest to scholars, students, the general public and professionals in the field of intelligence and security.

Gorbachev's export of Perestroika to Eastern Europe
Democratisation reconsidered
Hardman Helen

Key Selling Points
• Based on archival research in Russia, Hungary and Poland, this book provides an accurate and novel explanation of events 1987-89, which traces Soviet influence over regime reform in CEE
• Identifies a common initiative among the fraternal communist parties of Central and Eastern Europe to modernise their parties in 1987-89 for the purpose of retaining the one-party-system model
• Shows how Gorbachev encouraged leaderships across the CEE fraternal parties to modernise their regimes in accordance with 'perestroika'
• Offers illuminating insight into how parties envisaged the reform process 1987-89, which helps explain their respective party systems' trajectories since then
This book looks at the liberalisation process in Central and Eastern Europe (CEE) during the period 1987-1989, focusing on Gorbachev's initiative to encourage perestroika in all the fraternal regimes of CEE outside the Soviet Union.

Summary
This book looks at the liberalisation process in Central and Eastern Europe (CEE) during the period 1987-1989, focusing on Gorbachev's initiative to encourage perestroika in all the fraternal regimes of CEE outside the Soviet Union. Archival materials, interviews and textual analysis identify a joint initiative 1987-1989 among these fraternal communist parties to perpetuate the one-party system. For this purpose, fraternal parties were expected to follow the example of the CPSU in convening the national party conference, an all-party meeting on a similar scale to the five-yearly congress, and yet mysteriously, one which was barely described in the Party Statutes and rarely convoked. Gorbachev made use of CEE dependence on the Soviet Union for energy supplies to ensure that at least some fraternal parties followed his line.

This book will be of interest to those studying the transition process in CEE, democratisation, comparative politics more generally and students of research methods.

**Governing Europe's neighbourhood**  
*Partners or periphery?*  
Weber Katja, Smith Michael E., Baun Michael

**Key Selling Points**
- The first book to deal with the topic of the European Neighbourhood policy (ENP), and thus the boundaries of wider Europe, in a comprehensive way
- Examines the EU's relations with its neighbouring countries to the East and South, using a common analytical framework devised by the contributors through a series of workshops and conferences
- Offers seven critical case studies that analyse the full range of specific sectors of the ENP as outlined by the European Commission
- Each of these case study chapters provides a comparison of EU policies towards countries in different regions and considers the problems posed by diversity for the implementation of the ENP
- Provides a systematic analysis of the relationship between the EU's efforts on this region and those of the United States, examining the prospects for conflict and cooperation between the EU and US across a range of problems and countries

This volume introduces the concept of 'external governance' to analyze the European Union's relations with its new neighborhood following the EU's 2004 enlargement.

**Summary**
This volume examines the role of the European Union in creating a system of governance involving the countries and regions of its new 'neighbourhood'. Enlargement has functioned as one of the EU's most effective foreign policy tools, yet the EU is rapidly approaching the limits of its capacity to accept new member states. It therefore must develop ways of extending and preserving the European zone of peace and stability that do not rely on the prospect of membership as a means of influencing the behaviour of non-member countries.

A major step in this direction is the EU's new European Neighbourhood Policy (ENP). The ENP aims to create a ring of 'well-governed and friendly' countries along the EU's eastern, southeastern, and southern peripheries. This volume situates this policy in a broad, analytically-coherent framework, supported by a full range of ENP case studies, to explain whether the ENP represents a truly new approach to regional governance and, if so, what lessons that effort might offer to larger debates about the future of Europe, transatlantic relations and international order.

Order and conflict
Anthony Ascham and English political thought (1648-50)
Barducci Marco

Key Selling Points
• There is no rounded account of Ascham's writing to rival Barducci's
• It approaches this subject freshly and with independence of mind
• It is a timely addition to current scholarship, fitting into recent and current work on
  the development of propaganda and print history in the Civil War and Commonwealth
  period
• It offers a useful expansion of and corrective to some of the work which focuses more
  narrowly on the 'republican' defenders of the Commonwealth regime

Summary
The Puritan Revolution of mid-seventeenth-century England produced an explosion of
new and important political thinking. But while due attention has been given to the most
famous thinkers, there are other important figures who have been relatively neglected,
of whom Anthony Ascham is one. This book provides the first full-scale study of
Ascham's political thought.

During the crucial period between the Second Civil War and the aftermath of the
abolition of monarchy and the establishment of the English Republic, when he served as
official pamphleteer of the Parliament and the republican government, the arguments
exposed in Ascham's works paved the way for much of contemporary political
discussion. Ascham put forward a complex argument in support of Parliament's claims for
obedience which drew on the political thought of Grotius, Hobbes, Selden, Filmer and
Machiavelli. He combined ideas taken from these authors and turned them into a
powerful instrument of propaganda to be deployed to the service of the political agenda
of his Independent patrons in Parliament. Barducci's investigation of Ascham's works will
bring together an intellectual analysis of his political thought and an analysis of the
interaction between politics, propaganda and political ideas.

The book as a whole will provide a careful and systematic analysis of Ascham's career
and writings for the first time in English. It will be of interest to historians of early
modern England and early modern print and propaganda, as well as to scholars of
political thought, political science and intellectual history.

The economics of disability
Insights from Irish research
Cullinan John, Lyons Seán, Nolan Brian

Key Selling Points
- Previous works are either dated, inaccessible to a general readership, and/or narrow in focus. Explores a broad range of issues using up-to-date data and new research
- Each chapter presents a clear and relatively non-technical treatment of the specific topic under consideration, making it accessible to a greater number of interested readers
- It incorporates a life cycle perspective on disability, considering issues of specific relevance to children, working-age adults and older people with disabilities
- It provides a range of empirical evidence that can help improve disability policies, services and supports
- It provides an important addition to our knowledge and understanding of the economics of disability and fills a significant gap in the international literature

Summary
This book brings together research relating to the economics of disability in Ireland in order to provide evidence that can help improve disability policies, services and supports. In doing so, it addresses a number of key questions of relevance to the economic circumstances of people with disabilities, with particular emphasis on the relationship between disability and social inclusion, poverty, the labour market, living standards and public policy. Importantly, it also incorporates a life cycle perspective on disability, considering issues of specific relevance to children, working-age adults and older people with disabilities. It also focuses on issues relating to resource allocation and to wider society, while the book also presents a number of contributions focusing on mental health. This book fills a significant gap in the literature concerning the economics of disability, both in Ireland and internationally. We adopt a relatively broad perspective and explore a range of issues and debates of relevance to the economics of disability using recently available data and new up-to-date research. Each chapter presents a clear and relatively non-technical treatment of the specific topic under consideration, making it accessible to a greater number of interested readers. In doing so, it provides an important addition to our knowledge and understanding of the economics of disability and will serve as a useful and up-to-date resource for policymakers, advocates, researchers, academics and students, across a range of disciplines, both in Ireland and internationally.

The politics of old age
Older people’s interest organisations and collective action in Ireland
Doyle Martha

Key Selling Points
• First book on older people's interest organisations to synthesise key theoretical writings in political science, critical gerontology and cultural sociology
• Provides insightful analyses of policy ideas and practices regarding the present and future formulation of age based social policy and ideological debates which surround these practices and policies
• Reveals the changing landscape of older people's political representation in Ireland from the mid-1990s to the last decades of the twenty-first century
• Reveals a lack of transparency in policy-making in the Irish context as it relates to older people, with emphasis placed on framing the public political discourse
• The findings suggest that institutional structures and the welfare state remain consequential to older people's wellbeing and, if dismantled, may act as catalysts for their collective action. Powerfully reveals the impact of social policy design on the collective identities of individuals

situates the discussion of older people's interests in the international context and outlines the findings of an Irish case study

Summary
The politics of old age in the twenty first century, is a contentious politics which encompasses ideological debates about how old age is conceptualised and the rights and welfare entitlements of individuals in later life. An important aspect within this politics is the manner in which older people and their representative groups are given the opportunity to articulate their interests. The politics of old age: older people's interest organisations and collective action in Ireland situates this discussion in the international context and outlines the findings of an Irish case study which explores the evolution of older people's organisations in Ireland from their inception in the mid-1990s to the end of the first decade of the 21st century.

The book represents an important contribution to the relatively sparse academic literature addressing the relationship between ageing, politics and representation. Synthetizing key theoretical writings in political science, critical gerontology and cultural sociology the book reveals how ideological constructions of representation, welfare entitlements and the meaning of 'old age' remain important variables of a dynamic political environment which contextualizes and influences how older people's interest organisations function. The book provides an insight into the complexity of older people's representation and how the power the organisations exercise, their legitimacy and existence remain highly contingent on government policy design, political opportunity structures and the prevailing cultural and socioeconomic milieu. The book is essential reading for policymakers and organisations interested in ageing, policy and the political process and for students of ageing, social policy and political sociology.

Contributor Bio
Martha Doyle is a Visiting Researcher in the School of Social Work and Social Policy at Trinity College, Dublin

Table Of Contents
1. Introduction: Contextualizing the 'politics of old age'

2. Collective action and the nexus of political and cultural systems

3. Older people's interest organisations

4. The political, economic and social policy context

5. Older people's interest organisations: directors and members
6. Policy makers' perspectives of older people's interest representation
7. The nexus of resources, political opportunity structures and collective identities
8. Looking forward

India in a globalized world
Dutt Sagarika

Key Selling Points
- Assesses India in the context of a globalized world. Looks at the history of Indian civilization, exploring the roots of Indian identity and highlighting processes such as foreign invasions, foreign trade, cultural imperialism, colonial rule and the growth of Indian nationalism
- Considers the gradual democratization of Indian politics
- Examines in depth cultural and ethnic divisions in Indian society and the problems that have prevented economic development and stood in the way of economic liberalization
- Discusses the history of India's integration into the global economy and the opportunities available to the country in the early years of the 21st century
An explanation of how India has been affected by the different phases of globalization

Summary
This book looks at India in the context of a globalized world. It starts by looking at the history of Indian civilization, exploring the roots of Indian identity and highlighting processes such as foreign invasions, foreign trade, cultural imperialism, colonial rule and the growth of Indian nationalism. The book examines the gradual democratization of Indian politics.

Cultural and ethnic divisions in Indian society are examined in depth, as are the problems that have prevented economic development and stood in the way of economic liberalization. The history of India's integration into the global economy is considered, and the opportunities available to the country in the early years of the 21st century are detailed. The final chapters consider the Indian government's perception of the Indian diaspora, as well as the changing priorities reflected in India's foreign policy since 1947.

Contributor Bio
Sagarika Dutt is Lecturer in International Relations at the Nottingham Trent University

Table Of Contents
Introduction: globalisation theory and India
1. A brief history of the Indian sub-continent up to independence (1947)
2. The democratization of Indian politics
3. Identity and the Indian state
4. Economic development: from import substitution industrialisation to economic liberalization
5. India in the global (political) economy
6. Alternative approaches to development
7. A nation on the move: the Indian diaspora
8. Indian foreign policy and global politics
Conclusion: globalization and beyond

Crimes against humanity
Birth of a concept
Geras Norman

Key Selling Points
- The book provides an introduction for the non-specialist to the history of the concept of crimes against humanity
- It takes what is a legal concept and explores its general moral and philosophical
- This book explores the concept of crimes against humanity which is at the centre of many discussions of and disagreements about contemporary world politics
- An accessible and informative guide to the evolution of a highly contentious and extremely influential concept which impacts on modern ethics, politics and law
This is an accessible and informative guide to the evolution of the concept of crimes against humanity - a hugely influential concept which has had a marked impact on modern international politics, law and ethics.

Summary
This book tells the story of the emergence of the concept of crimes against humanity. It examines its origins, the ethical assumptions underpinning it, its legal and philosophical boundaries, and some of the controversies connected with it. A brief historical introduction is followed by an exploration of the various meanings of the term 'crimes against humanity' that have been suggested; a definition is proposed linking it to the idea of basic human rights. The book looks at some problems with the boundaries of the concept, the threshold for its proper application and the related issue of humanitarian intervention. It concludes with a discussion of the prospects for the further development of crimes-against-humanity law.

The work serves as a clear and compact introduction for students of politics, philosophy and law, as well as for the general reading public.

Contributor Bio

**Propaganda and counter-terrorism**

*Strategies for global change*

Briant Emma

**Key Selling Points**

- Forensic analysis of often hidden struggles that occurred over changes to 'update' propaganda practices, changes which challenged existing structures of legitimacy and which largely occurred in isolation from public debate
- Presents interviews with key personnel describing the key role of the Anglo-American relationship in the function of the propaganda war. These interviews indicated that it could enable the two countries to avoid certain domestic restrictions, calling into question the adequacy of controls
- Draws on interviews with key figures involved in planning of post 9/11 conflicts to give insight into propaganda strategy, an often neglected aspect of the Anglo-American relationship
- With fast-paced evolution of the global information sphere, the book highlights a need for public reexamination of controls and legal restrictions in national security propaganda

A unique account of British and United States government's attempts to adapt their propaganda strategies to global terrorist threats in a post-9/11 media environment

**Summary**

This book offers a unique account of British and United States Governments' attempts to adapt their propaganda strategies to global terrorist threats in a post-9/11 media environment. It discusses Anglo-American coordination and domestic struggles that brought in far-reaching changes to propaganda. Changes that had implications for the structures of legitimacy yet occurred largely in isolation from public debate. The fast-paced evolution of the global information sphere prompted rapid development of practices that raise questions regarding their governance. Dr. Briant argues that independent and public reexamination of continuing strategy development is essential for government accountability and the formation of systems and policies that both respect citizens and build constructive foreign relations. This book's themes will engage a wide readership including scholars, PR professionals and government personnel.

**Contributor Bio**

Emma Briant is Lecturer in Journalism Studies at the University of Sheffield

**Table Of Contents**

1. Introduction
2. Propaganda 'boundaries' and the extended apparatus
3. Formal propaganda (mis-)coordination
4. Domestic planners, initiative and propaganda
5. Anglo-American relations in the counter-terrorism propaganda war
6. Iraq War case study
7. Countering terror, denying dissent

**Fight Back**  
*Punk, Politics and Resistance*  
The Subcultures Network

---

**Key Selling Points**
- Brings together new and original research into a popular subject: punk
- One of the few academic studies of punk
- Afterword by Jon Savage
- Cross-disciplinary and transnational

**Summary**

Fight Back examines the different ways punk - as a youth/subculture - may provide space for political expression and action. Bringing together scholars from a range of academic disciplines (history, sociology, cultural studies, politics, English, music), it showcases innovative research into the diverse ways in which punk may be used and interpreted.

The essays are concerned with three main themes: identity, locality and communication. These, in turn, cover subjects relating to questions of class, age and gender; the relationship between punk, locality and socio-political context; and the ways in which punk's meaning has been expressed from within the subculture and reflected by the media. Jon Savage, the foremost commentator and curator of punk's cultural legacy, provides an afterword on punk's impact and dissemination from the 1970s to the present day.

**Contributor Bio**

The Subcultures Network is the interdisciplinary network for the study of subcultures, popular music and social change, hosted by the University of Reading.

**Table Of Contents**

Introduction: From Protest to Resistance; Matthew Worley, Jon Garland, Keith Gildart, Anna Gough-Yates, Paul Hodkinson, Sian Lincoln, Bill Osgerby, Lucy Robinson, John Street, Peter Webb

PART I: I WANNA BE ME: PUNK AND IDENTITY  
1. 'If you want to live, make sure you can fight': Fighting Masculinity on the Russian Punk Scene; Hilary Pilkington

Riches of the Rylands
The Special Collections of The University of Manchester Library
John Hodgson

Key Selling Points
• Riches of the Rylands explores and celebrates the outstanding Special Collections of The University of Manchester Library
• These collections of rare books, manuscripts, archives, maps and visual materials are extraordinarily rich and diverse. They span 5,000 years and six continents, and include almost every format ever used for written communication. Many derive from the superlative collections purchased by Enriqueta Rylands for the magnificent library she founded as a memorial to her husband John
• The book features over 150 key items from across the collections. Thirteen thematic chapters contain short essays on individual items by over sixty curators and experts in particular fields. Every item is beautifully illustrated in full colour and an extended introduction charts the history and context of the collections
• Riches of the Rylands will appeal to a broad readership - lovers of books and libraries, and anyone interested in literature, art, history, the history of ideas and collecting

Summary
Riches of the Rylands explores and celebrates the outstanding Special Collections of The University of Manchester Library.

These collections of rare books, manuscripts, archives, maps and visual materials are extraordinarily rich and diverse. Comprising over one million items and extending over twenty-five kilometres of shelving, they span 5,000 years, from clay tablets to emails; range over six continents; encompass scores of civilisations and belief systems; and include almost every format ever used for written communication.

Many of the items featured here derive from the superlative collections purchased by Enriqueta Rylands for the magnificent library she founded in 1900 as a memorial to her husband John. Some were separately accrued by The University of Manchester prior to its merger with The John Rylands Library in 1972, while others are of very recent acquisition.

Riches of the Rylands features over 150 key items, each one chosen for its intrinsic interest and significance, and to reflect the broad spectrum of the collections. The book is arranged thematically, with thirteen chapters containing short essays on individual items by over sixty curators and experts in particular fields. Every item is beautifully illustrated in full colour. An extended introduction charts the history and context of the collections, and explores how they 'speak' to one another and to many different audiences.

Riches of the Rylands will appeal to a broad readership - lovers of books and libraries, and anyone interested in literature, art, history, the history of ideas, and collecting - as well as more specialist academic audiences.

Contributor Bio
The John Rylands Library is part of the University of Manchester.

Table Of Contents
Foreword - Jan Wilkinson
Introduction - John R. Hodgson
1. Beyond books: from papyrus to pixels - Stella K. Halkyard
2. Through painted windows: the art of illumination - John R. Hodgson
3. First impressions: the early years of European printing - Julianne Simpson
4. Master binders and their craft - Caroline Checkley-Scott and John R. Hodgson
5. 'A definite claim to beauty': the private presses - John R. Hodgson
6. Envisioning space: maps and atlases - Donna M. Sherman
7. 'Lively oracles of God': The Bible from antiquity to modernity - Elizabeth Gow
8. 'So many paths': religious traditions across the world - Elizabeth Gow
9. 'On the shoulders of giants': science, technology and medicine - James N. Peters, Julianne Simpson and Janet L. Wallwork
10. 'Between the covers': a literary miscellany - Fran Baker
11. Illustrated imaginative children's literature - Ian Rogerson
12. Power, politics and propaganda: the story of Britain from 1215 - Dorothy J. Clayton
13. Manchester: local connections - Julie Ramwell

Defining events
Power, resistance and identity in twenty-first-century Ireland
Dukelow Fiona, Meade Rosie

Key Selling Points
• Extremely timely as Irish society engages in a period of self-analysis and questioning in the aftermath of the Celtic Tiger
• Helps readers analyse the forces at work (sometimes below the radar) during the boom period and beyond. It is very interdisciplinary in its approach bringing together critical perspectives from Archaeology, Law, Sociology, Equality Studies, Gender Studies, Geography and Social Policy
• No other text has adopted the focus on 'defining events'
• The core themes of power, resistance and identity emerge strongly across the text
• It engages with contemporary social theory in a very accessible and grounded way

Summary
This book re-visits and re-thinks some recent defining events in Irish society. Some of these are high profile and occupy a prominent place in public consciousness, such as the announcement of the banking guarantee and the publication of the Ryan report into clerical child abuse, while others are 'fringe' events which attracted less attention, such as the launch of Indymedia.ie, or were widely discussed in popular culture, like the publication of Donal Óg Cusack's autobiography or the opening of Dundrum Town Centre. The book critically explores issues of equality, belonging and rights as they impact on diverse communities in Ireland, be they older people, migrants or LGBT people.

As focal points for each chapter, all of the events covered in the book provide rich insights into the dynamics of Irish society in the twenty-first century. All expose underlying and complex issues of identity, power and resistance that animate public debate. In so doing, the book ultimately encourages readers to question the sources of, limits and obstacles to change in contemporary Ireland.

This book brings together in a single volume the experience, research and analysis of critical commentators from a diverse range of disciplines across the social sciences, and provides an important contribution to discourse about social, economic and cultural issues in today's Ireland. This makes for an original, timely and genuinely interdisciplinary text.

Contributor Bio
Rosie Meade and Fiona Dukelow are Lecturers in the School of Applied Social Studies at University College Cork

Table Of Contents
1. Introduction - Rosie Meade and Fiona Dukelow
2. The birth of Indymedia.ie: a critical space for social movements in Ireland - Margaret Gillan and Laurence Cox
3. In the way of development: Tara, the M3 and the Celtic Tiger - Conor Newman
4. Carts, horses and carriages: love and (same-sex) marriage in the 21st century - Angela O'Connell
5. Making 'race' an issue in the 2004 Irish Citizenship Referendum - Steve Garner
6. 'The centre of everything': Ireland at the Dundrum Town Centre - Denis Linehan
7. 'Taking back the neighbourhood': the introduction of ASBOs - Paul Michael Garrett
8. All that shimmers is not gold: the Garda Síochána Ombudsman Commission and garda
accountability - Vicky Conway

9. State to the rescue: the bank guarantee and Ireland's financialised neo-liberal growth model - Fiona Dukelow

10. Worlds turned upside down? The older people's uprising 2008 - Rosie Meade

11. Cutting back on equality - John Baker, Kathleen Lynch and Judy Walsh

12. The Ryan Report: reformatory and industrial schools and twentieth century Ireland - Eoin O'Sullivan

13. Gay in the GAA: the challenge of Dónal Óg Cusack's 'coming out' to heteronormativity in contemporary Irish culture and society - Debbie Ging and Marcus Free

**Human remains and mass violence**  
Methodological approaches  
Anstett Élisabeth, Dreyfus Jean-Marc

### Key Selling Points
- Although standing within the well-established field of genocide and conflict studies, the book is the only of its kind to focus on the role of the dead body within this academic tradition.
- It will provide invaluable insights into an area of mass violence previously neglected, whilst entering a pre-existing field of analysis regarding the responses of governments, communities and individuals to episodes of mass violence.
- Interdisciplinary in scope, the book brings a rounded view to the questions raised by the phenomena of bodily destruction while retaining an international character, drawing on studies from 4 continents.
- The practical implications following from the research are extensive, allowing future generations to understand and prepare for the actions of those involved in the mass production of cadavers and the practices involved in this process.

### Summary

Human remains and mass violence outlines for the first time in a single volume the theoretical and methodological tools for a study of human remains resulting from episodes of mass violence and genocide. Despite the highly innovative and contemporary research into both mass violence and the body, the most significant consequence of conflict - the corpse - remains absent from the scope of existing research.

Why have human remains hitherto remained absent from our investigation, and how do historians, anthropologists and legal scholars, including specialists in criminology and political science, deal with these difficult issues and confront the implications they create? By drawing on international case studies including genocides in Rwanda, the Khmer Rouge, Argentina, Russia and the context of post-World War II Europe, this ground-breaking edited collection opens new avenues of research through an exploration of these state-of-the-art analyses.

Each innovative chapter therefore strengthens the field of genocide studies by providing proper intellectual and theoretical tools for a better grasp of the legacy of mass violence in today's societies. Human remains and mass violence will display that, far from being extraneous, each discipline is able to contribute to this emerging line of enquiry with its own methodological framework and consequently valuable application.

Multidisciplinary in scope, Human remains and mass violence will appeal to readers interested in an understanding of mass violence's aftermath, including researchers in history, anthropology, sociology, law, politics and modern warfare.

### Contributor Bio

Élisabeth Anstett is a Researcher in Social Anthropology at the Centre National de la Recherche Scientifique, France, and a Director of the Corpses of Mass Violence and Genocide programme funded by the European Research Council.

Jean-Marc Dreyfus is Reader in Holocaust Studies at the University of Manchester and a Director of the Corpses of Mass Violence and Genocide programme funded by the European Research Council.

### Table Of Contents

Introduction: Corpses and mass violence: an inventory of the unthinkable - Élisabeth Anstett and Jean-Marc Dreyfus

1. The biopolitics of corpses of mass violence and genocide - Yehonatan Alsheh
2. Seeking the dead among the living: Embodying the disappeared of the Argentinean dictatorship through law - Sévane Garibian

3. The human body: victim, witness, and proof of mass violence - Caroline Fournet

4. Moral discourse and action in relation to the corpse: integrative concepts for a criminology of mass violence - Jon Shute

5. The disposal of corpses in an ethnicized civil war: Croatia, 1941-45 - Alexander Korb

7. From bones-as-evidence to tutelary spirits: The status of bodies in the aftermath of the Khmer Rouge genocide - Anne Yvonne Guillou

8. Display, concealment and 'culture': the disposal of bodies in the 1994 Rwandan genocide - Nigel Eltringham

Class, Ethnicity and Religion in the Bengali East End
A Political History
Sarah Glynn

Key Selling Points
- Will appeal to both an academic and a general readership. It is written in a clear style, it does not rely on prior knowledge, it relates a remarkable history - and it uses that history to explore and illuminate a strong theoretical argument
- Makes an original theoretical and empirical contribution to the academic literature on immigrant political mobilisation, providing a developed Marxist critique of established liberal and post-modern understandings
- Provides an accessible account - introducing a different perspective - that can be used in undergraduate courses in sociology, history, geography and politics
- Will appeal to those interested in the history of the Bengalis in Britain, in immigrant politics and in the organisation and tactics of the progressive left

Summary
This exploration of one of the most concentrated immigrant communities in Britain combines a fascinating narrative history, an original theoretical analysis of the evolving relationship between progressive left politics and ethnic minorities, and an incisive critique of political multiculturalism. It recounts and analyses the experiences of many of those who took part over six decades of political history that range over secular nationalism, trade unionism, black radicalism, mainstream local politics, Islamism and the rise and fall of the Respect Coalition. Through this Bengali case study and examples from wider immigrant politics, it traces the development and adoption of the concepts of popular frontism, revolutionary stages theory and identity politics. It demonstrates how these theories and tactics have cut across class-based organisation and acted as an impediment to addressing socio-economic inequality; and it argues for a left materialist alternative. It will appeal equally to sociologists, political activists and local historians.

Contributor Bio
Sarah Glynn is a Lecturer in Sociology at the University of the West of Scotland.

The Protestant Orphan Society and its social significance in Ireland 1828-1940
Cooper June

Key Selling Points
- Examines over a century of the pioneering work carried out by an under-documented yet eminently significant Irish Protestant charity
- In-depth case history analysis is used to draw attention to the experiences and perspectives of widows, and children while boarded out and apprenticed
- Adds considerably to existing accounts of the origins of 'modern boarding out' and the development of social services in Ireland
- Throws new light on Protestant approaches to child welfare in the nineteenth and twentieth century
- It provides important insights into the social composition of the Church of Ireland in the nineteenth and first half of the twentieth century

Summary
Spanning more than a century, this study provides a comprehensive account of the groundbreaking work and social influence of one of the most significant yet under documented nineteenth-century Irish Protestant charities and features in-depth case history analysis which gives many crucial insights into the lives of the widows and children it aimed to assist. It makes valuable contributions to social history particularly the growing field of children's studies, child welfare, foster care, the family, social welfare, as well as the study of Irish Protestantism.

This book examines the charity's origins, its boarding-out and apprenticeship schemes, its progressive policies, the role that women assumed in its management, the development of local Protestant Orphan Societies across the country, and opposition to its work. It argues that the pioneering system, which promoted children's health, education, and eventual independence, represented a private outdoor poor relief measure that predated state-sponsored boarding out by more than thirty years and became the basis for concepts of 'modern boarding out'. It uncovers the distinguished figures who lent their support such as the first President of Ireland, Douglas Hyde, and Dr Ella Webb and charts its gradual decline in the south from the early twentieth century onwards. It also focuses considerable attention on the experiences of the children whilst boarded out and apprenticed and the circumstances which led widows to become dependent on the charity, including the sister of Irish playwright, Sean O'Casey, identifying the challenges they faced as they endeavored to provide for their families alone.

Are the Irish different?
Inglis Tom

Key Selling Points
- Short essays from within the human sciences written in an engaging and accessible manner
- Covers a wide range of current issues and debates about Ireland
- Authors are international scholars in their disciplines
- Will be attractive to non-academics
- Challenges the issues and approaches of mainstream Irish Studies

Summary
Are the Irish different and, if so, how and why? This book addresses this issue through twenty-three short essays about the nature of contemporary Irish culture and society and the transformations that have taken place over the last fifty years. The topics covered include the nature of Irish nationalism and capitalism, the Irish political elite, the differences in the Irish family, the nature of Irish Catholicism, the upsurge in immigration, the Irish diaspora, the Irish language, sport and music. The essays are written in a clear and accessible manner by scholars from within the human sciences who are international experts in their disciplines.

The authors provide challenging insights into the ways in which we see and understand Ireland and what it is to be Irish. They avoid theoretical jargon and dense empirical data. They challenge the traditional issues that have been addressed in Irish studies and the methods that have been used. The final three essays provide an analysis and critical reflection on the nature of Irish studies.

The book will be of interest to those who have an academic and personal interest in Irish studies, and it will appeal to those who are not familiar with the theories and methods of the human sciences, showing how these can shine a light on the transformations that have taken place in Ireland.

Contributor Bio

Table Of Contents
1. Introduction - Tom Inglis
2. Irishness and nationalisms - Sinia Maleević
3. Where is Ireland in the worlds of capitalism? - Seán Ó Riain
4. Just another bubble economy? - Denis O'Hearn
5. A Catholic vision of Ireland - Bryan Fanning
6. The Irish political elite - Kieran Allen
7. The Irish family - different or not? - Tony Fahey
8. Single women in story and society - Anne Byrne
9. The Irish body - Tom Inglis
10. Sexual abuse and the Catholic Church - Marie Keenan
11. The difference between Irish and American Catholicism - Michele Dillon
12. Postcolonial legacies and the Irish psyche - Geraldine Moane
13. Thinking about Ireland and the Irish diaspora - Mary J. Hickman
14. Being Irish and male in Britain - Mairtin Mac an Ghaill and Chris Haywood
15. The new Irish and the Irish nation - Bryan Fanning
16. Conflict and reconciliation in Northern Ireland - Joseph Ruane
17. Irish language, Irish nation - Iarfhlaith Watson
18. The difference of Irish music - Martin Dowling
19. The GAA and the sporting Irish - Katie Liston
20. Feeling at home in contemporary Ireland - Ethel Crowley
21. Searching for and explaining difference - Tom Inglis
22. A new vision of Irish studies - Linda Connolly
23. Irish studies between the past and the future - Michael G. Cronin

Are the Irish Different?
Tom Inglis

Key Selling Points
- Short essays from within the human sciences written in an engaging and accessible manner
- Covers a wide range of current issues and debates about Ireland
- Authors are international scholars in their disciplines
- Will be attractive to non-academics
- Challenges the issues and approaches of mainstream Irish Studies

Summary
This book examines the extent and nature of Irish social and cultural difference. It is a collection of twenty-three short essays written in a clear and accessible manner by human scientists who are international experts in their area.

The topics covered include the nature of Irish nationalism and capitalism, the Irish political elite, the differences and similarities of the Irish family, the upsurge in immigration, Northern Ireland, the Irish diaspora, the Irish language, sport, music and many other topics.

The book will be bought by those who have an academic and personal interest in Irish Studies. It will be attractive to those who are not familiar with the theories and methods of the human sciences and how they can shine a light on the transformations that have taken place in Ireland. Tom Inglis, the editor of the collection, is a sociologist who has written extensively on Irish culture and society.

Start Korean with the Michel Thomas Method
Jieun Kiaer, Hugh Flint

Key Selling Points
• Introductory course on the Korean language

Summary
Try the Michel Thomas Method with this introductory product and start speaking real Korean straight away - no books, no pens, no memorizing. Simply listen, connect, and speak!

How does it work?
- Listen: collect words effortlessly by listening
- Connect: create your own mental tool kit by understanding how the words fit together
- Speak: put the words back together to build sentences, naturally

Why should I choose it?
- Guaranteed success: speak and understand perfectly
- Incredible progress: get what you want, fast
- Absolute confidence: unleash your natural learning style without trying

How far will I get?
- You'll learn the 50 essential words at the heart of Korean and how to put them together to make yourself understood.

Contributor Bio

Dr. Jieun Kiaer is a lecturer in Korean Language and Linguistics at Oxford University. She has published several books and papers on Korean language and poetry, as well as in language acquisition. She is the recipient of British Academy and Korean Foundation research grants.

Hugh Flint is a linguist specializing in the Korean language. He holds a Research Assistant position at Oxford University and has a career in translating and editing.

Next-Generation DNA Sequencing Informatics, Second Edition
(2nd Edition)
Stuart M. Brown

Key Selling Points
• Provides thorough, plain language introduction to the necessary informatics methods and tools for analyzing NGS data
• Detailed descriptions of algorithms, strengths and weaknesses of specific tools, pitfalls and alternative methods
• Thoroughly updated, including four new chapters covering experimental design, sample preparation, and quality assessment of NGS data, and more
• Extensive reference to best-practice bioinformatics methods for NGS applications and tutorials for common workflows
Take advantage of the explosion of research opportunities offered by new DNA sequencing technologies

Summary
Next-generation DNA sequencing (NGS) technology has revolutionized biomedical research, making genome and RNA sequencing an affordable and frequently used tool for a wide variety of research applications including variant (mutation) discovery, gene expression, transcription factor analysis, metagenomics, and epigenetics. Bioinformatics methods to support DNA sequencing have become and remain a critical bottleneck for many researchers and organizations wishing to make use of NGS technology. Next-Generation DNA Sequencing Bioinformatics, Second Edition, provides thorough, plain language introduction to the necessary informatics methods and tools for analyzing NGS data as did the first edition, and provides detailed descriptions of algorithms, strengths and weaknesses of specific tools, pitfalls and alternative methods. Four new chapters in this edition cover: experimental design, sample preparation, and quality assessment of NGS data; Public databases for DNA Sequencing data; De novo transcript assembly; proteogenomics; and emerging sequencing technologies. The remaining chapters from the first edition have been updated with the latest information. This book also provides extensive reference to best-practice bioinformatics methods for NGS applications and tutorials for common workflows. The second edition of Next-Generation DNA Sequencing Bioinformatics addresses the informatics needs of students, laboratory scientists, and computing specialists who wish to take advantage of the explosion of research opportunities offered by new DNA sequencing technologies.

Paris along the Nile
Architecture in Cairo from the Belle Epoque
Cynthia Myntti

Key Selling Points
- 200 superb black-and-white photographs of the beautiful buildings and architectural details of Egypt's Belle Epoque.
- A window on a period of incredible extravagance during which Khedive Ismail's Cairo became the mirror image of decadent Paris.
- Photographs accompanied by street address, and, where known, architect, date of construction, and first owner of the building.
A pictorial celebration of the wonderfully imaginative architecture of Cairo's new building boom that began in the 1870s.

Summary
Cairo, 'Mother of the World': its vividly diverse neighborhoods and building styles reveal its cosmopolitan energy and reflect the myriad of economic, political, and cultural forces that have shaped the city over the centuries. So impressed was Khedive Ismail after a visit to Haussman's 'new' Paris in 1867 that he decided to build a modern city along the same architectural lines and aesthetics, and brought European architects to Cairo to initiate Egypt's most dynamic building period since medieval times. The stunning buildings of late-nineteenth- and early-twentieth-century Cairo remain, but they are neglected, threatened by pollution, and are being pulled down for concrete highrises and parking lots. Paris along the Nile captures in 200 black-and-white photographs the architectural jewels of 'modern' Cairo.

Contributor Bio
Cynthia Myntti, who lived and worked in Cairo in the 1980s, is an anthropologist and architect. She directs the Neighborhood Initiative at the American University of Beirut, in Lebanon.

Sustainability and Innovation
The Next Global Industrial Revolution
Salah M. El-Haggar, Lisa Anderson

Key Selling Points
• Discusses the future of sustainability in practice with case studies.
• Introduces, for the first time, the concept of science and technology parks for sustainable development, with practical case studies.
• Introduces the concept of the next global industrial revolution in a holistic, practical, and clear approach with a detailed vision for both developed and developing countries.

Summary
One of the most urgent problems facing the world today is environmental sustainability. Current practices of pollution control, waste treatment, and environmental protection are not only hugely expensive and a burden on development but also unsustainable in the long run for their steady depletion of the world’s natural resources. Any solutions must have proven economic benefits, be technologically viable, and meet prevailing environmental and social perspectives.

The main objective of this new set of studies is to describe methods that help to protect the environment and conserve natural resources. This can be achieved by applying the ‘cradle-to-cradle’ concept, which aims to use materials in closed cyclic loops without generating any type of waste or pollution. The authors provide the reader with an introduction to basic concepts of sustainable development, describe the mechanisms and benefits of related technologies, and suggest potential uses on a practical level by examining innovations developed in the mechanical engineering laboratories of the American University in Cairo. Particular focus is placed on innovation as a vital means of attaining sustainability.

A timely contribution to the debate on environmentally sustainable practices, this book will be indispensable to environmentalists, scientists, economists, engineers, development specialists, and policy-makers, as well as being of interest to the lay reader.

Contributor Bio

Salah El-Haggar is professor of energy and sustainable development in the American University in Cairo’s Mechanical Engineering Department, where he is also currently department chair. With over thirty years’ experience in energy and sustainable development consultancy work and university teaching, El-Haggar is the author of several books, including Sustainable Industrial Design and Waste Management: Cradle to Cradle for Sustainable Development, and a contributing author to Environmental Engineering: Environmental Health and Safety for Municipal Infrastructure, Land Use and Planning, and Industry, as well as nearly 200 scientific publications and more than 50 technical reports.

Uktub al-’arabiya
Intermediate Writing Skills in Modern Standard Arabic
Azza Hassanein, Dalal Abo El Seoud, Hala Yehia

Key Selling Points
• Book 2 in a new 3-volume series aimed at developing writing skills at the beginners, intermediate, and advanced levels.
• A valuable, new addition to the bestselling 30+ Arabic language learning titles from the AUC Press.
A new textbook series for Arabic language students

Summary
This new series of three books aims to develop the writing skills of students learning Modern Standard Arabic, enabling them to move from forming correct words, phrases, sentences, and simple texts, to writing simple paragraphs and ultimately producing texts with the competency of a native speaker. The Intermediate level volume introduces students to authentic Arabic writing styles; strengthens and enhances their grammar; includes more sophisticated key words, collocations, expressions, and idioms; reinforces linguistic accuracy; and trains them to use handwriting script. Practical skills such as how to write memorandums, messages, and e-mails and how to compile information are included. Developed and piloted in the classrooms of the Arabic Language Institute at the American University in Cairo, this series has benefited from the expertise and knowledge of leading teachers of Arabic.
Other books in the series: Beginners Writing Skills in Modern Standard Arabic & Advanced Writing Skills in Modern Standard Arabic

Contributor Bio

Azza Hassanein holds a BA from Mansoura University and an MA in Teaching Arabic as a Foreign Language from the American University in Cairo, where she has taught Arabic since 1994. Dalal Abo El Seoud, with a PhD from Ain Shams University, is an Arabic language instructor in the Arabic Language Institute of the American University in Cairo. Hala Yehia is a senior instructor in the Arabic Language Institute of the American University in Cairo.

Wonderful Things
A History of Egyptology from Antiquity to 1879
Jason Thompson

Key Selling Points
- The detailed and thrilling stories of the men and women who rediscovered ancient Egypt and captivated the imagination of millions of people ever since.
- The first in a comprehensive three-volume masterwork on the history of Egyptology from antiquity up to the twenty-first century, full of intrigue, mystery, and discoveries.
- By the author of "A History of Egypt: From Earliest Times to the Present" and "Edward William Lane: The Life of the Pioneering Egyptologist and Orientalist"

The first part of the first comprehensive history of the study and understanding of ancient Egypt, from ancient times to the twenty-first century

Summary
The discovery of ancient Egypt and the development of Egyptology are momentous events in intellectual and cultural history. The history of Egyptology is the story of the people, famous and obscure, who constructed the picture of ancient Egypt that we have today, recovered the Egyptian past while inventing it anew, and made a lost civilization comprehensible to generations of enchanted readers and viewers thousands of years later. This, the first of a three-volume survey of the history of Egyptology, follows the fascination with ancient Egypt from antiquity until 1881, tracing the recovery of ancient Egypt and its impact on the human imagination in a saga filled with intriguing mysteries, great discoveries, and scholarly creativity. Wonderful Things affirms that the history of ancient Egypt has proved continually fascinating, but it also demonstrates that the history of Egyptology is no less so. Only by understanding how Egyptology has developed can we truly understand the Egyptian past.

Contributor Bio
Jason Thompson is currently a visiting associate professor at Bates College. He is the editor of Edward William Lane's Description of Egypt (AUC Press, 2000) and An Account of the Manners and Customs of the Modern Egyptians (AUC Press, 2003), and the author of Sir Gardiner Wilkinson and His Circle, A History of Egypt: From Earliest Times to the Present (AUC Press, 2008), and Edward William Lane, 1801-1876 (AUC Press, 2010).

Quotes
"Wonderful Things is a remarkable achievement: a scholarly work packed with facts but one which is also genuinely readable. It is ambitious in its scope and detail. To follow the growth of an arcane but also a highly romantic branch of learning becomes in Thompson's book something close to an adventure. The author successfully conveys his infectious enthusiasm for the subject but writes with a degree of detachment that allows him to be refreshingly and occasionally almost ruthlessly trenchant and critical."-- Jaromir Malek

Yusif Sayigh
Arab Economist and Palestinian Patriot: A Fractured Life Story
Rosemary Sayigh

Key Selling Points
- A rare window on modern Palestinian history, Israel, and the Middle East conflict by a pioneering figure in the Palestinian national movement.
- As an economist and an academic, Sayigh’s memoir also explores some of the most pressing issues that shaped Middle Eastern economic and social development in the 60s and 70s.
- Based on Yusif Sayigh’s own personal memoirs and collected documents and edited by his wife, a Middle East scholar.
A rare firsthand account by a prominent Palestinian economist of his youth and childhood in the mandate-era Levant and his life’s devotion to the cause of Palestine

Summary
An acclaimed economist and lifelong Palestinian nationalist Yusif Sayigh (1916-2004) came of age at a time of immense political change in the Middle East. Born in al-Bassa, near Acre in northern Palestine, he was witness to the events that led to the loss of Palestine and his memoir therefore constitutes a vivid social history of the region, as well as a revealing firsthand account of the Palestinian national movement almost from its earliest inception. Family and everyday life, co-villagers, landscapes, pleasures, outings, schooling, and political figures recreate the vanished world of Sayigh's formative years in the Levant. An activist in Palestine, he was taken prisoner of war by the Israelis in 1948. Later, as an economist, he wrote extensively on Arab oil, economic development, and manpower, teaching for many years at the American University of Beirut and taking early retirement in 1974 to work as a consultant for a number of pan-Arab and international organizations. A single chapter on Palestinian politics provides insights into his later activist work and experiences of working as a consultant with the Palestine Liberation Organization to produce an economic plan for an eventual Palestinian state.

This fascinating memoir by a pioneer and major figure of the Palestinian national movement is a welcome addition to the growing literature on Palestinian life during the first half of the twentieth century as well as an account of some of the most pressing political and economic issues to have faced the Arab world for the better part of the twentieth century.

Contributor Bio

Rosemary Sayigh, the wife of Yusif Sayigh, is an oral historian and anthropologist and the author of Palestinians: From Peasants to Revolutionaries, Too Many Enemies: The Palestinian Experience in Lebanon, and Voices: Palestinian Women Narrate Displacement. She is a currently visiting professor at the Center for Arab and Middle Eastern Studies at the American University of Beirut.

**Christianity and Monasticism in Middle Egypt**

Gawdat Gabra, Hany Takla

**Key Selling Points**
- Includes contributions by major Coptic scholars.
- The 6th volume in the definitive "Christianity and Monasticism" series.

The legacies of the Coptic Christian presence in Middle Egypt from the fourth century to the present day

**Summary**

Christianity and monasticism have long flourished along the Nile in Middle Egypt, the region stretching from al-Bahnasa (Oxyrhynchus) to Dayr al-Ganadla. The contributors to this volume, international specialists in Coptology from around the world, examine various aspects of Coptic civilization in Middle Egypt over the past two millennia. The studies explore Coptic art and archaeology, architecture, language and literature. The artistic heritage of monastic sites in the region is highlighted, attesting to their important legacies in the region.

**Contributor Bio**

**Gawdat Gabra** is the former director of the Coptic Museum and the author, coauthor, or editor of numerous books on the history and culture of Egyptian Christianity, including *The History and Religious Heritage of Old Cairo* (AUC Press, 2013). He is currently visiting professor of Coptic studies at Claremont Graduate University, California.
